Introduction

Haringey Council presents its Annual Report and Accounts of the Haringey Local Government Pension Fund for the year ended 31st March 2019.

The Local Government Pension Scheme (LGPS) is a defined benefit pension scheme for the employees of local government and related organisations within the UK. It is a national scheme run locally by councils nominated as "Administering Authorities". Haringey Pension Fund was established on 1st April 1965.

Haringey Council is the Administering Authority in the London Borough of Haringey and runs the Scheme to provide retirement benefits to all eligible employees of Haringey Council and other scheme employers who participate in the fund in the borough. More detail about these organisations can be found in the Membership section on page 13. The Management report on page 11 provides further information about how the scheme is run. The Scheme's registration number is 00329316RX.

Scheme Rules

The benefits payable for members of the scheme in respect of service from 1st April 2014 are based on career average revalued earnings. Pensions are increased each year in line with the Consumer Price Index. For service prior to April 2014 benefits are based on final salary and years of service. Other than in accordance with legislative requirements, there were no increases to benefits in payment in the year. The Administration report on page 30 provides details about the administration of the Scheme.

<u>Membership</u>

There were 6,445 active members (2018: 6,716), 8,733 (2018: 8,719) deferred members, and 7,794 (2018: 7,742) pensioners and dependents receiving benefits. More details can be found in the Membership section on page 13.

Financial position

The financial statements and notes in Appendix 1 show that the value of the Fund's assets increased by £27m to £1,383m as at 31 March 2019. The majority of the Fund's investments delivered positive single digit performance over the year, with the fund's private equity and renewable energy infrastructure investments delivering the best returns for the year in double digits.

<u>Investments</u>

During the year the rate of return on the Fund's investments was 5.7%. This was 0.9% below the Fund's target of 6.6% for the year. The Fund participates in a benchmarking group maintained by the Pensions and Investment Research Consultants (PIRC): around two thirds of all LGPS Funds take part in this

benchmarking group. The median performance in the benchmarking group in 2018/19 was a return of 6.6%. Over the course of 2018/19, Haringey's investment performance was in the 67th percentile out of all the funds which took part in this benchmarking (1st percentile being the best performing fund, 100th being the worst). However, Haringey's performance was in the 10th, 12th, and 16th percentiles over the rolling three, five and ten year periods which ended on 31 March 2019 respectively, showing that over the medium and long term the fund benchmarks well against its peers. More details of the investment strategy and the performance can be found on page 18.

Funding position

The last formal valuation of the funding position took place as at 31st March 2016, when the funding level was 79%. Details can be found in the Funding report on page 34. The next formal valuation will be carried out over the course of the 2019/20 financial year as at 31st March 2019.

Management and Financial Performance Report

- Service Delivery
- Pension Fund Advisers
- Management report for 2018/19
- Membership

Governance Arrangements

Haringey Council in its role as Administering Authority has delegated responsibility for administering the Pension Scheme to the Pensions Committee and Board. Details of the individuals who served on the Pensions Committee and Board during 2018/19 are shown below.

The terms of reference for Pensions Committee and Board are set out in the Council's constitution. The committee fulfils the duties required by regulations for the Council to operate a Pensions Board. The Committee and Board consists of elected Councillors, and employer and employee representatives all with equal voting rights. Councillors are selected by their respective political Groups and their appointments are confirmed at a meeting of the full Council. They were not appointed for a fixed term but the membership is reviewed regularly by the political groups. The other representatives were appointed by their peer groups. The membership of the Committee during the 2018/19 year was:

Councillor Matt White Chair

Councillor John Bevan Vice Chair

Councillor Viv Ross

Councillor Kaushika Amin (until January 2019)

Councillor Paul Dennison

Councillor Khaled Moyeed

Randy Plowright Employee Representative

Ishmael Owarish Employee Representative

Keith Brown Employer Representative

Contact Details for Pensions Committee and Board

5th Floor, Alexandra House,

London, N22 7TR.

Governance Compliance Statement

The Pension Fund has published a Governance Compliance Statement in accordance with the LGPS Regulations and this is set out in Appendix 2. The objective of the statement is to make the administration and stewardship of the Pension Fund transparent and accountable to all stakeholders.

Service Delivery

Haringey Council Pension Service includes accounting, investments and pensions administration activity, this is managed by Haringey Council officers within the finance department. The pension service receives support from other services across the Council such as legal, human resources, procurement and democratic services.

The key tasks for the investments and accounting staff of the fund include:

- Support to the Committee and Board to set investment strategy and monitor investment performance;
- Managing the contracts with the Pension Fund's advisers;
- Producing the annual Pension Fund workplan and Annual report and accounts;
 and
- Maintaining the key governance statements the Pension Fund is required to publish (the current versions can be found in the Appendices to this report).

The Scheme Administration report on page 30 sets out the key tasks of the pensions administration service.

The Pension Fund's internal auditors are Mazars Public Sector Internal Audit Limited. Regular audits are carried out on both pension fund investments and pensions administration.

Key Officer Contacts

Training was provided to committee members on a wide range of topics. Training sessions are generally held prior to meetings of the committee, or on half day slots as is deemed necessary consistent with the committee's work plan at a given point. Committee members are also able to receive training from external providers, and this was the case throughout 2018/19. Training was provided in line with CIPFA's knowledge and skills framework to ensure that the committee members received appropriate training.

Management Report for 2018/19

Financial Performance

The investment performance during the year was positive at 5.7% relative to benchmark of 6.6% - so the Fund underperformed its target by 0.9%. The majority of the Fund's investments delivered positive single digit returns, the best performance came from the fund's private equity and renewable energy infrastructure investments which delivered double digit returns.

In the medium to long term, the Fund has underperformed target slightly with returns of 11.5% against target of 11.9% over 3 years and returns of 10.1% against 10.5% over five years. All fund managers who have been engaged over 3 and 5 year periods, which provide a more meaningful view of performance figures than the 1 year figures, have delivered positive returns over these timescales.

The Fund participates in a benchmarking group maintained by the Pensions and Investment Research Consultants (PIRC): around two thirds of all LGPS Funds take part in this benchmarking group. The median performance in the benchmarking group in 2018/19 was a return of 6.6% - which Haringey did not exceed. Over the course of 2018/19, Haringey's investment performance was in the 67th percentile out of all the funds which took part in this benchmarking, (1st percentile being the best performing fund, 100th being the worst). Haringey's performance was in the 10th and 12th percentiles over the rolling three and five year periods which ended on 31 March 2019 respectively, showing strong performance over the longer term.

In 2018/19, the fund's assets increased by £27m from £1,356m to £1,383m. In the 2017/18 financial year, the corresponding figure was an increase of £48m, and investment performance of 4.4%. The increase in assets of £27m in 2018/19 takes accounts of the £40m bulk transfer out of the fund during the year, hence why the net increase in the fund was lower than the previous year, despite the performance return being higher.

Administrative Management Performance

The Fund's maintains a Pension Administration Strategy Statement, which was last updated in early 2018 and is reviewed regularly. During the financial year 2018/19 no formal action has been taken against any employers. The only breaches of the performance standards have been minor and have been dealt with informally. The timeliness of contribution payments from employers in the Fund has been monitored by the Pensions Committee and Board and issues have been followed up by the Fund's officers. Membership of the Fund has decreased by 205 in the financial year (from 23,177 in 2017/19 to 22,972 in 2018/19), as was expected due to a bulk transfer of c. 600 members from the fund when the College of Haringey, Enfield and North East London merged with another larger college and joined their pension fund.

Risk Management

Risk management is inherent to all pensions activity: both within the investment and administration of the fund. All activities carried out by officers of the fund include processes and procedures to manage relevant risks, and decision making by the Pensions Committee and Board includes robust risk assessment. The Pensions

Committee and Board tables a version of the fund's risk register in every meeting, where different areas of the risk register are reviewed and discussed in each meeting, with new risks added when they are identified. The highest rates risks are reviewed in every meeting. The risk register is available in the public section of the Pensions Committee and Board meetings which are published online.

The fund completes regular data matching exercises via specialist software provided by the fund's administration system, for example to identify pensioners who have passed away. The fund also receives NFI data for matching purposes.

Investment risk is a key risk which the Fund is exposed to due to the range of different types of assets the Fund has chosen to invest in. All investments are undertaken in line with the Local Government Pension Scheme (Management & Investment of Funds) Regulations 2016 and in consideration of advice from the Fund's investment adviser and from the Independent Adviser.

The Committee and Board has set an investment strategy which involves a wide range of asset classes and geographical areas. This provides diversification which reduces the risk of low and volatile returns. Following the decision to invest a large portion of the Fund on a passive basis, the risk of underperforming the benchmark has been reduced.

The majority of the Pension Fund's assets are managed by external fund managers and they are required to provide audited internal controls reports regularly to the Council, which set out how they ensure the Fund's assets are safeguarded against loss and misstatement.

The Committee and Board consider reports on investment performance, responsible investment activities and other pertinent matters relating to investment risk and fund managers at each committee meeting.

The Council's pensions team, employed on behalf of the fund, are subject to annual audits, both by the external auditor (appointed by Public Sector Audit Appointments), and by the Council's internal auditor. Internal audits are performed separately for the fund's administration and investment/accounting functions. External and internal audits have been generally positive in recent years, the last audit of investments provided full assurance (the highest rating) in 2018/19, and the last audit of administration provided substantial assurance (the second highest rating), with only two minor recommendations made, this took place during 2017/18.

Membership

Haringey Council is the Administering Authority for the Haringey Pension Fund and eligible staff are members of the scheme. In addition the Pension Fund has a number of other organisations (scheduled and admission bodies) participating in the Fund.

A scheduled body is a public body which is required by law to participate in the LGPS. Each scheduled employer is listed in the LGPS regulations. The most common type of scheduled employers are academy schools.

There are two types of admitted bodies:

- A transferee admission body is an employer permitted to participate in the LGPS. This might be a non profit making body carrying out work that is similar in nature to a public service like local government, or it might be a private company to which a service or assets have been outsourced. The majority of the fund's admitted bodies fall into this category.
- A community admission body is an organisation providing a public service in the UK otherwise than for gain. The organisation is expected to have sufficient links with the Council such that it is regarded as having a community interest. The fund has only two employers who fall into this category.

The membership of the Pension Fund at 31st March 2019 compared with the previous financial year is shown in the table below.

24.000 24.000 23,000 23,000 22,000 22,000 21,000 21,000 20,000 20,000 19.000 19.000 18,000 18,000 17,000 17,000 2010/11 2011/12 2012/13 2013/14 2014/15 2015/16 2016/17 2017/18 2018/19 Total Membership 19,638 19,868 20,192 21,065 21,716 22,052 22,052 23,177 22,972 19,868 20,192 21,065 21,716 22,052 22,052 23,177 22,972 Total Membership

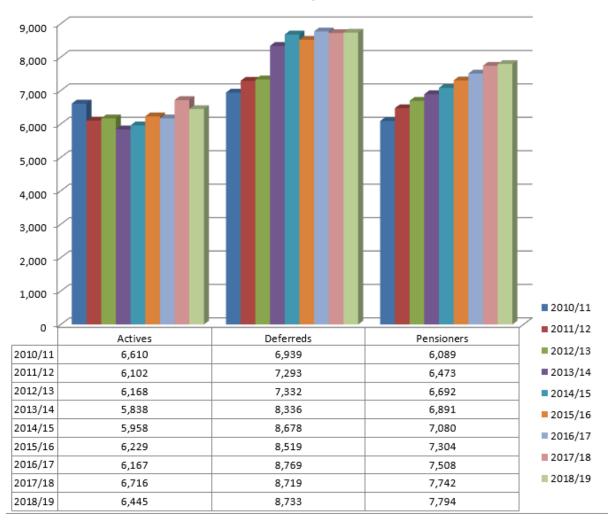

Total Membership Growth

The table above shows an overall decrease in membership of 0.9% over the past year due to a bulk transfer of around 600 members of the fund when one employer transferred out of the fund. Aside from this, deferred and pensioner members are on an upward trend as expected.

Overall membership is anticipated to continue to rise as new employers are admitted into the Fund and as more staff move into the deferred and pensioner groups.

The table below shows the breakdown of membership between active members, deferred and pensions.

Fund Membership 2010 - 2019

A schedule of the membership from each of the employers is shown below:

Investment Performance

Investment Pooling

Market Developments 2018/19

Investment Strategy

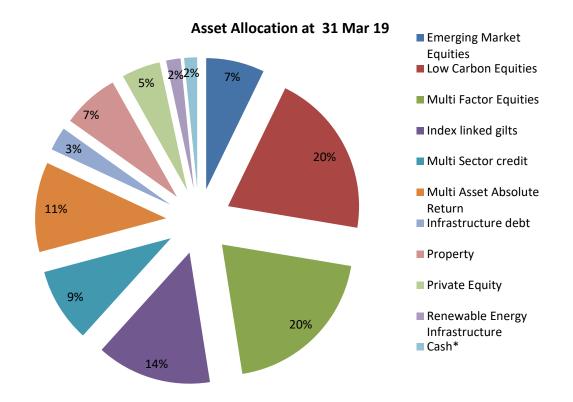

The Pension Fund's investment strategy is formulated within the parameters of the Local Government Pension Scheme (Management and Investment of Funds) Regulations 2016.

The Pensions Committee and Board is responsible for setting the investment strategy with the aid of independent advice from the Pension Fund's advisers. Day to day investment decisions are delegated to fund managers.

The strategy is set out in detail in the Investment Strategy Statement, which is shown in Appendix 3 to this report. All investments were externally managed, with the exception of a small allocation of cash used to meet benefit payments, which was held in-house.

The current strategic asset allocation includes allocations to passively managed equity, index linked gilts, multi sector credit, private equity, infrastructure debt, renewable energy infrastructure, a multi asset absolute return fund, and UK property. A further allocations to UK long lease property was agreed in 2016, however this investment had not been funded as at 31st March 2019, and is expected to be funded in full during 2019/20. The renewable energy infrastructure mandate has begun to be funded in 2018/19, but will take some years before the committed funds are all fully invested.

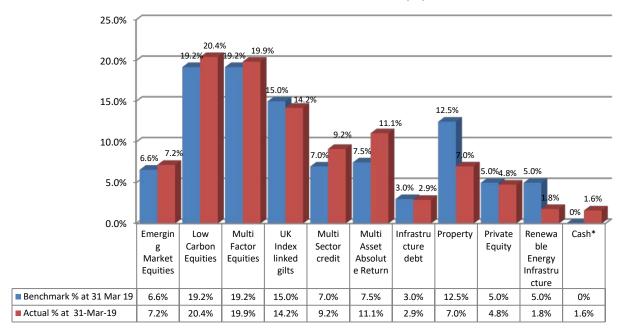

The actual asset allocation as at 31st March 2019 is illustrated by the below chart.

^{*}includes current asset/liability balances

The Fund's benchmark showing target asset allocation during 2018/19 is shown below, alongside the actual allocation of the Fund's investments at 31st March 2019.

The financial statements show that the Fund is invested in pooled funds and the breakdown in the table below shows the allocation of the underlying holdings.

Asset Class - Benchmark vs Actual 31/3/19

Custodial Arrangements

The Council employs Northern Trust to act as independent custodian of the Pension Fund's investments. As professional custodians, they employ a rigorous system of controls to ensure the safekeeping of assets entrusted to them. The custodian is responsible for the settlement of all day-to-day investment transactions, collection of investment income and the safe custody of the Pension Fund's investments.

^{*} includes current asset/liability balances

Responsible Investment

The Pension Fund believes that the adoption by companies of positive Environmental, Social and Governance (ESG) principles can enhance their long term performance, sustainability and increase their financial returns. These issues are of concern to the Fund because it is considered that companies who do not have regard for the social and environmental impact of their business, or who conduct their business in a way which is not sustainable over the longer term are in danger of adversely affecting the future prospects of the company, and potentially the company's long term valuation.

Due to the need to prioritise the fiduciary duty, the Fund does not participate in stock screening or exclusionary approaches. Instead the Fund seeks to influence the behaviour of companies through engagement. This engagement is undertaken through the following parties:

- The Fund's investment managers
- Local Authority Pension Fund Forum (LAPFF)
- Maintaining Tier 1 Signatory status to the UK Stewardship code

The Fund maintains membership of the LAPFF in order that engagement can be undertaken on its behalf.

In addition to this, all but one of the Fund's managers are signatories to the 'United Nations Principles for Responsible Investment' initiative.

At each committee meeting the Pensions Committee and Board receive reports on the engagement activity undertaken on behalf of the Fund, by the fund managers in relation to voting alerts from LAPFF, covering environmental issues, governance and remuneration and all other responsible investment issues.

The Fund incorporates ESG considerations into all decision making when making alterations to the investment strategy, but the fund is mindful of the fact that the fiduciary duty must take precedence over any other considerations when investing the fund. The fund has made a number of investments in recent years which have a clear ESG benefit. The fund has committed circa £70m to be invested in renewable energy infrastructure funds, and 50% of the fund's developed market equity investments are held within a low carbon fund, which reduces the carbon emissions associated with these investments by approximately 70%. All investments must be judged solely on their own merit, and while some investments may have a clearly identifiable ESG aspect, ESG is considered for all investments that the Fund makes: for example by ensuring that equity managers vote in line with LAPFF recommendations.

For further information regarding the Fund's approach to investing responsibly, please see the Investment Strategy Statement at Appendix 3.

Fund Managers

The Pension Fund has appointed external fund managers to undertake day to day management of the Fund's investments. Each fund manager is appointed with a mandate covering a defined asset class or classes with a target set that relates to a benchmark covering the asset class or classes they are managing. The fund managers in place during the 2018/19, the asset classes they cover, their percentage of the Fund's investments at 31st March 2019 and targets are shown in the table below (the remaining 2% was invested cash):

Investment Manager	Mandate	Asset Class	Passive /Active	Benchmark	Target (3 Yr Rolling Period)	Strategic Allocation	Allocation at 31 Mar 2019
LGIM	Passive Global Equities & Bonds	Global Multi Factor Equities	Passive	RAFI Multi Factor Global Unhedged	Benchmark	9.60%	9.93%

The fund had invested funds with seven managers for the whole of 2018/19, and made new investments with one new fund manager during the year (CIP). Of the seven who were invested with for the whole year, six achieved positive returns. The fund's private equity and renewable energy infrastructure investments performed best in 2018/19.

Fund Manager Performance Against Benchmark

LGIM (Passive equity (including low carbon), and index linked gilts) – The manager performed broadly in line with target as expected as the portfolio is invested passively. Equity markets delivered variable returns throughout the year with a correction in the final quarter of 2018, however overall performance was positive.

CBRE (Property)– The manager achieved positive returns of 5.3% in excess of the benchmark by 0.4%.

PANTHEON (Private Equity) – the private equity manager delivered a positive return of 14.5% in the year, the highest of all managers, although below their target of 16.5%.

ALLIANZ (Infrastructure Debt) – The manager underperformed benchmark in the year by 5.1%, however the most recent valuation at 31/3/19 is not included within this figure due to delays in valuations being made available, and this is likely to increase performance which will be reflected in future reporting. All funds have now

^{*}Investment had not yet begun with these fund managers as at 31 March 2019

^{**}Investment with these fund managers began in 2018/19

^{***}Remaining 2% held in cash as at 31/3/19

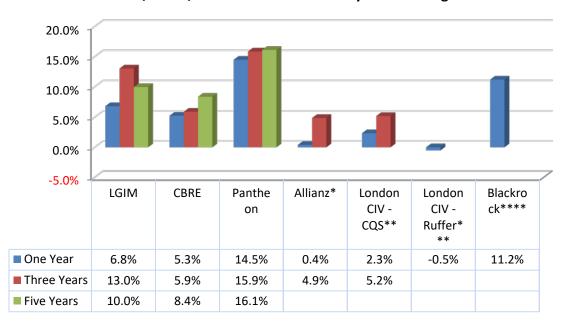

been drawn for this investments which are invested via a limited partnership structure in a total of five assets, which include two roads, a port and two university halls of residence. The investment will now continue to yield income to the fund for the remainder of the life of the investment which is anticipated to be in the region of 25 years.

London CIV - CQS (Multi Sector Credit) - The multi sector credit portfolio lagged behind benchmark in 2018/19, by 3.7%. The asset class has faced challenging conditions within 2018/19, however it is understood that CQS's performance benchmarks well compared to their peers investing in similar strategies.

London CIV – Ruffer (Multi Asset Absolute Return) – Returns were disappointing at -0.5% compared to a target of 8.0%. The investment was made to increase downside protection for the fund and to diversify from listed equities, and indeed, in the period of market correction in the final quarter of 2018, this fund did perform better than the fund's listed equity investment. Overall however, performance across the year lagged against target significantly. This was the first full year that the fund had been invested in this London CIV subfund as the investment was made in December 2017. It is therefore too early to draw a meaningful conclusion from the investment performance.

Blackrock (Renewable Energy Infrastructure) – This investment is via a closed ended limited partnership structure, similar to private equity. The investment began in May 2017, and will take a few years to full invest all committed funds. It is too early in the life of the investment to draw a meaningful conclusion from the investment performance, however, the initial returns are positive as they already exceed the 10% per annum target.

Fund managers' performance over the past three and five years is illustrated by the below chart.

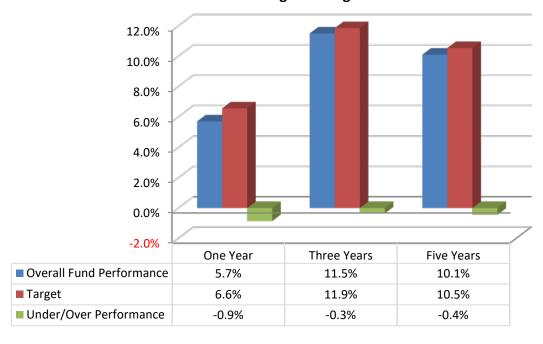

One/Three/Five Year Performance by Fund Manager

^{*} Commenced Dec 2014; ** Commenced Aug 2014 *** Commenced Dec 2017 **** Commenced May 2017

Investment Performance

The investment performance of the Pension Fund and the fund managers is regularly reviewed by Committee members. Performance reports to compare actual performance against the targets set for the fund managers are provided to and discussed by the Committee quarterly. The overall Pension Fund performance is summarised in the table below. All figures shown are annualised performance figures over the various periods to 31st March 2019.

Overall Fund Performance against Target

Investment Pooling

The fund has two investments made directly through the London CIV, the investment pool for London Boroughs. These are the CQS (Multi Sector Credit), and Ruffer (Multi Asset Absolute Return) investments. Besides this, the fund's passive equity and index linked gilts mandates with Legal and General fall under the CIV's oversight, and the fund benefits from lower fees negotiated on behalf of all funds. The fund therefore has around 81% of all assets held within the pool or under the pool's oversight as at 31/3/19. Investment management fees for these investments account for approximately 36% of all investment management costs. Those investments outside the pool are generally alternative investments which have proportionally higher fees associated with them.

The remaining investments held outside the pool represent alternative or illiquid investments, and which will remain under regular review to see if it is possible to transition them into the London CIV, or whether it would be in the fund's interests to sell the investments and instead invest via a London CIV strategy.

The fund is a shareholder in the CIV, all London Funds contributed £150k of shareholder capital, which is presented on the fund's balance sheet in Appendix 1 to these accounts. In addition to this, all shareholders in the CIV contribute an annual service charge of £25k and a development funding charge of £65k (for 2018/19). The fund estimates that the fund has generated a net saving via its participation in the CIV in 2018/19, as these costs are offset by ongoing reduced investment management fees for the funds under the CIV's oversight.

Market Background

JOHN RAISIN FINANCIAL SERVICES LIMITED

Independent Advisors Report

Market Background 2018-19

During the year 1 April 2018 to 31 March 2019 the world economy remained broadly positive although as the year progressed signs of an economic slowdown increased. United States – China trade tensions weighed against economic and financial markets. Equity markets, however, experienced a moderately positive year with the MSCI AC World index advancing by 3% although there were significant regional variances. April to September 2018 saw yet further advances in world equity markets. The Quarter October to December 2018 saw sharp declines with the MSCI AC World Index losing around 13% although most of the losses were regained in the period January to March 2019. Declining economic and financial market considerations led the US Federal Reserve, in particular and also the European Central Bank to move, in early 2019, back towards "looser" monetary policy in order to seek to support economic and financial markets.

The S&P 500 index rose by 7% over the period April 2018 to March 2019 to close at 2,834 continuing its long upward trend from the low of 666 of March 2009. On 20 September the S&P 500 recorded an all time closing high of 2,931 while on 22 August US stocks set a new record for the longest bull run – a period without a 20% fall – when it reached 3,453 days exceeding the 1990-2000 bull market. The increase in the S&P 500 over the financial year 2018-19 at 7% represented, however, a slowdown in equity price rises – in 2017-18 the S&P had advanced by 12% and in 2016-17 by 15%.

