REPORT OF THE PENSIONS COMMITTEE

Introduction

The Pensions Committee of Lincolnshire County Council is responsible for the management of the Pension Fund, covering administration, investments and governance. It approves the investment policy of the Fund and monitors its implementation during the year. The Committee generally meets eight times a year, including two manager presentation meetings and two training meetings. Special meetings are convened if considered necessary.

Following the local elections in May 2013, the membership of the Pensions Committee changed considerably, with eight new members to the Committee. Members of the Committee as at 31st March 2015 are listed on page 2.

All members of the Committee can exercise voting rights.

Corporate Governance and Social Responsibility

The Fund complies with corporate governance best practice by voting its shareholdings at all UK, developed Europe, US, Canada and Japan company meetings. The Fund is also a member of the Local Authority Pension Fund Forum (LAPFF), an organisation that monitors the governance of companies. The LAPFF seeks to protect and enhance shareholder returns by engaging with companies on a wide range of social, environmental and governance issues. The Fund has produced a Stewardship Code Statement, in accordance with the Financial Reporting Council's Stewardship Code, to explain how it acts as a responsible shareholder. This can be found on the Fund's website (details below).

Investment Performance

The Fund has an investment objective to meet its liabilities over the long term and to produce a return of 1% p.a. over the return produced by the strategic asset allocation benchmark.

The twelve months to 31st March 2015 produced a positive return to the Fund. Global equity markets rose during the 12 months but this masked a considerable amount of equity market volatility, largely driven by the accelerating slide in oil prices since June 2014. Equity returns, as measured by FTSE, ranged from +27.1% in Japan to +6.6% in the UK. Bond markets delivered strong returns with falling inflation expectations and disappointing economic growth in the Eurozone being the main drivers of performance. Bond returns ranged from +22.8% for UK Gilts to +3.2% for Overseas Bonds. Property delivered a solid return of +18.6%, as UK commercial property continued to be highly sought by both overseas and domestic investors due to the relatively high level of current income it generates, the emerging growth in rental levels and continued increase in capital values.

Performance over the year, at 12.3%, marginally under-performed the strategic benchmark return of 12.4%, producing a relative under-performance of -0.1%. This compares to a rise in retail prices of 0.9% and a decrease in public sector earnings of -0.9%. Over the last ten years, the Fund's annualised investment performance is a solid 7%, although this is slightly behind the benchmark return of 7.4%.

Manager Arrangements

There were no manager changes made during the year.

Pensions Administration

The Council's contract with Mouchel to provide Pensions Administration services ended on 31st March 2015. Lincolnshire County Council entered into a shared service arrangement with West Yorkshire Pension Fund (WYPF) to provide Pensions Administration services from 1st April 2015. A satellite office for WYPF will be based in Lincoln, co-located with the LCC Pension Fund team. This new arrangement should improve efficiency and reduce costs in the provision of the Pensions Administration service.

Fund Governance and Communication Statements and the Statement of Investment Principles

The Fund's investments are managed in accordance with the Statement of Investment Principles (SIP).

The Fund's SIP, Governance Compliance Statement, Communications Policy and Funding Strategy statements are all attached at the end of this report. These documents, and other related publications, can also be downloaded from the Pension Fund's shared website, at www.wypf.org.uk.

Hard copies of any of these statements may be obtained from:

Jo Ray, Pensions & Treasury Manager Lincolnshire County Council, County Offices, Newland, Lincoln, LN1 1YL (Tel: 01522 553656)

(email: jo.ray@lincolnshire.gov.uk).

Councillor Mark Allan

CHAIRMAN

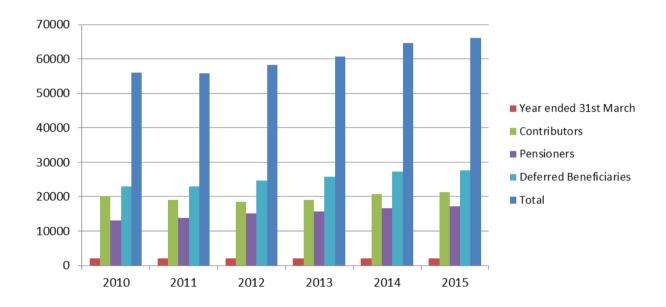

PENSIONS COMMITTEE

MANAGEMENT REPORT OF THE ADMINISTERING AUTHORITY

The Local Government Pension Scheme (LGPS) is a national scheme administered on a local basis by Lincolnshire County Council, providing current and future benefits for over 66,000 scheme members.

Local Government Pension Scheme Membership

As can be seen from the chart below, the membership is still increasing, and the fall in active membership seen over the last few years has reversed. The Fund has matured considerably over the last five years, with deferred members (those that are no longer in the Scheme but will be entitled to a pension at some point in the future) making up 42% of the overall membership.

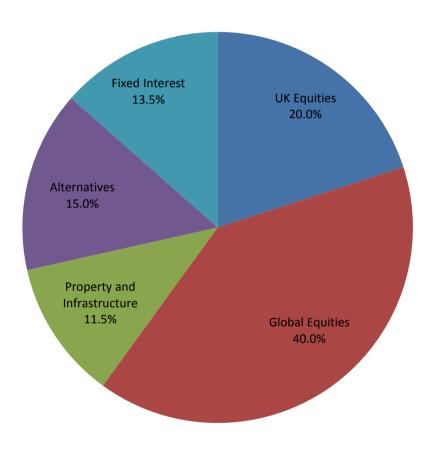

| Year ended 31st March | 2011 | 2012 | 2013 | 2014 | 2015 |
|------------------------|--------|--------|--------|--------|--------|
| Contributors | 19,043 | 18,527 | 19,102 | 20,697 | 21,262 |
| Pensioners | 13,865 | 15,143 | 15,702 | 16,577 | 17,264 |
| Deferred Beneficiaries | 22,931 | 24,620 | 25,799 | 27,246 | 27,577 |
| Total | 55,839 | 58,290 | 60,603 | 64,520 | 66,103 |

(Note: The numbers disclosed in the table above reflect individual pension records within the County Council's database. Current and past members of the LGPS may have more than one pension record as a result, for example, of having more than one part time contract of employment with a Scheme employer.)

Investment Policy

The Fund is managed with regard to a strategic asset allocation benchmark. This is reviewed every three years, following the Fund's triennial valuation. The strategic asset allocation is set to provide the required return, over the long term, to ensure that all pension payments can be met. The actual asset allocation may differ from the strategic benchmark within tolerances that are agreed by the Pensions Committee. The distribution of investments is reported to the Pensions Committee monthly and quarterly.

Strategic Asset Allocation Benchmark

| Asset class | Strategic Benchmark 31 st March 2015 % | Actual Asset Allocation 31 st March 2015 % |
|------------------------------------|---|--|
| UK Equities | 20.0 | 19.9 |
| Global Equities | 40.0 | 41.4 |
| Total Equities | 60.0 | 61.3 |
| Property and Infrastructure | 11.5 | 11.0 |
| Alternative (incl. Private Equity) | 15.0 | 14.3 |
| Fixed Interest | 13.5 | 13.0 |
| Cash (incl. current assets) | 0.0 | 0.4 |
| Total | 100 | 100 |

Investment Performance

The twelve month period ended 31st March 2015 saw the value of the Fund increase by £165m to £1,756m. All managers, other than the absolute return bond portfolio managed by F&C, produced positive absolute returns over the year. The investment return of 12.3% was marginally behind the Fund's specific benchmark return of 12.4%. Over the last ten years, the Fund's annualised investment performance of 7% is slightly behind the benchmark return of 7.4%.

Annual investment performance over the previous ten years is set out in the table below. The Fund's annual return of 12.3% compares to a rise in retail prices of 0.9% and decrease in public sector earnings of -0.9%.

Investment Performance of the Fund 1st April 2005 to 31st March 2015

| | Lincolnshire Fund Return | Comparative Benchmark Return | Retail Price Inflation | Public Sector Increase in earnings |
|---------------------|-----------------------------|------------------------------------|---------------------------|--|

| Vodafone | 11,686 | 0.7 |
| Pantheon USA VII | 10,921 | 0.6 |
| Astrazeneca | 10,124 | 0.6 |
| Total | 761,046 | 43.3 |

Stewardship Responsibilities

As a responsible shareholder, the Lincolnshire Pension Fund has produced a Stewardship Code statement in compliance with the Financial Reporting Council's Stewardship code, and encourages its external managers and service providers to produce their own codes.

The Pensions Committee agree that the adoption of good practise in Corporate Governance will improve the management of companies and thereby increase long term shareholder value.

The Fund votes on all company holdings in the UK, developed Europe, US, Canada and Japan. Votes are filed via a third party agent, Manifest Voting Agency, in accordance with a template agreed by the Pensions Committee. The votes cast are reported to the Pensions Committee on a quarterly basis, and this information is available on the Lincolnshire County Council website in the relevant Committee documents. Over the year, the Fund voted at 778 company meetings, and cast votes in respect of 12,009 resolutions.

The Fund is also a member of the Local Authority Pension Fund Forum (LAPFF), which is a voluntary organisation of 64 public sector Pension Funds based in the UK. LAPFF exists to promote the investment interests of Local Authority Pension Funds, and to maximise their influence as shareholders in promoting corporate social responsibility and high standards of corporate governance in the companies in which they invest. Further information on the work of the LAPFF can be found on their website at www.lapfforum.org. Highlights for the year include:

- Continued engagement with companies to discuss issues such as remuneration, carbon management, employment standards.
- Lobbies G20 meeting on global tax avoidance. In the light of high profile media examination of the tax affairs pf companies such as Amazon, Apple, Starbucks and Google, politicians of all persuasions from the US, UK and many other countries are under continued pressure to take increased action to reduce the more egregious examples of corporate tax evasion and opacity around their operations.
- Provided a response to the Law Commission fiduciary duty consultation presenting a LGPS perspective on key issues of stewardship, short termism and beneficiaries.
- Following collaborative engagement on board diversity, London Stock Exchange appointed two women to the board.
- Engaged with companies in eleven country domiciles on a wide range of governance and risk management concerns.

