INTRODUCTION

The main purpose of the Pension Fund Annual Report is to account for the income, expenditure and net assets of the London Borough of Harrow Pension Fund ('the Fund') for the financial year to 31 March 2021. This Report also explains the administration and management of the Fund and its investment and funding policy objectives and asset allocation, as well as highlighting market and Fund performance.

Information about the economic resources controlled by the Fund is provided by the Net Assets Statement. The actuarial funding level is reported in Note 20 and in the Statement of the Appointed Actuary on page 50/51.

The Pension Fund Committee is responsible for overseeing the management, administration and strategic direction of the Fund. The Committee regularly reviews the Fund's investment strategy seeking to achieve appropriate returns within acceptable risk parameters. This in turn minimises the amount the Council and other employers will need to make in contributions to the Fund to meet future liabilities.

The Fund is a shareholder of the London LGPS Collective Investment Vehicle Ltd (LCIV) (the organisation set up to run pooled LGPS investments in London in 2015) and holds £150,000 of regulatory capital in the company in the form of unlisted UK equity shares. The Pension Fund Committee has committed to investing in LCIV as and when suitable pool investment solutions in become available through The Pension Fund Committee has been active in the required transfer of assets under management to LCIV to gain efficiencies and fee reductions.

During 2020-21, the Pension Fund Committee continued its review of the Fund's Investment strategy. It made some decisions which will reduce significantly the carbon footprint of the Fund's investments. It agreed to sell those equity investments held by Oldfield Partners, investing the proceeds in the LCIV Sustainable Equity Fund (managed by RBC). This change was completed in Q1 of 2021. It has also agreed to move its passive equity holdings managed by Blackrock into a Low Carbon passive equity fund – that realignment is in progress. It has also agreed to realign the Fund's bond portfolio – that work is also being done in 2021-22. There were further drawdowns against the commitment to invest £68m of fund assets in the LCIV Infrastructure Fund, with a total of £16.1m being invested at 31 March 2021. Further investments will be made in 2021-22.

In line with the provisions of the Public Service Pensions Act 2013, the Council set up a Local Pension Board in 2015 to oversee the governance of the Pension Fund. During 2020-21, the Pension Board met three times and considered a range of reports on pension administration performance and pension fund governance arrangements, as well as reviewing the Communications Policy.

Pension Board and Pension Fund Committee have attended training courses and seminars during the year to meet the knowledge and skills requirements of their respective roles.

Following the introduction of the Markets in Financial Instrument Directive 2014/65 ("MiFID II") with effect from 3 January 2018, the Pension Fund Committee elected to opt up to professional client status with all its fund managers. This status has been maintained in 2020-21.

The net assets of the Fund as at 31 March 2021 were £968.0m compared to £777.8m as at 31 March 2020. The Fund's overall investment return for the year was 24.9%, reflecting the recovery following market turbulence in March 2020 arising from the Covid-19 pandemic.

Dawn Calvert - CPFA

Director of Finance

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF THE LONDON BOROUGH OF HARROW

Report on the financial statements

Opinion on the financial statements of the Harrow Pension Fund

We have audited the financial statements of Harrow Pension Fund ('the Pension Fund') for the year ended 31 March 2021, which comprise the Fund Account, the Net Assets Statement, and notes to the financial statements, including a summary of significant accounting policies. The financial reporting framework that has been applied in their preparation is applicable law and the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2019/20.

In our opinion the financial statements:

- give a true and fair view of the financial transactions of Harrow Pension Fund during the year ended 31 March 2021, and the amount and disposition of the Pension Fund's assets and liabilities as at 31 March 2021; and
- have been properly prepared in accordance with the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2020/21.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)) and applicable law. Our responsibilities under those standards are further described in the Auditor's responsibilities section of our report. We are independent of the Council, as administering authority for the Pension Fund, in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the FRC's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter – Effect of the Covid-19 pandemic on the valuation of pooled property fund assets

We draw attention to Note 5 of the financial statements, which describes the effects of the Covid-19 pandemic on the valuation of the Pension Fund's pooled property fund assets as at 31 March 2021. As disclosed at Note 5, these valuations have been reported by the valuers on the basis of 'material valuation uncertainty' because of the Covid-19 pandemic. Our opinion is not modified in respect of this matter.

Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which the ISAs (UK) require us to report to you where:

- the Director of Finance's use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the Director of Finance has not disclosed in the financial statements any identified material uncertainties that may cast significant doubt about the Pension Fund's ability to continue to adopt the going concern basis of accounting for a period of at least twelve months from the date when the financial statements are authorised for issue.

Other information

The Director of Finance is responsible for the other information. The other information comprises the information included in the Statement of Accounts, other than the financial statements and our auditor's report thereon. Our opinion on the financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of the Director of Finance for the financial statements

As explained more fully in the Statement of Responsibilities for the Statement of Accounts, the Director of Finance is responsible for the preparation of the Statement of Accounts, which includes the Pension Fund's financial statements, in accordance with proper practices as set out in the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2020/21, and for being satisfied that they give a true and fair view. The Director of Finance is also responsible for such internal control as the Director of Finance determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

The Director of Finance is required to comply with the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2020/21 and prepare the financial statements on a going concern basis, unless the Council is informed of the intention for dissolution of the Pension Fund without transfer of services or function to another entity. The Director of Finance is responsible for assessing each year whether or not it is appropriate for the Pension Fund to prepare the accounts on the going concern basis and disclosing, as applicable, matters related to going concern.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the Pension Fund's financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located on the Financial Reporting Council's website at www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Matters on which we are required to report by exception under the Code of Audit Practice

We are required by the Code of Audit Practice to report to you if:

- we issue a report in the public interest under section 24 of the Local Audit and Accountability Act 2014;
- we make a recommendation under section 24 of the Local Audit and Accountability Act 2014; or
- we exercise any other special powers of the auditor under sections 28, 29 or 31 of the Local Audit and Accountability Act 2014.

We have nothing to report in these respects.

Use of the audit report

This report is made solely to the members of the London Borough of Harrow, as a body and as administering authority for the Harrow Pension Fund, in accordance with part 5 of the Local Audit and Accountability Act 2014 and as set out in paragraph 44 of the Statement of Responsibilities of Auditors and Audited Bodies published by Public Sector Audit Appointments Limited. Our audit work has been undertaken so that we might state to the members of the Council those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the members of the Council, as a body, for our audit work, for this report, or for the opinions we have formed.

GOVERNANCE ARRANGEMENTS

The Council has delegated to the Pension Fund Committee various powers and duties in respect of its administration of the Fund. The Committee met three times during the year. It comprises four Councillors with full voting rights and a non-voting co-optee. Representatives from the trade unions are able to participate as observers of the Committee but do not have voting rights.

The Pension Fund Committee has the following terms of reference:

- 1) to exercise on behalf of the Council, all the powers and duties of the Council in relation to its functions as Administering Authority of the LB Harrow Pension Fund (the Fund), save for those matters delegated to other Committees of the Council or to an Officer;
- 2) the determination of applications under the Local Government Superannuation Regulations and the Teachers' Superannuation Regulations;
- 3) to administer all matters concerning the Council's pension investments in accordance with the law and Council policy;
- 4) to establish a strategy for the disposition of the pension investment portfolio;
- 5) to appoint and determine the investment managers' delegation of powers of management of the fund;
- 6) to determine cases that satisfy the Early Retirement provision under Regulation 26 of the Local Government Pension Scheme Regulations 1997 (as amended), and to exercise discretion under Regulation 8 of the Local Government (Early Termination of Employment) (Discretionary Compensation) (England and Wales) Regulations 2000 (as amended, subject to the conditions now agreed in respect of all staff, excluding Chief Officers;
- 7) to apply the arrangements set out in (6) above to Chief Officers where the application has been recommended by the Chief Executive, either on the grounds of redundancy, or in the interests of the efficiency of the service, and where the application was instigated by the Chief Executive in consultation with the leaders of the political groups;

The Committee is advised by two independent advisers and an investment consultant.