The US experienced another year of generally positive economic activity including good corporate results/earnings although the first half year results of 2018-19 were more positive than the second half. Unemployment fell from 4.1% in March 2018 to 3.8% by March 2019. Not since 1969 has the US seen a lower unemployment rate. Consumer sentiment (as measured by the University of Michigan) declined slightly over the year but remained at very favourable levels.

The United States Federal Reserve, the world's most important Central Bank, continued, from April to December 2018 its policy of "tightening" monetary policy by raising interest rates (the target range for the federal funds rate) by 0.25% on three separate occasions (June, September and December). As late as its December 2018 meeting it was signalling two further likely rate increases in 2019 before making a significant policy shift in early 2019. The Press Release following the January 2019 meeting of the US Federal Reserve's Federal Open

Market Committee (FOMC) excluded the reference to "some further gradual increases" in interest rates which appeared in the December 2018 Press Release as the FOMC put further rate rises on hold.

At a press conference following the January 2019 meeting the Federal Reserve Chairman Jay Powell while referring to the outlook for the US economy as "solid" also referred to "crosscurrents and conflicting signals about the outlook. Growth has slowed in some major foreign economies, particularly in China and Europe......Financial conditions tightened considerably late in 2018 and remain less supportive of growth than they were earlier in 2018..." Consequently, the FOMC determined that the cumulative effects of developments "warrant a patient, wait-and-see approach regarding future policy changes." That the Federal Reserve had significantly changed its future monetary policy approach and clearly moved away from further "tightening" was confirmed by the decisions of the March 2019 meeting of the FOMC. Firstly, the projections issued after this meeting indicated that there would likely be no increases in interest rates in 2019. Secondly a statement on "Balance Sheet Normalization Principles and Plans" stated that the policy of Balance Sheet reduction (introduced in 2017 as a fundamental policy shift towards monetary "tightening") will be slowed from May 2019 and then halted at the end of September 2019.

The MSCI EMU Index (which tracks the largest companies in the Eurozone) advanced by only 1% in 2018-19 which was a year of economic slowdown in the Eurozone. While the Eurozone seasonally adjusted unemployment rate fell from 8.5% in March 2018 to 7.7% in March 2019 (its lowest level since September 2008) other important indicators were concerning. Inflation figures indicated continuing failure to achieve the European Central Bank's (ECB) inflation target of below but close to 2% over the medium term. Although inflation as measured by the Harmonised Indices of Consumer Prices (HICP) which had been 1.3% in March 2018 was in the range 1.9% to 2.3% from May to November 2018 it was no higher than 1.5% from December 2018 and was 1.4% by March 2019. The IHS Markit Purchasing Managers Index for the Eurozone which was above 56 in April 2018 fell progressively, over the 2018-19 financial year, to 47.5 in March 2019 and well below 50 which indicates the boundary between expected contraction and expansion.

The Organisation for Economic Co-operation and Development (OECD) in their "Interim Economic Outlook" of March 2019 reported that "GDP growth in the euro area slowed sharply through 2018 and is projected to remain soft at 1% in 2019." There were clear concerns regarding weakness in German industrial activity which is noteworthy as the heavily manufacturing reliant German economy accounts for about a third of Eurozone output.

The ECB initially clearly "tightened" its Monetary policy stance by ending its net asset purchase programme in December 2018, following an announcement in June. However, in March 2019, in response to weaker economic data and indicators, the ECB took a step back towards "loosening" monetary policy by announcing that the key ECB (and presently very low) interest rates were now expected "to remain at their present levels at least through the end of 2019" rather than "at least through the summer of 2019."

During 2018-19 the FTSE 100 index of the largest UK listed companies (but which collectively earn over 70% of their revenues from overseas) increased by 3%. In contrast the more domestically focussed FTSE 250 index fell by 2%. Throughout 2018-19 there was ongoing uncertainty regarding the nature and timing of the UK's departure from the EU. Notwithstanding UK unemployment of 3.8% at March 2019 its lowest level since 1974 levels

of business investment have reduced since the 2016 EU Referendum. During 2018-19 the BoE raised interest rates once - from 0.5% to 0.75% on 1 August 2018.

The Nikkei 225 Index declined by 1% over the 2018-19 financial year compared with a 13% gain in 2017-18 and 15% gain in 2016-17. Japan's export driven economy is particularly vulnerable to economic slowdown and trade disputes both of which were features of 2018-19. Throughout 2018-19 the Bank of Japan continued an ultra "loose" approach to monetary policy incorporating a policy of keeping 10-year bond yields at around zero percent and a continuation of its major asset purchase programme which began in 2013. Japanese Consumer Price Inflation and Core inflation were both below 1% at March 2019 compared with the Bank of Japan's inflation target of 2%.

Asian equities and Emerging Market equities generally had negative year with the MSCI AC Asia ex Japan index down (in \$ terms) by over 5% and the MSCI Emerging Markets Index down by in excess of 7%. Global trade tensions centred on President Trump's approach to trade, US interest rates and the strength of the US dollar all weighted against these markets. Chinese growth of around 6.5% for the year 2018-19 was clearly lower than that achieved in the first five years after the 2009 crisis. Chinese stocks, however, received both a short term and likely long-term boost with the announcement, in February 2019, by the major index provider MSCI that it would more than quadruple the weighting of China listed shares in its "flagship" MSCI Emerging Markets Index from 0.7% to 3.3% by November 2019.

The 10-year Benchmark Government Bonds of the US, UK and Germany all finished the financial year with lower yields (and therefore higher prices) than at the beginning. The move away from monetary tightening by the ECB and particularly the US Federal Reserve, in early 2019, together with softening economic data were supportive of the major Government Bonds.

Scheme Administration Report

- Local Government Pension Scheme
- Administration Service Delivery
- Administration KPIs and statistics
- Communications Policy
- Pensions Administration Strategy

Local Government Pension Scheme

The Haringey Pension Fund is part of the Local Government Pension Scheme (LGPS), which is a statutory scheme which provides defined pension benefits based on membership and pay levels. The benefits are set out in the Local Government Pension Scheme (Benefits, Membership and Contributions) Regulations 2013 and Local Government Pension Scheme (Transitional, Provision Savings and Amendment) Regulations 2014. Haringey Pension Fund cannot make changes to the scheme, and may only exercise such discretions as are prescribed by the LGPS regulations.

Membership is open to the non-teaching employees of the Administering Authority, all scheduled bodies and certain employees of admitted bodies until the day before age 75. From April 2014, the benefit structure changed from a final salary scheme to career average revalued earnings based scheme, with changes to the accrual rate and to align the normal retirement date with the age at which the state pension commences.

Administration Service Delivery

The Pension Administration service calculates and pays pension benefits, maintains a database of members and is responsible for the interpretation and implementation of the Local Government Pension Scheme regulations and related legislation for the administration of the scheme.

The service operates in accordance with their professional standards and within the regulations laid down by the Local Government Pension Scheme.

Internal Dispute Resolution Procedure

Members of pension schemes have statutory rights to ensure that complaints, queries and problems concerning pension rights are properly resolved.

To facilitate this process, an Internal Disputes Resolution Procedure has been established. In the first instance, members are expected to take up matters with the Pensions Manager, Janet Richards at the following address:

Level 9 Alexandra House 10 Station Road Wood Green London N22 7LR

Alternatively email janet.richards@haringey.gov.uk. If the matter remains unresolved, a stage 1 appeal may be made to the Head of Human Resources and thereafter, if necessary a further appeal may be made to Bernie Ryan, Assistant Director, Corporate Governance at

Level 5 River Park House 225 High Road Wood Green London N22 8HQ

If the problem remains unresolved, members then have the facility to refer the matter to The Pensions Ombudsman, who can be contacted at:

11 Belgrave Road London SW1V 1RB

The statutory body responsible for the regulation of pension schemes in the United Kingdom is The Pensions Regulator and can be contacted at the following address:

The Pensions Regulator Napier House Trafalgar Place Brighton BN1 4DW

A central tracing agency exists to help individuals keep track of deferred pension entitlements from previous employers' pension schemes. An application for a search can be submitted to:

Pension Tracing Service The Pension Service Whitley Road Newcastle upon Tyne NE98 1BA

The Haringey Pension Fund's details are registered with the tracing agency.

<u>Further information</u>

For information about the Scheme generally, further information about resolving disputes, or an individual's entitlement to benefit, please refer to the Employee's guide, which can be found on the council's website (details below) or contact the Pensions Team, at

Level 9 Alexandra House 10 Station Road Wood Green London N22 7LR

telephone 020 8489 5916 or refer to the Council's website: www.haringey.gov.uk/pensionfund

Administration KPIs and Statistics

The Fund believes it provides value for money for its members and employers. The fund has previously completed benchmarking against its peers to compare staffing numbers and costs, and found it compared favourably to other similar funds.

Administration statistics are presented below. Those which demonstrate the the cost of the administration service are based on the pensions administration IT system and the recharge from Haringey Council (including staff, premises, support services etc), these differ from 'administrative costs' displayed in the fund's accounts, which include items such as tax charges, legal fees, and ill health liability insurance.

	2017/18	2018/19
Administration Cost per fund member	£33.92	£35.45
Administration FTEs	7.6	7.6
FTEs per 1000 fund members	0.33	0.33

Communications Policy

Effective communication between the Administering Authority, the scheme members, and the employers within the Fund is essential to the proper management of the Local Government Pension Scheme on a transparent and accountable basis.

The current policy, which has been prepared in accordance with the LGPS regulatory requirement is attached in Appendix 4, and sets out the policy framework within which the Pension Fund communicates with:

- Members of the scheme;
- Representatives of scheme members;
- Scheme employers; and,
- Prospective scheme members.

It identifies the format, frequency and method of distributing information and publicity. It also outlines the processes for promoting the scheme to prospective members and scheme employers.

The Communications Policy includes the provision of a pension's page on the Haringey website www.haringeypensionfund.co.uk. This facility enables staff to access information about the Local Government Pension Scheme in their own home with families and partners who may also have an interest in the benefits of the scheme.

Pensions Administration Strategy

The Fund implemented a Pensions Administration Strategy Statement on 1st April 2011, following consultation with the employers participating in the Fund and approval by Committee, this is regularly reviewed and updated.

This statement sets out the performance standards expected of the Council in its role of Administering Authority for the Fund and those expected of employers participating in the scheme. It seeks to promote good working relationships, improve efficiency and ensure quality of service and data. It sets out details of how performance will be monitored and what action might be taken in the event of persistent failure.

During the financial year 2017/18 no formal action has been taken against any employers. The only breaches of the performance standards have been minor and have been dealt with informally.

The Pensions Administration Strategy Statement can be found on the Haringey Pension Fund website www.haringeypensionfund.co.uk

Actuarial Funding Report

- Funding Position
- Funding Strategy Statement
- Statement of the Fund Actuary

Funding Position

The Pension Fund is independently valued every three years by a firm of actuaries to assess the adequacy of the Fund's assets to meet its long term obligations.

The most recent triennial actuarial valuation of the Fund was carried out as at 31 March 2016 in a report dated 29 March 2017.

The 2016 valuation was carried out in accordance with the Fund's Funding Strategy Statement and Guidelines GN9: Funding Defined Benefits – Presentation of Actuarial Advice published by the Board for Actuarial Standards. The resulting contribution rates reflected the cost of providing year by year accrual of benefits for the active members and the level of funding for each employer's past service liabilities.

The market value of the Fund at the time of the last triennial valuation as at 31 March 2016 was £1,046m. Against this sum liabilities were identified of £1,323m equivalent to a funding deficit of £277m. The movement in the actuarial deficit between 2013 and the last valuation in 2016 is analysed below:

Reason for change	£m
Interest on deficit	(53)
Contributions greater than cost of accrual	13
Investment returns higher than expected	67
Change in demographic assumptions	6
Change in base mortality assumptions	17
Actual membership higher than expected	57
Experience items	1
Change in financial assumptions	(17)
Total	91

The level of funding on an ongoing funding basis increased to 79% from 70% between the triennial actuarial valuations as at 31st March 2013 and as at 31st March 2016. The main reason for the improved position was improved investment returns and membership experiences that were better than projected.

The funding objective of the Fund is to be fully funded. As this objective had not been achieved at the last valuation date it was agreed with the actuary that the past service deficit would be recovered over a period not exceeding 20 years. Further information about the principles for achieving full funding is set out in the Funding Strategy Statement in Appendix 5.

The main assumptions used in the 2016 valuation were:

Investments	Annual nominal rate of return %
Discount rate	4.0
	Annual change %
Pay increases	2.8
Price Increases (pension increases)	2.1

Funding Strategy Statement

The Local Government Pension Scheme Regulations require Local Government Pension Funds to prepare, publish and maintain a Funding Strategy Statement in accordance with guidance issued by CIPFA.

The purposes of a Funding Strategy Statement are:

- to establish a clear and transparent fund-specific strategy which will identify how employers' pension liabilities are best met going forward;
- to support the regulatory framework to maintain as nearly constant employer contribution rates as possible; and,
- to take a prudent longer-term view of funding those liabilities.

The Funding Strategy Statement is reviewed in detail every three years alongside the triennial valuation. It is reviewed in collaboration with the Pension Fund's actuary, and after consultation with the Pension Fund's employers and investment advisers. The current statement was reviewed and agreed in March 2017, and then updated in November 2018.

The objectives of the Funding policy set out in the Statement are:

- to ensure the long-term solvency of the Fund (and of the share of the Fund notionally allocated to individual employers);
- to ensure that sufficient funds are available to meet all benefits as they fall due for payment;
- not to restrain unnecessarily the investment strategy of the Fund so that the Administering Authority can seek to maximise investment returns (and hence minimise the cost of the benefits) for an appropriate level of risk;
- to help employers recognise and manage pension liabilities as they accrue;
- to minimise the degree of short-term change in the level of each employer's contributions where the Administering Authority considers it reasonable to do so;
- to use reasonable measures to reduce the risk to other employers and ultimately to the Council Tax payer from an employer defaulting on its pension obligations;
- to address the different characteristics of the disparate employers or groups of employers to the extent that this is practical and costeffective; and
- to maintain the affordability of the Fund to employers as far as is reasonable over the longer term.

The policy is shown in full in Appendix 5.

Statement of Fund Actuary

Pension Fund Accounts Reporting Requirement

Introduction

CIPFA's Code of Practice on Local Authority Accounting 2018/19 requires Administering Authorities of LGPS funds that prepare pension fund accounts to disclose what IAS26 refers to as the actuarial present value of promised retirement benefits. I have been instructed by the Administering Authority to provide the necessary information for the London Borough of Haringey Pension Fund ("the Fund").

The actuarial present value of promised retirement benefits is to be calculated similarly to the Defined Benefit Obligation under IAS19. There are three options for its disclosure in the pension fund accounts:

- showing the figure in the Net Assets Statement, in which case it requires the statement to disclose the resulting surplus or deficit;
- · as a note to the accounts; or
- by reference to this information in an accompanying actuarial report.

If an actuarial valuation has not been prepared at the date of the financial statements, IAS26 requires the most recent valuation to be used as a base and the date of the valuation disclosed. The valuation should be carried out using assumptions in line with IAS19 and not the Fund's funding assumptions.

Present value of promised retirement benefits

Year ended	31 March 2019	31 March 2018
Active members (£m)	869	736
Deferred members (£m)	568	523
Pensioners (£m)	643	647
Total (£m)	2,080	1,906

The promised retirement benefits at 31 March 2019 have been projected using a roll forward approximation from the latest formal funding valuation as at 31 March 2016. The approximation involved in the roll forward model means that the split of benefits between the three classes of member may not be reliable. However, I am satisfied that the total figure is a reasonable estimate of the actuarial present value of benefit promises.

The above figures include both vested and non-vested benefits, although the latter is assumed to have a negligible value. Further, I have not made any allowance for unfunded benefits.

It should be noted the above figures are appropriate for the Administering Authority only for preparation of the pension fund accounts. They should not be used for any other purpose (i.e. comparing against liability measures on a funding basis or a cessation basis).

Assumptions

The assumptions used are those adopted for the Administering Authority's IAS19 report and are different as at 31 March 2019 and 31 March 2018. I estimate that the impact of the change in financial assumptions to 31 March 2019 is to increase the actuarial present value by £115m. There is no impact from any change in the demographic and longevity assumptions because they are identical to the previous period.

Financial assumptions

Year ended (% p.a.)	31 March 2019	31 March 2018
Pension Increase Rate	2.5%	2.4%
Salary Increase Rate	3.1%	3.0%
Discount Rate	2.4%	2.6%

Longevity assumptions

Life expectancy is based on the Fund's VitaCurves with improvements in line with the CMI 2013 model, assuming the current rate of improvements has reached a peak and will converge to a long term rate of 1.25% p.a.. Based on these assumptions, the average future life expectancies at age 65 are summarised below:

	Males	Females
Current pensioners	21.8 years	24.1 years
Future pensioners (assumed to be aged 45 at the latest formal valuation)	23.8 years	26.0 years

Please note that the longevity assumptions have not changed since the previous IAS26 disclosure for the Fund.

Commutation assumptions

An allowance is included for future retirements to elect to take 50% of the maximum additional tax-free cash up to HMRC limits for pre-April 2008 service and 75% of the maximum tax-free cash for post-April 2008 service.

Sensitivity Analysis

CIPFA guidance requires the disclosure of the sensitivity of the results to the methods and assumptions used.

The sensitivities regarding the principal assumptions used to measure the liabilities are set out below:

Sensitivity to the assumptions for the year ended 31 March 2019	Approximate % increase to liabilities	Approximate monetary amount (£m)
0.5% p.a. increase in the Pension Increase Rate	8%	173
0.5% p.a. increase in the Salary Increase Rate	1%	24
0.5% p.a. decrease in the Real Discount Rate	10%	208

The principal demographic assumption is the longevity assumption. For sensitivity purposes, I estimate that a 1 year increase in life expectancy would approximately increase the liabilities by around 3-5%.

Professional notes

This paper accompanies my covering report titled 'Actuarial Valuation as at 31 March 2019 for accounting purposes'. The covering report identifies the appropriate reliances and limitations for the use of the figures in this paper, together with further details regarding the professional requirements and assumptions.

Financial Report

- Director of Finance's Responsibilities
- Appendix 1 Pension Fund Accounts and Auditor's Report

Director of Finance's Responsibilities

The financial statements are the responsibility of the Director of Finance (S151 Officer). Pension scheme regulations require that audited financial statements for each Scheme year are made available to Scheme members, beneficiaries and certain other parties, which:

"show a true and fair view of the financial transactions of the Scheme during the Scheme year and of the amount and disposition at the end of that year of the assets and liabilities, other than liabilities to pay pensions and benefits after the end of the Scheme year, in accordance with the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom".

The Director of Finance has supervised the preparation of the financial statements and has, agreed suitable accounting policies, to be applied consistently, making any estimates and judgments on a prudent and reasonable basis.

The Director of Finance is also responsible for making available certain other information about the Scheme in the form of an Annual Report.

The Director of Finance is responsible for ensuring that records are kept in respect of contributions received in respect of any active member of the Scheme and for monitoring whether contributions are made to the Scheme by the Administering Authority and other participating scheme employers by the due dates.

The Director of Finance is responsible for the maintenance and integrity of the financial information of the Scheme included on the Authority's website. Legislation in the United Kingdom governing the preparation and dissemination of the financial statements may differ from legislation in other jurisdictions.

The Director of Finance also has a general responsibility for ensuring that adequate accounting records are kept and for taking such steps as are reasonably open to them to safeguard the assets of the Scheme and to prevent and detect fraud and other irregularities, including the maintenance of an appropriate system of internal control.

Statement of the Director of Finance

I certify that the financial statements set out in Appendix 1 have been prepared in accordance with the accounting policies set out below and give a true and fair view of the financial position of the Pension Fund at the reporting date and of its expenditure and income for the year ended 31st March 2019.

Jon Warlow, CPFA
Director of Finance (S151 Officer)

Appendix 1

INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF THE LONDON BOROUGH OF HARINGEY

Opinion on pension fund financial statements

We have audited the pension fund financial statements of London Borough of Haringey ("the pension fund") for the year ended 31 March 2019 which comprise the fund account, the net assets statement and notes to the pension fund financial statements, including a summary of significant accounting policies. The framework that has been applied in the preparation of the pension fund financial statements is applicable law and the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2018/19.

In our opinion the pension fund financial statements:

- give a true and fair view of the financial transactions of the pension fund during the year ended 31 March 2019 and the amount and disposition of the fund's assets and liabilities as at 31 March 2019, other than the liabilities to pay pensions and other benefits after the end of the scheme year; and
- have been properly prepared in accordance with applicable law and the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2018/19.

Basis for opinion on the financial statements

We conducted our audit in accordance with International Standards on Auditing (UK) (ISAs (UK)), the Code of Audit Practice issued by the National Audit Office in April 2015 ("Code of Audit Practice") and applicable law. Our responsibilities under ISAs (UK) are further described in the Auditor's responsibilities for the audit of the financial statements section of our report. We are independent of the pension fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in the UK, including the Financial Reporting Council's Ethical Standard, and we have fulfilled our other ethical

responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

We have nothing to report in respect of the following matters in relation to which the ISAs (UK) require us to report to you where:

- the Chief Financial Officer's use of the going concern basis of accounting in the preparation of the financial statements is not appropriate; or
- the Chief Financial Officer has not disclosed in the financial statements any
 identified material uncertainties that may cast significant doubt about the
 pension fund's ability to continue to adopt the going concern basis of
 accounting for a period of at least twelve months from the date when the
 financial statements are authorised for issue.

Other information

The Chief Financial Officer is responsible for the other information. The other information comprises the Narrative report together with all other information included in the Statement of Accounts, other than the pension fund financial statements and our auditor's report thereon. Our opinion on the pension fund financial statements does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

In connection with our audit of the pension fund financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the pension fund financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the pension fund financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of the Chief Financial Officer and London Borough of Haringey ("the Council") as administering authority of the pension fund

As explained more fully in the Statement of the Chief Financial Officer's Responsibilities, the Chief Financial Officer is responsible for the preparation of the Statement of Accounts, which comprises the pension fund financial statements, in accordance with proper practices as set out in the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the United Kingdom, and for being satisfied that the financial statements give a true and fair view.

In preparing the pension fund financial statements, the Chief Financial Officer is responsible for assessing the pension fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Council intends to wind up the scheme or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

In respect of our audit of the pension fund financial statements our objectives are to obtain reasonable assurance about whether the pension fund financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (UK) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located at the Financial Reporting Council's website at: https://www.frc.org.uk/auditorsresponsibilities. This description forms part of our auditor's report.

Use of our report

This report is made solely to the members of London Borough of Haringey, as a body, in accordance with part 5 of the Local Audit and Accountability Act 2014 and as set out in the Responsibilities of the Audited Body and Responsibility of the Auditor within Chapter 2 of the Code of Audit Practice published by the National Audit Office in April 2015. Our audit work has been undertaken so that we might state to the members of the Council those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Council and the Council's members, as a body, for our audit work, for this report, or for the opinions we have formed.

Notes to the Haringey Pension Fund Accounts for the year ended 31st March 2019

1. Description of the fund and effect of any changes during the period

Introduction

Haringey Local Government Pension Fund is part of the Local Government Pension Scheme and is administered by Haringey Council. The Council is the reporting entity for this pension fund. However, the Fund is separately managed by the Council acting in its role as Administering Authority and its accounts are separate from the Council's accounts. The following description of the fund is for summary only. For more detail, reference should be made to Haringey Annual Pension Fund Report and Accounts.

The financial statements have been prepared in accordance with the Public Service Pensions Act 2013 (as amended) and Local Government Pension Scheme Regulations and with the guidelines set out in the *Code of Practice on Local Authority Accounting in the UK 2017/18*, which is based on International Financial Reporting Standards as amended for the UK public sector. The fund is administered in accordance with the following secondary legislation:

- The Local Government Pension Scheme Regulations 2013 (as amended)
- The Local Government Pension Scheme (Transitional Provisions, Savings and Amendment) Regulations 2014 (as amended)
- The Local Government Pension Scheme (Management and Investment of Funds) Regulations 2016

The Net Asset Statement sets out the assets and liabilities for the

Fund as at 31st March 2019.

Investments and Statement of Investment Principles

The Pension Fund's investment strategy is formulated within the parameters of the Local Government Pension Scheme (Management and Investment of Funds) Regulations 2016.

The Pensions Committee and Board is responsible for setting investment strategy with the aid of independent advice from the Pension Fund's advisers. Day to day investment decisions are delegated to fund managers.

The strategy is set out in detail in the Investment Strategy Statement (ISS), (previously the Statement of Investment Principles), which is published in the Pension Fund Annual Report. The ISS is regularly updated to reflect any changes made to investment management arrangements and reports the extent of compliance with the Myners principles of investment. All investments are externally managed, with the exception of a small allocation of cash required for the payment of benefits, which is managed internally. The Fund made no significant changes to its Investment Strategy in 2018/19.