Risk Management

Risk management is an integral element of managing the Pension Fund. The Pension Fund has a risk register which identifies the major risks associated with managing the Fund. This is reviewed by the Pensions Committee annually, and new or changed risks are reported at each quarterly meeting.

The table below highlights the key risks and how they are managed.

| Key risk identified: | A range of controls are in place including: |
|--|--|
| Assets do not cover liabilities | Triennial valuation, diversification of investments, regular monitoring and reporting, professional advisors. |
| The inability to deliver the Pensions Administration Service, due to failure in the outsourced contract. | Performance and management indicators, monthly meetings, internal and external audits, service level agreement and benchmarking. |
| Paying pensions correctly | Process controls, checking, audits, reconciliations, tracing bureau, task management. |
| Collecting contributions correctly | Employer contribution monitoring, annual contribution checks, audits, employer training, reconciliations. |
| Loss of key staff, knowledge and skills | Diversified staff/team, pensions user groups, procedural notes, section meetings, appraisals. |
| The transition to the new Pensions Administration provider for 1st April 2015 | Project board, transition plan, meetings with the new provider. |

Information regarding the risks relating to financial instruments is included within the notes to the accounts, later in this report.

ACTUARIAL POSITION AND STATEMENT

The employers' contribution rates (including deficit cash amounts where applicable) applying in the year ended 31st March 2015, for employers with more than 100 employees participating in the LGPS, are set out below.

Employers' Contribution Rates 2014/15

| Employer | Rate as a % | Deficit cash |
|---|-------------|--------------|
| | of pay | payment |
| | | £'000 |
| Lincolnshire County Council | 19.7 | 180 |
| Boston Borough Council | 16.9 | 294 |
| City of Lincoln Council | 16.9 | 895 |
| North Kesteven District Council | 16.4 | 375 |
| South Holland District Council | 17.5 | 335 |
| South Kesteven District Council | 17.0 | 506 |
| West Lindsey District Council | 16.1 | 552 |
| East Lindsey District Council | 16.0 | 628 |
| Lincolnshire Police | 19.9 | 196 |
| Magna Vitae | 16.0 | - |
| G4S | 19.9 | - |
| Compass Point Business Services | 18.8 | - |
| Bishop Grosseteste University | 18.0 | 146 |
| Boston College | 20.1 | 53 |
| Grantham College | 19.4 | 15 |
| Lincoln College | 21.1 | - |
| Stamford College | 20.7 | 25 |
| Boston Witham Federation | 20.9 | - |
| Deepings School (Academy) | 20.9 | - |
| Lincoln Christ Hospital Academy | 20.9 | - |
| Priory Federation of Academies | 19.0 | 6 |
| Skegness Academy | 20.9 | - |
| Sleaford St Georges Academy | 22.5 | - |
| Spalding Sir John Gleed Academy | 20.9 | - |
| Welton William Farr CE School (Academy) | 22.7 | - |

The Lincolnshire Pension Fund' latest triennial valuation was as at 31st March 2013. The results from this are published on the Fund's website.

The table below summarises the financial position in respect of benefits earned by members up to this date, compared with the previous valuation.

| | 31 st March 2010 | 31 st March 2013 |
|--------------------------|-----------------------------|-----------------------------|
| Past Service Liabilities | £1,585m | £2,092m |
| Market Value of Assets | £1,204m | £1,495m |
| Surplus/(Deficit) | (382) | (597) |
| Funding Level | 75.9% | 71.5% |

Lincolnshire County Council Pension Fund ("the Fund") Actuarial Statement for 2014/15

This statement has been prepared in accordance with Regulation 34(1)(d) of the Local Government Pension Scheme (Administration) Regulations 2008, and Chapter 6 of the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the UK 2014/15.

Description of Funding Policy

The funding policy is set out in the Administering Authority's Funding Strategy Statement (FSS), dated March 2014. In summary, the key funding principles are as follows:

- to ensure the long-term solvency of the Fund, using a prudent long term view. This will ensure that sufficient funds are available to meet all members'/dependents' benefits as they fall due for payment;
- to ensure that employer contribution rates are reasonably stable where appropriate;
- to minimise the long-term cash contributions which employers need to pay the Fund, by recognising the link between assets and liabilities and adopting an investment strategy which balances risk and return (NB this will also minimise costs to be borne by Council Tax payers);
- to reflect the different characteristics of different employers in determining contribution rates. This
 involves the Fund having a clear and transparent funding strategy to demonstrate how each employer
 can best meet its own liabilities over future years; and
- to use reasonable measures to reduce the risk to other employers and ultimately to the Council Tax payer from an employer defaulting on pension obligations.

The FSS sets out how the Administering Authority seeks to balance the conflicting aims of securing the solvency of the Fund and keeping employer contributions stable.

For employers whose covenant was considered by the administering authority to be sufficiently strong, contributions have been stabilised below the theoretical rate required to return their portion of the Fund to full funding over 20 years if the valuation assumptions are borne out. Asset-liability modelling has been carried out which demonstrate that if these contribution rates are paid and future contribution changes are constrained as set out in the FSS, there is still a better than 70% chance that the Fund will return to full funding over 20 years.

Funding Position as at the last formal funding valuation

The most recent actuarial valuation carried out under Regulation 36 of the Local Government Pension Scheme (Administration) Regulations 2008 was as at 31 March 2013. This valuation revealed that the Fund's assets, which at 31 March 2013 were valued at £1,495 million, were sufficient to meet 71.5% of the liabilities (i.e. the present value of promised retirement benefits) accrued up to that date. The resulting deficit at the 2013 valuation was £597 million.

Individual employers' contributions for the period 1 April 2014 to 31 March 2017 were set in accordance with the Fund's funding policy as set out in its FSS.

Principal Actuarial Assumptions and Method used to value the liabilities

Full details of the methods and assumptions used are described in the valuation report dated 21 March 2014.

Method

The liabilities were assessed using an accrued benefits method which takes into account pensionable membership up to the valuation date, and makes an allowance for expected future salary growth to retirement or expected earlier date of leaving pensionable membership.

Assumptions

A market-related approach was taken to valuing the liabilities, for consistency with the valuation of the Fund assets at their market value.

The key financial assumptions adopted for the 2013 valuation were as follows:

| | 31 March 2013 | | |
|-----------------------|------------------------------|-------|--|
| Financial assumptions | % p.a. % p.a Nominal Real | | |
| Discount rate | 4.60% | 2.10% | |
| Pay increases | 3.80% | 1.30% | |
| Pension increases | 2.50% | - | |

The key demographic assumption was the allowance made for longevity. The life expectancy assumptions are based on the Fund's VitaCurves with improvements in line with the CMI 2010 model, assuming the current rate of improvements has reached a peak and will converge to long term rate of 1.25% p.a. Based on these assumptions, the average future life expectancies at age 65 are as follows:

| | Males | Females |
|--------------------|------------|------------|
| Current Pensioners | 22.2 years | 24.4 years |
| Future Pensioners* | 24.5 years | 26.8 years |

^{*}Future pensioners are assumed to be aged 45 as at the last formal valuation date

Copies of the 2013 valuation report and Funding Strategy Statement are available on request from Lincolnshire County Council, the Administering Authority to the Fund.

Experience over the period since April 2014

Experience has been worse than expected over the year to 31 March 2015 (excluding the effect of any membership movements). Real bond yields have fallen dramatically and the effect of this has been only partially offset by the effect of strong asset returns, meaning that funding levels are likely to have worsened and deficits increase over this period,

The next actuarial valuation will be carried out as at 31 March 2016. The Funding Strategy Statement will also be reviewed at that time.

INVESTMENT BACKGROUND

Returns for Major Markets

The twelve months to 31st March 2015 ended with positive returns across asset classes.

Equity markets had a large difference in returns ranging from 6.6% in the UK to 27.1% in Japan.

There was also a divergence across bond assets, with UK Gilts returning 22.8%, whilst Overseas Bonds and UK Corporate Bonds returned 3.2%.

Property had a very good year, returning 18.6% for investors.

Investment Returns to sterling based investors 1st April 2014 to 31st March 2015

| Asset Class | Index | Index return to sterling investors % |

| Property Cash | IPD Index LIBID Seven Day Rate (compounded) | 16 .6 0.4 |

World Equity Markets

It has been an unusual year for global financial markets characterised by a series of economic, geopolitical, and market shifts. Global equity markets rose during the 12 months to the end of March 2015 but this masked a considerable amount of equity market volatility, largely driven by the accelerating slide in oil prices since June 2014. A surprise surge in production and weaker-than-expected global demand for crude sent oil reserves sent oil prices tumbling, which triggered broader turmoil across global financial markets. Energy stocks suffered, as have oil-dependent countries such as Venezuela and Russia.

A brief summary of each quarter of the financial year is shown below.

Q2 2014

Global equities made solid gains over the second quarter, with sentiment driven by the ongoing support from the world's central banks. Janet Yellen, the US Federal Reserve (Fed) chairwoman, bolstered markets when she indicated that interest rates would remain at a record low for some time to come. Not to be outdone, European Central Bank (ECB) President Mario Draghi attempted to kick-start the struggling Euro-zone economy by announcing a series of bold policy measures in June. Equities were further lifted by well-received political elections in emerging markets and buoyant corporate activity from around the world. Meanwhile, geopolitics continued to rock markets, with the eruption of violence in the Middle East causing the price of oil to spike and prompting investors to take profits.

Q3 2014

Global equities were broadly positive over the quarter, with sentiment driven by ongoing central bank policy support, improving US economic data and a raft of eye-catching merger and acquisition deals. The ECB was particularly active, cutting interest rates and announcing an asset-purchase scheme. Data from China, however, was mixed. Geopolitics also played their part, with the West imposing ever-stricter sanctions on Russia, civilian protests in Hong Kong and the ongoing conflagration in the Middle East unsettling markets. Meanwhile, declining commodity prices and a rising US dollar hit a number of emerging nations.