The dates of the Pension Fund Committee meetings, along with meeting agendas, reports and minutes are available on the Harrow Council website:

<http://www.harrow.gov.uk/www2/mgCommitteeDetails.aspx?ID=1297>

In line with the provisions of the Public Service Pensions Act 2013, the Council has set up a Local Pension Board to oversee the governance of the Pension Fund. In particular it oversees:

- a) the effectiveness of the decision-making process
- b) the direction of the Fund and its overall objectives
- c) the level of transparency in the conduct of the Fund's activities
- d) the administration of benefits and contributions

The dates of the Pension Board meetings, along with meeting agendas, reports and minutes are available on the Harrow Council website:

<http://www.harrow.gov.uk/www2/mgCommitteeDetails.aspx?ID=1336>

PENSION SCHEME ADMINISTRATION AND PERFORMANCE

Pension Section overview

The Pensions Team acts as the main point of contact for any membership enquiries. The team is responsible for all aspects of Local Government Pension Scheme administration; setting up new members, monitoring and maintenance of pension member records, employer contributions payment of benefits, transfer payments and Additional Voluntary Contributions. The team is also responsible for monitoring and cleansing members' data to ensure it is fit for purpose and meets the requirements imposed on the Fund by the regulators, the Fund Actuary and HMRC. The team produces annual benefits statements, newsletters and maintains the pensions website <https://www.harrowpensionfund.org>

The team of seven staff (6.15 full time equivalents) ensures delivery of a value for money service by managing a caseload with no backlog and meeting performance targets. In 2020-21 all Annual Benefit Statements were issued on time.

Performance Monitoring 2020-21

Service	National Benchmarking Target	Harrow Actual Performance %
Issue letter notifying of dependent's benefit	5 days	82.76
Calculation and notification of ill health estimate	10 days	100
Calculation and notification of retirement benefits estimate	10 days	94.87
Issue letter to new pension provider detailing transfer-out quote	10 days	100
Calculation and notification of deferred benefits	10 days	92.42
Calculation and notification of retirement benefits	5 days	100
Process refund and issue payment	5 days	100
Calculation and notification of ill health benefits	5 days	100
Issue statutory notification on receipt of transfer funds	10 days	100

Pension Board monitors pension administration performance quarterly. There were no reported breaches of law.

The Internal Dispute Resolution Procedure which deals with complaint over the administration of pension benefits by the administering authority. There were no new complaints referred through the internal procedure during the year.

The costs of running the Pension Fund are shown below:

Process	2018-19	2019-20	2020-21
Investment management expenses			
Total Cost (£000)	4,509	4,050	3,840
Total Membership (No.)	18,161	18,451	18,577
Sub Cost per member (£)	248	219	207
Administration costs			
Total Cost (£000)	656	721	713
Total Membership (No.)	18,161	18,451	18,577
Sub Cost per member (£)	36	39	38
Oversight & governance costs			
Total Cost (£000)	566	634	602
Total Membership (No.)	18,161	18,451	18,577
Sub Cost per member (£)	32	34	32
Total cost per member (£)	316	292	277

Investment management costs include fund manager fees and the additional costs of fund transition on restructuring and fund re-balancing. The reduction in total management expenses reflects the benefit of fee reductions negotiated by the London Collective Investment Vehicle, as more of the Fund is now invested in the LCIV or in passive funds at rates negotiated by LCIV.

Administration costs cover the administration of pensions and are mainly staff salaries and business overheads including pension payroll and pension system administration costs

Oversight and governance costs include staff salaries for pension fund manager performance monitoring and committee support and external costs for investment advisers, actuarial review and external audit. The increase in these costs in 2019-20 reflected the fact that the work required for the triennial valuation as at 31 March 2019 was largely carried out in 2019-20.

INVESTMENT POLICY AND PERFORMANCE

Investment Market Commentary (provided by Aon, April 21)

- After severe disruption in global markets in early 2020 from the Coronavirus pandemic, equity markets rebounded in Q2 and Q3 2020 as a slowdown in new cases and the relaxation of lockdown measures resulted in a sharp economic rebound. A second wave outbreak at the onset of winter, however, dampened economic optimism over Q4 2020. Equity markets continued to rally as huge fiscal and monetary stimulus and optimism over Covid-19 vaccine rollouts led to investor willingness to overlook the sharpest economic recession in generations. Heightened political uncertainty around November's US presidential election provided some drag on risk sentiment, but increased expectations of expanded fiscal spending following Democrat Joe Biden's victory boosted markets.
- Global Covid-19 cases continued to surge in Q1 2021, with many countries going back into lockdown as new virus variants became more virulent. Health concerns also halted the vaccine rollout in some countries whilst supply constraints led to a slower than expected rollout in Europe. However, improving economic data over the quarter in most countries and global vaccination rollouts boosted economic recovery optimism. The MSCI AC World Index rose by 51.1% in local currency terms over the past twelve months and by 38.9% in sterling terms.
- US equities posted the strongest return over the year, helped by their high exposure to large technology companies. The \$1.9tn US economic relief package was approved by the Senate soon after Democrat Joe Biden was sworn in as US President in January 2021 which fed market expectations of stronger US growth and inflation. In contrast to the US, UK equities performed poorly as the UK economy struggled with a high virus death rate and Brexit worries over 2020. Emerging markets held up well as they were supported by the low global interest rate backdrop and the weak dollar. The risk of a reversal in both of these drivers, led to weaker EM equity performance in Q1 2021, however.
- On a global sector level, Consumer Discretionary (75.0%) and Information Technology (69.8%) were the best performers in local currency terms. These sectors were bolstered by Coronavirus-driven lockdowns. Utilities (19.3%) was the worst-performing sector, followed by Consumer Staples (20.7%) and Health Care (27.9%).
- Governments across major economies announced swift and significant fiscal support for businesses and individuals. The US government approved several stimulus packages and have proposed a new infrastructure bill worth \$1.9tn. The European Union (EU) promised a recovery package which was increased to €1.8tn and passed in late 2020.
- Central banks loosened monetary policy with quantitative easing (QE) programs. The US Federal Reserve (Fed) even began buying individual corporate bonds directly from the secondary market for the first time in Q2 2020. The Fed then announced a major policy shift in Q3 2020 by adopting an "average inflation targeting" approach which implies a higher tolerance towards inflation. In Q4 2020 and Q1 2021, the Fed maintained its guidance surrounding keeping interest rates near zero until at least 2024 and continuing to buy \$120bn of debt per month until "substantial further progress has been made" towards its employment and inflation targets.
- In Q3 2020, the Bank of England (BOE) reported in its meeting minutes that it was examining how negative interest rates could be implemented effectively should this be required. However, deputy governor Dave Ramsden later suggested that the current base rate represented the "effective lower bound" for interest rates.
- The European Central Bank (ECB) launched a €1.9tn pandemic emergency purchase program (PEPP) which will continue until March 2022.
- After years of negotiations, the UK and the European Union (EU) reached a historic Brexit trade deal. The deal was reached after issues including EU fishing rights in UK waters and fair competition rules were agreed. The agreement allows most goods to be traded between the UK and the EU without tariffs or quotas. Meanwhile, EU fishing rights in UK waters will be reduced by one-quarter over a five and a half-year transition period, after which access will depend on annual negotiations. Spain and the UK also agreed to keep the land border between the British overseas territory of Gibraltar and Spain open.
- Sterling ended the twelve months 5.7% higher on a trade-weighted basis. Sterling depreciated in Q2 2020 due to the deteriorating UK coronavirus situation, Brexit uncertainty and a poor economic outlook. However,

in Q3 2020, the weak US dollar led to sterling gains against the dollar. Sterling continued to more broadly appreciate in Q4 2020 in anticipation that a Brexit deal would be reached. The relief rally in sterling in Q1 2021, in the wake of the Brexit deal was boosted by the launch of a successful UK vaccination program.

- Brent crude oil prices rose by 179.4% over the last twelve months to \$63/BBL. After Q1's sharp fall oil prices recovered in Q2 2020, rising by 81%, supported by record-setting production cuts by OPEC+ and the easing of lockdown measures in major economies, leading to expectations of higher oil demand. Optimism over vaccine approval and the start of vaccinations supported oil prices later in the year, even though OPEC and Russia agreed to increase oil production by 500,000 barrels per day from January 2021. OPEC also cut its forecast for 2021 growth in oil demand, citing continued virus uncertainty and weak labour markets. In Q1 2021, crude oil prices were again boosted by positive vaccine developments and easing lockdowns. OPEC+ decided to maintain a production rate at 7mb/d, slightly down from the previous quarter's 7.2 m barrels per day.
- Inflation expectations rose globally over the last year on the back of liquidity expansion and growth optimism. This rise in inflation expectations was a key driver of rising global bond yields from record low levels reached in the first half of 2020. The rise in inflationary expectations was most significant in the US given the shift in Fed strategy and the massive US fiscal spending program.
- UK gilt yields fell to extreme lows in summer 2020 on the back of the pandemic, Brexit uncertainty and increased expectations of a BOE rate cut to negative levels. However, yields started to edge up across maturities in Q3 as global risk sentiment improved. In Q1 2021, gilt yields rose sharply on the back of economic optimism in the light of several vaccine discoveries, further fuelled by the new US stimulus package. According to FTSE All-Stocks indices, UK fixed-interest gilts fell by 5.5%, whilst index-linked gilts returned 2.3% over the last twelve months.
- Credit markets benefited from risk-on investor sentiment over the year, with credit spreads continuing to contract to ever tighter levels. UK investment-grade credit spreads (the difference between corporate and government bond yields), based on the iBoxx Sterling Non-Gilt Index, ended the period 111bps lower at 106bps.
- UK commercial property returned 2.6% over the period as the income return of 5.6% offset the 2.9% fall in capital values. Virus pressure on the already struggling retail sector meant it returned -5.8% over the. The office sector returned -0.8% over the year, whilst industrials outperformed with a return of 13.9%.