Fund administration and membership

At 31st March 2019, there were 6,445 (2018: 6,716) active fund memberships with employees contributing to the Fund and 7,794 (2018: 7,742) pensioner and dependent memberships with individuals receiving benefits. There were also 8,733 (2018: 8,719) deferred pensioner memberships. Some individuals have multiple memberships due to having had multiple contracts of employment with fund employers.

Employees in the following organisations, in addition to Council staff contribute to and accordingly benefit from the fund.

Transferee Admission Bodies:

- Cofely Workplace Limited
- Fusion Lifestyle
- Veolia Environmental Services (UK) PLC
- Lunchtime UK Limited (nine school contracts)
- ABM (two school contracts)
- Caterlink (three school contracts)
- Absolutely Catering
- Cooperscroft Care Home
- ISS Catering
- K M Cleaning
- London Academy of Excellence Tottenham (formerly known as Tottenham UTC)
- Amey Community Limited
- Pabulum (nine school contracts)
- Hillcrest Cleaning (two school contracts)
- Ategi Ltd
- Hertfordshire Catering Ltd
- Haringey Education Partnership

Community Admission Bodies:

- Alexandra Palace Trading Co Limited
- Haringey Citizens Advice Bureau

Scheduled Bodies:

- Homes for Haringey
- Greig City Academy
- Fortismere School
- Alexandra Park Academy
- Woodside Academy
- Eden Free School
- Harris Academy Coleraine
- Harris Academy Philip Lane
- AET Trinity Primary

- AET Noel Park
- Haringey 6th Form Centre
- St Paul's & All Hallows Infant Academy
- St Paul's & All Hallows Junior Academy
- St Michael's Academy
- St Ann CE Academy
- Holy Trinity CE Academy
- Heartlands High School
- St Thomas More RC Academy
- Brook House Primary
- Millbrook Primary School
- Harris Academy Tottenham
- The Octagon
- Dukes Aldridge Academy
- The Grove School

Scheduled bodies are public bodies required by law to participate in the LGPS. Admitted bodies are in the LGPS either because services have been outsourced or because they have sufficient links with the Council to be regarded as having a community interest.

The College of Haringey, Enfield & North East London was previously a scheduled body participating in the fund, however, it merged with another larger college and transferred from Haringey Fund in November 2018.

Description of the Fund

The Fund is a defined benefit scheme and was established on 1st April 1965 to provide retirement pensions and lump sum allowances, survivor dependants' and death benefits to all eligible employees of Haringey Council. Certain other organisations also participate in the Fund and details of these are set out above. The Fund's income is derived contributions from employees, contributions from employing

organisations and income from investments.

Haringey Council in its role as Administering Authority has delegated responsibility for administering the Pension Scheme to the Pensions Committee and Board. Details of the individuals who served on the Pensions Committee and Board during 2018/19 are shown below.

The terms of reference for Pensions Committee and Board are set out in the Council's constitution. The Committee and Board consists of six elected Councillors and four employer and employee representatives, (one of which was vacant in 2018/19). Councillors are selected by their respective political groups and their appointment is confirmed at a meeting of the full Council. Councillors are not appointed for a fixed term but the membership is reviewed regularly, normally annually, by the political groups. The membership of the Committee and Board during the 2018/19 year was:

Cllr Matt White - Chair
Cllr John Bevan - Vice Chair
Cllr Khaled Moyeed - Member
Cllr Kaushika Amin - Member
Cllr Viv Ross - Member
Cllr Paul Dennison - Member

Randy Plowright - Employee representative Ishmael Owarish - Employee representative Keith Brown - Employer representative

2. Basis of Preparation

The statement of accounts summarises the fund's transactions for the 2018/19 financial year and its position at year-end as at 31st March 2019. The accounts have been prepared in accordance with the Code of Practice on Local Authority Accounting in the United Kingdom 2018/19, which is based upon International Financial Reporting Standards (IFRS), as amended for the UK public sector. The accounts summarise the transactions of the fund and report on the net assets available to pay pension benefits. The accounts do not take account of obligations to pay pensions and benefits which fall due after the end of the financial year.

3. Significant accounting policies

The principal accounting policies of the Fund are set out below.

Contributions

Employer future service contributions and employee contributions are included on an accruals basis relating to wages and salaries payable for the financial year. Employer past service deficit costs are included on an accruals basis based on the year to which they are payable. Employers' capital cost payments are also accounted for on an accruals basis relating to the period in which the liability arises.

Transfers in and out

Transfers in and out are accounted for on a cash basis whenever the transfer value is paid or received.

Investment income

Interest on cash and short term deposits is accounted for on an accruals basis. Distributions from equity and bond pooled funds are recognised on the date of payment. Distributions from property unit trusts are shown on an accruals basis by reference to the ex-dividend date. Income retained within pooled funds is accounted for as part of the change in the market value of investments posted to the fund account. Interest is recognised on an effective interest rate basis.

Benefits

Benefits are shown on an accruals basis relating to the date on which

they become payable.

Taxation

The Fund is exempt from UK income tax on interest received and capital gains tax on the proceeds of investments sold. Income from overseas investments suffers withholding tax in the country of origin, unless exemption is permitted. Irrecoverable tax is accounted for as an expense as it arises.

Management expenses

Administrative, governance and oversight expenses are shown on an accruals basis. A proportion of relevant Council officers' time, including related on-costs, has been charged to the Fund on the basis of actual time spent on scheme administration and investment related matters. Up front charges paid to HMRC in respect of scheme members breaching the Pensions Lifetime allowance are disclosed under administrative expenses.

Fund managers' fees are based on the market values of the portfolios under management. Where managers invest in in-house investment vehicles, e.g. unit trusts where management fees are covered in the price of the units, the market value of such holdings are deducted from the portfolio value before calculating chargeable fees. All the investment management expenses are shown on an accruals basis.

Financial assets and liabilities

Financial assets and liabilities are included in the net assets statement and carried at fair value or amortised cost on the reporting date. A financial asset or liability is recognised in the net assets statement on the date the fund became party to the contractual acquisition of the asset or party to the liability. From this date any gains or losses from changes in the fair value of the asset or liability are recognised by the Fund. See note 16 for further detail including the valuation methodology for different investments.

The value of these holdings is based on the Fund's share of the net assets in the private equity fund or limited partnership using the latest financial statements published by the respective fund managers adjusted for draw-downs paid and distributions received in the period from the date of the private equity financial statements to 31st March 2019. Infrastructure holdings are valued by third parties appointed by the fund manager using mark to market modelling.

The valuation of securities denominated in overseas currencies is calculated by using the overseas bid or mid price current at the year-end date and the exchange rate for the appropriate currency at the year-end to express the value as a sterling equivalent.

Foreign currency transaction

Dividends, interest and purchases and sales of investments in foreign currencies have been accounted for at the spot market rates at the date of transaction. End-of-year spot market exchange rates are used to value cash balances held in foreign currency bank accounts, market values of overseas investments and purchases and sales outstanding at the end of the reporting period.

Cash and Cash Equivalents

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of not more than 24 hours.

Cash equivalents are investments that mature in no more than a three month period from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value. These are used in the day-to-day cash management of the Fund.

Actuarial Present Value of Promised Retirement Benefits

The actuarial present value of promised retirement benefits is assessed on a triennial basis by the scheme actuary and a roll

forward approximation is applied in the intervening years. This is done in accordance with the requirements of IAS 19 and relevant actuarial standards.

As permitted under IAS 26 and CIPFA guidance, the Fund has opted to disclose the actuarial present value of promised retirement benefits as an annex to the financial statements, however a brief summary of this is also included as note 20 in these accounts.

Additional Voluntary Contributions ("AVCs")

Members of the Fund are able to make AVCs in addition to their normal contributions. The related assets are invested separately from the main fund, and in accordance with the Local Government Pension Scheme (Management and Investment of Funds) Regulations 2016, are not accounted for within the financial statements. If on retirement members opt to enhance their Scheme benefits using their AVC funds, the amounts returned to the Scheme by the AVC providers are disclosed within transfers-in.

Further details about the AVC arrangements are disclosed in note 23 to the financial statements.

Post Balance Sheet Events

Events after the Balance Sheet date are those events, both favourable and unfavourable, that occur between the end of the reporting period and the date when the Statement of Accounts is authorised for issue. Two types of events can be identified:

- a) Those that provide evidence of conditions that existed at the end of the reporting period – the Statement of Accounts is adjusted to reflect such events; and
- b) Those that are indicative of conditions that arose after the reporting period the financial statements are not adjusted to reflect such events but where a category of events would have a material effect disclosure is made in the notes of the nature of the events and their estimated financial effect.

Events taking place after the date of authorisation for issue are not reflected in the Statement of Accounts.

The Fund will only usually disclose items where they are considered material.

4. Critical judgements in applying accounting policies

There are two areas in the accounts where critical judgements are applied which are materially significant to the accounts:

Private Equity valuations – the value of the Fund's private equity holdings is calculated by the General Partners of the Private Equity Fund using valuations provided by the underlying partnerships. The variety of valuation bases adopted and quality of management data of the underlying investments in the partnership means that there are inherent difficulties in determining the value of these investments. Given the long term nature of these investments, amounts realised on the sale of these investments may differ from the values reflected in these financial statements and the difference may be material. Further detail is given in note 16.

Actuarial present value of promised retirement benefits – the liability to pay pensions is based on a significant number of assumptions including the discount rate, mortality rates and expected returns on fund assets. The liability is calculated by the Fund's qualified Actuary on a three yearly basis with annual updates in the intervening years. The three yearly triennial valuation provides the basis for setting employer contributions for the following three year period. The Actuary has advised that this has provided a reasonable estimate of the actuarial present value of promised retirement benefits. Further detail is given in Annex 1 to these accounts.

5. Assumptions made about the future and other major sources of estimation uncertainty

Items	Uncertainties	Effect if actual results differ from assumptions
Actuarial Present Value of promised retirement benefits	Estimation of the net liability to pay pensions depends on a number of complex judgments relating to the discount rate used, the rate at which salaries are projected to increase, changes in retirement ages, mortality rates, Pension increase and expected returns on pension fund assets. A firm of consulting actuaries is engaged to provide the fund with expert advice about assumptions to be applied.	The effects on the net pension liability of changes in individual assumptions can be measured. For instance: - 0.5% decrease in the discount rate would result in a increase in the pension liability of £208m (10%) - 0.5% increase in assumed salary earnings would increase the value of the liabilities by approximately £24m (1%) - 0.5% increase in assumed pension inflation would increase the value of liabilities by approximately £173m (8%)
Private Equity	Private Equity investments are valued at fair value in accordance with international Private Equity and Venture Capital Guidelines. These assets are not publicly listed, and as such there is a degree of estimation.	The total private equity investments in the financial statements are £90m. There is a risk that this may be over or understated. Further detail is shown in Note 16 regarding the sensitivity of this valuation.

6. Events after the reporting date

The McCloud case relates to age discrimination in the judges public sector pension scheme, this ruling will be applicable to all other public sector schemes, including the LGPS and Haringey Pension Fund. When the public service pension schemes moved from final salary benefit structures to career average revalued earnings (CARE), members approaching retirement were given protected benefits, which has been challenged due to the differential treatment based on the age of members in the scheme. The Government appealed this ruling in relation to the judges scheme, however, permission to appeal was denied, and remedy has yet to be determined by the courts. This has the potential to increase the liabilities in any of the public service pension schemes, potentially increasing the costs for employers, and worsening the funding positions of employers who participate in the fund. The precise size and scale of such liabilities are as yet unknown, as the remedy to McCloud is likely to be highly complex. This is a source of uncertainty nationally and could take years to clarify. The Fund's Officers will follow developments closely. An estimate for the impact of McCloud is included within the actuarial disclosures within these accounts.

7. Contributions receivable

2018/19		2017/18
£000	By category	£000
9,619	Employee contributions	9,386
	Employer contributions	
24,392	- Normal contributions	23,625
9,488	- Deficit recovery contributions	10,267
695	 Augmentation contributions 	1,177
34,575	Total employers' contributions	35,069
44,194	Total	44,455

2018/19		2017/18
£000	By authority	£000
33,789	 Administering authority 	33,069
9,549	- Scheduled bodies	10,530
856	- Admitted bodies	856
44,194	Total	44,455

8. Transfers in from other pension funds

There were transfers in to the Pension Fund during 2018/19 of £3.738 million (£5.436 million in 2017/18) and these all related to individuals.

9. Benefits payable

2018/19		2017/18
£000	By category	£000
40,446	- Pensions	39,088
7,916	- Commutation and lump sum retirement benefits	8,309
1,412	- Lump sum death benefits	1,748
49,774	Total	49,145

2018/19		2017/18
£000	By authority	£000
45,47	3 - Administering authority	44,536
3,06	- Scheduled bodies	3,488
1,23	- Admitted bodies	1,121
49,77	74 Total	49,145

10. Payments to and on account of leavers

2018/19		2017/18
£000		£000
92	Refunds to members leaving service	87
40,436	Bulk Transfers	0
3,881	Individual transfers	6,334
44,409	Total	6,421

For further details regarding the bulk transfer above refer to Note 1.

11. Management expenses

2018/19		2017/18
£000		£000
1,306	Administrative costs	1,335
5,814	Investment management expenses	5,457
328	Oversight and governance costs	332
7,448	Total	7,124

This analysis of the costs of managing the Haringey Pension Fund during the period has been prepared in accordance with CIPFA guidance. The oversight and governance costs category includes £16k for external audit fees in 2018/19 (£21k in 2017/18).

2018/19		2017/18
£000		£000
5,590	Management Fees	4,605
0	Performance Related Fees	0
71	Custody fees	57
154	Transaction Fees	795
5,815	Total	5,457

12. Investment income

2018/19		2017/18
£000		£000
7,200	Pooled investments - unit trusts and other managed funds	5,836
36	Interest on cash deposits	17
7,236	Total	5,853

13. Taxes on income

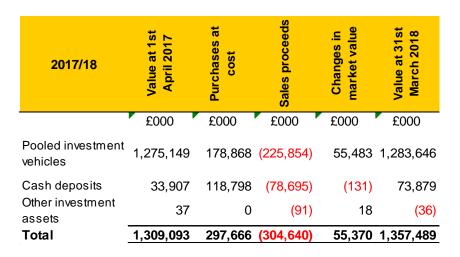

The income tax shown on the face of the Pension Fund Account relates to withholding tax (pooled).

14. Investments

14a. Reconciliation of movements in investment assets and liabilities

The changes in market value during the year comprise all increases and decreases in the market value of investments held at any time during the year, including profits and losses realised on sales of investments during the year.

2018/19	Value at 1st April 2018	Purchases at cost	Sales proceeds	Changes in market value	Value at 31st March 2019
	£000	£000	£000	£000	£000
Pooled investment vehicles	1,283,646	153,682	(149,748)	73,162	1,360,742
Cash deposits	73,879	49,025	(104,755)	235	18,384
Other investment assets/liabilities	(36)	5,140	(1)	(60)	5,043
Total	1,357,489	207,847	(254,504)	73,337	1,384,168

14b. Analysis of investments

15. Analysis of derivatives

The fund does not hold any derivatives at 31st March 2019.

16. Fair Value Hierarchy

The basis of the valuation of each class of investment asset is set out below. There has been no change in the valuation techniques used during the year. All assets have been valued using fair value techniques, which represent the highest and best price available at the reporting date.

Description of asset		Basis of Valuation	Observable and	Key sensitivities
			unobservable inputs	
Pooled equity and index linked gilts (unitised insurance policies)	Level 2	Published bid market price at end of the accounting period	NAV per share	Not Required
Pooled multi asset credit fund (other managed funds)	Level 2	Published bid market price at end of the accounting period	NAV per share	Not Required
Pooled multi asset absolute return fund (other managed funds)	Level 2	Published bid market price at end of the accounting period	NAV per share	Not Required
Infrastructure Debt (other managed funds)	Level 2	Most recent valuation	NAV published, cashflow transactions, i.e. distributions or capital calls	Not Required

Description of asset	Valuation Hierarchy		Observable and unobservable inputs	Key sensitivities affecting the valuations provided
Pooled UK property unit trusts	Level 3	Most recent published NAV updated for cashflow transactions to the end of the accounting period	transactions, i.e.	Valuations could be affected by material events between the date of the financial statements fund's own reporting date, and by differences between audited and unaudited accounts. Valuations of underlying property assets.

Description of asset	Valuation Hierarchy	Basis of Valuation	Observable and unobservable inputs	Key sensitivities affecting the valuations provided
Private Equity	Level 3	Most recent valuations updated for cashflow transactions and foreign exchange movements to the end of the accounting period. The Market approach may be used in some circumstance s for the valuation of underlying assets by the fund manager.	approach valuations: taking into account actual observed	Valuations could be affected by material events between the date of the financial statements provided and the pension fund's own reporting date, and by differences between audited and unaudited accounts

Sensitivity of assets valued at level 3

Having analysed historical data, current market trends and information received regarding the valuation techniques of the fund managers, the fund has determined that the valuation methods described above are likely to be accurate to within the following ranges, and has set out below the consequent potential impact on the closing value of investments held at 31 March 2019.

Asset	Assessed Valuation Range +/-	Valuation as at 31/03/2019	Value on Increase	Value on Decrease
		£000	£000	£000
Pooled UK property				
unit trusts	2%	96,717	98,652	94,783
Private Equity	5%	90,403	94,923	85,882
		187,120	193,574	180,666

16a. Fair Value Hierarchy

Asset and liability valuations have been classified into three levels, according to the quality and reliability of information used to determine fair values. Transfers between levels are recognised in the year in which they occur. Criteria utilised in the instrument classifications are detailed below.

Level 1

Financial instruments at Level 1 are those where the fair values are derived from unadjusted quoted prices in active markets for identical assets or liabilities. Products classified as level 1 comprise quoted equities, quoted fixed securities, quoted index linked securities and unit trusts.

Listed investments are shown at bid prices. The bid value of the investment is based on the bid market quotation of the relevant stock exchange. Cash and short term investment debtors and creditors are classified as level 1.

Level 2

Financial instruments at level 2 are those where quoted market prices are not available; for example, where an investment is traded in a market that is not considered to be active, or where valuation techniques are used to determine fair value and where these techniques use inputs that are based significantly on observable market data.

Level 3

Financial instruments at Level 3 are those where at least one input that could have a significant effect on the instrument's valuation is not based on observable market data. Such instruments would include unquoted equity investments (private equity), and hedge fund of funds, which are valued using various valuation techniques that require significant judgement in determining appropriate assumptions.

The following table provides an analysis of the financial assets and liabilities of the pension fund grouped into levels 1 to 3, based on the level at which the fair value is observable. The figures below do not include the cash holdings of the fund.

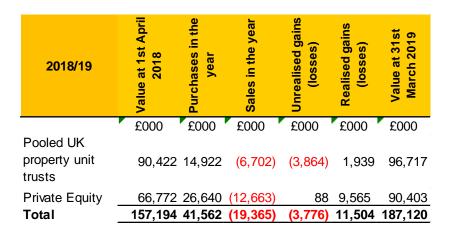

Values as at 31/03/19	Quoted market price Level 1	Using observable inputs	With significant unobservable inputs Level 3	Total
	£000	£000	£000	£000
Financial assets / liabilities at fair value through profit and loss	5,042	1,173,623	187,120	1,365,784
Total	5,042	1,173,623	187,120	1,365,784

Values as at 31/03/18	Quoted market price	Using observable inputs	With significant unobservable inputs	Total
	Level 1	Level 2	Level 3	
	£000	£000	£000	£000
Financial assets at fair value through profit and loss	(36)	1,126,451	157,194	1,283,610
Total	(36)	1,126,451	157,194	1,283,610

16b. Transfers between Levels 1 and 2

There were no transfers between levels 1 and 2 during the year.

16c. Reconciliation of fair value measurements within level 3

17. Financial Instruments

17a. Classification of financial instruments

The majority of the Fund's financial assets and liabilities are classified as "fair value through profit and loss". This means that the assets can be exchanged between parties at a market price. The Accounting Policies describe how fair value is measured. Assets which have fixed payments and are not quoted in an active market are classified as "Loans and Receivables" at amortised cost. The only financial assets in this class held by the Fund are cash deposits and debtors. Creditors to the Fund are classified as financial liabilities at amortised cost because they are not held for trading.

31/03/2019		31/03/2018 Carrying
Carrying Value	Name of holding	Value
Value		restated
£000		£000
	Long Term Investments	
150	- London CIV	150
150		150
	Financial assets or liabilities at	
	fair value through profit or loss

5,042	- Other investment balances	(36)
1,365,785		1,283,610
	Financial assets at amortised cost	
18,383	- Cash deposits	73,879
822	- Debtors	944
19,205		74,823
	Financial liabilities at amortised	
	cost	
(2,373)	- Creditors	(2,636)
0	- Cash overdrawn	(44)
(2,373)		(2,680)
1,382,767	Net Assets	1,355,903

The carrying values shown above are the same as the fair value for each line.

17b. Net gains and losses on financial instruments

2018/19		2017/18	
£000		£000	
	Financial Assets		
73,162	Fair value through profit or loss	55,48	3
174	Financial assets and liabilities at amortised cost	(113	3)
73,336		55,37	0

The Fund has not entered into any financial guarantees that are required to be accounted for as financial instruments.

18. Nature and extent of risks arising from Financial Instruments

The Pension Fund's investment objective is to achieve a return on Fund assets, which is sufficient, over the long term, to fully meet the cost of benefits and to ensure stability of employer's contribution rates. Achieving the investment objectives requires a high allocation to growth assets in order to improve the funding level, although this leads to a potential higher volatility of future funding levels and therefore contribution rates.

a) Management of risk

The Pension Fund is invested in a range of different types of asset – equities, bonds, property, private equity and cash. This is done in line with the Local Government Pension Scheme Management and Investment of Funds Regulations 2016, which require pension funds to invest any monies not immediately required to pay benefits. These regulations require the formulation of an Investment Strategy Statement which sets out the Fund's approach to investment including the management of risk. The latest version is attached to the Pension Fund Annual Report and Accounts.

The majority of the Pension Fund's assets are managed by external fund managers and they are required to provide an audited internal

controls report regularly to the Council which sets out how they ensure the Fund's assets are safeguarded against loss and misstatement.

The listed equity and index linked portfolios held within pooled investment vehicles, representing 66% of the fund's investment strategy (this mandate is currently overweight in actual terms as newer investment mandates are funded from the passive portfolios), are managed on a passive basis to minimise the volatility of returns compared with market indices and to reduce the fees and governance requirements.

b) Market price risk

The key risk for the Pension Fund is market risk, which is the risk that the values of the investments fluctuate due to changes in market prices. The majority of the Fund is invested in pooled funds with underlying assets which can fluctuate on a daily basis as market prices change e.g. equities and bonds. To demonstrate the impact of this volatility, the table below shows the impact of potential price changes based on the observed historical volatility of asset class returns. The potential volatilities are consistent with a one standard deviation movement in the change in value of the assets over the last three years.

As at 31/03/2019	Value	% change	Value on increase	Value on decrease
	£000	%	£000	£000
UK equities	0	12.6	0	0
Overseas equities	655,353	15.1	754,101	556,604
UK bonds	195,855	11.1	217,682	174,028
Cash	18,384	0.0	18,384	18,384
Property	96,717	4.2	100,766	92,669
Alternatives	417,859	8.7	454,368	381,350
Total Assets	1,384,168		1,545,301	1,223,035

As at 31/03/2018	Value	% change	Value on increase	Value on decrease
	£000	%	£000	£000
UK equities	91,011	13.9	103,682	78,340
Overseas equities	621,877	18.3	735,617	508,137
UK bonds	185,249	12.0	207,428	163,070
Cash	73,879	0.0	73,879	73,879
Property	90,383	4.6	94,551	86,215
Alternatives	295,090	8.4	319,824	270,356
Total Assets	1,357,489		1,534,981	1,179,997

A number of controls have been put in place to minimise this risk. A key method to reduce risk is to diversify the Pension Fund's investments. This is achieved through the setting of a benchmark, which incorporates a wide range of asset classes and geographical areas. Nine investment managers have been appointed to further diversify the Pension Fund's investments and lower risk. Funds had been invested with eight of these fund managers as at 31st March 2019.

In addition to diversification, parameters have been set for the investment managers to work within to ensure that the risk of volatility and deviation from the benchmark are within controlled levels.

Investment values and performance of the fund managers is measured on a quarterly basis through reporting to Pensions Committee and Board

c) Exchange rate risk

The Pension Fund holds assets in currencies other than sterling, which made up 62% of the Fund value on 31st March 2019, equivalent to £877 million (2017/18: £761 million). These arise from passive pooled equities, private equity, property and cash. From 2017/18 going forwards, foreign currency exposures are hedged in the equity asset class only, via the purchase of units in hedged versions of index tracking funds.

The main non-sterling currency exposures at 31st March 2019 was the US dollar. Other major exposures were the Euro, and Asian and emerging market countries.