Q4 2014

Despite pronounced bouts of volatility, global equity markets finished ahead for the quarter. Investors had much to consider, from the plunging oil price and ongoing geopolitical tensions, to uneven economic growth and Europe's seemingly unstoppable slide into deflation. Central bank policy also continued to dictate sentiment. The heightened prospect of a US rate hike in the 2015 unnerved some, and caused a sell-off in many emerging markets. By contrast, further stimulus measures in Japan (to the surprise of everyone) and a rate cut in China boosted risk assets. The ECB, meanwhile, continued its slow march towards quantitative easing. In the corporate world, merger and acquisition activity remained sprightly, while the latest results season was generally positive.

Q1 2015

Familiar themes dictated sentiment for global equity investors over the first quarter of 2015, including ongoing central bank policy initiatives, the depressed oil price and mixed economic data. The strength of the US dollar was also a major talking point, and proved to be a mixed blessing for investors. Meanwhile, the ECB was back under the spotlight after it launched a €1.1 trillion quantitative easing programme. The move lifted equities globally. However, a victory for the anti-austerity Syriza party in Greece brought the viability of the Eurozone project back into question. Geopolitics remained a feature, as Ukraine/Russia agreed a ceasefire and violence erupted in Yemen.

Fixed Interest

A brief summary of each quarter of the financial year is shown below.

Q2 2014

It was a positive quarter for investment grade corporate bonds in both absolute and relative terms. Returns were driven by a further decline in government bond yields across most core markets and credit spread tightening. Central bank policy continued to prove supportive for the asset class. The ECB announced a package of measures aimed at reinvigorating the Euro-zone economy and combating the threat of deflation. US and UK credit also made good progress, although speculation that interest rates would have to rise sooner than expected in the UK proved a headwind during June.

Q3 2014

Government bond markets enjoyed a strong three-month period. Supportive central bank policy and a number of geopolitical concerns ensured demand for developed market government bonds remained strong. Indeed, US Treasury, German bund and UK gilt yields all declined markedly over the period. European government bonds were especially well served by the introduction of a suite of measures by the ECB to try and stimulate the moribund Eurozone economy. Corporate bond markets made good progress. A favourable environment of low interest rates, expansionary monetary policy and positive, but low, economic growth allowed the asset class to deliver solid returns over the period. There were some notable idiosyncratic issues during the period, such as the impact of the crisis in Crimea on the bonds of companies with direct or indirect exposure to Russia and Ukraine.

Q4 2014

The last quarter of 2014 proved eventful for global bond markets. Actual and anticipated intervention by major central banks was one driver of moves in bond yields, while a precipitous decline in the oil price was another. With inflation points in most jurisdictions continuing to surprise to the downside, a disinflationary tone pervaded markets and pushed interest rate expectations out further. As a result, core government bonds made good progress. Corporate credit made positive progress but underperformed on a relative basis, due to the robust nature of the rally in underlying government bonds. In what was a generally risk-averse period, higher-rated bonds outperformed lower rated issuance, with high yield

once again struggling. At a company-specific level, the falling oil price created both winners and losers, with a number of high-profile oil-related companies coming under pressure.

Q1 2015

It was another volatile quarter for core government bond markets. Generally, however, performance was positive despite 2015 starting with yields at already very low levels. The most important development during the period was the decision by the ECB to finally embark on a programme of sovereign bond-buying. This was particularly positive for European bonds. Corporate bonds generally enjoyed a strong three months, with government bond yields falling and credit spreads narrowing – the best possible outcome for the asset class. The exception was Europe where spreads widened. Sterling denominated corporate bonds were particularly strong over the period, outperforming both euro and dollar bonds.

UK Commercial Property

A brief summary of each quarter of the financial year is shown below.

Q2 2014

The improving economic backdrop in the UK remained supportive for recovery in commercial real estate. This resulted in positive returns for investors, who were becoming more confident in the recovery's sustainability. As the recovery developed, investors were also starting to turn their attention from the lower yielding Central London market towards the regions. Opportunities were beginning to arise outside the capital, where there was limited future supply, but demand was picking up as the domestic economy improved. In addition, while liquidity was more constrained regionally, pricing remained attractive.

Q3 2014

The UK continued to lead the recovery in global real estate markets, supported by improving economic data. Capital values increased, while rental growth began to materialise in most sectors. Offices were the best performing sector, followed by industrials and retail. The Central London office occupier market remained strong, with robust demand and limited supply pushing up rents. Overseas investors were again the most active in the capital, accounting for 72% of take up in the third quarter, up from 68.6% on the previous quarter. Encouragingly, though, the improving activity appeared to be spreading to the regions as investors looked for more affordable investments outside of London and the south east.

Q4 2014

UK commercial real estate continued to lead the global property recovery and ended 2014 strongly. Capital values increased further over the quarter, driven mainly by a competitive investment market. Having initially been led by London, rental growth also improved in most sectors. Rents in the industrials sector strengthened on improved tenant demand and a lack of stock. The retail sector continued to lag behind as it undergoes structural changes. However, there was some emerging evidence that retail rents were beginning stabilise, helped by the improving financial position of consumers. In terms of the investment market,

interest in UK real estate showed no signs of abating and remained broad-based, with overseas investors, UK institutions and private companies all active in the sector.

Q1 2015

After a very strong finish to 2014, UK commercial real estate made a steady start to 2015. Both capital values and rents grew over the first quarter albeit at a slower pace than in the last few months of 2014. The markets continued to see capital value growth for secondary property equalise with that of prime property, although there were geographic and sector differences. For example, performance among secondary properties in the office and industrial sectors was catching up with prime, while this had yet to occur in retail. From an investment perspective, there remained strong interest in UK real estate, with ongoing activity from overseas investors, UK institutions and private companies.

ADMINISTRATION OF BENEFITS

Lincolnshire County Council has contracted with Mouchel to administer LGPS benefits and other services (to 31/3/15). The service is monitored through a number of performance indicators. These are detailed in the table below, showing the performance achieved over the last year against the expected performance.

| Service Area | Days to complete | Performance Target (%) | Total cases | Actual Performance (%) |
|-----------------------------------|------------------|---------------------------|-------------|------------------------------|
| Processing new entrants | 18 | 98.5 | 6,109 | 99.0 |
| Transfers – in (calculation) | 30 | 98.5 | 204 | 77.9 |
| Transfers – in (payment received) | 30 | 98.5 | 153 | 100 |
| Transfers – out (calculation) | 30 | 98.5 | 401 | 98.3 |
| Transfers – out (payment made) | 30 | 98.5 | 102 | 100 |
| Actual retirements | 5 | 98.75 | 492 | 99.8 |
| Deferred into payment | 20 | 98.5 | 641 | 98.3 |
| Deferred benefits | 10 | 98.5 | 1,764 | 98.6 |
| Estimates | 10 | 98.25 | 1,488 | 96.7 |
| Death in service | 5 | 98.5 | 12 | 100 |
| Death of a pensioner | 5 | 98.5 | 313 | 95.5 |
| Refunds | 5 | 98.75 | 372 | 96.2 |
| Pension calculations | 10 | 98.5 | 597 | 96.7 |

As can be seen from the table above, only one area is highlighted in red, transfers in, where 77.9% of cases were achieved in 30 days, against a target of 98.5%. This was due to the late delivery of factors from the Government Actuary's Department (GAD) following the introduction of the new 2014 CARE scheme. Performance is reported quarterly to the Pensions Committee, and monthly meetings are held between LCC and Mouchel to manage any performance issues.

The Council's contract with Mouchel to provide Pensions Administration services ended on 31st March 2015. Lincolnshire County Council entered into a shared service arrangement with West Yorkshire Pension Fund (WYPF) to provide Pensions Administration services from 1st April 2015. A satellite office for WYPF will be based in Lincoln, co-located with the LCC Pension Fund team. This new arrangement should improve efficiency and reduce costs in the provision of the Pensions Administration service.

SUMMARY OF LGPS CONTRIBUTIONS AND BENEFITS FROM 1ST APRIL 2014

Membership of the LGPS is available to all contracted employees of participating employers whether whole time or part time. Casual employees may also be members providing their contract of employment is for a minimum of three months. Whilst membership of the Scheme is not compulsory, employees of Scheme employers who are eligible are deemed to have joined unless they specifically opt out, whilst employees of transferred Admission Bodies are eligible only if they are employed in connection with the service transferred.

National legislation and regulation cover the LGPS including the benefit entitlements of Scheme participants and their families. Such benefits are not linked to the investment performance of the Fund. Key features of the contributions payable and the benefits available are outlined below.

Contributions

Employee's contribution rates from 1st April 2014 are based on actual pensionable pay using the pay band table below. The bands are increased each April in line with inflation by the Department for Communities and Local Government. The bands, as they stood at 31st March 2015, are shown below.

| Full Time Equivalent Pay | Contribution Rate |
|---------------------------------------|--------------------------|
| Up to £13,600 | 5.5% |
| More than £13,601 and up to £21,200 | 5.8% |
| More than £21,201 and up to £34,400 | 6.5% |
| More than £34,401 and up to £43,500 | 6.8% |
| More than £43,501 and up to £60,700 | 8.5% |
| More than £60,701 and up to £86,000 | 9.9% |
| More than £86,001 and up to £101,200 | 10.5% |
| More than £101,201 and up to £151,800 | 11.4% |
| Over £151,800 | 12.5% |

Benefits

The retirement age for scheme members is their Normal Pension Age which is the same as their State Pension Age (but with a minimum of age 65). However, employees may retire and draw their pension at any time between age 55 and 75. If an employee chooses to retire before their Normal Pension Age it will normally be reduced, as it is being paid earlier, and if taken later the Normal Pension Age then it will be increased, as it is being paid later. Retirement before age 55, other than on ill-health grounds, is not possible.

Annual Pensions

Pensions are calculated at a rate of 1/49th of the employee's pensionable pay in each scheme year. Inflation increases will be added to ensure that pension accounts keep up with the cost of living.