Index returns from 31/03/2020 to 31/03/2021

Investment Policy

The objective of the Fund is to provide pension and lump sum benefits for members on their retirement and/or benefits on death, before or after retirement, for their dependants, on a defined benefits basis. The sums required to fund these benefits and the amounts actually held (i.e. the funding position) are reviewed at each triennial actuarial valuation, or more frequently as required.

The assets of the Fund are invested with the primary objective of being to achieve a return that is sufficient to meet the funding objective, subject to an appropriate level of risk and liquidity. Over the long-term it is expected that the Fund's investment returns will be at least in line with the assumptions underlying the actuarial valuation.

Related objectives are to seek to minimise the level and volatility of employer contributions necessary to meet the cost of pension benefits.

The Council has delegated the management of the Fund's investments to professional investment managers, appointed in accordance with the Local Government Pension Scheme Regulations. Their activities are specified in either detailed investment management agreements or subscription agreements and regularly monitored. The Committee is satisfied that the appointed fund managers, all of whom are authorised under the Financial Services and Markets Act 2000 to undertake investment business, have sufficient expertise and experience to carry out their roles

The Fund may invest in quoted and unquoted securities of UK and overseas markets including equities and fixed interest and index linked bonds, cash, property and commodities either directly or through pooled funds. The Fund may also make use of contracts for differences and other derivatives either directly or in pooled funds investing in these products for the purpose of efficient portfolio management or to hedge specific risks, including currency fluctuations.

The Committee aims to achieve its investment objective by maintaining a high allocation to growth assets, mainly equities, reflecting the security of the sponsor's covenant, the funding level, the long time horizon of the Fund and the projected asset class returns and volatility. Diversifying investments reduces the risk of a sharp fall in one particular market having a substantial impact on the whole Fund.

The cumulative cost of pooling for the Pension Fund to 31 March 2021 is £0.468m paid to the London CIV for annual service charges and development funding

The following table compares the actual asset allocation as at 31 March 2021 to the agreed allocation

Investment assets	Actual Percentage of Fund	Agreed Allocation
	%	%
Global equities-passive	26	24
Developed world equities-active	19	18
Emerging markets equities-active	9	8
Fixed interest securities	10	10
Index linked securities	3	3
Private equity	1	2
Cash	3	0
Forward currency contracts	1	0
Diversified growth funds	10	6.5
Multi Asset Credit	10	11
Pooled property	6	10
Infrastructure	2	7.5
Total	100	100

The investment style is to appoint fund managers with appropriate performance benchmarks and place maximum accountability for performance against that benchmark with them. The Fund's managers are appointed to give diversification of investment approach and spread of risk. The fund managers appointed are mainly remunerated through fees based on the value of assets under management. Private equity managers are remunerated through fees based on commitments and through performance related fees.

Fund performance

The Fund uses Pensions and Investment Research Consultants (PIRC) as its independent investment performance measurement consultant.

Investment returns over 1, 3, and 5 years at 31st March 2021 are shown below.

The Fund's return of 24.9% during 2020-21 reflects the recovery in asset values from the "low point" of 31 March 2021 which was the result of a significant fall in asset prices experienced during the last two months of 2019-20 as the Covid-19 pandemic impacted across all asset classes. Since March 2020, asset prices have increased to a level above their "pre-pandemic" level.

Although the Fund, in common with all other LGPS funds, has its own unique benchmark and investment strategy, over the medium term it is reasonable to compare performance with other funds.

STATEMENTS AND PUBLICATIONS

Governance Compliance Statement

The Local Government Pension Scheme Regulations 2013, Regulation 55 requires all administering authorities to produce a Governance Compliance Statement. This Statement must set out whether the Administering Authority delegates its function and, if so, what the terms, structure and operation of the delegation are. The Administering Authority must also state the extent to which a delegation complies with guidance given by the Secretary of State. The current Statement was agreed by the Pension Fund Committee on 24 March 2021 and can be found as Appendix 1.

<https://www.harrowpensionfund.org/resources/governance-compliance-statement-march-2021/>

Communications Policy Statement

The Local Government Pension Scheme Regulations 2013, Regulation 61 requires all administering authorities to produce a Communications Policy Statement. This statement sets out the Fund's strategy for communicating with members, members' representatives, prospective members and employing authorities, together with the promotion of the Scheme to prospective members and their employing authorities. The current Statement was agreed by the Pension Fund Committee on 24 March 2021 and can be found as Appendix 2.

<https://www.harrowpensionfund.org/resources/communications-policy-statement-march-2021/>

Funding Strategy Statement

Regulation 58 of the Local Government Pension Scheme (Administration) Regulations 2013 requires all administering authorities to produce a Funding Strategy Statement. The purpose of the Funding Strategy Statement is to explain the funding objectives of the Fund, in particular:

- How the costs of the benefits provided under the LGPS are met through the Fund;
- The objectives in setting employer contribution rates; and
- The funding strategy that is adopted to meet these objectives.

The Funding Strategy Statement is reviewed every three years at the same time as the triennial actuarial valuation of the Fund. An interim review of the Statement may be carried out and a revised Statement published if there has been a material change in the policy matters set out in the Statement or there has been a material change to the Investment Strategy Statement. The current Statement as approved by the Pension Fund Committee on 18 December 2019, and was updated to reflect the changes in Regulations which came into force in March 2020. It can be found as Appendix 3.

<https://www.harrowpensionfund.org/resources/funding-strategy-statement-march-2020/>

Investment Strategy Statement

Regulation 7(1) of The Local Government Pension Scheme (Management and Investment of Funds) Regulations 2016 requires an administering authority to formulate an investment strategy which must be in accordance with guidance issued by the Secretary of State.

This Statement provides details of the Fund's investment policies including:

- The suitability of particular investments;
- The choice of asset classes, and
- Approach to risk.

The Statement also details the Fund's compliance with the six principles set out in the Chartered Institute of Public Finance and Accountancy's publication 'Investment Decision Making and Disclosure in the Local Government Pension Scheme 2009 – a guide to the application of the 2008 Myners Principles to the management of LGPS Funds'.

The current Statement as approved by the Pension Fund Committee on 13 September 2021 can be found as Appendix 4.

<https://www.harrowpensionfund.org/resources/investment-strategy-statement-september-2021/>

Local Government Pension Scheme Guide

A brief guide to the Local Government Pension Scheme can be found as Appendix 5

<https://www.harrowpensionfund.org/resources/brief-guide-to-the-lgps-2021/>

RISK MANAGEMENT

The Fund's primary long term risk is that the assets will fall short of its liabilities (i.e. promised benefits payable to members). The Pension Fund Committee is responsible for managing and monitoring risks and ensuring that appropriate risk management processes are in place and are operating effectively. The aim of risk management is to limit risks to those that are expected to provide opportunities to add value.

The most significant risks faced by the Fund and the procedures in place to manage these risks are described below:

Governance and Regulatory Risk

The failure to exercise good governance and operate in line with regulations can lead to financial as well as reputation risk. These risks are managed through:

- Decisions are taken by the Pension Fund Committee in the light of advice from the Investment Advisers and Investment Consultant and from officers;
- Regular reviews of the Investment Strategy Statement and Funding Strategy Statement that set out the high level objectives of the Fund and how these will be achieved;
- Tailored training for members;
- Reviews of the Pension Fund Committee agenda and papers by Harrow's Legal Department; and.
- Establishment of the Pension Board.

Sponsor Risk

The Fund is currently in deficit and achieving a fully funded status may require the continued payment of deficit contributions. The Actuary reviews the required level of contributions every three years. To protect the Fund and the Administering Employer, bonds and other forms of security are required from some of the Admitted employers.