There is a risk that due to exchange rate movements the sterling equivalent value of the investments falls. The Fund acknowledges that adverse foreign currency movements relative to Sterling can reduce the value of the fund's investment portfolio. The table below demonstrates the potential value of the fund's investments based on positive or adverse currency movements by 10%.

As at 31/03/2019	Value	%	Value on	Value on
710 41 017 007 2010	Value	change	increase	decrease
	£000	%	£000	£000
Overseas equities	655,353	10.0	720,888	589,818
Multi-sector credit	126,935	10.0	139,629	114,242
Private equity	90,401	10.0	99,441	81,361
Cash	4,017	10.0	4,419	3,615
Total Assets	876,706	10.0	964,377	789,035

As at 31/03/2018	Value	%	Value on	Value on
As at 31/03/2018	Value	change	increase	decrease
	£000	%	£000	£000
Overseas equities	621,877	10.0	684,065	559,689
Multi-sector credit	92,564	10.0	101,820	83,308
Private equity	38,198	10.0	42,018	34,378
Cash	8,174	10.0	8,991	7,356
Total Assets	760,813	10.0	836,894	684,731

The cash balances managed internally are only permitted to be in sterling.

d) Interest Rate risk

Movements in interest rates affect the income earned by the Fund and can have an impact on the value of net assets. To demonstrate this risk, the table below shows the impact on income earned of a 1%

increase and decrease in interest rates.

	Interest earned 2018/19	Interest rate if 1% higher	
	£000	£000	£000
Cash deposits	36	6 178	(107)
Total	30	6 178	(107)
	Interest earned 2017/18	Interest rate if 1% higher	
	£000	£000	£000
Cash deposits	1	7 86	(52)
Total	1	7 86	(52)

e) Credit risk and counterparty risk

Credit risk is the risk a counterparty fails to fulfil a transaction it has committed to entering into. This risk is particularly relevant to the Council's non-sovereign bonds (including those held in pooled funds) and cash investments.

The Investment Management Agreements the Council has signed with the external fund managers set out limits on the types of bonds the fund managers can purchase for the Fund in order to limit the possibility of default. The table below shows the split of the bond investments by credit rating at 31st March 2019 and 31st March 2018. The majority of bonds (2019: £196 million, 2018 £185m) are UK Government index linked, with the balance being corporate bonds. The UK Government has an AA+ credit rating.

	Market value 31/03/2019	AA	Α	BBB	Below BBB
	£000	%	%	%	%
Bond exposure in pooled investment vehicles	322,790	61	3	2	34
Total / Weighted Average	322,790	61	3	2	34

	Market value 31/03/2018	AA	Α	BBB	Below BBB
	£000	%	%	%	%
Bond exposure in pooled investment vehicles	277,813	67	2	2	29
Total / Weighted Average	277,813	67	2	2	29

The cash that the Council manages internally on behalf of the Pension Fund is invested in line with the Council's Treasury Management Strategy, which sets out very strict limits on the counterparties which can be used and the amounts that can be invested with them. The amount of cash held by fund managers is kept to a minimum and when held for a period of time is invested in the custodian bank's AAAm rated money market fund. The table below details the credit ratings of the institutions the cash was held with.

31/03/	2019		31/03/2018	
Exposure	Credit rating		Exposure	Credit rating
£000			£000	
11,133	AA-	Northern Trust	66,287	AA-
5	Α	Barclays Bank Plc	3,147	Α
7,245	AAAm	Money Market Funds	4,445	AAAm
18,384			73,879	

The limits for cash is kept under constant review to be able to respond quickly to changes in the creditworthiness of counterparties which may increase risk.

f) Liquidity risk

Liquidity risk is the risk that monies are not available to meet the Pension Fund's obligation to pay pension benefits on time. Maintaining a level of internally managed cash balances enables the Pension Fund to ensure liquidity is not an issue. All of the internally managed cash held on 31st March 2019 was in money market funds and bank accounts with the main bank or custodian, ensuring cash is available as required. Monitoring of the cashflow position daily assists with maintaining this position.

The majority of the Council's non cash investments are in pooled funds whose underlying holdings are listed equities or bonds. These funds have regular (at least monthly) trade dates, which ensure it is possible to realise the investments easily if necessary.

19. Funding Arrangements

In line with the Local Government Pension Scheme Regulations 2013, the fund's actuary undertakes a funding valuation every three years for the purpose of setting employer contribution rates for the forthcoming triennial period. The last such valuation took place as at 31st March 2016. The next valuation will take place as at 31st March

2019, (this valuation will be finalised prior to 31st March 2020).

The key elements of the funding policy are:

- to ensure the long-term solvency of the fund, i.e. that sufficient funds are available to meet all pension liabilities as they fall due for payment
- to ensure that employer contribution rates are as stable as possible
- to minimise the long-term cost of the scheme by recognising the link between assets and liabilities and adopting an investment strategy that balances risk and return
- to reflect the different characteristics of employing bodies in determining contribution rates where the administering body considers it reasonable to do so
- to use reasonable measures to reduce the risk to other employers and ultimately to the tax payer from an employer defaulting on its pension obligations.

The market value of the Fund at the time of the last triennial valuation as at 31st March 2016 was £1,046 million. Against this sum liabilities were identified of £1,323 million equivalent to a funding deficit of £277 million.

The aim is to achieve 100% solvency over a period of 20 years and to provide stability in employer contribution rates by spreading any increases in rates over a period of time. Solvency is achieved when the funds held, plus future expected investments returns and future contributions, are sufficient to meet expected future pension benefits payable. When an employer's funding is less than 100% of the funding target, then a deficit recovery plan will be put in place requiring additional contributions from the employer to meet the shortfall.

At the 2016 actuarial valuation, the fund was assessed as 79% funded. This corresponds to a deficit of £277m at that time.

Contribution increases or decreases may be phased in over the three-year period ending 31 March 2020 for scheme employers, or changes may take immediate effect from 1 April 2017. The actuary agreed that the Council's contribution rate could increase by 1.5% over a three year period from April 2017, from 24.9% of pensionable salaries to 26.4% in March 2019. The actuary specified a minimum level of contributions in monetary terms to cover the past service deficit.

Individual employer's rates will vary depending on the demographic and actuarial factors particular to each employer in the Fund. Full details of contribution rates payable can be found in the 2016 actuarial valuation report.

The valuation of the fund has been undertaken using the projected unit method under which the salary increase for each member is assumed to increase until they leave active service by death, retirement or withdrawal from service. The principal assumptions were as follows.

Future assumed rates as at 31st March 2016	%
Discount rate (annual nominal return rate)	4.0
Pay increase (annual change)	2.8
Pay increase - Pension (annual change)	2.1
Retail Price Index (RPI)	3.3

^{*}An allowance is also made for promotional pay increases.

20. Actuarial present value of promised retirement benefits

In addition to the triennial funding valuation, the fund's actuary also undertakes a valuation of the pension fund liabilities, on an IAS 19 basis, every year using the same base data as the funding valuation rolled

forward to the current financial year, taking account of changes in membership numbers and updating assumptions to the current year. This valuation is not carried out on the same basis as that used for setting fund contribution rates and the fund accounts do not take account of liabilities to pay pensions and other benefits in the future. In order to assess the value of the benefits on this basis, the actuary has updated the actuarial assumptions from those used for funding purposes. The actuary has also used valued ill health and death benefits in line with IAS 19.

The figures in the below table include an allowance for the McCloud legal ruling.

31/03/19		31/03/18
£m		£m
(2,088)	Present Value of promised retirement benefits	(1,906)
1,383	Fair Value of scheme assets	1,356
(705)	Net Liability	(550)

As noted above, the liabilities above are calculated on an IAS 19 basis and therefore will differ from the results of the 2016 triennial valuation because IAS 19 stipulates a discount rate rather than a rate which reflects market rates. Please see Annex 1 to these accounts for more information.

24. Agency Services

There were no agency services provided by the fund in the year.

25. Related party transactions

Haringey Council

In 2018/19 the Pension Fund paid £0.651m to the Council for administration and legal services (£0.616 million in 2017/18). As at $31^{\rm st}$ March 2019 an amount of £0.161m was due from the Council to the Fund (£0.216 million in 2017/18).

Governance

During 2018/19 no Council members who served on the Pensions Committee and Board were also members of Haringey Pension Fund. Two of the employer and employee representatives for the Committee and Board were fund members. Committee and Board members are required to declare their interests at the beginning of each Committee meeting and as necessary during the discussion of individual items of business at Committee meetings if it becomes clear that a conflict of interest has arisen.

Key Management Personnel

The key management personnel for the fund is the Section 151 Officer for Haringey Council. The Council recharges the pension fund for a portion of this officer's costs. The post was filled by an agency staff members for the first half of 2018/19 who did not have the right to join Haringey Pension Fund, for the second half of the year the Section 151 Officer was a permanent member of staff who was a member of the fund.

26. Contingent liabilities and contractual commitments

The Fund had outstanding commitments to invest of £182.4m (£81.4m with Pantheon – Private Equity, £6.0m with Allianz – Infrastructure debt, £13.1m with Blackrock, and £31.4m with Copenhagen Infrastructure Partners and £50.0m with Aviva Property at 31st March 2019 (2018: £149.9m). The commitments relate to

outstanding call payments due in relation to the private equity, renewable energy infrastructure, property and infrastructure debt portfolios.

27. Contingent assets

Twelve admitted body employers in the Haringey Pension Fund hold insurance bonds to guard against the possibility of being unable to meet their pension obligations. These bonds are drawn in favour of the Fund and payment will only be triggered in the event of employer default.

Annex 1 to the Financial Statements

Introduction

CIPFA's Code of Practice on Local Authority Accounting 2018/19 requires Administering Authorities of LGPS funds that prepare pension fund accounts to disclose what IAS26 refers to as the actuarial present value of promised retirement benefits. I have been instructed by the Administering Authority to provide the necessary information for the London Borough of Haringey Pension Fund ("the Fund").

The actuarial present value of promised retirement benefits is to be calculated similarly to the Defined Benefit Obligation under IAS19. There are three options for its disclosure in the pension fund accounts:

- showing the figure in the Net Assets Statement, in which case it requires the statement to disclose the resulting surplus or deficit;
- as a note to the accounts; or
- by reference to this information in an accompanying actuarial report.

If an actuarial valuation has not been prepared at the date of the financial statements, IAS26 requires the most recent valuation to be used as a base and the date of the valuation disclosed. The valuation should be carried out using assumptions in line with IAS19 and not the Fund's funding assumptions.

Present value of promised retirement benefits

Present value of Promised Retirement Benefits	Year ended 31/03/2019	Year ended 31/03/2018
Active members	877	736
Deferred pensioners	568	523
Pensioners	643	647
Total	2,088	1,906

The promised retirement benefits at 31 March 2019 have been projected using a roll forward approximation from the latest formal funding valuation as at 31 March 2016. The approximation involved in the roll forward model means that the split of benefits between the three classes of member may not be reliable. However, I am satisfied that the total figure is a reasonable estimate of the actuarial present value of benefit promises.

The above figures include both vested and non-vested benefits, although the latter is assumed to have a negligible value. Further, I have not made any allowance for unfunded benefits.

It should be noted the above figures are appropriate for the Administering Authority only for preparation of the pension fund accounts. They should not be used for any other purpose (i.e. comparing against liability measures on a funding basis or a cessation basis).

Assumptions

The assumptions used are those adopted for the Administering Authority's IAS19 report and are the same as at 31 March 2019 and 31 March 2018. There is no impact from any change in the demographic and longevity assumptions because they are identical to the previous period.

Financial assumptions

Year ended	31 Mar 2019 % p.a.	31 Mar 2018 % p.a.
Inflation/Pensions Increase Rate	2.5	2.4
Salary Increase Rate	3.1	3.0
Discount Rate	2.4	2.6

Longevity assumptions

Life expectancy is based on the Fund's VitaCurves with improvements in line with the CMI 2013 model, assuming the current rate of improvements has reached a peak and will converge to long term rate of 1.25% p.a. Based on these assumptions, the average future life expectancies at age 65 are summarised below:

	Males	Females
Current Pensioners	21.8 years	24.1 years
Future Pensioners	23.8 years	26.0 years

Please note that the longevity assumptions have not changed since the previous IAS26 disclosure for the Fund.

Commutation assumptions

An allowance is included for future retirements to elect to take 50% of the maximum additional tax-free cash up to HMRC limits for pre-April 2008 service and 75% of the maximum tax-free cash for post-April 2008 service.

Sensitivity Analysis

CIPFA guidance requires the disclosure of the sensitivity of the results to the methods and assumptions used. The sensitivities regarding the principal assumptions used to measure the liabilities are set out below:

Change in assumptions for the year ended 31 March 2018	Approximate % increase to liabilities	Approximate monetary amount (£m)
0.5% decrease in discount rate	10	208
0.5% increase in salary increase rate	1	24
0.5% increase in pensions increase rate	8	173

The principal demographic assumption is the longevity assumption. For sensitivity purposes, I estimate that a 1 year increase in life expectancy would approximately increase the liabilities by around 3-5%.

Professional notes

This paper accompanies my covering report titled 'Actuarial Valuation as at 31 March 2019 for accounting purposes'. The covering report identifies the appropriate reliances and limitations for the use of the figures in this paper, together with further details regarding the professional requirements and assumptions.

Appendix 2

Governance Compliance Statement

1 Introduction

This Governance Compliance Statement document sets out how governance of the Pension Fund operates in Haringey. It is prepared in accordance with paragraph 55 of the Local Government Pension Scheme Regulations 2013 and the associated statutory guidance issued by the Department for Communities and Local Government.

The objective of the Governance Compliance Statement is to make the administration and stewardship of the scheme more transparent and accountable to the stakeholders.

2 Council delegation

Haringey Council, in its role as Administering Authority, has delegated responsibility for administering the Local Government Pension Scheme to the Pensions Committee and Board. The terms of reference for the committee were adopted by the Council in 2017, are included in the Council's constitution and are set out in the section below:

3 Terms of reference

The responsibilities for Pensions Committee and Board are set out below from the terms of reference for the committee:

- a. all the functions which are stated not to be the responsibility of The Executive in Regulation 2 and Schedule 1 paragraph H of The Local Authorities (Functions and Responsibilities) (England) Regulations 2000 (as amended) and in any Statute or subordinate legislation further amending these Regulations relating to those matters concerning the Local Government Pension Scheme.
- b. Exercising all the Council's functions as "Administering Authority" and being responsible for the management and monitoring of the Council's Pension Fund and the approval of all relevant policies and statements. This includes:
 - i. Selection, appointment and performance monitoring of investment managers, AVC scheme providers, custodians and other specialist external advisers:
 - ii. Formulation of investment, socially responsible investment and governance policies and maintaining a statement of investment principles and funding strategy statement;

- iii. Determining the allocation of investments between each asset class;
- iv. Reviewing specialist external advisers performance;
- v. Publicising statements and policy documents as required by legislation, government directives and best practice.
- c. Monitoring and as appropriate to decide upon Pensions Administration issues.
- d. Monitoring the Pension Fund Budget including Fund expenditure and actuarial valuations; and to receive the Pension Fund Budget annually.
- e. Agreeing to the admission of bodies into the Council's Pension scheme.
- f. Receiving actuarial valuations.
- g. Ensuring that members receive appropriate training to undertake their responsibilities.
- h. Approving the Annual Accounts of the Local Government Pension Scheme and consider recommendations from the Auditor.
- i. To secure, and to assist in securing compliance with:
 - i. the Regulations,
 - ii. and any other legislation relating to the governance and administration of the Scheme and any connected scheme,
 - iii. any requirements imposed by the Pensions Regulator in relation to the Scheme and any connected scheme, and
- j. To ensure, and to assist in securing the effective and efficient governance and administration of the Scheme and any connected scheme.

4 Membership of Committee

The Committee's membership is made up of six elected members of Haringey Council and two employee and two employer representatives.

5 Compliance with statutory guidance

The Council is fully compliant with the statutory guidance issued by the Department for Communities and Local Government in 2008. Annex 1 details this compliance in each area of the guidance.

6 Local Pension Board

The Local Government Pension Scheme Regulations 2013 (paragraph 53 (4)) requires the Council to establish a Local Pension Board to assist the Pensions Committee. The Council applied under paragraph 106(2) of the Local Government Pension Scheme (Amendment) (Governance) Regulations 2015 to operate a combined Board and Committee, this request was approved, and the joint Pensions Committee and Board is now fully operational.

Annex 1: Compliance with Statutory Guidance

A. Structure

- a) The management of the administration of benefits and strategic management of fund assets clearly rests with the main committee established by the appointing council.
- b) That representatives of participating LGPS employers, admitted bodies and scheme members (including pensioner and deferred members) are members of either the main or secondary committee established to underpin the work of the main committee.
- c) That where a secondary committee or panel has been established, the structure ensures effective communication across both levels.
- d) That where a secondary committee or panel has been established, at least one seat on the main committee is allocated for a member from the secondary committee or panel.

Haringey position

Fully compliant.

The terms of reference for Pensions Committee and Board are clear that administration of benefits and strategic management of fund assets are part of the remit. In addition to elected members, there are members on the Committee representing Scheduled & Admitted Bodies, Active members and Pensioners. There is no secondary committee dealing with pension issues.

B. Representation

- a) That all key stakeholders are afforded the opportunity to be represented within the main or secondary committee structure. These include:
 - i) employing authorities (including non-scheme employers, e.g. admitted bodies);
 - ii) scheme members (including deferred and pensioner scheme members);
 - iii) independent professional observers, and
 - iv) expert advisers (on an ad-hoc basis).
- b) That where lay members sit on a main or secondary committee, they are treated equally in terms of access to papers and meetings, training and are given full opportunity to contribute to the decision making process, with or without voting rights.

Haringey position

Fully compliant.

In addition to elected members, there are four employer and employee positions on the committee representing Scheduled & Admitted Bodies, Active members and Pensioners. Independent and expert advisers attend as required by the Committee. All members of the committee have equal voting rights and access to all of the same papers, meetings and training.

C. Selection and role of lay members

That committee or panel members are made fully aware of the status, role and function they are required to perform on either a main or secondary committee.

Haringey position

Fully compliant.

The terms of reference for the Pensions Committee and Board sets out the role and function of the Committee in relation to Pensions. This is supplemented by induction training offered to all new members of the Committee. Training is reported on at every meeting, members of the committee are actively encouraged to complete wider training sessions, as well as those organised for committee members prior to committee meetings.

D. Voting

The policy of individual administering authorities on voting rights is clear and transparent, including the justification for not extending voting rights to each body or group represented on main LGPS committees.

Haringey position

Fully compliant.

The policy regarding voting rights is clearly set out and all members of the Pensions Committee and Board have equal voting rights. The nature of the decision making by the committee is such that almost all decision making is done by a reached consensus among the group of committee members, rather than by voting.

E. Training, Facility time, Expenses

- a) That in relation to the way in which statutory and related decisions are taken by the administering authority, there is a clear policy on training, facility time and reimbursement of expenses in respect of members involved in the decision-making process.
- b) That where such a policy exists, it applies equally to all members of committees, subcommittees, advisory panels or any other form of secondary forum.

Haringey position

Fully compliant.

There is a clear policy on reimbursement of expenses for elected members of the Pensions Committee and Board. All members of the committee, have equal access to training.

F. Meetings (frequency/quorum)

- a) That an administering authority's main committee or committees meet at least quarterly.
- b) That an administering authority's secondary committee or panel meet at least twice a year and is synchronised with the dates when the main committee sits.
- c) That administering authorities who do not include lay members in their formal governance arrangements, provide a forum outside of those arrangements by which the interests of key stakeholders can be represented.

Haringey position

Fully compliant.

The committee meets at least four times a year (recently this has been five times per annum). Additional formal or informal e.g. training meetings or manager selection days are held when necessary.

G. Access

That subject to any rules in the Council's constitution, all members of main and secondary committees or panels have equal access to committee papers, documents and advice that falls to be considered at meetings of the main committee.

Haringey position

Fully compliant.

All members of the committee have equal access to all papers, documents and advice.

H. Scope

That administering authorities have taken steps to bring wider scheme issues within the scope of their governance arrangements.

Haringey position

Fully compliant.

The Pensions Committee and Board's terms of reference include the wide range of pension's issues – investment, funding, administration, admission and budgeting.

I. Publicity

That administering authorities have published details of their governance arrangements in such a way that stakeholders with an interest in the way in which the scheme is governed can express an interest in wanting to be part of those arrangements.

Haringey position

Fully compliant.

The Governance Compliance Statement is circulated to all employers in the Pension Fund and published on the Council's website.

Appendix 3

LONDON BOROUGH OF HARINGEY PENSION FUND

INVESTMENT STRATEGY STATEMENT

1. Introduction

Haringey Council is the Administering Authority for the Local Government Pension Scheme in the London Borough of Haringey area and as such is responsible for the investment of the Pension Fund's ("the Fund") assets. The Council has delegated this responsibility to the Pensions Committee and Board (henceforth referred to as "the Committee").

The Committee is responsible for setting the investment strategy for the Fund, appointing fund managers to implement it and monitoring the performance of the strategy. The Committee retains an independent adviser and the services of an investment Consulting firm, in addition to the advice it receives from the Chief Financial Officer and other Officers.

Stock level decisions are taken by the investment managers appointed by the Fund to implement the agreed investment strategy. These decisions are taken within the parameters set out for each manager – more details are provided in Appendix B.

The Local Government Pension Scheme (Management and Investment of Funds) Regulations 2016 requires administering authorities to formulate and to publish a statement of its investment strategy, in accordance with guidance issued from time to time by the Secretary of State.

The Investment Strategy Statement will be an important governance tool for the Fund, as well providing transparency in relation to how the Fund's investments are managed. It will be kept under review and revised from time to time in order to reflect any changes in policy.

The Committee complies with the requirements of the Myners Review of Institutional Investment, which can be found in Appendix A, alongside a review of the Fund's compliance with the principles.

Key Investment Beliefs

The key investment beliefs held by the Committee form the foundation of discussions, and assist decisions, regarding the structure of the Fund's investment policy

The Fund's key investment beliefs are set out below:

(i) Investment Governance

The Fund has the necessary skills, expertise and resources to take decisions on asset allocations, rebalancing and fund manager appointments.

Day to day investment decisions are delegated to regulated external fund managers that have appropriate skills and experience.

Investment Consultants, Independent Advisors and Officers are a source of expertise and research to inform Committee decisions.

The Committee's primary goal is the security of assets, and it will only take decisions when it is convinced that it is right to do so. In that regard, training in advance of decision making is considered a priority.

(ii) Long Term Approach

The strength of the largest employers' covenant (London Borough of Haringey) allows a longer term deficit recovery period and for the Fund to take a long term view of investment strategy.

The most important aspect of risk is not the volatility of returns but the risk of absolute loss and of not meeting the objective of facilitating low, stable contribution rates for employers.

Illiquidity and volatility are risks which offer potential sources of additional compensation to the long term investor. Moreover, it is important to avoid being a forced seller in short term markets.

Participation in economic growth is a major source of long term equity returns.

Over the long term, equities are expected to outperform other liquid assets, particularly government bonds.

Well governed companies that manage their businesses in a responsible manner will likely produce higher returns over the long term.

(iii) Appropriate Investments

Allocations to asset classes other than equities and government bonds (e.g. multi-sector credit, private equity, infrastructure and property) offer the Fund access to other forms of risk premia and provide diversification.

Diversification across asset classes and asset types is expected to reduce the volatility of the

overall Fund return.

(iv) Management Strategies

Passive management provides low cost exposure to asset class returns and is especially attractive in efficient markets, where there is limited evidence that active management can consistently generate returns (after additional costs) that exceed index benchmarks. The Committee takes the view that most equity markets are sufficiently efficient to prefer passive equity investment.

Active management will be considered in markets in which passive approaches are either impossible or where there is strong evidence that active management can add value over the long-term (for example Property and alternative investments such as Private Equity) and which are therefore suited to active management.

Active management is more expensive than passive management, and fees should be aligned to the value created in excess of the performance of the market.

Active management performance should be monitored over multi-year rolling cycles and assessed to confirm that the original investment process on appointment is being delivered and that continued appointment is appropriate.

Implementation of strategies should be consistent with the governance capabilities of the Committee.

Objectives

The primary objective of the Fund is:

• To provide for members' pension and lump sum benefits on their retirement or for their dependants benefits on death before or after retirement on a defined benefits basis.

The investment objective of the Fund is:

 To achieve a return on Fund assets that is sufficient, over the long term, to meet its funding objectives.

The Committee recognises that the investment performance of the Fund is critical as it impacts directly on the level of employer contributions that the employers are required to pay.

This statement will be reviewed by the Committee at least triennially, or more frequently should any significant change occur.