Lump Sum Payments

A member receives a tax free lump of three times their pension on service accrued prior to 1 April 2008. On service from 1 April 2008 there is no automatic lump sum, but members have the option to commute pension at the rate of £12 cash lump sum for every £1 pension given up, subject to maximum tax free lump sum of 25% of the capital value of accrued benefits at retirement.

III Health Retirement

There are three tiers of benefits. The benefits are calculated as for normal retirement with additional service under tiers one and two.

Death-benefits

Death in service attracts a tax free lump sum of three times final pensionable pay. An annual pension is payable to a spouse/civil partner/co-habiting partner (when meeting certain criteria) and eligible children, however civil partners and co-habiting partners pensions are based on post 5th April 1988 membership only. If a member dies within ten years of their retirement (or up to age 75), a single lump sum payment is made of ten times the member's annual pension, less any pension paid since retirement. For a member who retired prior to 1st April 2008 and dies within five years of their retirement, a single lump sum payment is made of five times the member's annual pension less any pension paid since retirement. The surviving spouse is entitled to an annual pension based on 1/160ths accrual of the member's membership.

Supplementary Pensions

Scheme members may purchase additional pension of up to a maximum of £5,000 per annum, in blocks of £250. As an alternative, Scheme members may increase their benefits by paying Additional Voluntary Contributions (AVCs). The AVC provider, appointed by the County Council as the administering authority, is Prudential.

SUMMARY OF LGPS CONTRIBUTIONS AND BENEFITS FROM 1ST APRIL 2008 to 31ST MARCH 2014

LGPS 2014 came into effect from the 1st April 2014. Prior to this the key features were as follows:

Membership of the LGPS is available to all contracted employees of participating employers whether whole time or part time. Casual employees may also be members providing their contract of employment is for a minimum of three months. Whilst membership of the Scheme is not compulsory, employees of Scheme employers who are eligible are deemed to have joined unless they specifically opt out, whilst employees of transferred Admission Bodies are eligible only if they are employed in connection with the service transferred.

National legislation and regulation cover the LGPS including the benefit entitlements of Scheme participants and their families. Such benefits are not linked to the investment performance of the Fund. Key features of the contributions payable and the benefits available are outlined below:

Contributions

Employees contribute between 5.5% and 7.5% of their pensionable pay towards their pension.

Benefits

The retirement age for scheme members is 65. However, employees may retire between 60 and 65 but would suffer a reduction to their benefits (unless protected under the 85 year rule). Retirement before age 60, other than on ill-health grounds, is not possible without the permission of the employer.

Annual Pensions

Pensions are calculated at a rate of 1/60th (1/80th for service accrued prior to 1 April 2008) of the employee's average 'final' pay in their last twelve months of employment for each year of pensionable service. Pensions for persons aged 55 and over (no age restriction for ill-health) are increased each April in line with inflation.

Lump Sum Payments

A member receives a tax free lump of three times their pension on service accrued prior to 1 April 2008. On service from 1 April 2008 there is no automatic lump sum, but members have the option to commute pension at the rate of £12 cash lump sum for every £1 pension given up, subject to maximum tax free lump sum of 25% of capital value of accrued benefits at retirement.

III Health Retirement

There are three tiers of benefits. The benefits are calculated as for normal retirement with additional service under tiers one and two.

Death-benefits

Death in service attracts a tax free lump sum of three time's final pensionable pay. An annual pension is payable to a spouse/civil partner/co-habiting partner (when meeting certain criteria) and eligible children, however civil partners and 'nominated' dependent partners pensions are based on post 5th April 1988 membership only. If a member dies within ten years of their retirement (or up to age 75), a single lump sum payment is made of ten times the member's annual pension, less any pension paid since retirement. For a member who retired prior to 1st April 2008 and dies within five years of their retirement, a single lump sum payment is made of five times the member's annual pension less any pension paid since retirement. The surviving spouse is entitled to an annual pension based on 1/160ths accrual of the member's membership.

Supplementary Pensions

Scheme members may purchase additional pension of up to a maximum of £5,000 per annum, in blocks of £250. As an alternative, Scheme members may increase their benefits by paying Additional Voluntary Contributions (AVCs). The AVC provider, appointed by the County Council as the administering authority, is Prudential.

SUMMARY OF LGPS CONTRIBUTIONS AND BENEFITS TO 31st MARCH 2008

The department for Communities and Local Government (CLG) issued amended regulations to replace the existing scheme with a 'New Look' scheme from the 1st April 2008. Prior to this the key features were as follows:

Membership of the LGPS is available to all contracted employees of participating employers whether whole time, part time or casual.

National legislation and regulation cover the LGPS including the benefit entitlements of Scheme participants and their families. Such benefits are not linked to the investment performance of the Fund. Key features of the contributions payable and the benefits available are outlined below:

Contributions

Employees contribute 6% of their pensionable pay towards their pension, the exception being manual workers who were Fund members before 1 April 1998 who pay 5%.

Benefits

The normal retirement age for Scheme members is 65 but employees in the Scheme prior to 1 April 1998 can retire at 60 provided they have 25 years' service. Retirement before these ages, other than on ill-health grounds, is not possible without the permission of the employer.

Annual Pensions

Pensions are calculated at a rate of 1/80th of the employee's average 'final' pay in their last twelve months of employment for each year of pensionable service. Pensions for persons aged 55 and over are linked to the movement in inflation.

Lump Sum Payments

A member receives a tax free lump sum payment in retirement of three times their pension, with an option to take a bigger lump sum by exchanging part of their pension. Up to 25% of the capital value of a member's pension can be taken as tax free cash.

III Health Retirement

Benefits are as for normal retirement but with additional years added dependent on the length of pensionable membership.

Death-benefits

Death in service attracts a lump sum grant equivalent to up to twice final pensionable pay. An annual pension is payable to the surviving spouse and any eligible children. For death after retirement a single payment is made of five times the member's annual pension (less any pension paid since retirement). The surviving spouse is entitled to an annual pension of up to 50% of the member's pension for the rest of their life.

Supplementary Pensions

Scheme members may purchase additional membership within the Scheme up to a maximum of 6 2/3rd years. As an alternative, Scheme members may increase their benefits by paying Additional Voluntary Contributions, up to limits prescribed in scheme rules, to an AVC provider appointed by the County Council as the administering authority. The Lincolnshire AVC provider is Prudential plc.

PENSION FUND KNOWLEDGE AND SKILLS - POLICY AND REPORT

As an administering authority of the Local Government Pension Scheme, Lincolnshire County Council recognises the importance of ensuring all staff and individuals charged with the financial management and decision making with regard to the pension fund, are fully equipped with the knowledge and skills to discharge the duties and responsibilities allocated to them. Within the management of the Pension Fund, LCC seeks to appoint individuals who are both capable and experienced, and will provide and arrange training for staff and individuals involved to enable them to acquire and maintain an appropriate level of expertise, knowledge and skills.

An annual training plan is agreed by the Pensions Committee each April, setting out what training will be covered over the coming year and relating it back to the CIPFA Knowledge and Skills Frameworks. Knowledge and skills are acquired and maintained through the regular Pensions Committees, as well as through additional training sessions targeting specific areas and attendance at seminars and conferences. In addition, all members are offered the opportunity to attend the three-day fundamentals training arranged by the Local Government Association.

The County Finance Officer, the delegated S151 Officer, is responsible for ensuring that policies and strategies are implemented.

Activity in 2014/15

A full training plan was taken to Pensions Committee in April 2014 to identify training requirements over the coming year. The training plan was linked to specific areas within the CIPFA Knowledge and Skills Framework.

The 6 areas within the Knowledge and Skills Framework are:

- Pensions Legislative and Governance Context
- 2. Pensions Auditing and Accounting Standards
- 3. Financial Services Procurement and Relationship Management
- 4. Investment Performance and Risk Management
- 5. Financial Markets and Products Knowledge
- 6. Actuarial Methods, Standards and Practices

The table below details the various areas covered in training and Committee presentations during the year, and the areas within the Knowledge and Skills Framework that they relate to.

| Date | Topic | KSF area(s) |
|--|---|--|
| 22 nd May 2014 Committee topics | Pension Fund Discretions (LGPS2014) External Manager Presentations | 1 4,5 |

Notes to the Pension Fund Account

1 Pension Fund Account

The Lincolnshire County Council Pension Fund (the Fund) is part of the Local Government Pension Scheme and Lincolnshire County Council is the Administering Authority. Benefits are administered by Mouchel, alongside a Council wide contract. From 1st April 2015 the administration of the Fund will be in a shared service arrangement with West Yorkshire Pension Fund.

The following information is a summary only, and further detail can be found in the Lincolnshire Pension Fund Annual Report 2014/15 (available on the Council's website at www.lincolnshire.gov.uk), and in the underlying statutory powers underpinning the scheme, namely the Public Service Pensions Act 2013 and the Local Government Pension Scheme (LGPS) Regulations.

General

The scheme is governed by the Public Service Pensions Act 2013. The Fund is administered in accordance with the following secondary legislation:

- the LGPS Regulations 2013 (as amended)
- the LGPS (Transitional Provisions, Savings and Amendment) Regulations 2014 (as amended)
- the LGPS (Management and Investment of Funds) Regulations 2009.

It is a contributory defined benefit pension scheme to provide pensions and other benefits for pensionable employees of Lincolnshire County Council, the district councils in Lincolnshire and a range of other scheduled and admitted bodies within the county. Teachers, police officers and fire-fighters are not included as they come within other national pension schemes.

The Fund is overseen by the Lincolnshire County Council Pensions Committee.

Membership

Membership of the LGPS is automatic for eligible employees, but they are free to choose whether to remain in the scheme or make their own personal arrangements outside of the scheme

Organisations participating in the Fund include:

- Scheduled bodies, which are local authorities and similar bodies whose staff are automatically entitled to be members.
- Admitted bodies, which are other organisations that participate in the Fund under an admission agreement between the Fund and the relevant organisation. Admitted bodies include charitable organisations and similar bodies or private contractors undertaking a local authority function following outsourcing to the private sector.