Investment Risk

The Fund is invested in a range of asset classes as detailed in Note 14 to the accounts. This is done in line with The Local Government Pension Scheme (Management and Investment of Funds) Regulations 2016 which require pension funds to invest any monies not immediately required to pay benefits. These Regulations require the formulation of an Investment Strategy Statement which sets out the Fund's approach to investment including the management of risk. The largest asset class is listed equities, which has both a greater expected return and volatility than the other main asset classes. Potential risks affecting investments include:

Pricing Risk

The valuation of investments is constantly changing, impacting on the potential realisation proceeds and income. For example, the value of the Fund's investments decreased in value by 8.1% in 2019-20, largely due to the Covid-19 pandemic in the last quarter of the year, but has increased by 24.9% in 2020-21. Changes of a similar magnitude are possible in future, and this risk cannot be eliminated.

Procedures in place to manage the volatility of investments include:

- Diversification of the investments between asset classes, economic sectors and geographical areas to include equities, fixed interest and index linked bonds, property, multi assets mandates and private equity. The investment strategy is reviewed by the Pension Fund Committee and market conditions are reviewed to monitor performance at every meeting to determine if any strategic action is required;
- Global equities are managed by three active managers with different styles and one passive manager to reduce the risk of underperformance against benchmarks. The Investment Adviser provides quarterly reports on the performance and skills of each manager to the Pension Fund Committee; and
- The benefit liabilities are all Sterling based and to reduce the currency risk from non-Sterling investments, 50% of the overseas currency exposures are hedged to Sterling.

Liquidity Risk

Investments in some asset classes e.g. private equity, property and infrastructure, can be illiquid in that they cannot be realised at short notice. Around 9% of Harrow's Funds are in illiquid assets. This is deemed appropriate for the fund even though it has a slightly negative Cashflow. All cash balances are managed in accordance with the Council's Treasury Management Strategy Statement and are all currently readily accessible without notice.

Counterparty Risk

The failure by a counterparty, including an investee company, can lead to an investment loss. This risk is mainly managed through wide diversification of counterparties and also through detailed selection of counterparties by external fund managers.

Actuarial Risk

The value of the liability for future benefits is affected by changes in inflation, salary levels, life expectancy and expected future investment returns. Although there are opportunities to use financial market instruments to manage some of these risks, the Pension Fund Committee does not currently believe these to be appropriate. Changes to the benefits structure in 2014 had reduced some of these risks, although the recent "McCloud Judgement" is likely to have an adverse impact. These risks are all monitored through the actuarial valuation process and additional contributions required from employers should deficits arise.

Operational Risk

Operational risk relates to losses (including error and fraud) from failures in internal controls relating to investment managers and internally e.g. administration systems.

Controls at external fund managers are monitored through the receipt of audited annual accounts for each manager together with annual assessments of the control environment including reviews of internal controls reports certified by reporting auditors.

Controls within the Administering Authority are reviewed by Harrow's Internal Audit Team.

INTERNAL CONTROLS

To mitigate the risks regarding investment management, the Council obtains independent internal controls assurance reports from the reporting accountants of the relevant Investment manager.

These independent reports are prepared in accordance with international standards. Any weaknesses in internal control highlighted by the controls assurance reports are reviewed and reported to the Pension Committee.

The results of the latest reviews are summarised below.

Fund Manager	Type of report	Assurance obtained	Reporting Accountant
Blackrock Inv Man UK Ltd	ISAE 3402	Reasonable assurance	Deloitte LLP
GMO LLC	AT-C 320 (SOC)	Reasonable assurance	PWC LLP

STATEMENT OF RESPONSIBILITIES FOR THE FINANCIAL STATEMENTS

The Council's Responsibilities

The Council is required:

- To make arrangements for the proper administration of its financial affairs and to secure that one of its officers has the responsibility for the administration of those affairs. In Harrow, that officer is the Director of Finance;
- To manage its affairs to secure economic, efficient and effective use of resources and safeguard its assets; and
- To approve the Financial Statements.

The Director of Finance's Responsibilities

The Director of Finance is responsible for the preparation of the Fund's Statement of Accounts in accordance with proper practices set out in the CIPFA Code of Practice on Local Authority Accounting.

In preparing this Statement of Accounts, the Director of Finance has:

- Selected suitable accounting policies and then applied them consistently;
- Made judgements and estimates that were reasonable and prudent;
- Complied with the Code of Practice on Local Authority Accounting;
- Kept proper accounting records which were up to date; and
- Taken reasonable steps for the prevention and detection of fraud and other irregularities.

I certify that these Financial Statements present fairly the financial position of the London Borough of Harrow Fund of the Local Government Pension Scheme as at 31 March 2021 and its income and expenditure for the year then ended.

A handwritten signature in black ink, reading "D. Calvert", enclosed within a thin yellow rectangular border.

Dawn Calvert – CPFA

Director of Finance

Notes to the Harrow Pension Fund

Accounts for the year ended

31 March 2021

NOTE 1: DESCRIPTION OF FUND

The Harrow Pension Fund ('the Fund') is part of the Local Government Pension Scheme ("LGPS") and is administered by the London Borough of Harrow. The Council is the reporting entity for the Fund.

a) **General**

The Scheme is governed by the Public Service Pensions Act 2013. The Fund is administered in accordance with the following secondary legislation:

- The Local Government Pension Scheme Regulations 2013 (as amended)
- The Local Government Pension Scheme (Transitional Provisions, Savings and Amendment) Regulations 2014 (as amended)
- The Local Government Pension Scheme (Management and Investment of Funds) Regulations 2016.

It is a contributory defined benefit pension scheme designed to provide pensions and other benefits for pensionable employees of the Council and a range of other scheduled and admitted bodies. Teachers, police officers and firefighters are not included as they come within other national pension schemes.

The Fund is overseen by the Harrow Pension Fund Committee, which is a committee of the Council.

b) **Membership**

Membership of the LGPS is voluntary and employees are free to choose whether to join the Scheme, remain in the Scheme or make their own personal arrangements outside the Scheme.

Organisations participating in the Fund include the following:

- **Scheduled bodies:** These are the local authority and similar bodies whose staff, are automatically entitled to be members of the Fund.
- **Admitted bodies:** These are other organisations that participate in the Fund under an admission agreement. Admitted bodies include voluntary, charitable and similar bodies or private contractors undertaking a local authority function following outsourcing.

There are 43 employer organisations within the Harrow Pension Fund including the Council itself, as detailed below.

Employer	Status	Pensioners	Deferred	Actives	Total	%
Harrow Council	Scheduled Body	5797	5764	3605	15,166	81.63
Stanmore College	Scheduled Body	91	154	78	323	1.74

c) Funding

Full-time, part-time and casual employees, where there is a mutuality of obligation and who have a contract of more than three months, are brought into the Fund automatically but have the right to “opt out” if they so wish. Casual employees with no mutuality of obligation are not eligible for membership.

Employee contribution rates are set by regulations and are dependent upon each member’s full time equivalent salary. Employee contributions attract tax relief at the time they are deducted from pay.

Employers participating in the Fund pay different rates of contributions depending on their history, their staff profile and any deficit recovery period agreed with the Fund. Employer contribution rates are reviewed as part of the triennial actuarial valuation. The last valuation took place as at 31 March 2019 and showed that the Fund was 94% funded. The deficit is to be recovered by additional employer contributions over the course of 20 years.

Benefits are funded by contributions and investment earnings. Contributions are made by active members of the Fund in accordance with the LGPS Regulations 2013 and range from 5.5% to 12.5% of pensionable pay. Employee contributions are matched by employers’ contributions which are set based on triennial actuarial funding valuations. Currently almost all, employer contribution rates fall within the range 18.0% to 26.5% of pensionable pay with the largest employers paying between 19.3% and 20.1%.

d) Benefits

Prior to 1 April 2014, pension benefits under the LGPS were based on final pensionable pay and length of pensionable service, summarised below.

	Service pre 1 April 2008	Service post 31 March 2008
Pension	Each year worked is worth $1/80 \times$ final pensionable salary	Each year worked is worth $1/60 \times$ final pensionable salary
Lump Sum	Automatic lump sum of 3 x salary. In addition, part of the annual pension can be exchanged for a one-off tax-free cash payment. A lump sum of £12 is paid for each £1 of pension given up	No automatic lump sum. Part of the annual pension can be exchanged for a one-off tax-free cash payment. A lump sum of £12 is paid for each £1 of pension given up

From 1 April 2014, the Scheme became a career average (CARE) scheme, whereby members accrue benefits based on their pensionable pay in each year at an accrual rate of $1/49$ th. Accrued pension is uprated annually in line with the Consumer Price Index.

There are a range of other benefits provided under the Scheme including early retirement, disability pensions and death benefits. For more details, refer to the ‘Brief Guide to the Local Government Pension Scheme’ attached as Appendix 5.