2. Investment strategy and the process for ensuring suitability of investments

The Fund's benchmark investment strategy, along with an overview of the role each asset is expected to perform is set out in the following table:

Asset class	Allocation (%)	Allowable ranges (%)	Role(s) within the strategy
Listed Equities	45.0	+/- 10.0	Aim to generate returns in excess of inflation, through exposure to the shares of domestic and overseas companies.
Multi Asset Absolute Return	7.5	+/- 6.0	Aim to generate equity like returns but with lesser volatility, via exposure to multiple asset classes, whilst diversifying the risk from market cap equity.
Private Equity	5.0	_*	Aim to generate returns in excess of inflation, through exposure to companies that are not publicly traded, whilst providing some diversification away from listed equities and bonds.
Property	12.5	_*	Aim to generate returns in excess of inflation through exposure to UK and overseas property markets, through both income and capital appreciation, whilst providing some diversification away from equities and bonds.
Conventional Property	7.5	+/- 2.5	Traditional "core" property.
Long Lease Property	5.0	+/- 2.5	Long Lease Property is a lower risk approach compared to conventional property and focuses on delivering returns by harvesting long-term, secure contractual income that will increase over time through a combination of fixed and inflation related increases.
Infrastructure Debt	3.0	_*	A low risk asset producing returns by investing in senior debt secured on infrastructure assets
Renewable Energy Infrastructure	5.0	_*	Aims to generate returns in excess of inflation, through exposure to a diversified mix of renewable energy infrastructure sectors whilst providing some diversification away from listed equities and bonds.

Multi-Sector Credit	7.0	+/- 3.0	Provides diversified exposure to global credit markets to capture both income and capital appreciation of underlying markets and securities.
UK Index-Linked Gilts	15.0	+/-3.0	Expected to produce an income stream with an explicit linkage to inflation, and interest rate sensitivity, which is expected to mitigate the impact to some extent of changes in interest rates and inflation expectation on the Fund's funding position.
Total	100.0		

^{*} Given the illiquid nature of these asset classes, there is no formal tolerance range in place. However, the Committee will closely monitor the position of the Fund over time, including these asset classes.

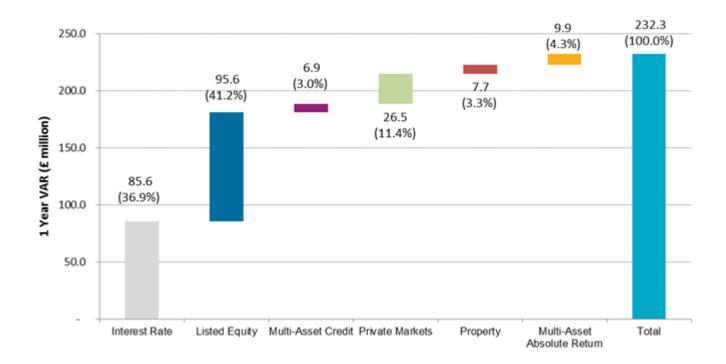

Note: Full details of the asset allocation of the Fund, including the investment managers and their respective performance benchmarks, are included in Appendix B.

3. Risk measurement and management

There are a number of risks to which any investment is exposed. The Fund's investment strategy has an inherent degree of risk which has to be taken in order to achieve the rate of return required to meet its funding objectives. The Fund has put in place a number of controls in order to manage the level of risk taken.

The benchmark the Committee has set involves a wide range of asset classes and geographical areas. This diversification aims to reduce the risk of low or negative returns to an acceptable level. As noted above, the Committee believes that active management of investments is appropriate in some asset classes, but not all. Active management introduces the risk of relative underperformance of an investment compared to its benchmark or wider market returns for that asset class. As the majority of the Fund's assets (all equities and index-linked gilts) are invested on a passive basis, the risk of underperforming the benchmark has been significantly reduced.

The following graph provides an indication of the main sources of investment risk (estimated by Mercer) relative to how the Fund's liabilities are currently valued (this is an estimate as at March 2016 and will change over time). The graph shows risk, as measured by a one year "value at risk" measure at the 5% level - in other words, if we consider a downside scenario which has a 1 in 20 chance of occurring, this would be the impact on the deficit relative to our "best estimate" of what the deficit would be in one years' time.

The following risks are recognised and considered by the Committee:

Valuation risk: the Actuarial Valuation assumes that the Fund generates an expected return equal to or in excess of the Fund's discount rate. An important risk to which the Fund is exposed is that the return is not achieved, either due to unexpected increases in the value placed on the liabilities, or if the assets do not perform as expected. This risk is reduced by the diversified investment strategy the Fund employs, through the alignment of the investment strategy with funding requirements through regular reviews, and through regular monitoring.

Longevity risk: this is the risk that the members of the Fund live longer than expected under the Actuarial Valuation assumptions. This risk is captured within the Actuarial Valuation report which is conducted at least triennially and monitored by the Committee, but any increase in longevity will only be realised over the long term.

Sponsor Covenant risk: the financial capacity and willingness of the sponsoring employers to support the Fund is a key consideration of the Committee and is reviewed on a regular basis.

Diversification risk: the Committee recognises the risks that may arise from the lack of diversification of investments. Subject to managing the risk from a mismatch of assets and liabilities, the Committee aims to ensure that the asset allocation policy results in an adequately diversified portfolio.

Liquidity risk: the Committee recognises that there is liquidity risk in holding assets that are not readily marketable and realisable. Given the Fund's long term investment horizon, the Committee believes that a degree of liquidity risk is acceptable, given the potential return. The majority of the Fund's assets are realisable at short notice.

Manager risk: the Fund's assets are invested with a number of managers to provide appropriate

diversification.

Regulatory and political risk: across all of the Fund's investments, there is the potential for adverse regulatory or political change. Regulatory risk arises from investing in a market environment where the regulatory regime may change. This may be compounded by political risk in those environments subject to unstable regimes. The Committee will attempt to invest in a manner which considers the impact of any such regulatory or political change should such a change occur.

Exchange rate risk: this risk arises from unhedged currency exposure on investments overseas. The Committee has agreed to hedge 50% of the overseas equity exposure (excluding Emerging Markets) to protect the sterling value of these investments and to reduce the volatility that arises from movements in exchange rates. Currency hedging on other assets is considered on a case of case, as appropriate.

Cashflow risk: the Fund's cashflow position is carefully monitored on a regular basis. As appropriate, positive and negative cashflows are used to help rebalance the investment policy closer into line with the target. Over time, it is expected that the size of pensioner cashflows will increase as the Fund matures and greater consideration will need to be given to raising assets to meet outgoings. The Committee recognises that this can present additional risks, particularly if there is a requirement to sell assets at inopportune times.

Governance: members of the Committee participate in regular training sessions. The Committee is aware that poor governance and, in, particular, high turnover of members may prove detrimental to the investment strategy, fund administration, liability management and corporate governance, and seek to minimise turnover where possible.

Environmental, Social and Governance: the Committee wishes to have an active influence on issues of environmental, social or governance (ESG) concern with companies in which the Fund is a shareholder. It will seek to codify its approach with Fund Managers and will use the services of specialist agencies as necessary to identify issues of concern. The Committee requires the Fund Managers to take into account the implications of substantial "extra-financial" considerations, e.g., ESG or reputational issues that could bring a particular investment decision into the public arena.

The full ESG policy of the Fund is outlined in Section 5.

4. Approach to asset pooling

The Fund has formally agreed to join the London Collective Investment Vehicle (CIV) as part of the Government's pooling agenda. The London CIV has been operational for some time and is in the process of opening a range of sub-funds covering liquid asset classes, with less liquid asset classes to follow.

The Fund will consider transitioning liquid assets (as appropriate) into the London CIV when there are suitable investment strategies that meet the asset allocation and investment strategy available on the London CIV platform.

The Fund's illiquid assets (e.g. Property, Private Equity and Infrastructure related) are expected to remain outside of the London CIV pool. The cost of exiting these strategies would have a negative financial impact on the Fund. These will be held as legacy assets until such time as they mature and proceeds re-invest through the pool assuming it has appropriate strategies available or until the Fund changes asset allocation and makes a decision not to reinvest. The Committee will regularly review the assets that it has determined should be held outside the London CIV, at least every three years, to ensure that this decision continues to demonstrate value for money.

5. Social, environmental and corporate governance policy

The Fund believes the adoption by companies of positive Environmental, Social and Governance principles can enhance their long term performance and increase their financial returns. The Fund has demonstrated this by adopting the United Nations Principles for Responsible Investment and by being a member of the Local Authority Pension Fund Forum, which undertakes engagement activity with companies on behalf of its members.

In addition, the Fund has demonstrated this by allocating one-half of its equity portfolio (excluding Emerging Markets) to a passive fund that tracks the MSCI World Low Carbon Target Index. This index aims to reduce exposure to companies with the highest carbon footprints, relative to a market capitalisation benchmark. Further, the Fund has made commitments expected to be equivalent to c. 5% of assets to two Renewable Energy mandates. These mandates will invest in infrastructure assets that are linked to the production of different forms of Renewable Energy (e.g. Wind, Solar, Tidal power). This further demonstrates the commitment of the Fund to Environmental principles. The Fund believes that further reduction in exposure to fossil fuel industries will reduce risk and secure stronger returns for the fund over the long term.

Investment managers are expected to consider responsible investment issues when voting on behalf of the Fund. However in instances where shareholder value and responsible investment conflict, the investment managers are instructed to vote for shareholder value and report these instances to the Committee. All investment managers are expected to vote in respect of all pooled funds.

The Committee has member and other stakeholder representatives who actively engage with stakeholders to ensure the Fund is aware and can respond effectively to stakeholder concerns.

Investments that deliver social impact as well as a financial return are often described as "social investments". Social investment includes a wide spectrum of investment opportunities. The Fund is consistent in the application of risk and return requirements when evaluating all investment opportunities including those that address societal challenges but generate competitive financial returns with an acceptable risk / return profile in line with the investment strategy.

6. Policy of the exercise of rights (including voting rights) attaching to investments

The Fund believes that active Stewardship can promote the long term success of companies for the benefit of stakeholders including investors.

Stewardship Code Statement

The Fund is a Tier 1 Signatory to the Financial Reporting Council UK Stewardship Code and has prepared a formal statement of compliance, which is shown below.

Statement of Compliance with the UK Stewardship code

The London Borough of Haringey Pension Fund takes the stewardship responsibilities that come with being an institutional investor very seriously. The Fund believes the adoption by companies of positive Environmental, Social and Governance principles can enhance their long term performance and increase their financial returns. The Fund has demonstrated this by adopting the United Nations Principles for Responsible Investment and by being a member of the Local Authority

Pension Fund Forum, which undertakes engagement activity with companies on behalf of its members.

The Fund has a clear commitment to stewardship and ESG that is embedded in its investment strategy, with roughly one third of developed market equity holdings allocated to a low carbon fund, and with an additional allocation to renewable energy mandates. The fund believes that a commitment to sound responsible investment principles will yield stronger returns for the fund in the long term.

Principle 1 – Institutional investors should publicly disclose their policy on how they will discharge their stewardship responsibilities.

Haringey is a member of the Local Authority Pension Fund Forum, and actively monitors voting alerts issued by LAPFF. When voting alerts are issued, we notify the relevant fund managers and request that they vote in line with the LAPFF recommendation. Whilst Haringey invests all equity holdings passively, and therefore cannot compel its equity fund manager to vote in a particular way at AGMs, we follow up on all voting alerts to monitor whether fund managers vote in line with the LAPFF recommendations. If the fund manager does not do this, a rationale for their decision is sought, and this is circulated to members of the Pensions Committee and Board (the S101 decision making body for the Haringey Pension Fund). Further to this, LAPFF voting alerts are reported on at every Pensions Committee and Board meeting to monitor how the fund managers have voted compared to LAPFF recommendations. The papers for these meetings which show how fund managers have voted, are published on the internet and are therefore made available for the beneficiaries of the fund as well as the general public.

Principle 2 - Institutional investors should have a robust policy on managing conflicts of interest in relation to stewardship and this policy should be publicly disclosed.

Haringey's Pensions Committee and Board has a robust conflicts of interest policy which is reviewed at least annually. Conflicts of interest are embedded in the terms of reference of the Pensions Committee and Board, and a register of any conflicts which arise is maintained. Members of the Pensions Committee and Board complete declaration of interest forms annually. There is a clear process in place for managing any conflicts of interest which occur for Committee and Board members during meetings.

Haringey expects all Fund Managers to employ similarly robust conflicts of interest policies, and this is something that is considered upon any new manager appointment.

Principle 3 - Institutional investors should monitor their investee companies.

Day-to-day responsibility for managing the Fund's equity holdings is delegated to the relevant fund managers: these are all currently invested in passive pooled funds. The Fund expects managers to monitor and engage with companies they invest in, and to report on these engagement activities.

Through membership of the Local Authority Pension Fund Forum, key ESG concerns are highlighted, to ensure that Haringey is able to probe fund managers to understand their voting intentions and attempt to influence this.

Principle 4 - Institutional investors should establish clear guidelines on when and how they will escalate their activities as a method of protecting and enhancing shareholder value.

Responsibility for day-to-day interaction with companies is delegated to the Fund's investment managers, including the escalation of engagement when necessary. On occasion, the Fund may itself choose to escalate activity; this will typically be through our membership of the Local Authority Pension Fund Forum (LAPFF). When this occurs, the Committee will typically take a minuted vote on the decision whether to participate in the proposed activity.

Principle 5 - Institutional investors should be willing to act collectively with other investors where appropriate.

The Fund seeks to work collaboratively with other institutional shareholders in order to maximise the influence that it can have on individual companies. This is achieved through our LAPFF membership, together with initiatives proposed by our investment managers or other advisors. The Fund takes its membership of LAPFF seriously, Officers and Councillors are engaged with LAPFF activity, with Councillor members of the Pensions Committee and Board attending LAPFF meetings such as the AGM. One of the members of the Pensions Committee and Board ran for a position on the LAPFF executive in the spring of 2017.

Principle 6 - Institutional investors should have a clear policy on voting and disclosure of voting activity.

Haringey actively monitors all LAPFF voting alerts, and monitors fund manager compliance with these voting recommendations in each Pensions Committee and Board meeting. All voting activity that takes place is published on Haringey's website highlighting where any fund managers have not complied with LAPFF voting guidelines.

The Fund invests via pooled funds and is therefore subject to the underlying investment managers' policies. The Fund expects its investment managers to exercise all votes associated with the Fund's equity holdings where practicable. The Fund encourages its investment managers to publicly disclose their voting records, and expects these to be made available to Haringey upon request. The Fund also looks to fulfil its responsibilities regarding shareholder voting through its membership of LAPFF.

Generally, the Fund expects its investment managers to support resolutions that are consistent with the UK Corporate Governance Code and represent best practice. In overseas markets, the Committee expects the managers to take account of local best practice principles.

Where resolutions or issues fall short of the expected standards, the Committee and Board expects managers will either abstain or vote against, depending on the individual circumstances of the company and the issues presented. The Committee and Board expects the investment managers to report on their voting activities on a regular basis and the Fund's Officers consider whether each manager's actions and engagement activities have been appropriate and in keeping with the Fund's policies.

Principle 7 - Institutional investors should report periodically on their stewardship and voting activities.

The Fund expects its underlying investment managers to report regularly to both the Officers and the Committee and Board with respect to voting and engagement activities, including examples of company engagement, progress on engagement over time and collaborative activities. The Fund encourages its investment managers to publicly report on their stewardship activities. The Fund reports on its stewardship activity via LAPFF voting alerts to the Committee and Board at each meeting, and these papers are published on the internet.

The Fund also expects its investment managers to take steps to report publicly on their stewardship activity. The Fund's listed equity manager, Legal and General Investment Management publishes various documents periodically on their website at the below web address:

http://www.lgim.com/uk/en/capabilities/corporate-governance-responsible-investment/stewardship-integration/

Advice Taken

In constructing this statement, the Committee has taken advice from a representative of the Fund's professional investment advisor (Mercer Limited), an independent advisor (John Raisin Financial Services Limited), and the Borough's Chief Financial Officer (and other Officers).

Appendix A - Myners Investment Principles - Compliance Statement

Principle 1: Effective Decision-making

Administering authorities should ensure that:

- decisions are taken by persons or organisations with the skills, knowledge, advice and resources necessary to make them effectively and monitor their implementation; and
- those persons or organisations have sufficient expertise to be able to evaluate and challenge the advice they receive, and manage conflicts of interest.

Haringey Position - Compliant

Haringey offers regular training to all members of the Committee to ensure they have the necessary knowledge to make decisions and challenge the advice they receive. All members are requested to complete the pensions regulator online public service toolkit, and annual training needs analysis is completed to highlight areas of weakness or gaps in knowledge. Training is completed prior to every Committee meeting, and members are actively encouraged to undertake training independently in their own time. All training activity undertaken is reported in the minutes of each Committee meeting.

Principle 2: Clear Objectives

An overall investment objective should be set out for the fund that takes account of the scheme's liabilities, the potential impact on local taxpayers, the strength of the covenant for non-local authority employers, and the attitude to risk of both the administering authority and scheme employers, and these should be clearly communicated to advisors and investment managers.

Haringey Position - Compliant

The Fund sets out an investment objective in this statement, which reflects the financial requirements of the agreed funding policy and the desire to return to full funding over the long-term, in combination with an acceptable level of contributions.

Principle 3: Risk and liabilities

In setting and reviewing their investment strategy, administering authorities should take account of the form and structure of liabilities. These include the implications for the local taxpayers, the strength of the covenant for participating employers, the risk of their default and longevity risk.

Haringey Position - Compliant

The Fund's investment strategy was set following the results of the last formal Actuarial Valuation, which incorporated these issues. The investment strategy has since been revised to seek to further improve risk adjusted returns. Any changes to the investment strategy are only made subject to due consideration of the liability profile of the fund.

Principle 4: Performance assessment

Arrangements should be in place for the formal measurement of performance of the investments, investment managers and advisors.

Administering authorities should also periodically make a formal assessment of their own effectiveness as a decision-making body and report on this to scheme members.

Haringey Position - Compliant

The Committee reviews the performance of Fund investments on a quarterly basis and meets with investment managers (via Officers) at least once a year. Contracts with advisers are reviewed regularly. The Committee undertakes an assessment of its own effectiveness on a regular basis.

Principle 5: Responsible ownership

Administering authorities should:

- Adopt, or ensure their investment managers adopt, the Financial Reporting Council (FRC) UK Stewardship Code on the responsibilities of shareholders and agents
- Include a statement of their policy on responsible ownership in the statement of investment principles.
- Report periodically to scheme members on the discharge of such responsibilities.

Haringey Position - Compliant

The Fund's investment managers have adopted or are committed to the UK Stewardship Code.

The Fund is a Tier 1 signatory to the FRC Stewardship code and has produced a statement which is included in the Investment Strategy Statement.

Principle 6: Transparency and reporting

Administering authorities should:

- Act in a transparent manner, communicating with stakeholders on issues relating to their management of investments, its governance and risks, including performance against stated objectives
- Provide regular communication to scheme members in the form they consider most appropriate

Haringey Position - Compliant

The Fund communicates with its stakeholders through the publication of policy statements and an Annual Report on its website. The Fund communicates regularly with its members and the communication policy statement provides information about how this is done. The Communications Policy is updated or reviewed at least annually.

Appendix B – Investment Manager Performance Targets and Benchmarks

Manager	Portfolio	%	Benchmark	Performance Target
LGIM	Global Equities	60.0	See Appendix C	Index (passively managed)
	and Index-Linked Gilts			
Pantheon	Private Equity	5.0	MSCI World Index	+ 3.5% p.a.
Private				
Equity

Investors			Property Funds All	year period
			Balanced Index	
Aviva Investors	Long Lease Property	5.0	50% FTSE Actuaries	+1.50% p.a. over the medium to long
			5-15 Year Gilt Index	term
			50% FTSE 15 Years	
			+ Gilt Index*	
Allianz	Infrastructure Debt	3.0	5.5% p.a.	Benchmark
BlackRock	Renewable Energy	2.5	10.0% p.a.	Benchmark
	Infrastructure			
Copenhagen	Renewable Energy	2.5	10.0% p.a.	Benchmark
Infrastructure	Infrastructure			
Partners (CIP)				
CQS	Multi Sector	7.0	3 month GBP LIBOR	+ 5.0% p.a.
	Credit			
Ruffer (London	Multi Asset Absolute	7.5	8.0% p.a.	Benchmark
CIV)	Return			

^{*} The Fund invests in the Aviva Lime Property Fund, which invests in a diversified portfolio of UK Real Estate assets with long leases and strong covenants. The official performance objective is to outperform the composite benchmark in the table above by 1.5% over the medium to long term. In practice, the shorter term performance of the benchmark has the scope to perform very differently to the underlying property assets. Over shorter periods (less than 5 years), the Officers will assess the performance of this part of the portfolio on a total return basis, whereby around 60% to 80% of this is expected to be derived from rental income (with capital appreciation being the balance).

Appendix C – Global Equity and Bond Benchmarks

The table below outlines details on the Fund's passive managed investments, held with LGIM. This allocation comprises all of the Fund's listed equity and index linked gilt exposure. The aim of these passively managed funds is to track the performance of the respective indices within a lower level of tracking deviation (gross of fees) over rolling 3-year periods.

Asset Class	Benchmark	Allocation (% total Fund assets)
Multi Factor Clobal Equity	RAFI Multi Factor Index (Unhedged)	9.585%
Multi Factor Global Equity	RAFI Multi Factor Index (Hedged)	9.585%
Emerging Markets Equity	FTSE Emerging Markets Index (Unhedged)	6.660%

Appendix 4

Local Government Pension Scheme Regulations 2013 Regulation 61

Policy Statement on Communications with Scheme Members and Employers

Effective communication between Haringey Council, the scheme members, and the employers within the fund is essential to the proper management of the LGPS on a transparent and accountable basis.

This document sets out a policy framework within which the Council will communicate with :-

- Members of the scheme and their family units.
- Representatives of members
- · Employing bodies and
- Prospective members

It identifies the format, frequency and method of distributing information and publicity. It also outlines the processes for promoting the scheme to prospective members and employing bodies.

Members of the scheme:

A. Points of Contacts:

- i. Pension Team for day-to-day contact and visits.
- ii. Ad hoc briefings and workshops
- iii. Harinet
- iv. Pensions Web Page

A pensions page is maintained on Harinet and on the Haringey Web Site which provides:-

- Guides to the LGPS including Pension Sharing on Divorce, Increasing Pension Benefits and the Appeals Process
- Forms which allow members to :-
 - Join or leave the scheme or opt to join the 50/50 scheme.
 - Indicate to the Council how any death grant should be disbursed.
- Policy Statements on the use of the Council's Discretionary Powers, Investment Principles. The Financial Strategy Statement and the Communications Strategy
- Annual Reports and Pensions Bulletins
- Notice of events

- Contact details for the Pensions Team
- Links to other useful sites including the scheme regulations and on-line to the Local Government Pension Scheme.

The information held on the Harinet and Pensions Web Pages is reviewed and updated on a regular basis. Although the web page mirrors the information held on Harinet, it extends to a wider audience and allows the family unit to access pensions information relevant to them.

B. Levels of Communication:

- i. General day to day administration of the scheme
- ii. Annual payslips and annual newsletter to Pensioner Members
- iii. Statutory notices and statements e.g : individual notices regarding entry to the scheme or hours changes and Annual Benefits Statements .
- iv. Formal notice of significant proposals to change the scheme
- v. Life certificates to Pensioners living abroad.

C. Medium of communication

- i. Telephone and e-mail
- ii. Hard copy dispatches
- iii. Workshops/ Employee Briefings
- iv. Face to face meetings

D. Timing

- i. General policy is to issues statutory notifications and statements within the prescribed limits and to respond to written enquiries within 10 working days.
- ii. An Annual Report on the Fund is published annually.
- iii. Pension Bulletins on items of significance are issued as the need arises.
- vi. The Pensions Newsletter is published in April of each year to coincide with pensions increase awards.
- v. The Deferred Members Newsletter is published each year and coincides with the distribution of the Deferred Members Annual Benefits Statements

Representatives of members

A. Points of Contact

- i. The Corporate Industrial Relations Group
- ii. Council and Staff Joint Consultative Committee
- iii. Pensions Committee and General Purposes Committee
- iv. Face to face meetings or issues raised in correspondence or by telephone.
- v. Ad hoc presentations to Trade Union Officers and work place representatives.

B. Levels of communication

- i. Consultation on proposed scheme changes and significant policy issues on the use of employer discretions.
- ii. Joint meetings with staff affected by TUPE transfers
- iii. Response to employee complaints or queries via their representatives.
- iv. Semi- formal meetings to brief employee representatives on scheme changes or to explain existing scheme rules.

C. Medium of communication

- i. Telephone and e-mail
- ii. Hard copy dispatches
- iii. Group meetings at Officer level
- iv. Committee meetings at Elected Member level
- v. Face to face meetings

D. Timing

Formal meetings are dictated by pre determined dates. Informal meetings as an when required.