There are 182 employer organisations in the Fund including the County Council (a list of scheduled employers is shown at note 28) and the membership numbers are shown below:

^{*} The Lincolnshire County Council membership numbers for the 31 March 2015 have been estimated

as final year end data is still being completed at the time of preparing the Annual Report.

| | 31 Mar 2014 | 31 Mar 2015 |
|---|---------------------------|----------------------------|
| Number of employers with active members | 185 | 182 |
| Number of employees in the scheme | | |
| Lincolnshire County Council | 10,734 | 10,679* |
| Other employers | 9,963 | 10,583 |
| Total | 20,697 | 21,262 |
| Number of pensioners Lincolnshire County Council Other employers Total | 10,121 6,456 16,577 | 10,664* 6,600 17,264 |
| Number of deferred pensioners Lincolnshire County Council Other employers | 18,794 8,452 | 18,872* 8,705 |
| Total | 27,246 | 27,577 |

Funding

Benefits are funded by contributions and investment earnings. Contributions are made by active members of the Fund in accordance with LGPS Regulations 2013 and range from 5.5% to 12.5% of pensionable pay. Employer contributions are set based on triennial actuarial funding valuations. The last valuation was 31 March 2013, and employer contribution rates were set ranging from 15.1% to 28.7% of pensionable pay. In addition, a number of employers are paying deficit contributions as cash payments.

Benefits

Prior to 1st April 2014, pension benefits under the LGPS are based on final pensionable pay and length of pensionable service, summarised below:

| | Service pre 1 st April 2008 | Service post 31 st March 2008 |
|----------|---|---|
| Pension | Each year is worth 1/80 x final pensionable salary. | Each year is worth 1/60 x final pensionable salary. |
| Lump Sum | Automatic lump sum of 3/80 x salary. In addition, part of the annual pension can be exchanged for a one-off tax free cash payment. A lump sum of £12 is paid for each £1 of pension given up. | No automatic lump sum. Part of the annual pension can be exchanged for a one-off tax-free cash payment. A lump sum of £12 is paid for each £1 of pension given up. |

From 1st April 2014, the scheme became a career average scheme, whereby members accrue benefits based on their pensionable pay in that year at an accrual rate of 1/49th. Accrued pension is

updated annually in line with the Consumer Price Index.

There are a range of other benefits provided under the scheme including early retirement, disability pensions and death benefits. For more details, please refer to our shared pensions website, at www.wypf.org.uk.

2 Basis of Preparation

The Statement of Accounts summarises the Fund's transactions for the 2014/15 financial year and its position at year end as at 31st March 2015. The accounts have been prepared in accordance with the Code of Practice on Local Authority Accounting in the United Kingdom 2014-15, which is based on International Financial Reporting Standards (IFRS), as amended for the UK public sector.

The accounts summarise the transactions of the Fund and report on the net assets available to pay pension benefits due. The accounts do not take into account liabilities to pay pensions and other benefits after the period end. These liabilities are dealt with through the periodic actuarial valuations of the Fund and are reflected in the levels of employers' contributions determined by these valuations.

The accounting policies set out below have been applied consistently to all periods presented within these financial statements.

3 Significant Accounting Policies

Fund account - revenue recognition

Contributions income

- Normal contributions, both from the members and from the employer, are accounted for on an accruals basis at the percentage rate recommended by the Fund actuary in the payroll period to which they relate.
- Employer deficit funding contributions are accounted for on the day on which they are payable under the schedule of contributions set by the Fund actuary or on receipt if earlier than due date.
- Employer augmentation contributions and pension strain contributions are accounted for in the period in which the liability arises. Any amount due in year but unpaid will be classed as a current financial asset.

Transfers to and from other schemes

Transfer values represent the amounts received and paid during the year for members who have either joined or left the Fund during the financial year and are calculated in accordance with the relevant regulations. Transfers in/out are accounted for when received/paid, which is normally when the member liability is accepted or discharged.

Investment Income

Dividends, interest, stock lending and other investment income have been accrued for in the accounts where amounts were known to be due at the end of the accounting period.

Fund account - expense items

Benefits payable

Pensions and lump sum benefits payable are included in the accounts at the time of payment.

Taxation

The Fund is a registered public service scheme under section 1(1) of Schedule 36 of the Finance Act 2004 and as such is exempt from UK income tax on interest received and from capital gains tax on the proceeds of investments sold. Income from overseas investments suffers withholding tax in the country of origin, unless exemption is permitted. Irrecoverable tax is accounted for as a Fund expense as it arises.

Management expenses

The code does not require any breakdown of pension fund administrative expenses. However, in the interests of greater transparency, the Council discloses its pension fund management expenses in accordance with the CIPFA guidance Accounting for Local Government Pension Scheme Management Costs.

Administrative expenses

All administrative expenses are accounted for on an accruals basis. All staff costs of the pensions administration team are charged to the Fund. Associated management, accommodation and other overheads are apportioned to this activity and charged as expenses to the Fund.

Oversight and Governance

All oversight and governance expenses are accounted for on an accruals basis. All staff costs of the pensions administration team are charged to the Fund. Associated management, accommodation and other overheads are apportioned to this activity and charged as expenses to the Fund.

Investment expenses

All investment management expenses are accounted for on an accruals basis.

Fees for the external investment managers and custodian are agreed in the respective mandates governing their appointments. Broadly, these are based on the market value of the investments under their management and therefore increase and decrease as the value of the investments change.

In addition, the Fund has negotiated with the following managers that an element of their fee be performance related:

- Invesco Asset Management Global Equities (ex UK)
- Schroder Investment Management Global Equities
- Neptune Investment Management Global Equities
- Threadneedle Asset Management Global Equities
- Morgan Stanley Investment Management Ltd Alternative Investments

Where an investment manager's fee invoice has not been received by the financial year end, an estimate based upon the market value of their mandate is used for inclusion in the Fund accounts.

Net assets statement

Financial assets

Financial assets are included in the net assets statement on a fair value basis as at the reporting date. A financial asset is recognised in the net asset statement on the date the Fund becomes party to the contractual acquisition of the asset. From this date, any gains or losses arising from changes in the fair value of the asset are recognised by the Fund.

The values of investments as shown in the net assets statement have been determined as follows:

Market Quoted investments – The value of an investment for which there is a readily available market price is determined by the bid market price ruling on the final day of the accounting period.

Fixed Interest Securities – These are recorded at net market value based on current yields.

Unquoted Investments – The fair value of investments for which market quotations are not readily available is determined as follows:

Valuations of delisted securities are based on the last sale price prior to delisting, or where subject to liquidation, the amount the Council expects to receive on wind-up, less estimated realisation costs.

Securities subject to takeover offer – the value of the consideration offered under the offer, less realisation costs.

Directly held investments include investments in limited partnerships, shares in unlisted companies, trusts and bonds. Other unquoted securities typically include pooled investments in property, infrastructure, debt securities and private equity. The valuation of these pools or directly held securities is undertaken by the investment manager or responsible entity and advised as a unit or security price. The valuation standards followed in these valuations adhere to industry guidelines or to standards set by the constituent documents of the pool or the management agreement.

Investments in private equity funds and unquoted limited partnerships are valued based on the Fund's share of the net assets in the private equity or limited partnership using the latest financial statements published by the respective fund managers in accordance with the guidelines set out by the British Venture Capital Association.

Limited partnerships – Fair value is based on the net asset value ascertained from periodic valuations provided by those controlling the partnership.

Pooled investment vehicles – These are valued at closing bid price if both bid and offer prices are published; or if single priced, at the closing single price. In the case of pooled investment vehicles that are accumulation funds, change in market value also includes income which is reinvested in the fund, net of withholding tax.

Transaction costs are included in the purchase and sale costs of investments and are identified in the notes to the accounts.

Derivatives

The Fund uses derivative financial instruments to manage its exposure to certain risks arising from its investment activities. The Fund does not hold derivatives for speculative purposes.

Derivative contracts are priced at fair value and open contracts are included within the other investment balances.

The value of futures contracts is determined using the exchange prices at the reporting date. Amounts due from or owed to the broker are the amounts outstanding in respect of the initial margin and variation margin.

The future value of forward currency contracts is based on market forward exchange rates at the year end date and determined as the gain or loss that would arise if the outstanding contract were matched at the year end with and equal and opposite contract.

Cash and cash equivalents

Cash comprises cash in hand and deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and are subject to minimum risk of changes in value.

Foreign currency transactions

Dividend, interest, purchases and sales of investments in foreign currencies have been accounted for at the spot rates at the date of the transaction. End of year spot market exchange rates are used to value cash balances held in foreign currency bank accounts, market values of overseas investments and purchases and sales outstanding at the end of the reporting period. The exchange rates used at 31st March 2015 are shown in note 29.

Financial liabilities

Financial liabilities are included in the net assets statement on a fair value basis as at the reporting date. A financial liability is recognised in the net asset statement on the date the Fund becomes party to the liability. From this date, any gains or losses arising from changes in the fair value of the liability are recognised by the Fund.

Prior Period Adjustments

The Code requires prior period adjustments to be made when material omissions or misstatements are identified (by amending opening balances and comparative amounts for the prior period). Such errors include the effects of mathematical mistakes, mistakes in applying accounting policies, oversights or misinterpretations of facts, and fraud.

The following disclosures will be made:

- the nature of the prior period error;
- for each prior period presented, to the extent practicable, the amount of the correction for each financial statement line item affected, and
- the amount of the correction at the beginning of the earliest prior period presented.

Changes in accounting estimates are accounted for prospectively, i.e. in the current and future years affected by the change. They do not give rise to a prior period adjustment.

Changes in Accounting Policies

Changes in accounting policy may arise through changes to the Code or changes instigated by the Council. For changes brought in through the Code, the Pension Fund will disclose the information required by the Code. For other changes we will disclose: the nature of the change; the reasons why; report the changes to the current period and each prior period presented and the amount of the adjustment relating to periods before those presented. If retrospective application is impracticable for a particular prior period, we will disclose the circumstances that led to the existence of that condition and a description of how and from when the change in accounting policy has been applied.