NOTE 2: BASIS OF PREPARATION

The Statement of Accounts summarises the Fund's transactions for the 2020-21 financial year and its position as at 31 March 2021. The Accounts have been prepared on a going concern basis in accordance with the 'Code of Practice on Local Authority Accounting in the United Kingdom 2020-21' issued by the Chartered Institute of Public Finance and Accountancy (CIPFA) which is based on International Financial Reporting Standards as amended for the UK public sector.

The Accounts summarise the transactions of the Fund and report on the net assets available to pay pension benefits. The Accounts do not take account of obligations to pay pensions and benefits which fall due after the end of the financial year.

NOTE 3: SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Fund account – Revenue Recognition

a) Contributions income

Normal contributions, both from the members and from employers, are accounted for on an accruals basis at the percentage rate recommended by the Fund actuary in the financial year to which they relate.

Employer deficit funding contributions are accounted for on the due dates on which they are payable under the schedule of contributions set by the Fund actuary or on receipt if earlier than the due date.

Employers' augmentation contributions and pensions strain contributions are accounted for in the period in which the liability arises. Any amount due in year but unpaid will be classed as a current financial asset. Amounts not due until future years, if significant, are classed as long term financial assets.

b) Transfers to and from other schemes

Transfer values represent the amounts received and paid during the year for members who have either joined or left the Fund during the financial year and are calculated in accordance with The Local Government Pension Scheme Regulations 2013 (see notes 8 and 10).

Individual transfers in/out are accounted for when received/paid, which is normally when the member liability is accepted or discharged.

Transfers in from members wishing to use the proceeds of their additional voluntary contributions to purchase Scheme benefits are accounted for on a receipts basis and are included in transfers in (see note 8).

Bulk (group) transfers are accounted for on an accruals basis in accordance with the terms of the transfer agreement.

c) Investment income

- i) Interest income is recognised in the Fund account as it accrues, using the effective interest rate of the financial instrument as at the date of acquisition or origination. Income includes the amortisation of any discount or premium, transaction costs (where material) or other differences between the initial carrying amount of the instrument and its amount at maturity calculated on an effective interest rate basis.
- ii) Distributions from pooled funds are recognised at the date of issue. Any amount not received by the end of the reporting period is disclosed in the net asset statement as a current financial asset.
- iii) Changes in the net market value of investments are recognised as income and comprise all realised and unrealised gains/losses during the year.

Fund account – Expense items

a) Benefits payable

Pensions and lump-sum benefits payable include all amounts known to be due as at the end of the financial year. Any amounts due but unpaid are disclosed in the net assets statement as current liabilities.

b) Taxation

The Fund is a registered public service scheme under section 1(1) of Schedule 36 of the Finance Act 2004 and as such is exempt from UK income tax on interest received and from capital gains tax on the proceeds of investments sold. Income from overseas investments suffers withholding tax in the country of origin, unless exemption is permitted. Irrecoverable tax is accounted for as a Fund expense if it arises.

c) Management expenses

The Code does not require any breakdown of pension fund administrative expenses. However, in the interest of greater transparency, the Fund discloses its Pension Fund management expenses in accordance with CIPFA's *Accounting for Local Government Pension Scheme Management Expenses (2016)*.

Administrative expenses

All administrative expenses are accounted for on an accruals basis. All staff costs of the Pension's Administration Team are recharged to the Fund. Associated management, accommodation and other overheads are apportioned to this activity and recharged as expenses to the Fund.

Oversight and governance costs

All oversight and governance expenses are accounted for on an accruals basis. All staff costs relating to the oversight and governance of the Fund's investments are recharged to the Fund. Associated management, accommodation and other overheads are apportioned to this activity and recharged as expenses to the Fund.

Investment management expenses

All investment management expenses are accounted for on an accruals basis.

Fees of the external investment managers and custodian are agreed in the respective mandates governing their appointments. Broadly, these are based on the market value of the investments under their management and therefore increase or reduce as the values of these investments change

Where an investment manager's fee invoice or fee information has not been received by the balance sheet date an estimate based on the market value of their mandate as at the end of the year is used for inclusion in the Fund account in 2020-21.

Net Assets Statement

a) Financial assets

Financial assets are included in the Net Assets Statement on a fair value basis as at the reporting date. A financial asset is recognised in the Net Assets Statement on the date the Fund becomes party to the contractual acquisition of the asset. From this date any gains or losses arising from changes in the fair value of an asset are recognised in the Fund account.

The values of investments as shown in the Net Assets Statement have been determined at fair value in accordance with the requirements of the Code and IFRS 13 (See note 16). For the purposes of disclosing levels of fair value hierarchy, the fund had adopted the classification

guidelines recommended in '*Practical Guidance on Investment Disclosures (PRAG/Investment association, 2016)*'

The Fund became a shareholder in the London LGPS CIV Ltd (the organisation set up to run pooled LGPS investments in London) in 2015 and holds £150,000 of regulatory capital in the form of unlisted UK equity shares.

b) Derivatives

The Fund uses derivative financial instruments to manage its exposure to specific risks arising from its investment activities. The Fund does not hold derivatives for speculative purposes. (See note 15)

c) Cash and cash equivalents

Cash comprises cash in hand and demand deposits and includes amounts held by the Fund's external managers and custodians.

Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and that are subject to minimal risk of changes in value.

d) Financial liabilities

The Fund recognises financial liabilities at fair value as at the reporting date. A financial liability is recognised in the Net Assets Statement on the date the Fund becomes party to the liability. From this date any gains or losses arising from changes in the fair value of the liability are recognised by the Fund.

e) Actuarial present value of promised retirement benefits

The actuarial present value of promised retirement benefits is assessed on an annual basis by the Fund actuary in accordance with the requirements of IAS 19 and relevant actuarial standards.

As permitted under the Code, the Fund has opted to disclose the actuarial present value of promised retirement benefits by way of a note to the Net Assets Statement (Note 20).

f) Additional Voluntary Contributions

The Fund provides an additional voluntary contribution (AVC) scheme for its members, the assets of which are invested separately from those of the Fund. The Fund has appointed Prudential Assurance, Clerical Medical and Equitable Life Assurance Society as its AVC providers. AVCs are paid to the AVC provider by employers and are specifically intended for providing additional benefits for individual contributors. Each AVC contributor receives an annual statement showing the amount held in their account and the movements in the year.

AVCs are not included in the accounts in accordance with section 4 (1)(b) of the Local Government Pension Scheme (Management and Investments of Funds) Regulations 2016 but are disclosed as a note only (Note 23)

g) Contingent Liabilities

A contingent liability arises where an event has taken place that gives the Council a possible obligation whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council. Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that an outflow of resources will be required or the amount of the obligation cannot be measured reliably. Contingent liabilities are not recognised in the Balance Sheet but disclosed in a note to the accounts.

h) Contingent Assets

A contingent asset arises where an event has taken place that gives the Council a possible asset whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Council.

Contingent assets are not recognised in the Balance Sheet but disclosed in a note to the accounts where it is probable that there will be an inflow of economic benefits or service potential.

Accounting Standards Issued but not yet fully adopted

The following accounting policy changes are not yet reflected in the 2020-21 Code of Practice. They are not therefore reflected in the Pension Fund Statement of Accounts:

- IFRS 16 Leases (replaces IAS 17) will be implemented in 2022-23;
- Definition of a Business: Amendments to IFRS 3 Business Combinations;
- Interest Rate Benchmark Reform: Amendments to IFRS 9, IAS 39 and IFRS 7;
- Interest Rate Benchmark Reform – Phase 2: Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16.

NOTE 4: CRITICAL JUDGEMENTS IN APPLYING ACCOUNTING POLICIES

Pension Fund liability

The net Pension Fund liability is calculated every three years by the appointed actuary with annual updates in the intervening years. The methodology used is in line with accepted guidelines.

This estimate is subject to significant variances based on changes to the underlying assumptions which are agreed with the actuary and have been summarised in notes 19 and 20.

These actuarial revaluations are used to set the future employer contributions rates and underpin the Fund's most significant management policies.

Unquoted private equity investments

It is important to recognise the subjective nature of determining the fair value of private equity investments. They are inherently based on forward-looking estimates and judgements involving many factors.

NOTE 5: ASSUMPTIONS MADE ABOUT THE FUTURE AND OTHER MAJOR SOURCES OF ESTIMATION UNCERTAINTY

The preparation of financial statements requires management to make judgements, estimates and assumptions that affect the amounts reported for assets and liabilities at the balance sheet date and the amounts reported for the revenues and expenses during the year. Estimates and assumptions are made taking into account historical experience, current trends and other relevant factors. However, the nature of estimation means that the actual outcomes could differ from the assumptions and estimates.