Employers

A. Points of contact:

Day to day contact falls into three categories:-

- i. Pensions Team for day to day administration
- ii. Pay Support (where the Council provides a payroll service)
- iii. Finance for FRS 17 disclosure and funding issues.

B. Levels of Communication:

- i. General day to day administration of the scheme
- ii. Formal notification of discussion documents and consultation papers

- iii. Employer briefings on issues affecting the scheme including an Employers Guide to the LGPS
- iv. Pre and post fund valuation meetings.

C. Medium of communication

- i. Telephone and e-mail
- ii. Site visits
- iii. Hard copy dispatches

D. Timing

The general policy is to keep employers informed of issues as they arise or are expected to arise in good time for the appropriate action to be taken or comments considered.

We are proposing to improve the data quality from the employers through the implementation of iconnect which is a system to interface between employer payroll systems and the pension systems and should improve data quality at source.

Prospective Members and promoting the LGPS

- i. All new starters are issued with a leaflet Important Pensions Information as part of their new starter packs. This gives a brief outline of the scheme benefits and the alternative choices available.
- ii. An Annual Benefits Statement are issued yearly. This ensures that members appreciate the value of being a scheme member which they can share with colleagues.
- iii. Promotions of the Additional Voluntary Contributions Scheme are held in conjunction with the Council's AVC providers. These events are open to all staff and act to attract non members to the LGPS.

Funding Strategy Statement

1 Introduction

1.1 What is this document?

This is the Funding Strategy Statement (FSS) of the London Borough of Haringey Pension Fund ("the Fund"), which is administered by the London Borough of Haringey, ("the Administering Authority").

The Funding Strategy Statement (FSS) has been revised following the enactment of the Local Government Pension Scheme (Amendment) Regulations 2018.

The regulations introduced the provision to repay exit credits in circumstances where an employer terminates scheme participation and the actuarial assessments results in a surplus position.

This revised FSS has been prepared by the Administering Authority in collaboration with the Fund's actuary, Hymans Robertson LLP, and after consultation with the Fund's employers, Investment Consultant and Independent Advisor. It is effective from . 20 November 2018

1.2 What is the London Borough of Haringey Pension Fund?

The Fund is part of the national Local Government Pension Scheme (LGPS). The LGPS was set up by the UK Government to provide retirement and death benefits for local government employees, and those employed in similar or related bodies, across the whole of the UK. The Administering Authority runs the London Borough of Haringey Fund, in effect the LGPS for the Haringey area, to make sure it:

- receives the proper amount of contributions from employees and employers, and any transfer payments;
- invests the contributions appropriately, with the aim that the Fund's assets grow over time with investment income and capital growth; and
- uses the assets to pay Fund benefits to the members (as and when they retire, for the rest of their lives), and to their dependants (as and when members die), as defined in the LGPS Regulations. Assets are also used to pay transfer values and administration costs.

The roles and responsibilities of the key parties involved in the management of the Fund are summarised in Appendix B.

1.3 Why does the Fund need a Funding Strategy Statement?

Employees' benefits are guaranteed by the LGPS Regulations, and do not change with market values or employer contributions. Investment returns will help pay for some of the benefits, but probably not all, and certainly with no guarantee. Employees' contributions are fixed in those Regulations also, at a level which covers only part of the cost of the benefits.

Therefore, employers need to pay the balance of the cost of delivering the benefits to members and their dependants.

The FSS focuses on how employer liabilities are measured, the pace at which these liabilities are funded, and how employers or pools of employers pay for their own liabilities. This statement sets out how the Administering Authority has balanced the conflicting aims of:

- affordability of employer contributions,
- · transparency of processes,
- stability of employers' contributions, and
- prudence in the funding basis.

There are also regulatory requirements for an FSS, as given in <u>Appendix A</u>. This FSS has been prepared taking account of the revised guidance on preparing and maintaining a FSS issued by CIPFA in 2016.

The FSS is a summary of the Fund's approach to funding its liabilities, and this includes reference to the Fund's other policies; it is not an exhaustive statement of policy on all issues. The FSS forms part of a framework which includes:

- the LGPS Regulations;
- the Rates and Adjustments Certificate (confirming employer contribution rates for the next three years) which can be found in an appendix to the formal valuation report;
- actuarial factors for valuing individual transfers, early retirement costs and the costs of buying added service; and
- the Fund's Statement of Investment Principles / Investment Strategy Statement (see Section 4)

1.4 How does the Fund and this FSS affect me?

This depends who you are:

- a member of the Fund, i.e. a current or former employee, or a dependant: the Fund needs to be sure it is collecting and holding enough money so that your benefits are always paid in full;
- an employer in the Fund (or which is considering joining the Fund): you will want to know how your
 contributions are calculated from time to time, that these are fair by comparison to other employers in the
 Fund, in what circumstances you might need to pay more and what happens if you cease to be an
 employer in the Haringey Fund. Note that the FSS applies to all employers participating in the Fund;
- an Elected Member whose council participates in the Fund: you will want to be sure that the council
 balances the need to hold prudent reserves for members' retirement and death benefits, with the other
 competing demands for council money;
- a Council Tax payer: your council seeks to strike the balance above, and also to minimise cross-subsidies between different generations of taxpayers.

1.5 What does the FSS aim to do?

The FSS sets out the objectives of the Fund's funding strategy, such as:

- to ensure the long-term solvency of the Fund, using a prudent long term view. This will ensure that sufficient funds are available to meet all members'/dependants' benefits as they fall due for payment;
- to ensure that employer contribution rates are reasonably stable where appropriate;
- to minimise the long-term cash contributions which employers need to pay to the Fund, by recognising the
 link between assets and liabilities and adopting an investment strategy which balances risk and return (NB
 this will also minimise the costs to be borne by Council Tax payers);
- to reflect the different characteristics of different employers in determining contribution rates. This involves the Fund having a clear and transparent funding strategy to demonstrate how each employer can best meet its own liabilities over future years; and
- to use reasonable measures to reduce the risk to other employers and ultimately to the Council Tax payer from an employer defaulting on its pension obligations.

1.6 How do I find my way around this document?

In <u>Section 2</u> there is a brief introduction to some of the main principles behind funding, i.e. deciding how much an employer should contribute to the Fund from time to time.

In <u>Section 3</u> we outline how the Fund calculates the contributions payable by different employers in different situations.

In <u>Section 4</u> we show how the funding strategy is linked with the Fund's investment strategy.

In the Appendices we cover various issues in more detail if you are interested:

- A. the regulatory background, including how and when the FSS is reviewed,
- B. who is responsible for what,
- C. what issues the Fund needs to monitor, and how it manages its risks,
- D. some more details about the actuarial calculations required,
- E. the assumptions which the Fund actuary currently makes about the future,
- F. a glossary explaining the technical terms occasionally used here.

If you have any other queries please contact Thomas Skeen, Head of Pensions in the first instance at e-mail address thomas.skeen@haringey.gov.uk or on telephone number 020 8489 1341.

2 Basic Funding issues

(More detailed and extensive descriptions are given in Appendix D).

2.1 How does the actuary measure the required contribution rate?

In essence this is a three-step process:

- Calculate the ultimate funding target for that employer, i.e. the ideal amount of assets it should hold in order to be able to pay all its members' benefits. See <u>Appendix E</u> for more details of what assumptions we make to determine that funding target;
- 2. Determine the time horizon over which the employer should aim to achieve that funding target. See the table in 3.3 and Note (c) for more details;
- 3. Calculate the employer contribution rate such that it has at least a given probability of achieving that funding target over that time horizon, allowing for different likelihoods of various possible economic outcomes over that time horizon. See 2.3 below, and the table in 3.3 Note (e) for more details.

2.2 What is each employer's contribution rate?

This is described in more detail in Appendix D. Employer contributions are normally made up of two elements:

- a) the estimated cost of benefits being built up each year, after deducting the members' own contributions and including administration expenses. This is referred to as the "*Primary rate*", and is expressed as a percentage of members' pensionable pay; plus
- b) an adjustment for the difference between the Primary rate above, and the actual contribution the employer needs to pay, referred to as the "Secondary rate". In broad terms, payment of the Secondary rate will aim to return the employer to full funding over an appropriate period (the "time horizon"). The Secondary rate may be expressed as a percentage of pay and/or a monetary amount in each year.

The rates for all employers are shown in the Fund's Rates and Adjustments Certificate, which forms part of the formal Actuarial Valuation Report. Employers' contributions are expressed as minima, with employers able to pay contributions at a higher rate. Account of any higher rate will be taken by the Fund actuary at subsequent valuations, i.e. will be reflected as a credit when next calculating the employer's contributions.

2.3 What different types of employer participate in the Fund?

Historically the LGPS was intended for local authority employees only. However over the years, with the diversification and changes to delivery of local services, many more types and numbers of employers now participate. There are currently more employers in the Fund than ever before, a significant part of this being due to new academies.

In essence, participation in the LGPS is open to public sector employers providing some form of service to the local community. Whilst the majority of members will be local authority employees (and ex-employees), the majority of participating employers are those providing services in place of (or alongside) local authority services: academy schools, contractors, housing associations, charities, etc.

The LGPS Regulations define various types of employer as follows:

Scheduled bodies - councils, and other specified employers such as academies and further education establishments. These must provide access to the LGPS in respect of their employees who are not eligible to join another public sector scheme (such as the Teachers Scheme). These employers are so-called because they are specified in a schedule to the LGPS Regulations.

It is now possible for Local Education Authority schools to convert to academy status, and for other forms of school (such as Free Schools) to be established under the academies legislation. All such **academies (or Multi Academy Trusts)**, as employers of non-teaching staff, become separate new employers in the Fund. As academies are defined in the LGPS Regulations as "Scheduled Bodies", the Administering Authority has no discretion over whether to admit them to the Fund, and the academy has no discretion whether to continue to allow its non-teaching staff to join the Fund. There has also been guidance issued by the DCLG regarding the terms of academies' membership in LGPS Funds.

Designating employers - employers such as town and parish councils are able to participate in the LGPS via resolution (and the Fund cannot refuse them entry where the resolution is passed). These employers can designate which of their employees are eligible to join the scheme.

Other employers are able to participate in the Fund via an admission agreement, and are referred to as 'admission bodies'. These employers are generally those with a "community of interest" with another scheme employer – **community admission bodies** ("CAB") or those providing a service on behalf of a scheme employer – **transferee admission bodies** ("TAB"). CABs will include housing associations and charities, TABs will generally be contractors. The Fund is able to set its criteria for participation by these employers and can refuse entry if the requirements as set out in the Fund's admissions policy are not met. (NB The terminology CAB and TAB has been dropped from recent LGPS Regulations, which instead combine both under the single term 'admission bodies'; however, we have retained the old terminology here as we consider it to be helpful in setting funding strategies for these different employers.

2.4 How does the measured contribution rate vary for different employers?

All three steps above are considered when setting contributions (more details are given in $\underline{\text{Section 3}}$ and $\underline{\text{Appendix D}}$).

- 1. The **funding target** is based on a set of assumptions about the future, (e.g. investment returns, inflation, pensioners' life expectancies). However, if an employer is approaching the end of its participation in the Fund then its funding target may be set on a more prudent basis, so that its liabilities are less likely to be spread among other employers after its cessation;
- 2. The **time horizon** required is, in broad terms, the period over which any deficit is to be recovered. A shorter period will lead to higher contributions, and vice versa (all other things being equal). Employers may be given a lower time horizon if they have a less permanent anticipated membership, or do not have tax-raising powers to increase contributions if investment returns under-perform; and
- 3. The **probability of achieving** the funding target over that time horizon will be dependent on the Fund's view of the strength of employer covenant and its funding profile. Where an employer is considered to be weaker, or potentially ceasing from the Fund, then the required probability will be set higher, which in turn will increase the required contributions (and vice versa).

For some employers it may be agreed to pool contributions, see 3.4.

Any costs of non ill-health early retirements must be paid by the employer, see 3.6.

Costs of ill-health early retirements are covered in 3.7 and 3.8.

2.5 How is a deficit (or surplus) calculated?

An employer's "funding level" is defined as the ratio of:

- the market value of the employer's share of assets (see <u>Appendix D</u>, section <u>D5</u>, for further details of how this is calculated), to
- the value placed by the actuary on the benefits built up to date for the employer's employees and exemployees (the "liabilities"). The Fund actuary agrees with the Administering Authority the assumptions to be used in calculating this value.

If this is less than 100% then it means the employer has a shortfall, which is the employer's deficit; if it is more than 100% then the employer is said to be in surplus. The amount of deficit or shortfall is the difference between the asset value and the liabilities value.

It is important to note that the deficit/surplus and funding level are only measurements at a particular point in time, on a particular set of assumptions about the future. Whilst we recognise that various parties will take an interest in these measures, for most employers the key issue is how likely it is that their contributions will be sufficient to pay for their members' benefits (when added to their existing asset share and anticipated investment returns).

In short, deficits and funding levels are short term measures, whereas contribution-setting is a longer term issue.

2.6 How does the Fund recognise that contribution levels can affect council and employer service provision, and council tax?

The Administering Authority and the Fund actuary are acutely aware that, all other things being equal, a higher contribution required to be paid to the Fund will mean less cash available for the employer to spend on the provision of services. For instance:

- Higher Pension Fund contributions may result in reduced council spending, which in turn could affect the resources available for council services, and/or greater pressure on council tax levels;
- Contributions which Academies pay to the Fund will therefore not be available to pay for providing education; and
- Other employers will provide various services to the local community, perhaps through housing
 associations, charitable work, or contracting council services. If they are required to pay more in pension
 contributions to the LGPS then this may affect their ability to provide the local services at a reasonable

Whilst all this is true, it should also be borne in mind that:

- The Fund provides invaluable financial security to local families, whether to those who formerly worked in the service of the local community who have now retired, or to their families after their death;
- The Fund must have the assets available to meet these retirement and death benefits, which in turn
 means that the various employers must each pay their own way. Lower contributions today will mean
 higher contributions tomorrow: deferring payments does not alter the employer's ultimate obligation to the
 Fund in respect of its current and former employees;
- Each employer will generally only pay for its own employees and ex-employees (and their dependants), not for those of other employers in the Fund;

- The Fund strives to maintain reasonably stable employer contribution rates where appropriate and
 possible. However, a recent shift in regulatory focus means that solvency within each generation is
 considered by the Government to be a higher priority than stability of contribution rates;
- The Fund wishes to avoid the situation where an employer falls so far behind in managing its funding shortfall that its deficit becomes unmanageable in practice: such a situation may lead to employer insolvency and the resulting deficit falling on the other Fund employers. In that situation, those employers' services would in turn suffer as a result:
- Council contributions to the Fund should be at a suitable level, to protect the interests of different
 generations of council tax payers. For instance, underpayment of contributions for some years will need
 to be balanced by overpayment in other years; the council will wish to minimise the extent to which
 council tax payers in one period are in effect benefitting at the expense of those paying in a different
 period.

Overall, therefore, there is clearly a balance to be struck between the Fund's need for maintaining prudent funding levels, and the employers' need to allocate their resources appropriately. The Fund achieves this through various techniques which affect contribution increases to various degrees (see 3.1). In deciding which of these techniques to apply to any given employer, the Administering Authority takes a view on the financial standing of the employer, i.e. its ability to meet its funding commitments and the relevant time horizon.

For instance, where the Administering Authority has reasonable confidence that an employer will be able to meet its funding commitments, then the Fund will permit options such as stabilisation (see 3.3 Note (b)), a longer time horizon relative to other employers, and/or a lower probability of achieving their funding target. Such options will temporarily produce lower contribution levels than would otherwise have applied. This is permitted in the expectation that the employer will still be able to meet its obligations for many years to come.

On the other hand, where there is doubt that an employer will be able to meet its funding commitments or withstand a significant change in its commitments, then a higher funding target, and/or a shorter deficit recovery period relative to other employers, and/or a higher probability of achieving the target may be required.

The Fund actively seeks employer input, including to its funding arrangements, through various means: see Appendix A.

3 Calculating contributions for individual Employers

3.1 General comments

A key challenge for the Administering Authority is to balance the need for stable, affordable employer contributions with the requirement to take a prudent, longer-term view of funding and ensure the solvency of the Fund. With this in mind, the Fund's three-step process identifies the key issues:

- 1. What is a suitably (but not overly) prudent funding target?
- 2. How long should the employer be permitted to reach that target? This should be realistic but not so long that the funding target is in danger of never actually being achieved.
- 3. What probability is required to reach that funding target? This will always be less than 100% as we cannot be certain of future market movements. Higher probability "bars" can be used for employers where the Fund wishes to reduce the risk that the employer ceases leaving a deficit to be picked up by other employers.

These and associated issues are covered in this Section.

The Administering Authority recognises that there may occasionally be particular circumstances affecting individual employers that are not easily managed within the rules and policies set out in the Funding Strategy Statement. Therefore the Administering Authority may, at its sole discretion, direct the actuary to adopt alternative funding approaches on a case by case basis for specific employers.

3.2 The effect of paying lower contributions

In limited circumstances the Administering Authority may permit employers to pay contributions at a lower level than is assessed for the employer using the three step process above. At their absolute discretion the Administering Authority may:

- extend the time horizon for targeting full funding;
- adjust the required probability of meeting the funding target;
- permit an employer to participate in the Fund's stabilisation mechanisms;
- permit extended phasing in of contribution rises or reductions;
- pool contributions amongst employers with similar characteristics; and/or
- accept some form of security or guarantee in lieu of a higher contribution rate than would otherwise be the
 case.

Employers which are permitted to use one or more of the above methods will often be paying, for a time, contributions less than required to meet their funding target, over the appropriate time horizon with the required likelihood of success. Such employers should appreciate that:

- their true long term liability (i.e. the actual eventual cost of benefits payable to their employees and exemployees) is not affected by the pace of paying contributions;
- lower contributions in the short term will be assumed to incur a greater loss of investment returns on the
 deficit. Thus, deferring a certain amount of contribution may lead to higher contributions in the long-term;
 and
- it may take longer to reach their funding target, all other things being equal.

Overleaf (3.3) is a summary of how the main funding policies differ for different types of employer, followed by more detailed notes where necessary.

Section 3.4 onwards deals with various other funding issues which apply to all employers.

3.3 The different approaches used for different employers

Type of employer		Scheduled Bodi	es	•	mission Bodies and ng Employers	Transferee Admission Bodies
Sub-type	Local Authority	Academies	Colleges	Open to new entrants	Closed to new entrants	(all)
Funding Target Basis used	Ongoing, as	sumes long-term F (see <u>Appendix E</u>			move to "gilts basis" - Note (a)	Ongoing, assumes fixed contract term in the Fund (see Appendix E)
Primary rate approach				(see Appendix	(D – D.2)	
Stabilised contribution rate?	Yes - see Note (b)	Yes - see Note (b)	No	No	No	No
Maximum time horizon – <u>Note (c)</u>	20 years	20 years	20 years	20 years	Future working lifetime	Outstanding contract term
Secondary rate – Note (d)	Monetary amount	Percentage of pay	Monetary amount	Monetary amount	Monetary amount	Percentage of pay
Treatment of surplus	Covered by stabilisation arrangement	Covered by stabilisation arrangement	Preferred approach: contributions kept at Primary rate. However, reductions may be permitted by the Administering Authority		Reduce contributions by spreading the surplus over the remaining contract term, unless time horizon passes next valuation in which case limit to Primary rate	
Probability of achieving target – Note (e)	70%	70%	75%	75%	80%	50%
Phasing of contribution changes	Covered by stabilisation arrangement	Covered by stabilisation arrangement	3 years	3 years	3 years	None
Review of rates – Note (f)	Administerin			contribution rates antervals between va	and amounts, and the luations	Particularly reviewed in last 3 years of contract
New employer	n/a	n/a	Note (g)	<u>N</u>	ote (h)	Notes (h) & (i)
Cessation of participation: cessation debt/exit credit payable	as Sched participate cessation of changes for	issumed not to be quiled Bodies are leging the LGPS. In the courring (machinery example), the cess applied would be a	ally obliged to be rare event of y of Government sation calculation	admission agro debt/exit credit w basis appropriate	d subject to terms of eement. Cessation will be calculated on a to the circumstances n – see Note (j).	Participation is assumed to expire at the end of the contract. Cessation debt/surplus calculated on ongoing basis unless admission terminated early in which case gilts cessation basis is used.

Note (a) (Basis for CABs and Designating Employers closed to new entrants)

In the circumstances where:

- the employer is a Designating Employer, or an Admission Body but not a Transferee Admission Body, and
- the employer has no guarantor, and
- the admission agreement is likely to terminate, or the employer is likely to lose its last active member, within a timeframe considered appropriate by the Administering Authority to prompt a change in funding,

the Administering Authority may set a higher funding target (e.g. using a discount rate set equal to gilt yields) by the time the agreement terminates or the last active member leaves, in order to protect other employers in the Fund. This policy will increase regular contributions and reduce, but not entirely eliminate, the possibility of a final deficit payment being required or a surplus payment being made to the employer when a cessation valuation is carried out.

The Administering Authority also reserves the right to adopt the above approach in respect of those Designating Employers and Admission Bodies with no guarantor, where the strength of covenant is considered to be weak but there is no immediate expectation that the admission agreement will cease or the Designating Employer alters its designation.

Note (b) (Stabilisation)

Stabilisation is a mechanism where employer contribution rate variations from year to year are kept within a predetermined range, thus allowing those employers' rates to be relatively stable. In the interests of stability and affordability of employer contributions, the Administering Authority, on the advice of the Fund Actuary, believes that stabilising contributions can still be viewed as a prudent longer-term approach. However, employers whose contribution rates have been "stabilised" (and may therefore be paying less than their theoretical contribution rate) should be aware of the risks of this approach and should consider making additional payments to the Fund if possible.

This stabilisation mechanism allows short term investment market volatility to be managed so as not to cause volatility in employer contribution rates, on the basis that a long term view can be taken on net cash inflow, investment returns and strength of employer covenant.

The current stabilisation mechanism applies if:

- the employer satisfies the eligibility criteria set by the Administering Authority (see below) and;
- there are no material events which cause the employer to become ineligible, e.g. significant reductions in
 active membership (due to outsourcing or redundancies), or changes in the nature of the employer (perhaps
 due to Government restructuring), or changes in the security of the employer.

On the basis of extensive modelling carried out for the 2016 valuation exercise (see <u>Section 4</u>), the stabilised details are as follows:

Type of employer	Council	Academies
Starting rate	24.9% (2016/17 rate)	28.9% (2016/2017 rate)
Max contribution increase from one year to the next	+1% of pay*	+2% of pay

Max contribution decrease from one year to the	-1% of pay	-2% of pay**
next		

^{*}In practice the Council contribution rate will be held at the current level for 2 years, followed by a 1.5% increase in 2019-20.

The stabilisation criteria and limits will be reviewed at the 31 March 2019 valuation, to take effect from 1 April 2020. However the Administering Authority reserves the right to review the stabilisation criteria and limits at any time before then, on the basis of membership and/or employer changes as described above.

Note (c) (Maximum time horizon)

The maximum time horizon starts at the commencement of the revised contribution rate (1 April 2017 for the 2016 valuation). The Administering Authority would normally expect a reducing time horizon (i.e. the same target date) to be used at successive triennial valuations, but would reserve the right to propose alternative time horizons, for example where there were no new entrants.

Where stabilisation applies, the resulting employer contribution rate would be amended to comply with the stabilisation mechanism.

For employers with no (or very few) active members at this valuation, the deficit should be recovered by a fixed monetary amount over a prudent period to be agreed with the body or its successor.

For academies where written notice has been served terminating their funding agreement with the Department for Education, the period is reduced to the period of notice (with immediate effect).

For Community Admission Bodies without a guarantor, the period will generally be equal to the average future working lifetime of their active employee members.

Note (d) (Secondary rate)

The Administering Authority reserves the right to amend the Secondary rate between valuations and/or to require these payments in monetary terms (if they are paid in percentage of pay terms), for instance where:

- the employer is relatively mature, i.e. has a large Secondary contribution rate (e.g. above 15% of payroll), or
- there has been a significant reduction in payroll due to outsourcing or redundancy exercises, or
- the employer has closed the Fund to new entrants.

Note (e) (Probability of achieving funding target)

Each employer has its funding target calculated, and a relevant time horizon over which to reach that target. Contributions are set such that, combined with the employer's current asset share and anticipated market movements over the time horizon, the funding target is achieved with a given minimum probability. A higher required probability bar will give rise to higher required contributions, and vice versa.

The way in which contributions are set using these three steps, and relevant economic projections, is described in further detail in Appendix D.

Different probabilities are set for different employers depending on their nature and circumstances: in broad terms, a higher probability will apply due to one or more of the following:

^{**}Reductions in contribution rate will be limited such that the Academy is paying at least the Primary rate.

- the Fund believes the employer poses a greater funding risk than other employers,
- the employer does not have tax-raising powers;
- the employer does not have a guarantor or other sufficient security backing its funding position; and/or
- the employer is likely to cease participation in the Fund in the short or medium term.