4 Actuarial Valuation

An actuarial valuation of the Fund undertaken as at 31 March 2013 indicated that the Fund's assets were £1,495m and covered 71.5% of the Funds liabilities. This compared with assets of £1,204m at the valuation as at 31 March 2010, which covered 76% of the Fund's liabilities. The main actuarial assumptions for the 2013 valuation were as follows:

| Nominal | Real |
|-----------|-----------|
| per annum | per annum |

| | % | % |
|-----------------------------------|-----|-----|
| Investment Return | | |
| - Equities | 4.6 | 2.1 |
| - Bonds | 3.0 | |
| Rate of Pensionable pay inflation | 3.8 | 1.3 |
| Rate of Price inflation | 2.5 | |

The Fund is valued using the projected unit method, which is consistent with the aim of achieving a 100% funding level. The changes in contribution rates resulting from the actuarial valuation as at 31 March 2013 will be effective from April 2014. The contribution rates have been set by the Actuary to target a funding level, for most employers, on an ongoing basis of 100% over a period of up to 20 years. The next actuarial valuation will be undertaken as at 31 March 2016. A copy of the Fund Valuation report can be obtained from the Council's website.

5 Actuarial Present Value of Promised Retirement Benefits

Below is the note provided by the Fund's Actuary, Hymans Robertson, to provide the Actuarial present value of the promised retirement benefits, as required under the Code. The report titled 'Actuarial Valuation as at 31 March 2015 for IAS19 purposes' referred to in the note can be obtained from the Pensions and Treasury Management section at the County Council.

Pension Fund Accounts Reporting Requirement

Introduction

CIPFA's Code of Practice on Local Authority Accounting 2013/14 requires administering authorities of LGPS funds that prepare pension fund accounts to disclose what IAS26 refers to as the actuarial present value of promised retirement benefits.

The actuarial present value of promised retirement benefits is to be calculated similarly to the defined benefit obligation under IAS19. There are three options for its disclosure in pension fund accounts:

- showing the figure in the Net Assets Statement, in which case it requires the statement to disclose the resulting surplus or deficit;
- as a note to the accounts; or
- by reference to this information in an accompanying actuarial report.

If an actuarial valuation has not been prepared at the date of the financial statements, IAS26 requires the most recent valuation to be used as a base and the date of the valuation disclosed. The valuation should be carried out using assumptions in line with IAS19 and not the Pension Fund's funding assumptions.

I have been instructed by the Administering Authority to provide the necessary information for Lincolnshire Pension Fund, which is in the remainder of this note.

Balance sheet

| Year ended | 31 Mar 2015 | 31 Mar 2014 |
|---|-------------|-------------|
| | £m | £m |
| Present value of Promised retirement benefits | 2,953 | 2,456 |

Liabilities have been projected using a roll forward approximation from the latest formal funding valuation as at 31 March 2013. I estimate this liability at 31 March 2015 comprises £1,400m in respect of employee members, £557m in respect of deferred pensioners and £996m in respect of pensioners. The approximation involved in the roll forward model means that the split of scheme liabilities between the three classes of member may not be reliable. However, I am satisfied the aggregate liability is a reasonable estimate of the actuarial present value of benefit promises. I have not made any allowance for unfunded benefits.

The above figures include both vested and non-vested benefits, although the latter is assumed to have a negligible value.

It should be noted the above figures are appropriate for the Administering Authority only for preparation of the accounts of the Pension Fund. They should not be used for any other purpose (i.e. comparing against liability measures on a funding basis or a cessation basis).

Assumptions

The assumptions used are those adopted for the Administering Authority's IAS19 report as required by the Code of Practice. These are given below. I estimate the impact of the change of assumptions to 31 March 2015 is to increase the actuarial present value by £401m.

Financial Assumptions

My recommended financial assumptions are summarised below:

| Year ended | 1 Mar 2014 | 31 Mar 2015 |
|---------------------------------|------------|-------------|
| | % p.a. | % p.a. |
| Inflation/Pension Increase rate | 2.8 | 2.4 |
| Salary Increase Rate* | 4.1 | 3.8 |
| Discount Rate | 4.3 | 3.2 |

^{*} Salary increases are 1% p.a. nominal for the three years to 31 March 2015 reverting to the long term rate thereafter.

Longevity assumption

As discussed in the accompanying report, the life expectancy assumption is based on the Fund's VitaCurves with improvements in line with the CMI_2010 model, assuming the current rate of improvements has reached a peak and will converge to a long term rate of 1.25% p.a. Based on these assumptions, the average future life expectancies at age 65 are summarised below:

| | Males | Females |
|--------------------|------------|------------|
| Current Pensioners | 22.2 years | 24.4 years |
| Future Pensioners* | 24.5 years | 26.8 years |

^{*}Future pensioners are assumed to be aged 45 at the last formal valuation date.

Please note that the assumptions have changed since the previous IAS26 disclosure for the Fund

Commutation assumption

An allowance is included for future retirements to elect to take 25% of the maximum additional tax-free cash up to HMRC limits for pre-April 2008 service and 63% of the maximum tax-free cash for post-2008 service.

Professional notes

This paper accompanies my covering report titled 'Actuarial Valuation as at 31 March 2015 for IAS19 purposes' dated 17 April 2015. The covering report identifies the appropriate reliances and limitations for the use of the figures in this paper, together with further details regarding the professional requirements and assumptions.

Anne Cranston AFA 6 May 2015

For and on behalf of Hymans Robertson LLP

6 Assumptions Made and Major Sources of Uncertainly

The accounts contain estimated figures that are based on assumptions made by the council, and other Professionals, about the future or that are otherwise uncertain. Estimates are made taking into account historical experience, current trends and other relevant factors. However, because balances cannot be determined with certainty, actual results could be materially different from the assumptions and estimates.

The items in the accounts for the year ended 31st March 2015 for which there is a significant risk of material adjustment in the forthcoming financial year are as follows:

| | Uncertainties | Effect if actual results differ from assumptions |
|--|--|--|
| Actual present value of promised retirement benefits | Estimation of the net liability to pay pensions depends on a number of complex judgements relating to the discount rate used, the rate at which | The effects of changes in the individual assumptions can be measured. For example: |
| | salaries are projected to increase, changes in retirement ages, mortality rates and expected returns on investments. A firm of consulting actuaries are engaged to provide | 1) a 0.5% increase in the discount rate assumption would result in a decrease of the pension liability of £282m. |
| | expert advice about the assumptions to be applied. | 2) a 0.25% increase in assumed earnings inflation would increase the value of liabilities by approximately £50m. |
| | | 3) a 0.5% increase in the pension increase rate would increase the value of liabilities by approximately £207m. |
| | | 4) a one-year increase in assumed life expectancy would increase the |

| | | liability by approximately £89m. |
|----------------|---|---|
| Private Equity | Private Equity investments are valued at fair value in accordance with British Venture Capital Association guidelines. These investments are not publicly listed and as such there is a degree of estimation involved in the valuation. | The total private equity investments in the Fund are £73.7m. There is a risk that these may be over or understated in the accounts. |

7 Pension Fund Investments 2014/15

The strategic asset allocation for the investment of the Fund, as agreed by the Pensions Committee, is detailed below.

| Asset allocation | |
|--|----------------|
| UK Equities Global Equities | 20.0% 40.0% |
| Property | 11.5% |
| Fixed Interest | 13.5% |
| Alternative Investments (incl. Private Equity) | 15.0% |
| | 100.0% |

Surplus funds are invested in a wide variety of UK and overseas companies, Government Securities, property and other investments, in line with a Statement of Investment Principles. The assets are managed in a number of active and passive investment portfolios. Investment performance is monitored by the Pensions Committee of the County Council.

| Fund manager | 31-Mar | | 31-Mar | |
|---------------------------------|--------|----|--------|----|
| | 2014 | | 2015 | |
| | £m | % | £m | % |
| | | | | |
| EXTERNALLY MANAGED | | | | |
| Invesco | 332 | 21 | 362 | 21 |
| Neptune | 79 | 5 | 92 | 5 |
| Schroders | 84 | 5 | 90 | 5 |
| Threadneedle | 87 | 6 | 91 | 5 |
| Morgan Stanley (Global Brands) | 75 | 5 | 89 | 5 |
| Morgan Stanley (Alternatives) | 139 | 9 | 175 | 8 |
| Morgan Stanley (Private Equity) | 87 | 6 | 77 | 7 |
| Blackrock | 98 | 6 | 116 | 7 |
| Goodhart | 101 | 6 | 112 | 6 |
| | | | | |
| INTERNALLY MANAGED | | | | |
| Pooled Investments: | | | | |
| Property | 179 | 11 | 194 | 11 |
| UK Equity | 317 | 20 | 346 | 20 |

The Pension Fund Statement of Recommended Practice was amended with effect from 2008/09 to require that managers report valuations at closing prices (either bid or last traded), rather than mid prices that had previously been used. The managers within the Pension Fund have reported their year end valuations at either bid or fair value, as detailed in the table below.

| Fund Manager | Valuation Pricing |
|---------------------|----------------------|
| EXTERNALLY MANAGED | · |
| Invesco | Bid |
| Neptune | Bid |
| Schroders | Bid |
| Threadneedle | Bid |
| Morgan Stanley | Bid/Fair Value |
| Blackrock | Bid |
| Goodhart | Bid |
| INTERNALLY MANAGED | |
| Pooled Investments: | |
| Property | Bid/Fair Value |
| UK Equity | Bid |

The Fund lends stock to third parties under a stock lending agreement with the Fund's custodian, JP Morgan. The total amount of stock on loan at the year-end was £36,449,527 and this value is included in the net assets statement to reflect the Funds continuing economic interest in the securities on loan. As security for the stocks on loan, the Fund was in receipt of collateral at the year-end valued at £39,913,115, which represented 109.5% of the value of securities on loan.

Income received from stock lending activities, before costs, was £286,900 for the year ending 31 March 2015 and is included within the 'Investment Income' figure detailed on the Pension Fund Account.