The items in the net assets statement at 31 March 2021 for which there is a significant risk of material adjustment in the forthcoming financial year are as follows:

Item	Uncertainties	Effect if actual results differ from assumptions
Actuarial present value of promised retirement benefits (Note 20)	Estimation of the net liability to pay pensions depends on a number of complex judgements relating to the discount rate used, the rate at which salaries are projected to increase, changes in retirement ages, mortality rates and expected returns on pension fund assets. A firm of consulting actuaries is engaged to provide the fund with expert advice about the assumptions to be applied.	The effects on the net pension liability of changes in individual assumptions can be measured. For instance: • a 0.5% decrease in the discount rate assumption would result in an increase in the pension liability of £124.56m • a 0.5% increase in assumed earnings inflation would increase the value of liabilities by approximately £8.78m • a 0.5% increase in Pension benefits would increase the liability by approximately £113.41m
Private equity (Note 16C)	Private equity investments are valued at fair value in accordance with <i>International Private Equity and Venture Capital Valuation Guidelines</i> . These investments are not publicly listed and as such there is a degree of estimation involved in the valuation.	Private equity investments are valued at £7m in the financial statements. There is a risk that this investment may be under or overstated in the accounts.
Fair value – basis of valuation (Note 16)	In March 2020, the outbreak of Covid-19 had a significant impact on global financial markets, although there was a recovery during the second half of 2020 which has continued in the quarter to 31 March 2021. As at the valuation date, it is considered that less weight can be attached to previous market evidence to inform opinions of value on level 3 investments. Consequently, less certainty and a higher degree of caution should be attached to level 3 valuations. Whilst there is some evidence of economic recovery, at the current time, it is not possible to predict accurately the long term impact of Covid-19, particularly on property investments in some locations and sectors of the economy. Values have been based on the situation prior to Covid-19 on the assumption that values will be restored once global markets recover.	Any reduction in investment values will result in a reduction in the Fund's net asset position.
Pooled Property Fund	Revaluation of Pension Fund assets within the pooled property funds are undertaken by the asset managers using professional valuers as set out in the fund agreements. The outbreak of Covid-19 has impacted global markets and therefore our fund managers have advised that valuations have been reported on the basis of 'material valuation uncertainty' as per VPS 3 and VPGA 10 of the RICS Red Book, meaning that less weight can be applied to previous market evidence to inform opinions of value. Consequently, less certainty – and a higher degree of caution – should be attached to valuations of pooled property fund assets than would normally be the case.	The total property pooled investments in the financial accounts are £61.56m. There is a risk that these investments may be understated or overstated in the accounts. A 5% decrease in value would decrease the total valuation by £3.078m.

NOTE 6: EVENTS AFTER THE REPORTING DATE

These are events that occur between the end of the reporting period and the date when the financial statements are authorised for issue that provide new information about conditions that did not exist as of the balance sheet date. There were no material events after the reporting date for 2020-21.

NOTE 7: CONTRIBUTIONS RECEIVABLE

NOTE 14D: STOCK LENDING

Within the Investment Strategy Statement stock lending is permitted within pooled funds. At present, use of this facility is restricted to the Blackrock Portfolio.

The Blackrock lending programme covers equity and fixed income assets around the world and is designed to generate incremental returns for investors with appropriate risk controls.

The programme benefits from a counterparty default indemnity from Blackrock pursuant to its Securities Lending Authorisation Agreement

Value of Stock on Loan as at 31 March 2021 £24.4m (6.60%) compared to £23.8m (8.24%) as at 31 March 2020.

NOTE 15: ANALYSIS OF DERIVATIVES

Objectives and policies for holding derivatives

Most of the holding in derivatives is to hedge liabilities or hedge exposures to reduce risk in the Fund. Derivatives may be used to gain exposure to an asset more efficiently than holding the underlying asset. The use of derivatives is managed in line with the investment management agreement agreed between the Fund and the various investment managers.

In order to maintain appropriate diversification and to take advantage of overseas investment returns, a significant proportion of the Fund's equity portfolio is in overseas stock markets. To reduce the volatility associated with fluctuating currency rates, the Fund has a passive currency programme in place managed by Record Currency Management Limited. The Fund hedges 50% of the exposure in various developed world currencies within the equities portfolio.

NOTE 16: FAIR VALUE – BASIS OF VALUATION

The basis of the valuation of each class of investment asset is set out below. There has been no change in the valuation techniques used during the year. All assets have been valued using fair value techniques which represent the most appropriate price available at the reporting date

Description of Asset	Valuation Hierarchy	Basis of Valuation	Observable and unobservable inputs	Key sensitivities affecting the valuations provided
Market quoted investments including pooled funds for global equities, corporate and UK index linked bonds and diversified growth funds	Level 1	Published bid market price ruling on the final day of the accounting period	Not required	Not required
Market quoted investments including pooled funds for global equities and diversified growth funds	Level 1	Published market price or other value ruling on the final day of the accounting period	Not required	Not required
Forward foreign exchange derivatives	Level 2	Market forward exchange rates at the year end.	Exchange rate risk	Not required
Pooled Investment - Multi asset credit	Level 2	Fixed income securities are priced based on evaluated prices provided by Independent pricing services	Not required	Not required
Pooled investments - property funds	Level 3	Closing bid price where bid and offer prices are published	Net Asset Value-based pricing set on a forward pricing basis	Not required
Pooled investments - Infrastructure	Level 3	Valued by Fund Managers	Manager valuation statements are prepared in accordance with ECVA guidelines	Not required
Unquoted equity	Level 3	Comparable valuation of similar companies in accordance with <i>International Private Equity and Venture Capital Valuation</i> (2012)	EBITDA multiple, Revenue multiple, Discount for lack of marketability, Control premium	Valuations could be affected by material events occurring between the date of the financial statements provided and the Pension Fund's own reporting date, by changes to expected cashflows, and by any differences between audited and unaudited accounts

Sensitivity of assets valued at Level 3

The Fund has determined that the sensitivity of the level 3 investments should be at the level determined by independent advisers for equity investments generally. Set out below is the consequent potential impact on the closing value of investments held at 31 March 2021 using data provided by PIRC.

	Assessed valuation range (+/-)	Valuation at 31 March 2021	Value on increase	Value on decrease
		£000	£000	£000
Private Equity	7.47%	6,989	7,511	6,467
Pooled investments - Infrastructure	7.11%	16,099	17,243	14,954
Pooled investments - property funds	2.20%	61,561	62,913	60,209
		84,649	87,667	81,630

	Assessed valuation range (+/-)	Valuation at 31 March 2020	Value on increase	Value on decrease
		£000	£000	£000
Private Equity	9.10%	8,025	8,755	7,295
Pooled investments - property funds	1.90%	64,140	65,359	62,921
		72,165	74,114	70,216

NOTE 16A: FAIR VALUE HIERARCHY

Asset and liability valuations have been classified into three levels, according to the quality and reliability of information used to determine fair values. Transfers between levels are recognised in the year in which they occur.

Level 1

Assets and liabilities at level 1 are those where the fair values are derived from unadjusted quoted prices in active markets for identical assets or liabilities. Products classified as level 1 comprise quoted equities, quoted fixed securities, quoted index linked securities and unit trusts.

Level 2

Assets and liabilities at level 2 are those where quoted market prices are not available; for example, where an instrument is traded in a market that is not considered to be active, or where valuation techniques are used to determine fair value.

Level 3

Assets and liabilities at level 3 are those where at least one input that could have significant effect on the instrument's valuation is not based on observable market data.

The following table provides an analysis of the financial assets and liabilities of the Fund grouped into levels 1 to 3, based on the level at which the fair value is observable.

	Quoted market price	Using observable inputs	With significant unobservable inputs	
Values at 31 March 2021	Level 1 £'000	Level 2 £'000	Level 3 £'000	Total £'000

NOTE 18: NATURE AND EXTENT OF RISKS ARISING FROM FINANCIAL INSTRUMENTS

Risk and risk management

The Fund's primary long-term risk is that its assets will fall short of its liabilities (i.e. promised benefits payable to members). Therefore the aim of investment risk management is to minimise the risk of an overall reduction in the value of the Fund and to maximise the opportunity for gains across the whole Fund portfolio. The Fund achieves this through asset diversification to reduce exposure to market risk (price risk, currency risk and interest rate risk) and credit risk to an acceptable level. In addition, the Fund manages its liquidity risk to ensure there is sufficient liquidity to meet its forecast cash flows. The Council manages these investment risks as part of its overall Pension Fund risk management programme.

Responsibility for the Fund's risk management strategy rests with the Pension Fund Committee. The Committee reviews the Fund's risk register on a regular basis.