Note (f) (Regular Reviews)

Such reviews may be triggered by significant events including but not limited to: significant reductions in payroll, altered employer circumstances, Government restructuring affecting the employer's business, or failure to pay contributions or arrange appropriate security as required by the Administering Authority.

The result of a review may be to require increased contributions (by strengthening the actuarial assumptions adopted and/or moving to monetary levels of deficit recovery contributions), and/or an increased level of security or guarantee.

Note (g) (New Academy conversions)

At the time of writing, the Fund's policies on academies' funding issues are as follows:

- i. The new academy will be regarded as a separate employer in its own right and will not be pooled with other employers in the Fund. The only exception is where the academy is part of a Multi Academy Trust (MAT) in which case the academy's figures will be calculated as below but can be combined with those of the other academies in the MAT;
- ii. The new academy's past service liabilities on conversion will be calculated based on its active Fund members on the day before conversion. For the avoidance of doubt, these liabilities will include all past service of those members, but will exclude the liabilities relating to any ex-employees of the school who have deferred or pensioner status;
- iii. The new academy will be allocated an initial asset share from the ceding council's assets in the Fund. This asset share will be calculated using the estimated funding position of the ceding council at the date of academy conversion. The share will be based on the active members' funding level, having first allocated assets in the council's share to fully fund deferred and pensioner members. The asset allocation will be based on market conditions and the academy's active Fund membership on the day prior to conversion;
- iv. The new academy's initial contribution rate will be calculated using market conditions, the council funding position and, membership data, all as at the day prior to conversion;

The Fund's policies on academies are subject to change in the light of any amendments to DCLG guidance. Any changes will be notified to academies, and will be reflected in a subsequent version of this FSS. In particular, policy (iv) above will be reconsidered at each valuation.

Note (h) (New Admission Bodies)

With effect from 1 October 2012, the LGPS 2012 Miscellaneous Regulations introduced mandatory new requirements for all Admission Bodies brought into the Fund from that date. Under these Regulations, all new Admission Bodies will be required to provide some form of security, such as a guarantee from the letting employer, an indemnity or a bond. The security is required to cover some or all of the following:

- the strain cost of any redundancy early retirements resulting from the premature termination of the contract;
- allowance for the risk of asset underperformance;
- allowance for the risk of a fall in gilt yields;
- allowance for the possible non-payment of employer and member contributions to the Fund; and/or
- the current deficit.

Transferee Admission Bodies: For all TABs, the security must be to the satisfaction of the Administering Authority as well as the letting employer, and will be reassessed on an annual basis. See also **Note** (i) below.

Community Admission Bodies: The Administering Authority will only consider requests from CABs (or other similar bodies, such as section 75 NHS partnerships) to join the Fund if they are sponsored by a Scheduled Body with tax raising powers, guaranteeing their liabilities and also providing a form of security as above.

The above approaches reduce the risk, to other employers in the Fund, of potentially having to pick up any shortfall in respect of Admission Bodies ceasing with an unpaid deficit.

At the Administering Authority's discretion, where the employer is not able to provide an appropriate bond or security, the Fund may accept the Admission Body on the basis that it pays a premium reflecting the added risk being borne by the Awarding Authority or Fund. This premium will typically be 5% of pensionable pay.

Note (i) (New Transferee Admission Bodies)

A new TAB usually joins the Fund as a result of the letting/outsourcing of some services from an existing employer (normally a Scheduled Body such as a council or academy) to another organisation (a "contractor"). This involves the TUPE transfer of some staff from the letting employer to the contractor. Consequently, for the duration of the contract, the contractor is a new participating employer in the Fund so that the transferring employees maintain their eligibility for LGPS membership. At the end of the contract the employees revert to the letting employer or to a replacement contractor.

Ordinarily, the TAB would be set up in the Fund as a new employer with responsibility for all the accrued benefits of the transferring employees; in this case, the contractor would usually be assigned an initial asset allocation equal to the past service liability value of the employees' Fund benefits. The quid pro quo is that the contractor is then expected to ensure that its share of the Fund is also fully funded at the end of the contract: see Note (i).

Employers which "outsource" have flexibility in the way that they can deal with the pension risk potentially taken on by the contractor. In particular there are three different routes that such employers may wish to adopt. Clearly as the risk ultimately resides with the employer letting the contract, it is for them to agree the appropriate route with the contractor:

i) Pooling

Under this option the contractor is pooled with the letting employer. In this case, the contractor pays the same rate as the letting employer, which may be under a stabilisation approach.

ii) Letting employer retains pre-contract risks

Under this option the letting employer would retain responsibility for assets and liabilities in respect of service accrued prior to the contract commencement date. The contractor would be responsible for the future liabilities that accrue in respect of transferred staff. The contractor's contribution rate could vary from one valuation to the next. It would be liable for any deficit (or entitled to any surplus) at the end of the contract term in respect of assets and liabilities attributable to service accrued during the contract term.

iii) Fixed contribution rate agreed

Under this option the contractor pays a fixed contribution rate and on cessation does not pay any deficit or get a refund of surplus.

The Administering Authority is willing to administer any of the above options as long as the approach is documented in the Admission Agreement as well as the transfer agreement. The Admission Agreement should ensure that some element of risk transfers to the contractor where it relates to their decisions and it is unfair to burden the letting employer with that risk. For example the contractor should typically be responsible for pension costs that arise from:

- above average pay increases, including the effect in respect of service prior to contract commencement even if the letting employer takes on responsibility for the latter under (ii) above; and
- · redundancy and early retirement decisions.

Note (j) (Admission Bodies Ceasing)

Notwithstanding the provisions of the Admission Agreement, the Administering Authority may consider any of the following as triggers for the cessation of an admission agreement with any type of body:

- Last active member ceasing participation in the Fund (NB recent LGPS Regulation changes mean that the Administering Authority has the discretion to defer taking action for up to three years, so that if the employer acquires one or more active Fund members during that period then cessation is not triggered. The current Fund policy is that this is left as a discretion and may or may not be applied in any given case);
- The insolvency, winding up or liquidation of the Admission Body;
- Any breach by the Admission Body of any of its obligations under the Agreement that they have failed to remedy to the satisfaction of the Fund;
- A failure by the Admission Body to pay any sums due to the Fund within the period required by the Fund; or
- The failure by the Admission Body to renew or adjust the level of the bond or indemnity, or to confirm an appropriate alternative guarantor, as required by the Fund.

On cessation, the Administering Authority will instruct the Fund actuary to carry out a cessation valuation to determine whether there is any deficit or surplus. Where there is a deficit, payment of this amount in full would normally be sought from the Admission Body; where there is a surplus following the LGPS (Amendment) Regulations 2018 which came into effect on 14th May 2018, this will normally result in a refund payment to the Admission Body (unless a risk-sharing arrangement has been put in place – see Note (i) above).

For non-Transferee Admission Bodies whose participation is voluntarily ended either by themselves or the Fund, or where a cessation event has been triggered, the Administering Authority must look to protect the interests of other ongoing employers. The actuary will therefore adopt an approach which, to the extent reasonably practicable, protects the other employers from the likelihood of any material loss emerging in future:

- (a) Where a guarantor does not exist then, in order to protect other employers in the Fund, the cessation liabilities and final deficit will normally be calculated using a "gilts cessation basis", which is more prudent than the ongoing basis. This has no allowance for potential future investment outperformance above gilt yields, and has added allowance for future improvements in life expectancy. This could give rise to significant cessation debts being required.
- (b) Where there is a guarantor for future deficits and contributions, the details of the guarantee will be considered prior to the cessation valuation being carried out. In some cases the guarantor is simply guarantor of last resort and therefore the cessation valuation will be carried out consistently with the approach taken had there been no guarantor in place. Alternatively, where the guarantor is not simply guarantor of last resort, the cessation may be calculated using the ongoing basis as described in Appendix E;
- (c) Again, depending on the nature of the guarantee, it may be possible to simply transfer the former Admission Body's liabilities and assets to the guarantor, without needing to crystallise any deficit or surplus. This approach may be adopted where the employer cannot pay the contributions due, and this is within the terms of the guarantee.

Under (a) and (c), any shortfall would usually be levied on the departing Admission Body as a single lump sum payment. If this is not possible then the Fund would spread they payment subject to there being some security in place for the employer such as a bond indemnity or guarantee.

In the event that the Fund is not able to recover the required payment in full, then the unpaid amounts fall to be shared amongst all of the other employers in the Fund. This may require an immediate revision to the Rates and Adjustments Certificate affecting other employers in the Fund, or instead be reflected in the contribution rates set at the next formal valuation following the cessation date.

As an alternative, where the ceasing Admission Body is continuing in business, the Fund at its absolute discretion reserves the right to enter into an agreement with the ceasing Admission Body. Under this agreement the Fund would accept an appropriate alternative security to be held against any deficit, and would carry out the cessation valuation on an ongoing basis: deficit recovery payments would be derived from this cessation debt. This approach would be monitored as part of each triennial valuation: the Fund reserves the right to revert to a "gilts cessation basis" and seek immediate payment of any funding shortfall identified. The Administering Authority may need to seek legal advice in such cases, as the Body would have no contributing members.

For employers that are guaranteed by a guarantor (usually the original employer or letting authority), the Fund's policy at the point of cessation is for the guarantor to subsume the residual assets, liabilities and any surplus or deficit. This is subject to the agreement of all parties involved (i.e. the Fund, the exiting employer and the guarantor) who will need to consider any separate contractual agreements that have been put in place between the exiting employer and the guarantor.

If all parties do not agree, then the surplus will be paid directly to the exiting employer normally within 3 months of cessation (despite any other agreements that may be in place); in maintaining a consistent approach the Fund will seek to recover the deficit from the exiting employer in the first instance although if not possible the

deficit will be subsumed by the guarantor; thereafter all remaining assets and liabilities will be subsumed by the outsourcing employer.

3.4 Pooled contributions

From time to time, with the advice of the Actuary, the Administering Authority may set up pools for employers with similar or complementary characteristics. This will always be in line with its broader funding strategy. The current pools in place within the Fund are as follows:

- Non-academy schools are generally pooled with Haringey Council, however there may be exceptions for specialist or independent schools.
- Haringey Council may be pooled with the legacy liabilities and assets of ceased employers.
- Smaller Transferee Admission Bodies may be pooled with the letting employer, provided all parties (particularly the letting employer) agree.

Those employers which have been pooled are identified in the Rates and Adjustments Certificate.

Employers who are permitted to enter (or remain in) a pool at the 2016 valuation will not normally be advised of their individual contribution rate unless agreed by the Administering Authority.

In general, the Administering Authority does not permit other pools, but will consider new proposals on a case by case basis.

3.5 Additional flexibility in return for added security

The Administering Authority may permit greater flexibility to the employer's contributions if the employer provides added security to the satisfaction of the Administering Authority.

Such flexibility includes a reduced rate of contribution, an extended time horizon, or permission to join a pool with another body (e.g. the Local Authority).

Such security may include, but is not limited to, a suitable bond, a legally-binding guarantee from an appropriate third party, or security over an employer asset of sufficient value.

The degree of flexibility given may take into account factors such as:

- · the extent of the employer's deficit;
- the amount and quality of the security offered;
- the employer's financial security and business plan; and
- whether the admission agreement is likely to be open or closed to new entrants.

3.6 Non ill health early retirement costs

It is assumed that members' benefits are payable from the earliest age that the employee could retire without incurring a reduction to their benefit (and without requiring their employer's consent to retire). (**NB** the relevant age may be different for different periods of service, following the benefit changes from April 2008 and April 2014). Employers are required to pay additional contributions ('strain') wherever an employee retires before attaining this age. The actuary's funding basis makes no allowance for premature retirement except on grounds of ill-health.

Normally the additional strain contribution is payable as an immediate single lump sum and is not spread.

3.7 III health early retirement costs

In the event of a member's early retirement on the grounds of ill-health, a funding strain will usually arise, which can be very large. Such strains for all employers other than the Council will now be met via external insurance (see 3.8 below).

3.8 External III health insurance

All employers other than the Council are covered by an external insurance policy covering ill health early retirement strains. In effect, the premiums are covered by the employer's contribution to the Fund each year.

3.9 Employers with no remaining active members

In general an employer ceasing in the Fund, due to the departure of the last active member, will pay a cessation debt on an appropriate basis (see 3.3, Note (j)) and consequently have no further obligation to the Fund. Thereafter it is expected that one of two situations will eventually arise:

- a) The employer's asset share runs out before all its ex-employees' benefits have been paid. In this situation the other Fund employers will be required to contribute to pay all remaining benefits: this will be done by the Fund actuary apportioning the remaining liabilities on a pro-rata basis at successive formal valuations;
- b) The last ex-employee or dependant dies before the employer's asset share has been fully utilised. In this situation the remaining assets would be apportioned pro-rata by the Fund's actuary to the other Fund employers.

In exceptional circumstances the Fund may permit an employer with no remaining active members to continue contributing to the Fund. This would require the provision of a suitable security or guarantee, as well as a written ongoing commitment to fund the remainder of the employer's obligations over an appropriate period. The Fund would reserve the right to invoke the cessation requirements in the future, however. The Administering Authority may need to seek legal advice in such cases, as the employer would have no contributing members.

3.10 Policies on bulk transfers

Each case will be treated on its own merits, but in general:

- The Fund will not pay bulk transfers greater than the lesser of (a) the asset share of the transferring employer in the Fund, and (b) the value of the past service liabilities of the transferring members;
- The Fund will not grant added benefits to members bringing in entitlements from another Fund unless the asset transfer is sufficient to meet the added liabilities; and
- The Fund may permit shortfalls to arise on bulk transfers if the Fund employer has suitable strength of
 covenant and commits to meeting that shortfall in an appropriate period. This may require the employer's
 Fund contributions to increase between valuations.

4 Funding strategy and links to investment strategy

4.1 What is the Fund's investment strategy?

The Fund has built up assets over the years, and continues to receive contribution and other income. All of this must be invested in a suitable manner, which is the investment strategy.

Investment strategy is set by the administering authority, after consultation with the employers and after taking investment advice. The precise mix, manager make up and target returns are set out in the Statement of Investment Principles (being replaced by an Investment Strategy Statement under new LGPS Regulations), which is available to members and employers.

The investment strategy is set for the long-term, but is reviewed from time to time. Normally a full review is carried out as part of each actuarial valuation, and is kept under review annually between actuarial valuations to ensure that it remains appropriate to the Fund's liability profile.

The same investment strategy is currently followed for all employers.

4.2 What is the link between funding strategy and investment strategy?

The Fund must be able to meet all benefit payments as and when they fall due. These payments will be met by contributions (resulting from the funding strategy) or asset returns and income (resulting from the investment strategy). To the extent that investment returns or income fall short, then higher cash contributions are required from employers, and vice versa

Therefore, the funding and investment strategies are inextricably linked.

4.3 How does the funding strategy reflect the Fund's investment strategy?

In the opinion of the Fund actuary, the current funding policy is consistent with the current investment strategy of the Fund. The asset outperformance assumption contained in the discount rate (see Appendix E3) is within a range that would be considered acceptable for funding purposes; it is also considered to be consistent with the requirement to take a "prudent longer-term view" of the funding of liabilities as required by the UK Government (see Appendix A1).

However, in the short term – such as the three yearly assessments at formal valuations – there is the scope for considerable volatility and there is a material chance that in the short-term and even medium term, asset returns will fall short of this target. The stability measures described in <u>Section 3</u> will damp down, but not remove, the effect on employers' contributions.

The Fund does not hold a contingency reserve to protect it against the volatility of equity investments.

4.4 How does this differ for a large stable employer?

The Actuary has developed four key measures which capture the essence of the Fund's strategies, both funding and investment:

Prudence - the Fund should have a reasonable expectation of being fully funded in the long term;

Affordability – how much can employers afford;

Stewardship – the assumptions used should be sustainable in the long term, without having to resort to overly optimistic assumptions about the future to maintain an apparently healthy funding position; and

Stability – employers should not see significant moves in their contribution rates from one year to the next, to help provide a more stable budgeting environment.

The key problem is that the key objectives often conflict. For example, minimising the long term cost of the scheme (i.e. keeping employer rates affordable) is best achieved by investing in higher returning assets e.g. equities. However, equities are also very volatile (i.e. go up and down fairly frequently in fairly large moves), which conflicts with the objective to have stable contribution rates.

Therefore, a balance needs to be maintained between risk and reward, which has been considered by the use of Asset Liability Modelling: this is a set of calculation techniques applied by the Fund's actuary to model the range of potential future solvency levels and contribution rates.

The Actuary was able to model the impact of these four key areas, for the purpose of setting a stabilisation approach (see 3.3 Note (b)). The modelling demonstrated that retaining the present investment strategy, coupled with constraining employer contribution rate changes as described in 3.3 Note (b), struck an appropriate balance between the above objectives. In particular the stabilisation approach currently adopted meets the need for stability of contributions without jeopardising the Administering Authority's aims of prudent stewardship of the Fund.

Whilst the current stabilisation mechanism is to remain in place until 2020, it should be noted that this will need to be reviewed following the 2019 valuation.

4.5 Does the Fund monitor its overall funding position?

The Administering Authority monitors the relative funding position, i.e. changes in the relationship between asset values and the liabilities value, annually. It reports this to the regular Pensions Committee meetings.

5 Statutory reporting and comparison to other LGPS Funds

5.1 Purpose

Under Section 13(4)(c) of the Public Service Pensions Act 2013 ("Section 13"), the Government Actuary's Department must, following each triennial actuarial valuation, report to the Department of Communities & Local Government (DCLG) on each of the LGPS Funds in England & Wales. This report will cover whether, for each Fund, the rate of employer contributions are set at an appropriate level to ensure both the solvency and the long term cost efficiency of the Fund.

This additional DCLG oversight may have an impact on the strategy for setting contribution rates at future valuations.

5.2 Solvency

For the purposes of Section 13, the rate of employer contributions shall be deemed to have been set at an appropriate level to ensure solvency if:

- (a) the rate of employer contributions is set to target a funding level for the Fund of 100%, over an appropriate time period and using appropriate actuarial assumptions (where appropriateness is considered in both absolute and relative terms in comparison with other funds); and either
- (b) employers collectively have the financial capacity to increase employer contributions, and/or the Fund is able to realise contingent assets should future circumstances require, in order to continue to target a funding level of 100%; or
- (c) there is an appropriate plan in place should there be, or if there is expected in future to be, a material reduction in the capacity of fund employers to increase contributions as might be needed.

5.3 Long Term Cost Efficiency

The rate of employer contributions shall be deemed to have been set at an appropriate level to ensure long term cost efficiency if:

- i. the rate of employer contributions is sufficient to make provision for the cost of current benefit accrual,
- ii. with an appropriate adjustment to that rate for any surplus or deficit in the Fund.

In assessing whether the above condition is met, DCLG may have regard to various absolute and relative considerations. A relative consideration is primarily concerned with comparing LGPS pension funds with other LGPS pension funds. An absolute consideration is primarily concerned with comparing Funds with a given objective benchmark.

Relative considerations include:

- 1. the implied deficit recovery period; and
- 2. the investment return required to achieve full funding after 20 years.

Absolute considerations include:

- 1. the extent to which the contributions payable are sufficient to cover the cost of current benefit accrual and the interest cost on any deficit;
- 2. how the required investment return under "relative considerations" above compares to the estimated future return being targeted by the Fund's current investment strategy;
- 3. the extent to which contributions actually paid have been in line with the expected contributions based on the extant rates and adjustment certificate; and
- 4. the extent to which any new deficit recovery plan can be directly reconciled with, and can be demonstrated to be a continuation of, any previous deficit recovery plan, after allowing for actual Fund experience.

DCLG may assess and compare these metrics on a suitable standardised market-related basis, for example where the local funds' actuarial bases do not make comparisons straightforward.

Appendix A – Regulatory framework

A1 Why does the Fund need an FSS?

The Department for Communities and Local Government (DCLG) has stated that the purpose of the FSS is:

"to establish a **clear and transparent fund-specific strategy** which will identify how employers' pension liabilities are best met going forward;

to support the regulatory framework to maintain as nearly constant employer contribution rates as possible; and

to take a prudent longer-term view of funding those liabilities."

These objectives are desirable individually, but may be mutually conflicting. As a result of Section 13 of the Public Service Pensions Act 2013, the FSS must have as the primary objective the setting of employer contributions at an appropriate level to ensure both the solvency and the long-term cost-efficiency of the Pension Fund.

The requirement to maintain and publish a FSS is contained in LGPS Regulations which are updated from time to time. In publishing the FSS the Administering Authority has to have regard to any guidance published by Chartered Institute of Public Finance and Accountancy (CIPFA) (most recently in 2016) and to its Statement of Investment Principles / Investment Strategy Statement.

This is the framework within which the Fund's actuary carries out triennial valuations to set employers' contributions and provides recommendations to the Administering Authority when other funding decisions are required, such as when employers join or leave the Fund. The FSS applies to all employers participating in the Fund.

A2 Does the Administering Authority consult anyone on the FSS?

Yes. This is required by LGPS Regulations. It is covered in more detail by the most recent CIPFA guidance, which states that the FSS must first be subject to "consultation with such persons as the authority considers appropriate", and should include "a meaningful dialogue at officer and elected member level with council tax raising authorities and with corresponding representatives of other participating employers".

In practice, for the Fund, the consultation process for this FSS was as follows:

- a) A draft version of the FSS was issued to all participating employers on 12 October 2018 for comment;
- b) Comments were requested within 14 days;
- c) Following the end of the consultation period the FSS was updated where required, approved by Haringey Pensions Committee and Board on 20 November 2018, and then published on 21 November 2018.

A3 How is the FSS published?

The FSS is made available through the following routes:

Published on the website, at http://www.haringeypensionfund.co.uk;

A copy sent by post or e-mail to each participating employer in the Fund;

A full copy included in or linked from the annual report and accounts of the Fund;

Copies made available on request.

A4 How often is the FSS reviewed?

The FSS is reviewed in detail at least every three years as part of the triennial valuation. Normally the FSS is expected to remain unaltered until it is consulted on as part of the formal process for the next valuation. As a result, however, of the Local Government Pension Scheme (Amendment) Regulations 2018 which came into effect on 14 May 2018 it has been necessary to amend, after due consultation, the FSS.

It is possible that (usually slight) amendments may be needed within the three year period. These would be needed to reflect any regulatory changes, or alterations to the way the Fund operates (e.g. to accommodate a new class of employer). Any such amendments would be consulted upon as appropriate:

- trivial amendments would be simply notified at the next round of employer communications,
- amendments affecting only one class of employer would be consulted with those employers,
- other more significant amendments would be subject to full consultation.

In any event, changes to the FSS would need agreement by the Pensions Committee and would be included in the relevant Committee Meeting minutes.

A5 How does the FSS fit into other Fund documents?

The FSS is a summary of the Fund's approach to funding liabilities. It is not an exhaustive statement of policy on all issues, for example there are a number of separate statements published by the Fund including the Statement of Investment Principles/Investment Strategy Statement, Governance Strategy and Communications Strategy. In addition, the Fund publishes an Annual Report and Accounts with up to date information on the Fund.

These documents can be found on the web at http://www.haringeypensionfund.co.uk.

Appendix B – Responsibilities of key parties

The efficient and effective operation of the Fund needs various parties to each play their part.

B1 The Administering Authority should:-

- 1. operate the Fund as per the LGPS Regulations;
- 2. effectively manage any potential conflicts of interest arising from its dual role as Administering Authority and a Fund employer;
- 3. collect employer and employee contributions, and investment income and other amounts due to the Fund;
- 4. ensure that cash is available to meet benefit payments as and when they fall due;
- 5. pay from the Fund the relevant benefits and entitlements that are due;
- invest surplus monies (i.e. contributions and other income which are not immediately needed to pay benefits) in accordance with the Fund's Statement of Investment Principles/Investment Strategy Statement (SIP/ISS) and LGPS Regulations;
- 7. communicate appropriately with employers so that they fully understand their obligations to the Fund;
- 8. take appropriate measures to safeguard the Fund against the consequences of employer default;
- 9. manage the valuation process in consultation with the Fund's actuary;
- 10. provide data and information as required by the Government Actuary's Department to carry out their statutory obligations (see <u>Section 5</u>);
- 11. prepare and maintain a FSS and a SIP/ISS, after consultation;
- 12. notify the Fund's actuary of material changes which could affect funding (this is covered in a separate agreement with the actuary); and
- 13. monitor all aspects of the fund's performance and funding and amend the FSS and SIP/ISS as necessary and appropriate.

B2 The Individual Employer should:-

- 1. deduct contributions from employees' pay correctly;
- 2. pay all contributions, including their own as determined by the actuary, promptly by the due date;
- 3. have a policy and exercise discretions within the regulatory framework;
- 4. make additional contributions in accordance with agreed arrangements in respect of, for example, augmentation of scheme benefits, early retirement strain; and
- 5. notify the Administering Authority promptly of all changes to its circumstances, prospects or membership, which could affect future funding.