8 Contributions Receivable

Contributions receivable are analysed below:

| | 2013/14 £000 | 2014/15 £000 |
|---------------------------|-----------------|-----------------|
| Employers | | |
| Normal | 48,015 | 56,897 |
| Deficit Funding | 9,603 | 5,465 |
| Additional - Augmentation | 1,446 | 1,457 |
| Members | | |
| Normal | 17,786 | 18,577 |
| Additional years | 134 | 107 |
| | 76,984 | 82,503 |

These contributions are analysed by type of Member Body as follows:

| | 2013/14 | 2014/15 |
|-----------------------------|---------|---------|
| | £000 | £000 |
| Lincolnshire County Council | 35,356 | 37,286 |
| Scheduled Bodies | 37,816 | 40,522 |
| Admitted Bodies | 4,812 | 4,695 |

| 76,984 82,503 |
|---------------|

9 Transfers In

| | 2013/14 £000 | 2014/15 £000 |
|--|-----------------|-----------------|
| Individual transfers from other schemes Bulk transfers in from other schemes | 6,732 0 | 6,372 0 |
| | 6,732 | 6,372 |

There were no material outstanding transfers due to the Pension Fund as at 31 March 2015

10 Benefits Payable

| | 2013/14 £000 | 2014/15 £000 |
|---|-----------------|-----------------|
| Pensions | 60,641 | 63,097 |
| Commutations & Lump Sum Retirement Benefits | 12,337 | 13,348 |
| Lump Sum Death Benefits | 1,266 | 1,612 |
| | | |
| | 74,244 | 78,057 |

These benefits are analysed by type of Member Body as follows:

| | 2013/14 £000 | 2014/15 £000 |
|-----------------------------|-----------------|-----------------|
| Lincolnshire County Council | 37,857 | 41,623 |
| Scheduled Bodies | 31,820 | 32,477 |
| Admitted Bodies | 4,567 | 3,957 |
| | 74,244 | 78,057 |

11 Payments to and on account leavers

| | 2013/14 £000 | 2014/15 £000 |
|---------------------------------------|-----------------|-----------------|
| Individual transfers to other schemes | 3,917 | 3,726 |
| Bulk transfers to other schemes | 0 | 30,638 |
| Refunds to members leaving service | 5 | 94 |
| | 3.922 | 34.458 |

Bulk transfers were made out of the Fund in respect of the Probation Service moving to Greater Manchester Pension Fund and the Police Forensics Team moving to Derbyshire Pension Fund.

There were no material outstanding transfers due from the Pension Fund as at 31 March 2015.

12 Management Expenses

The analysis of the costs of managing the Lincolnshire Pension Fund during the period has been prepared in accordance with CIPFA guidance.

The external Audit fee for the year was £29,220 and is included within the oversight and governance costs below.

| | 2013/14 | 2014/15 |
|--------------------------------|---------|---------|
| | £000 | £000 |
| Administrative Costs | 1,079 | 1,289 |
| Investment Management Expenses | 3,051 | 3,127 |
| Oversight and Governance Costs | 438 | 391 |
| Total Management Expenses | 4,568 | 4,807 |

A further breakdown of the investment management expenses is shown below.

The management fees disclosed include all management fees directly incurred by the Fund and include £511,014 (£462,993 in 2013/14) in respect of performance related fees paid / payable to the Fund's investment managers.

| | 2013/14 | 2014/15 |
|--------------------------------------|---------|---------|
| | £000 | £000 |
| Management Fees | 2,949 | 3,027 |
| Custody Fees | 102 | 100 |
| | | |
| Total Investment Management Expenses | 3,051 | 3,127 |

Transaction costs are included in the cost of purchases and sales proceeds. Transaction costs include costs charged directly to the scheme such as fees, commissions, stamp duty and other fees. Transaction costs incurred during the year amounted to £674,585 (502,409 in 2013/14). In addition to the transaction costs disclosed above, indirect costs are incurred through the bid-offer spread on investments. The amount of indirect costs is not separately provided to the scheme.

Geographical Analysis of Fund Assets as at 31 March 2015

| | UK £'000 | Non-UK £'000 | Global £'000 | Total £'000 |

An analysis of the type of pooled investment vehicles is given below:

| | 2013/14 £000 | 2014/15 £000 |
|-----------------------------|-----------------|-----------------|
| Property | | • |
| Unit Trusts | 116,296 | 133,426 |
| Other managed funds (LLP's) | 58,405 | 56,214 |
| Private Equity | | |
| Other managed funds (LLP's) | 83,313 | 73,692 |
| Fixed Interest | | |
| Other managed funds | 168,971 | 194,083 |
| Index linked gilts | | |
| Other managed funds | 29,623 | 34,466 |
| Equities | | |
| Other managed funds | 74,715 | 88,445 |
| Alternatives | | |
| Other managed funds | 125,936 | 164,801 |
| Total Pooled Vehicles | 657,259 | 745,127 |

It is required to disclose where there is a concentration of investment (other than in UK Government Securities) which exceeds 5% of the total value of the net assets of the scheme. The two investments that fall into this category as follows:

| Investment | 2013/14 Value (£000) | % of net assets | 2014/15 Value (£000) | % of net assets |
|--|----------------------------|-----------------------|----------------------------|-----------------|
| Goodhart Absolute Return Bond Fund | 100,617 | 6.3 | 112,371 | 6.4 |
| Morgan Stanley Alternative Investments | 125,936 | 7.9 | 164,801 | 9.4 |
| Morgan Stanley Global Brands | 74,715 | 4.7 | 88,445 | 5.0 |

16 Analysis of Derivatives

The holding in derivatives is used to hedge exposures to reduce risk in the fund. The use of any derivatives is managed in line with the investment management agreements of the various investment managers.

The only direct derivative exposure that the Fund has is in forward foreign currency contracts. In order to maintain appropriate diversification and to take advantage of overseas investment returns, a significant proportion of the Fund's quoted equity portfolio is in overseas stock markets. To reduce the volatility associated with fluctuating currency rates, the Fund has appointed two active currency overlay managers. Record Currency Management and HSBC Trinkaus & Burkhardt each overlay half of the value of the Global Equity ex UK portfolio managed by Invesco.

| Settlement | Currency | Local | Currency | Local | Asset | Liability |

17 Profit (Loss) on Forward Deals and Currency Exchange

The profit or loss from any forward deals and from currency exchange is a result of the normal trading of the Fund's managers who manage multi-currency portfolios. It also includes the unrealised loss of £0.5m (unrealised loss of £0.6m in 2013/14) from the Fund's two Currency Overlay Managers.

18 Other Investment Balances

| | | 2013/14 | 2014/15 |
|------------------------------|-----------|---------|---------|
| | | £000 | £000 |
| Dividends Receivable | | 2,991 | 3,830 |
| Recoverable Tax | | 888 | 1,100 |
| Outstanding Foreign Exchange | e | (40) | (4,825) |
| Outstanding Stock Lending | | 18 | 30 |

| | Sales | 1,531 | 2,134 |
| | | 4,364 | 473 |

19 Current Assets and Liabilities

Debtors are recorded in the accounts when income due to the Pension Fund, for example from sales of investments or dividend payments, has not actually been received. Debtors include a figure of £2,495,177 for contributions due from employers (2013/14 £4,099,190). Long term debtors are amounts due to the Pension Fund that will not be received within 12 months. The Pension fund only has one long term debtor, the Magistrates Court, who are funding the cost of their pensioner and deferred member liabilities over a 10 year period. Similarly, creditors are recorded where services supplied to the Pension Fund, or purchases of investments have been made by 31 March, but payment is not made until the following financial year.

A thorough reconciliation of the data held on the Pensions Administration system and the pensioner payroll system took place ahead of the move from Mouchel to WYPF for the Pension Administration services. A small number of over and underpayments were identified. Any underpayments were corrected immediately. Overpayments are being addressed on a case-by-case basis. The overall amount is not considered material.

As required by the Code, creditors and debtors are split by type below:

| | 2013/14 £000 | 2014/15 £000 |
|---------------------------------------|-----------------|-----------------|
| Debtors | | |
| Central Government Bodies | 745 | 1,683 |
| Other Local Authorities | 4,868 | 1,466 |
| NHS Bodies | 0 | 0 |
| Public Corporations and Trading Funds | 12 | 141 |
| Other Entities and individuals | 1,349 | 715 |
| | 6,974 | 4,005 |
| Long Term Debtors | | |
| Central Government Bodies | 2,131 | 2,132 |
| Other Local Authorities | 0 | 0 |
| NHS Bodies | 0 | 0 |
| Public Corporations and Trading Funds | 0 | 0 |
| Other Entities and individuals | 0 | 0 |
| | 2,131 | 2,132 |
| Creditors | | |
| Central Government Bodies | (569) | (667) |
| Other Local Authorities | (891) | (87) |
| NHS Bodies | 0 | 0 |
| Public Corporations and Trading Funds | (781) | (1,106) |
| Other Entities and individuals | (559) | (1) |
| | (2,800) | (1,861) |

20 Contingent Liabilities and Contractual Commitments

Investment commitments have been made to a number of pooled vehicles that make private equity or property investments. At the year end, the value of outstanding commitments to the 25 investment vehicles amounted to £24,059,856.

21 Contingent Assets

Five admitted body employers in the Fund hold insurance bonds or equivalent cover to guard against the possibility of being unable to meet their pension obligations. These arrangements are drawn in favour of the Pension Fund and payment will only be triggered in the event of employer default.

22 Impairment Losses

The Fund has no recognised impairment losses.

23 Additional Voluntary Contributions

Scheme members may make additional contributions to enhance their pension benefits. All Additional Voluntary Contributions (AVC) are invested in a range of investment funds managed by the Prudential plc. At the year end, the value of AVC investments amounted to £9,233,388 (£8,675,676 in 2013/14) and member contributions of £1,217,147 (£1,087,950 in 2013/14) were received by the Prudential in the year to 31st March. The value of AVC funds and contributions received in the year are not included in the Fund Account and Net Assets Statement.