Market risk

Market risk is the risk of loss from fluctuations in equity and commodity prices, interest and foreign exchange rates and credit spreads. The Fund is exposed to market risk from its investment activities, particularly through its equities holdings. The level of risk exposure depends on market conditions, expectations of future price and yield movements and the asset mix.

The objective of the Fund's risk management strategy is to identify, manage and control market risk exposure within acceptable parameters.

In general, excessive volatility in market risk is managed through the diversification of the portfolio in terms of geographical and industry sectors and individual securities. To mitigate market risk, the Council and its investment advisers undertake appropriate monitoring of market conditions and benchmark analysis.

Price risk

Price risk represents the risk that the value of a financial instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or foreign exchange risk), whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all such instruments in the market.

The Fund's investment managers mitigate this price risk through diversification.

Following analysis of historical data and expected investment return movement during the financial year, in consultation with the Fund's advisers, the Council has determined that the following movements in price risk are reasonably possible.

Assets type	Potential market movements (+/-) %
Equities	14.20
Bonds	7.70
Alternatives	7.10
Pooled Property	2.20
Private Equity	7.50

Had the market price of the Fund investments increased/decreased in line with the above the change in the net assets available to pay benefits would have been as follows:

Asset type	Value as at 31 March 2021	Percentage change	Value on increase	Value on decrease
	£'000	%	£'000	£'000
Investment portfolio assets:				
Pooled equities investments	533,297	14.20	609,025	457,569
Pooled bond investments	122,361	7.70	131,783	112,939
Pooled alternative investments	201,053	7.10	215,328	186,778
Pooled property investments	61,561	2.20	62,915	60,207
Private Equity	6,989	7.50	7,513	6,465
Pooled Infrastructure	16,099	7.10	17,242	14,956
Equity - London CIV	150	0.00	150	150
Total	941,510		1,043,956	839,064

Asset type	Value as at 31 March 2020	Percentage change	Value on increase	Value on decrease
	£'000	%	£'000	£'000
Investment portfolio assets:				
Pooled equities investments	389,487	12.00	436,225	342,749
Pooled bond investments	111,463	6.90	119,154	103,772
Pooled alternative investments	171,230	6.30	182,017	160,443
Pooled property investments	64,140	1.90	65,359	62,921
Private Equity	8,025	9.10	8,755	7,295
Pooled Infrastructure	700	0.00	700	700
Equity - London CIV	150	0.00	150	150
Total	745,195		812,360	678,030

Interest rate risk

The Fund invests in financial assets for the primary purpose of obtaining a return on investments. These investments are subject to interest rate risks, which represent the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Council recognises that interest rates can vary and can affect both income to the Fund and the carrying value of Fund assets, both of which affect the value of the net assets available to pay benefits

The Fund's direct exposure to interest rate movements as at 31 March 2021 and 31 March 2020 and the impact of a 1% movement in interest rates are as follows:

Assets exposed to interest rate risk	Carrying amount as at 31 March 2021	Potential movement on 1% change in interest rates	Value on increase	Value on decrease
	£'000		£'000	£'000
Cash and cash equivalents	25,074	0	25,074	25,074
Fixed interest securities	97,538	975	98,513	96,562
Total change in assets available	122,612	975	123,587	121,636

Assets exposed to interest rate risk	Carrying amount as at 31 March 2020	Potential movement on 1% change in interest rates	Value on increase	Value on decrease
	£'000		£'000	£'000
Cash and cash equivalents	30,794	0	30,794	30,794
Fixed interest securities	87,635	876	88,511	86,759
Total change in assets available	118,429	876	119,305	117,553

This analysis demonstrates that changes in interest rates do not impact on the value of cash and cash equivalents balances but do affect the fair value on fixed interest securities.

Changes in interest rates affect interest income received on cash balances but have no effect on income from fixed income securities.

Currency risk

Currency risk represents the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Fund is exposed to currency risk on its global equities pooled fund investments, some of which are denominated in currencies other than Sterling. To mitigate this risk, the Fund uses derivatives and hedges 50% of the overseas equity portfolio arising from the developed market currencies.

Following analysis of historical data in consultation with the Fund's advisers the Council considers the likely volatility associated with foreign exchange rate movements to be 7.1%

A 7.1% strengthening/weakening of the pound against the various currencies in which the fund holds investments would increase/decrease the net assets available as follows.

The Fund is now invested in the LCIV Global Bond. The underlying manager hedges currency exposure within its mandate.

Currency Exposure - asset type	Asset Value as at 31 March 2021	Change to net assets	
		+7.1%	-7.1%
	£'000	£'000	£'000
Overseas Pooled Equities	496,012	531,229	460,795

Currency Exposure - asset type	Asset Value as at 31 March 2020	Change to net assets	
		+7.4%	-7.4%
	£'000	£'000	£'000
Overseas Pooled Equities	367,462	394,654	340,270

Credit risk

Credit risk represents the risk that the counterparty to a transaction or a financial instrument will fail to discharge an obligation and cause the Fund to incur a financial loss. The market values of investments generally reflect an assessment of credit in their pricing and consequently the risk of loss is implicitly provided for in the carrying value of the Fund's assets and liabilities.

In essence the Fund's entire investment portfolio is exposed to some form of credit risk, with the exception of the derivatives positions. However the selection of high quality counterparties, brokers and financial institutions by Fund managers should minimise the credit risk that may occur.

Cash deposits are not made with banks and financial institutions unless they are rated independently and meet the Council's Treasury Management investment criteria

The Council believes it has managed its exposure to credit risk and has had no experience of default or uncollectable deposits over the past five years.

The Fund's cash holding at 31 March 2021 was £25.1m (31 March 2020: £30.8m). This was held with the following institutions.

Summary	Balances at 31 March 2020	Balances at 31 March 2021
	£'000	£'000
Bank accounts		
Royal Bank of Scotland	2,641	4,399
JP Morgan	3,025	7,949
BlackRock	25,128	12,726
	30,794	25,074

Liquidity risk

Liquidity risk represents the risk that the Fund will not be able to meet its financial obligations as they fall due. The Council therefore takes steps to ensure that the Pension Fund has adequate cash resources to meet its commitments.

The Council has immediate access to its Pension Fund cash holdings.

The Fund considers liquid assets to be those that can be converted to cash within three months. Illiquid assets are those assets which will take longer than three months to convert into cash. As at 31 March 2021 the value of illiquid assets was £84.6m. This represented 8.76% of the total Fund assets (31 March 2020: £72.9m).

Refinancing risk

The Pension Fund does not have any financial instruments that have a refinancing risk.

NOTE 19: FUNDING ARRANGEMENTS

In line with The Local Government Pension Scheme Regulations 2013, the Fund's Actuary undertakes a funding valuation every three years for the purpose of setting employer contribution rates for the forthcoming triennial period. The last such valuation took place as at 31 March 2019. The next valuation takes place as at 31 March 2022.

The key elements of the funding policy are:

- to ensure the long-term solvency of the Fund, using a prudent long term view. This will ensure that sufficient funds are available to meet all members'/dependants' benefits as they fall due for payment;
- to ensure that employer contribution rates are reasonably stable where appropriate;
- to minimise the long-term cash contributions which employers need to pay to the Fund, by recognising the link between assets and liabilities and adopting an investment strategy which balances risk and return (this will also minimise the costs to be borne by Council Tax payers)
- to reflect the different characteristics of different employers in determining contribution rates. This involves the Fund having a clear and transparent funding strategy to demonstrate how each employer can best meet its own liabilities over future years; and
- to use reasonable measures to reduce the risk to other employers and ultimately to the Council Tax payer from an employer defaulting on its pension obligations.

The aim is to achieve 100% solvency over a period of 20 years and to provide stability in employer contribution rates by spreading any increases in rates over a period of time. Solvency is achieved

when the funds held, plus future expected investment returns and future contributions, are sufficient to meet expected future pension benefits payable.

At the 2019 actuarial valuation, the Fund was assessed as 94% funded (74% at the March 2016 valuation). This corresponded to a deficit of £52m (2016 valuation: £228m).

Contribution increases are being phased in over the 3 years' ending 31 March 2023.

Individual employers' rates vary depending on the demographic and actuarial factors particular to each employer.

The valuation of the Fund has been undertaken using the projected unit method under which the salary for each member is assumed to increase until they leave active service by death, retirement or withdrawal from service. The principal assumptions were as follows:

Financial assumptions

Other financial assumptions	2016 %	2019 %
Price inflation (CPI)	2.1	2.3
Salary increases	2.4	3.0
Pension increases	2.1	2.3
Funded basis discount rate	3.8	4.3

Demographic assumptions

The life expectancy assumptions are based on the Fund's Hymans Robertson's Vita Curves in line with the CMI 2018 model, an allowance for smoothing of recent mortality experience and a long term rate of 1.25% p.a.