B3 The Fund Actuary should:-

- 1. prepare valuations, including the setting of employers' contribution rates. This will involve agreeing assumptions with the Administering Authority, having regard to the FSS and LGPS Regulations, and targeting each employer's solvency appropriately;
- 2. provide data and information as required by the Government Actuary's Department to carry out their statutory obligations (see <u>Section 5</u>);

- 3. provide advice relating to new employers in the Fund, including the level and type of bonds or other forms of security (and the monitoring of these);
- 4. prepare advice and calculations in connection with bulk transfers and individual benefit-related matters;
- 5. assist the Administering Authority in considering possible changes to employer contributions between formal valuations, where circumstances suggest this may be necessary;
- 6. advise on the termination of employers' participation in the Fund; and
- 7. fully reflect actuarial professional guidance and requirements in the advice given to the Administering Authority.

B4 Other parties:-

- 1. investment advisers (either internal or external) should ensure the Fund's SIP/ISS remains appropriate, and consistent with this FSS;
- 2. investment managers, custodians and bankers should all play their part in the effective investment (and dis-investment) of Fund assets, in line with the SIP/ISS;
- 3. auditors should comply with their auditing standards, ensure Fund compliance with all requirements, monitor and advise on fraud detection, and sign off annual reports and financial statements as required;
- 4. governance advisers may be appointed to advise the Administering Authority on efficient processes and working methods in managing the Fund;
- 5. legal advisers (either internal or external) should ensure the Fund's operation and management remains fully compliant with all regulations and broader local government requirements, including the Administering Authority's own procedures;
- the Department for Communities and Local Government (assisted by the Government Actuary's Department) and the Scheme Advisory Board, should work with LGPS Funds to meet Section 13 requirements.

Appendix C – Key risks and controls

C1 Types of risk

The Administering Authority has an active risk management programme in place. The measures that it has in place to control key risks are summarised below under the following headings:

- financial;
- demographic;
- regulatory; and
- governance.

C2 Financial risks

2 Financial risks	
Risk	Summary of Control Mechanisms
Fund assets fail to deliver returns in line with the anticipated returns underpinning the valuation of	Only anticipate long-term returns on a relatively prudent basis to reduce risk of under-performing.
liabilities over the long-term.	Assets invested on the basis of specialist advice, in a suitably diversified manner across asset classes, geographies, managers, etc.
	Analyse progress at three yearly valuations for all employers.
	Inter-valuation roll-forward of liabilities between valuations at whole Fund level.
Inappropriate long-term investment strategy.	Overall investment strategy options considered as an integral part of the funding strategy. Used asset liability modelling to measure 4 key outcomes.
	Chosen option considered to provide the best balance.
Fall in risk-free returns on Government bonds, leading to rise in value placed on liabilities.	Stabilisation modelling at whole Fund level allows for the probability of this within a longer term context.
	Inter-valuation monitoring, as above.
	Some investment in bonds helps to mitigate this risk.
Active investment manager under-performance relative to benchmark.	Quarterly investment monitoring analyses market performance and active managers relative to their index benchmark.
Pay and price inflation significantly more than anticipated.	The focus of the actuarial valuation process is on real returns on assets, net of price and pay increases.
	Inter-valuation monitoring, as above, gives early warning.

Risk	Summary of Control Mechanisms
	Some investment in bonds also helps to mitigate this risk.
	Employers pay for their own salary awards and should be mindful of the geared effect on pension liabilities of any bias in pensionable pay rises towards longer- serving employees.
Effect of possible increase in employer's contribution rate on service delivery and admission/scheduled bodies	An explicit stabilisation mechanism has been agreed as part of the funding strategy. Other measures are also in place to limit sudden increases in contributions.
Orphaned employers give rise to added costs for the Fund	The Fund seeks a cessation debt (or security/guarantor) to minimise the risk of this happening in the future.
	If it occurs, the Actuary calculates the added cost spread pro-rata among all employers – (see <u>3.9</u>).
Liquidity issues posed by significant cessations posed by employers in surplus funding position	Careful monitoring of funding levels at triennial valuations, and allowing contribution holidays where appropriate to ensure employers do not generate significant surplus positions
	Ensuring that the fund's investment strategy allows for a significant proportion of liquid investments and asset classes

C3 Demographic risks

Risk	Summary of Control Mechanisms
Pensioners living longer, thus increasing cost to Fund.	Set mortality assumptions with some allowance for future increases in life expectancy.
	The Fund Actuary has direct access to the experience of over 50 LGPS funds which allows early identification of changes in life expectancy that might in turn affect the assumptions underpinning the valuation.
Maturing Fund – i.e. proportion of actively contributing employees declines relative to retired employees.	Continue to monitor at each valuation, consider seeking monetary amounts rather than % of pay and consider alternative investment strategies.
Deteriorating patterns of early retirements	Employers are charged the extra cost of non ill-health retirements following each individual decision.

Risk	Summary of Control Mechanisms
	Employer ill health retirement experience is monitored, and insurance is an option.
Reductions in payroll causing insufficient deficit recovery payments	In many cases this may not be sufficient cause for concern, and will in effect be caught at the next formal valuation. However, there are protections where there is concern, as follows:
	Employers in the stabilisation mechanism may be brought out of that mechanism to permit appropriate contribution increases (see Note (b) to 3.3).
	For other employers, review of contributions is permitted in general between valuations (see Note (f) to 3.3) and may require a move in deficit contributions from a percentage of payroll to fixed monetary amounts.

C4 Regulatory risks

Risk	Summary of Control Mechanisms
Changes to national pension requirements and/or HMRC rules e.g. changes arising from public sector pensions reform.	The Administering Authority considers all consultation papers issued by the Government and comments where appropriate.
	The results of the most recent reforms were built into the 2013 valuation. Any changes to member contribution rates or benefit levels will be carefully communicated with members to minimise possible optouts or adverse actions.
Time, cost and/or reputational risks associated with any DCLG intervention triggered by the Section 13 analysis (see Section 5).	Take advice from Fund Actuary on position of Fund as at prior valuation, and consideration of proposed valuation approach relative to anticipated Section 13 analysis.
Changes by Government to particular employer participation in LGPS Funds, leading to impacts on funding and/or investment strategies.	The Administering Authority considers all consultation papers issued by the Government and comments where appropriate.
	Take advice from Fund Actuary on impact of changes on the Fund and amend strategy as appropriate.

C5 Governance risks

Risk	Summary of Control Mechanisms
Administering Authority unaware of structural changes in an employer's membership (e.g. large fall in employee members, large number of	The Administering Authority has a close relationship with employing bodies and communicates required standards e.g. for submission of data.
retirements) or not advised of an employer closing to new entrants.	The Actuary may revise the rates and Adjustments certificate to increase an employer's contributions between triennial valuations
	Deficit contributions may be expressed as monetary amounts.
Actuarial or investment advice is not sought, or is not heeded, or proves to be insufficient in	The Administering Authority maintains close contact with its specialist advisers.
some way	Advice is delivered via formal meetings involving Elected Members, and recorded appropriately.
	Actuarial advice is subject to professional requirements such as peer review.
Administering Authority failing to commission the Fund Actuary to carry out a termination valuation for a departing Admission Body.	The Administering Authority requires employers with Best Value contractors to inform it of forthcoming changes.
	Community Admission Bodies' memberships are monitored and, if active membership decreases, steps will be taken.
An employer ceasing to exist with insufficient funding or adequacy of a bond.	The Administering Authority believes that it would normally be too late to address the position if it was left to the time of departure.
	The risk is mitigated by:
	Seeking a funding guarantee from another scheme employer, or external body, where-ever possible (see Notes (h) and (j) to 3.3).
	Alerting the prospective employer to its obligations and encouraging it to take independent actuarial advice.
	Vetting prospective employers before admission.
	Where permitted under the regulations requiring a bond to protect the Fund from various risks.
	Requiring new Community Admission Bodies to have a guarantor.

Risk	Summary of Control Mechanisms
	Reviewing bond or guarantor arrangements at regular intervals (see Note (f) to 3.3).
	Reviewing contributions well ahead of cessation if thought appropriate (see Note (a) to 3.3).

Appendix D – The calculation of Employer contributions

In <u>Section 2</u> there was a broad description of the way in which contribution rates are calculated. This Appendix considers these calculations in much more detail.

All three steps above are considered when setting contributions (more details are given in <u>Section 3</u> and <u>Appendix D</u>:

- 1. The **funding target** is based on a set of assumptions about the future, eg investment returns, inflation, pensioners' life expectancies. However, if an employer is approaching the end of its participation in the Fund then it's funding target may be set on a more prudent basis, so that it's liabilities are less likely to be spread among other employers after it's cessation of participation;
- 2. The **time horizon** required is, in broad terms, the period over which any deficit is to be recovered. A shorter period will lead to higher contributions, and vice versa (all other things being equal). Employers may be given a lower time horizon if they have a less permanent anticipated membership, or do not have tax-raising powers to increase contributions if investment returns under-perform;
- 3. The required **probability of achieving** the funding target over that time horizon will be dependent on the Fund's view of the strength of employer covenant and its funding profile. Where an employer is considered to be weaker, or potentially ceasing from the Fund, then the required probability will be set higher, which in turn will increase the required contributions (and vice versa).

The calculations involve actuarial assumptions about future experience, and these are described in detail in Appendix E.

D1 What is the difference between calculations across the whole Fund and calculations for an individual employer?

Employer contributions are normally made up of two elements:

- a) the estimated cost of ongoing benefits being accrued, referred to as the "Primary contribution rate" (see
 D2 below); plus
- b) an adjustment for the difference between the Primary rate above, and the actual contribution the employer needs to pay, referred to as the "Secondary contribution rate" (see <u>D3</u> below).

The contribution rate for each employer is measured as above, appropriate for each employer's funding position and membership. The whole Fund position, including that used in reporting to DCLG (see section 5), is calculated in effect as the sum of all the individual employer rates. DCLG currently only regulates at whole Fund level, without monitoring individual employer positions.

D2 How is the Primary contribution rate calculated?

The Primary element of the employer contribution rate is calculated with the aim that these contributions will meet benefit payments in respect of members' **future** service in the Fund. This is based upon the cost (in excess of members' contributions) of the benefits which employee members earn from their service each year.

The Primary rate is calculated separately for all the employers, although employers within a pool will pay the contribution rate applicable to the pool as a whole. The Primary rate is calculated such that it is projected to:

- 1. meet the required funding target for all future years' accrual of benefits*, excluding any accrued assets,
- 2. within the determined time horizon (see <u>note 3.3 Note (c)</u> for further details),

- 3. with a sufficiently high probability, as set by the Fund's strategy for the category of employer (see <u>3.3</u> Note (e) for further details).
- * The projection is for the current active membership where the employer no longer admits new entrants, or additionally allows for new entrants where this is appropriate.

The projections are carried out using an economic modeller developed by the Fund's actuary Hymans Robertson: this allows for a wide range of outcomes as regards key factors such as asset returns (based on the Fund's investment strategy), inflation, and bond yields. The measured contributions are calculated such that the proportion of outcomes meeting the employer's funding target (by the end of the time horizon) is equal to the required probability.

The approach includes expenses of administration to the extent that they are borne by the Fund, and includes allowances for benefits payable on death in service and on ill health retirement.

D3 How is the Secondary contribution rate calculated?

The combined Primary and Secondary rates aim to achieve the employer's funding target, within the appropriate time horizon, with the relevant degree of probability.

For the funding target, the Fund actuary agrees the assumptions to be used with the Administering Authority – see <u>Appendix E</u>. These assumptions are used to calculate the present value of all benefit payments expected in the future, relating to that employer's current and former employees, based on pensionable service to the valuation date only (i.e. ignoring further benefits to be built up in the future).

The Fund operates the same target funding level for all employers of 100% of its accrued liabilities valued on the ongoing basis, unless otherwise determined (see <u>Section 3</u>).

The Secondary rate is calculated as the balance over and above the Primary rate, such that the total is projected to:

- meet the required funding target relating to combined past and future service benefit accrual, including accrued asset share (see <u>D5</u> below)
- 2. within the determined time horizon (see 3.3 Note (c) for further details)
- 3. with a sufficiently high probability, as set by the Fund's strategy for the category of employer (see <u>3.3</u> Note (e) for further details).

The projections are carried out using an economic modeller developed by the Fund Actuary Hymans Robertson: this allows for a wide range of outcomes as regards key factors such as asset returns (based on the Fund's investment strategy), inflation, and bond yields. The measured contributions are calculated such that the proportion of outcomes with at least 100% solvency (by the end of the time horizon) is equal to the required probability.

D4 What affects a given employer's valuation results?

The results of these calculations for a given individual employer will be affected by:

- 1. past contributions relative to the cost of accruals of benefits;
- 2. different liability profiles of employers (e.g. mix of members by age, gender, service vs. salary);
- 3. the effect of any differences in the funding target, i.e. the valuation basis used to value the employer's liabilities;
- 4. any different time horizons;

- 5. the difference between actual and assumed rises in pensionable pay;
- 6. the difference between actual and assumed increases to pensions in payment and deferred pensions;
- 7. the difference between actual and assumed retirements on grounds of ill-health from active status;
- 8. the difference between actual and assumed amounts of pension ceasing on death;
- 9. the additional costs of any non ill-health retirements relative to any extra payments made; and/or
- 10. differences in the required probability of achieving the funding target.

D5 How is each employer's asset share calculated?

The Administering Authority does not account for each employer's assets separately. Instead, the Fund's actuary is required to apportion the assets of the whole Fund between the employers, at each triennial valuation.

This apportionment uses the income and expenditure figures provided for certain cash flows for each employer. This process adjusts for transfers of liabilities between employers participating in the Fund, but does make a number of simplifying assumptions. The split is calculated using an actuarial technique known as "analysis of surplus".

Actual investment returns achieved on the Fund between each valuation are applied proportionately across all employers, to the extent that employers in effect share the same investment strategy. Transfers of liabilities between employers within the Fund occur automatically within this process, with a sum broadly equivalent to the reserve required on the ongoing basis being exchanged between the two employers.

The Fund actuary does not allow for certain relatively minor events, including but not limited to:

- 1. the actual timing of employer contributions within any financial year;
- 2. the effect of the premature payment of any deferred pensions on grounds of incapacity.

These effects are swept up within a miscellaneous item in the analysis of surplus, which is split between employers in proportion to their liabilities.

The methodology adopted means that there will inevitably be some difference between the asset shares calculated for individual employers and those that would have resulted had they participated in their own ring-fenced section of the Fund.

The asset apportionment is capable of verification but not to audit standard. The Administering Authority recognises the limitations in the process, but it considers that the Fund actuary's approach addresses the risks of employer cross-subsidisation to an acceptable degree.

Appendix E – Actuarial assumptions

E1 What are the actuarial assumptions?

These are expectations of future experience used to place a value on future benefit payments ("the liabilities"). Assumptions are made about the amount of benefit payable to members (the financial assumptions) and the likelihood or timing of payments (the demographic assumptions). For example, financial assumptions include investment returns, salary growth and pension increases; demographic assumptions include life expectancy, probabilities of ill-health early retirement, and proportions of member deaths giving rise to dependants' benefits.

Changes in assumptions will affect the measured funding target. However, different assumptions will not of course affect the actual benefits payable by the Fund in future.

The combination of all assumptions is described as the "basis". A more optimistic basis might involve higher assumed investment returns (discount rate), or lower assumed salary growth, pension increases or life expectancy; a more optimistic basis will give lower funding targets and lower employer costs. A more prudent basis will give higher funding targets and higher employer costs.

E2 What basis is used by the Fund?

The Fund's standard funding basis is described as the "ongoing basis", which applies to most employers in most circumstances. This is described in more detail below. It anticipates employers remaining in the Fund in the long term.

However, in certain circumstances, typically where the employer is not expected to remain in the Fund long term, a more prudent basis applies: see <u>Note (a)</u> to <u>3.3</u>.

E3 What assumptions are made in the ongoing basis?

a) Investment return / discount rate

The key financial assumption is the anticipated return on the Fund's investments. This "discount rate" assumption makes allowance for an anticipated out-performance of Fund returns relative to long term yields on UK Government bonds ("gilts"). There is, however, no guarantee that Fund returns will out-perform gilts. The risk is greater when measured over short periods such as the three years between formal actuarial valuations, when the actual returns and assumed returns can deviate sharply.

Given the very long-term nature of the liabilities, a long term view of prospective asset returns is taken. The long term in this context would be 20 to 30 years or more.

For the purpose of the triennial funding valuation at 31 March 2016 and setting contribution rates effective from 1 April 2017, the Fund actuary has assumed that future investment returns earned by the Fund over the long term will be 1.8% per annum greater than gilt yields at the time of the valuation (this is higher than that used at the 2013 valuation – 1.6% per annum - which gives a lower funding target, all other things being equal). In the opinion of the Fund actuary, based on the current investment strategy of the Fund, this asset out-performance assumption is within a range that would be considered acceptable for the purposes of the funding valuation.

b) Salary growth

Pay for public sector employees is currently subject to restriction by the UK Government until 2020. Although this "pay freeze" does not officially apply to local government and associated employers, it has been suggested that they are likely to show similar restraint in respect of pay awards. Based on long term historical analysis of the membership in LGPS funds, and continued austerity measures, the salary increase assumption at the 2016 valuation has been set to be a blended rate combined of:

- 1. 1% p.a. until 31 March 2020, followed by
- 2. 1.0% above the retail prices index (RPI) per annum p.a. thereafter.

This gives a single blended rate of RPI less 0.4%, and is a change from the previous valuation, which assumed a flat assumption of RPI plus 1.0% per annum. The change has led to a reduction in the funding target (all other things being equal).

c) Pension increases

Since 2011 the consumer prices index (CPI), rather than RPI, has been the basis for increases to public sector pensions in deferment and in payment. Note that the basis of such increases is set by the Government, and is not under the control of the Fund or any employers.

As at the previous valuation, we derive our assumption for RPI from market data as the difference between the yield on long-dated fixed interest and index-linked government bonds. This is then reduced to arrive at the CPI assumption, to allow for the "formula effect" of the difference between RPI and CPI. At this valuation, we propose a reduction of 1.0% per annum. This is a larger reduction than at 2013, which will serve to reduce the funding target (all other things being equal). (Note that the reduction is applied in a geometric, not arithmetic, basis).

d) Life expectancy

The demographic assumptions are intended to be best estimates of future experience in the Fund based on past experience of LGPS funds which participate in Club Vita, the longevity analytics service used by the Fund, and endorsed by the actuary.

The longevity assumptions that have been adopted at this valuation are a bespoke set of "VitaCurves", produced by the Club Vita's detailed analysis, which are specifically tailored to fit the membership profile of the Fund. These curves are based on the data provided by the Fund for the purposes of this valuation.

It is acknowledged that future life expectancy and, in particular, the allowance for future improvements in life expectancy, is uncertain. There is a consensus amongst actuaries, demographers and medical experts that life expectancy is likely to improve in the future. Allowance has been made in the ongoing valuation basis for future improvements in line with the 2013 version of the Continuous Mortality Investigation model published by the Actuarial Profession and a 1.25% per annum minimum underpin to future reductions in mortality rates. This is a similar allowance for future improvements than was made in 2013.

The combined effect of the above changes from the 2013 valuation approach, is a slight reduction to the average overall life expectancies in the Fund. The approach taken is considered reasonable in light of the long term nature of the Fund and the assumed level of security underpinning members' benefits.

e) General

The same financial assumptions are adopted for most employers, in deriving the funding target underpinning the Primary and Secondary rates: as described in (3.3), these calculated figures are translated in different ways into employer contributions, depending on the employer's circumstances.

The demographic assumptions, in particular the life expectancy assumption, in effect vary by type of member and so reflect the different membership profiles of employers.

Appendix F – Glossary

Actuarial assumptions/basis

The combined set of assumptions made by the actuary, regarding the future, to calculate the value of **the funding target**. The main assumptions will relate to the **discount rate**, salary growth, pension increases and longevity. More prudent assumptions will give a higher target value, whereas more optimistic assumptions will give a lower value.

Administering Authority The council with statutory responsibility for running the Fund, in effect the Fund's "trustees".

Admission Bodies

Employers where there is an Admission Agreement setting out the employer's obligations. These can be Community Admission Bodies or Transferee Admission Bodies. For more details (see <u>2.3</u>).

Covenant

The assessed financial strength of the employer. A strong covenant indicates a greater ability (and willingness) to pay for pension obligations in the long run. A weaker covenant means that it appears that the employer may have difficulties meeting its pension obligations in full over the longer term.

Designating Employer Employers such as town and parish councils that are able to participate in the LGPS via resolution. These employers can designate which of their employees are eligible to join the Fund.

Discount rate

The annual rate at which future assumed cashflows (in and out of the Fund) are discounted to the present day. This is necessary to provide a **funding target** which is consistent with the present day value of the assets. A lower discount rate gives a higher target value, and vice versa. It is used in the calculation of the **Primary and Secondary rates**.

Employer

An individual participating body in the Fund, which employs (or used to employ) **members** of the Fund. Normally the assets and **funding target** values for each employer are individually tracked, together with its **Primary rate** at each **valuation**.

Funding target

The actuarially calculated present value of all pension entitlements of all **members** of the Fund, built up to date. This is compared with the present market value of Fund assets to derive the **deficit**. It is calculated on a chosen set of **actuarial assumptions**.

Gilt

A UK Government bond, ie a promise by the Government to pay interest and capital as per the terms of that particular gilt, in return for an initial payment of capital by the purchaser. Gilts can be "fixed interest", where the interest payments are level throughout the gilt's term, or "index-linked" where the interest payments vary each year in line with a specified index (usually RPI). Gilts can be bought as assets by the Fund, but their main use in funding is as an objective measure of solvency.

Guarantee / guarantor

A formal promise by a third party (the guarantor) that it will meet any pension obligations not met by a specified employer. The presence of a guarantor will mean, for instance, that the Fund can consider the employer's **covenant** to be as strong as its guarantor's.

Letting employer

An employer which outsources or transfers a part of its services and workforce to another employer (usually a contractor). The contractor will pay towards the LGPS benefits accrued by the transferring members, but ultimately the obligation to pay for these benefits will revert to the letting employer. A letting employer will usually be a local authority, but can sometimes be another type of employer such as an Academy.

LGPS

The Local Government Pension Scheme, a public sector pension arrangement put in place via Government Regulations, for workers in local government. These Regulations also dictate eligibility (particularly for Scheduled Bodies), members' contribution rates, benefit calculations and certain governance requirements. The LGPS is divided into 101 Funds which map the UK. Each LGPS Fund is autonomous to the extent not dictated by Regulations, e.g. regarding investment strategy, employer contributions and choice of advisers.

Maturity

A general term to describe a Fund (or an employer's position within a Fund) where the members are closer to retirement (or more of them already retired) and the investment time horizon is shorter. This has implications for investment strategy and, consequently, funding strategy.

Members

The individuals who have built up (and may still be building up) entitlement in the Fund. They are divided into actives (current employee members), deferreds (exemployees who have not yet retired) and pensioners (exemployees who have now retired, and dependants of deceased exemployees).

Primary contribution rate

The employer contribution rate required to pay for ongoing accrual of active members' benefits (including an allowance for administrative expenses). See Appendix D for further details.

Profile

The profile of an employer's membership or liability reflects various measurements of that employer's **members**, ie current and former employees. This includes: the proportions which are active, deferred or pensioner; the average ages of each category; the varying salary or pension levels; the lengths of service of active members vs their salary levels, etc. A membership (or liability) profile might be measured for its **maturity** also.

Rates and Adjustments Certificate

A formal document required by the LGPS Regulations, which must be updated at least every three years at the conclusion of the formal **valuation**. This is completed by the actuary and confirms the contributions to be paid by each employer (or pool of employers) in the Fund for the three year period until the next valuation is completed.

Scheduled Bodies

Types of employer explicitly defined in the LGPS Regulations, whose employers must be offered membership of their local LGPS Fund. These include Councils, colleges, universities, academies, police and fire authorities etc, other than employees who have entitlement to a different public sector pension scheme (e.g. teachers, police and fire officers, university lecturers).

Secondary contribution rate

The difference between the employer's actual and **Primary contribution rates**. In broad terms, this relates to the shortfall of its asset share to its **funding target**. See Appendix D for further details.

Stabilisation

Any method used to smooth out changes in employer contributions from one year to the next. This is very broadly required by the LGPS Regulations, but in practice is particularly employed for large stable employers in the Fund. Different methods may involve: probability-based modelling of future market movements; longer deficit recovery periods; higher discount rates; or some combination of these.

Valuation

An actuarial investigation to calculate the liabilities, Primary and Secondary contribution rates for a Fund, and usually individual employers too. This is normally carried out in full every three years (last done as at 31 March 2016), but can be approximately updated at other times. The assets value is based on market values at the valuation date, and the liabilities value and contribution rates are based on long term bond market yields at that date also.