The average future life expectancy at age 65 based on the Actuary's Fund-specific mortality review is as follows:

	Male	Female
Current pensioners	22.0	24.3
Future pensioners (assumed to be aged 45)	23.1	26.3

Commutation assumption

It is assumed that 50% of future retirees will elect to exchange pension for additional tax free cash up to HMRC limits for service to 1 April 2008 and 75% for service from 1 April 2008.

NOTE 20: ACTUARIAL PRESENT VALUE OF PROMISED RETIREMENT BENEFITS

In addition to the triennial funding valuation, the Fund's actuary also undertakes a valuation of the Pension Fund liabilities, on an IAS 19 basis, every year using the same base data as the funding valuation rolled forward to the current financial year, taking account of changes in membership numbers and updating assumptions to the current year. This valuation is not carried out on the same basis as that used for setting Fund contribution rates and the Fund accounts do not take account of liabilities to pay pensions and other benefits in the future.

In order to assess the value of the benefits on this basis, the Actuary has updated the actuarial assumptions (set out below) from those used for funding purposes (see Note 19). The actuary has also valued ill health and death benefits in line with IAS 19.

31 March 2020		31 March 2021
£m		£m
(1,104)	Present value of promised retirement benefits	(1,389)
697	Fair value of scheme assets	871
(407)	Net Liability	(518)

As noted above, the liabilities are calculated on an IAS 19 basis and therefore will differ from the results of the 2019 triennial funding valuation because IAS 19 stipulates a discount rate rather than a rate which reflects market rates.

IAS19 Assumptions used

	2019-20	2020-21
	% pa	% pa
Inflation/pensions increase rate assumption	1.9	2.9
Salary increase rate	2.6	3.6
Discount rate	2.3	2.0

NOTE 21: CURRENT ASSETS

31 March 2020		31 March 2021
£'000		£'000
Short Term Debtors:		
661	Contributions due - employers	561
55	Sundry debtors	66
1,289	Cash owed to Fund	1,035
2,005		1,662

NOTE 21A: LONG TERM DEBTORS

31 March 2020		31 March 2021
£'000		£'000
0	Lifetime Tax Allowances	140
0		140

NOTE 22: CURRENT LIABILITIES

31 March 2020		31 March 2021
£'000		£'000
(156)	Sundry creditors	(119)
(80)	Benefits payable	(283)
(236)		(402)

NOTE 23: ADDITIONAL VOLUNTARY CONTRIBUTIONS

Market value 31 March 2020		Market value 31 March 2021
£'000		£'000
2,268	Prudential Assurance	2,676
553	Clerical Medical	617
224	Utmost (Previously Equitable Life)	237
3,045		3,530

NOTE 24: AGENCY SERVICES

There were no payments of this type

NOTE 25: RELATED PARTY TRANSACTIONS

Harrow Council

The Fund is required under IAS24 to disclose details of material transactions with related parties. The Council is a related party to the Pension Fund. Details of the contributions made to the Fund by the Council and expenses refunded to the Council are set out below.

The Pension Fund has operated a separate bank account since April 2011. However, to avoid any undue cost to the Fund some minor transactions continue to be processed through the Council's bank account. These are reconciled monthly and settlement of any outstanding balance is adjusted when the Council pays its contributions to the fund.

31 March 2020		31 March 2021
£'000		£'000
(20,634)	Employer's Pension Contributions to the Fund	(20,663)
906	Administration expenses paid to the Council	908
1,289	Cash held by the Council	1,035

Governance

Each member of the Pension Fund Committee is required to declare their interests at each meeting.

NOTE 25A: KEY MANAGEMENT PERSONNEL

The key management personnel of the fund are the Councils' Director of Finance (S151 Officer) and the Pension Fund Manager.

Total remuneration payable from the Pension Fund to these key management personnel is set out below:

31 March 2020		31 March 2021
£'000		£'000
91	Short-term benefits	105
0	Termination benefits	0

NOTE 26: CONTINGENT LIABILITIES AND CONTRACTUAL COMMITMENTS

Outstanding capital commitments at 31 March 2021 totalled £53.3m (31 March 2020: £65.8m).

These commitments relate to outstanding call payments due on unquoted limited partnership funds held by Pantheon Ventures and LCIV Infrastructure Fund.

NOTE 27: CONTINGENT ASSETS

One admitted body employer in the Fund holds an insurance bond/guarantee to guard against the possibility of being unable to meet their pension obligations. These bonds are drawn in favour of the Fund and payment will only be triggered in the event of employer default.

London Borough of Harrow Pension Fund (“the Fund”) Actuarial Statement for 2020/21

This statement has been prepared in accordance with Regulation 57(1)(d) of the Local Government Pension Scheme Regulations 2013. It has been prepared at the request of the Administering Authority of the Fund for the purpose of complying with the aforementioned regulation.

Description of Funding Policy

The funding policy is set out in the Administering Authority's Funding Strategy Statement (FSS), dated March 2020. In summary, the key funding principles are as follows:

- to ensure the long-term solvency of the Fund, using a prudent long term view. This will ensure that sufficient funds are available to meet all members'/dependants' benefits as they fall due for payment;
- to ensure that employer contribution rates are reasonably stable where appropriate;
- to minimise the long-term cash contributions which employers need to pay to the Fund, by recognising the link between assets and liabilities and adopting an investment strategy which balances risk and return (**NB** this will also minimise the costs to be borne by Council Tax payers);
- to reflect the different characteristics of different employers in determining contribution rates. This involves the Fund having a clear and transparent funding strategy to demonstrate how each employer can best meet its own liabilities over future years; and
- to use reasonable measures to reduce the risk to other employers and ultimately to the Council Tax payer from an employer defaulting on its pension obligations.

The FSS sets out how the Administering Authority seeks to balance the conflicting aims of securing the solvency of the Fund and keeping employer contributions stable. For employers whose covenant was considered by the Administering Authority to be sufficiently strong, contributions have been stabilised to return their portion of the Fund to full funding over 20 years if the valuation assumptions are borne out. Asset-liability modelling has been carried out which demonstrate that if these contribution rates are paid and future contribution changes are constrained as set out in the FSS, there is still at least a 72% likelihood that the Fund will return to full funding over 20 years.

Funding Position as at the last formal funding valuation

The most recent actuarial valuation carried out under Regulation 62 of the Local Government Pension Scheme Regulations 2013 was as at 31 March 2019. This valuation revealed that the Fund's assets, which at 31 March 2019 were valued at £851 million, were sufficient to meet 94% of the liabilities (i.e. the present value of promised retirement benefits) accrued up to that date. The resulting deficit at the 2019 valuation was £52 million.

Each employer had contribution requirements set at the valuation, with the aim of achieving full funding within a time horizon and probability measure as per the FSS. Individual employers' contributions for the period 1 April 2020 to 31 March 2022 were set in accordance with the Fund's funding policy as set out in its FSS.

Principal Actuarial Assumptions and Method used to value the liabilities

Full details of the methods and assumptions used are described in the 2019 valuation report.

Method

The liabilities were assessed using an accrued benefits method which takes into account pensionable membership up to the valuation date; and makes an allowance for expected future salary growth to retirement or expected earlier date of leaving pensionable membership.

Assumptions

A market-related approach was taken to valuing the liabilities, for consistency with the valuation of the Fund assets at their market value.

The key financial assumptions adopted for the 2019 valuation were as follows:

Financial assumptions	31 March 2019
Discount rate	4.3%
Salary increase assumption	3.0%
Benefit increase assumption (CPI)	2.3%

The key demographic assumption was the allowance made for longevity. The life expectancy assumptions are based on the Fund's VitaCurves with improvements in line with the CMI 2018 model, an allowance for smoothing of recent mortality experience and a long term rate of 1.25% p.a. Based on these assumptions, the average future life expectancies at age 65 are as follows:

	Males	Females
Current Pensioners	22.0 years	24.3 years
Future Pensioners*	23.1 years	26.3 years

*Aged 45 at the 2019 Valuation.

Copies of the 2019 valuation report and Funding Strategy Statement are available on request from the Administering Authority to the Fund.

Experience over the period since 31 March 2019

Markets were severely disrupted by COVID 19 in March 2020, but in the 2020/21 year they recovered strongly. As a result, the funding level of the Fund as at 31 March 2021 is likely to be an improvement to that reported at the previous formal valuation.

The next actuarial valuation will be carried out as at 31 March 2022. The Funding Strategy Statement will also be reviewed at that time.