24 Dividend Tax Claims

During the financial year 2006/07, the County Council lodged a number of claims with HM Revenue and Customs for the recovery of dividend tax credits relating to earlier years. The total value of the claims is £793,497 and relates to both Foreign Income Dividends paid by UK companies and certain dividends paid by overseas companies. The claims are based on interpretations of European Union law and a number of recent relevant judgements. The County Council is participating with other pension funds in progressing a legal test case to support the claims.

During the financial year 2009/10, the County Council lodged a claim with HM Revenue and Customs for the recovery of withholding tax suffered on manufactured overseas dividends. This is a tax imposed on overseas dividends due to the Pension Fund when the stock is on loan to another party, through the stock lending service provided by the Fund's custodian, JP Morgan. The value of the claim is approximately £714,000 and relates to the periods from 2004/05 to 2008/09. In 2010/11 a top-up claim was submitted for the year 2009/10, for approximately £278,000. No additional claims were made in this area in 2012/13, however top-up claims for the period from 1st April 2011 to 31st March 2013 were made in May 2013, for £377,253. As with the tax claim detailed in the paragraph above, the County Council is participating with other pension funds in progressing a legal test case to support the claims.

During the financial year 2011/12, the County Council lodged a claim with the relevant tax authorities for the recovery of withholding tax suffered on overseas dividends from Spain (approx. £101,000) and Germany (approx. £165,000), covering the periods from 2007-2010. During the financial year 2012/13 the Spanish tax authorities rejected elements of the claim, reducing the value to approximately £70,000, followed by a further rejection of approximately £65,000. In Spain repayments are increasingly being seen and a repayment of €79,565 has been approved by the Spanish Tax Authority with payment due in April 2015. After this repayment, the only quarter outstanding is Q4 2004.

It is expected that resolution of these claims will take a number of years and, if unsuccessful, the Fund could incur a share of the costs of the Commissioners of the Inland Revenue.

25 Related Party Transactions

In accordance with Financial Reporting Standard 8 'Related Party Disclosures' material transactions with related parties not disclosed elsewhere are detailed below:-

Under legislation introduced in 2003/04, Councillors have been entitled to join the Scheme, however this changed from the 1st April 2014 and no new Councillors are now able to join the scheme. Councillors who are current members will cease to be in the scheme following the end of their term as Councillor. Committee member M Leaning of the Pensions Committee currently receives pension benefits from the Fund. Committee members M Allan, R Phillips and A Antcliff are contributing members of the Pension Fund as at 31st March 2015.

No senior officers responsible for the administration of the Fund have entered into any contract, other than their contract of employment with the Council, for the supply of goods or services to the Fund.

The Treasury Management section of the County Council acts on behalf of the Pension Fund to manage the cash position held in the Pension Fund bank account. This is amalgamated with the County Council's cash and lent out in accordance with the Council's Treasury Management policies. During the year, the average balance in the Pension Fund bank account was £8,846.5m and interest of £58k was earned over the year.

Lincolnshire County Council paid contributions of £26.7m into the Pension Fund during the year and all payments were received within agreed timescales.

Paragraph 3.9.4.2 of the Code exempts local authorities from the key management personnel disclosure requirements of IAS24, on the basis that the disclosure requirements for officer remuneration and members' allowances detailed in section 3.4 of the Code (which are derived from the requirements of Regulations 7(2)-(4) of the Accounts and Audit (England) Regulations 2011 and Regulation 7A of the Accounts and Audit Regulations 2005) satisfy the key management and personnel disclosure requirements of paragraph 16 of IAS24. This applies in equal measure to the accounts of Lincolnshire Pension Fund.

The disclosures required by Regulation 7(2)-(4) of the Accounts and Audit (England) Regulations can be found in the main accounts of Lincolnshire County Council at note 47. This can be found on the Council's website at www.lincolnshire.gov.uk.

26 Financial Instruments

Classification of financial instruments

Accounting policies describe how different asset classes of financial instruments are measured, and how income and expenses, including fair value gains and losses, are recognised. The following table analyses the carrying amounts of financial assets and liabilities (excluding cash) by category and net asset statement heading. No financial assets were reclassified during the accounting period.

2013/14 2014/15

| | Designated as fair value through profit & loss | Loans & receivables | Financial liabilities at amortised cost | Designated as fair value through profit & loss | Loans & receivables | Financial liabilities at amortised cost |
|--------------------------|---|---------------------|---|--|---------------------|---|
| | £000 | £000 | £000 | £000 | £000 | £000 |

Valuation of financial instruments carried at fair value

The valuation of financial instruments has been classified into three levels, according to the quality and reliability of information used to determine fair values.

Level 1

Financial instruments at Level 1 are those where the fair values are derived from unadjusted quoted prices in active markets for identical assets or liabilities. Products classified as level 1 comprise quoted equities, quoted fixed interest, quoted index linked securities and unit trusts.

Listed investments are shown at bid prices. The bid value of the investment is based on the bid market quotation of the relevant stock exchange.

Level 2

Financial instruments at Level 2 are those where quoted prices are not available; for example, where an instrument is traded in a market that is not considered to be active, or where valuation techniques are used to determine fair value and where these techniques use inputs that are based significantly on observable market data.

Level 3

Financial instruments at Level 3 are those where at least one input that could have a significant effect on the instrument's valuation is not based on observable market data.

Such instruments would include unquoted equity investments, which are valued using various valuation techniques that require significant judgement in determining appropriate assumptions.

The values of the investment in private equity are based on valuations provided by the managers to the private equity funds in which the Lincolnshire Fund has invested.

These valuations are prepared in accordance with the Private Equity and Venture Capital Valuation Guidelines (US investments), and the International Private Equity and Venture Capital Valuation Guidelines (non US investments) which follow the valuation principles of IFRS and US GAAP. Valuations are shown to the latest valuation date available and adjusted for cash flow where required to 31st March 2015.

The value for the alternatives investments with Morgan Stanley are provided by the underlying managers within the pool of investments and assurance is provided by Morgan Stanley on the quality of the valuations.

The following table provides an analysis of the financial assets and liabilities grouped into Level 1 to 3, based on the level at which fair value is observable.

| Values at 31st March 2015 | Level 1 £000 | Level 2 £000 | Level 3 £000 | Total £000 |
|--|-----------------|-----------------|-----------------|---------------|
| Financial Assets | | | | |

27 Nature and Extent of Risks Arising from Financial Instruments

The Fund's primary long-term risk is that its assets will fall short of its liabilities (i.e. the promised benefits payable to members). Therefore, the aim of investment risk management is to minimise the risk of an overall reduction in the value of the Fund and to maximise the opportunity for gains across the Fund. This is achieved through asset diversification to reduce exposure to market risk (price risk, currency risk and interest rate risk) and credit risk to an acceptable level. In addition, the Fund manages its liquidity risk to ensure there is sufficient liquidity to meet the Fund's forecast cashflows.

Market Risk

Market risk is the loss from fluctuations in equity and commodity prices, interest and foreign exchange rates and credit spreads. The Fund is exposed to market risk from its investment activities, particularly through its equity holdings. The level of risk exposure depends on market conditions, expectations of future prices and yield movements and the asset mix.

To mitigate market risk, the Pension Fund invests in a diversified pool of assets to ensure a reasonable balance between different categories, having taken advice from the Fund's Investment Consultant. The management of the assets is split between a number of managers with different performance targets and investment strategies. Risks associated with the strategy and investment returns are included as part of the quarterly reporting to the Pensions Committee where they are monitored and reviewed.

Price risk

Price risk represents the risk that the value of a financial instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or foreign exchange risk), whether those changes are caused by factors specific to the individual instrument or its issuer or factors affecting all such instruments in the market.

The Fund is exposed to share price risk. This arises from investments held by the Fund for which the future price is uncertain. All securities investments present a risk of loss of capital. The maximum risk resulting from financial instruments is determined by the fair value of the financial instrument. To mitigate this price risk, each manager is expected to maintain a diversified portfolio within their allocation.

Price risk - sensitivity analysis

Following analysis of historical data and expected investment return during the financial year, in consultation with a fund manager, the Fund has determined that the following movements in market price are reasonably possible for the 2013/14 reporting period.

| Asset Type | Potential market movements (+/-) |
|-------------|----------------------------------|
| UK Equities | 12.2% |

| Overseas Equities | 10.7% |
|-------------------------|--------|
| UK Bonds | 7.5% |
| UK Index Linked | 10.00% |
| Overseas Bonds | 9.0% |
| Private Equity | 10.7% |
| Alternative Investments | 10.0% |
| Property | 5.8% |

The potential price changes disclosed above are broadly consistent with a one standard deviation movement in the value of assets. The analysis assumes that all other variables, in particular foreign currency exchange rates and interest rates, remain the same.

Had the market price of the Fund's investments increased/decreased in line with the above, the change in net assets available to pay benefits would have been as follows (the prior year comparative is shown below):

| Asset Type | Value at 31/03/2015 £000 | Percentage Change % | Value on Increase £000 | Value on Decrease £000 |
|--|--------------------------------|---------------------------|------------------------------|------------------------------|
| Cash deposits | 25,695 | 0.0 | 25,695 | 25,695 |
| UK Equities | 361,374 | 12.0 | 404,739 | 318,009 |
| Overseas Equities | 699,928 | 10.7 | 774,820 | 625,036 |
| UK Bonds | 81,712 | 7.5 | 87,840 | 75,584 |
| UK Index Linked | 34,466 | 10.0 | 37,913 | 31,019 |
| Overseas Bonds | 112,371 | 9.0 | 122,484 | 102,258 |

Interest rate risk

The Fund invests in financial assets for the primary purpose of obtaining a return on investments. These investments are subject to interest rate risks, which represent the risk that the fair value or future cashflows of a financial instrument will fluctuate because of changes to market interest rates. The Fund's direct exposure to interest rate movements as at 31 March 2015 and 31 March 2014 is set out below. These disclosures present interest rate risk based on the underlying financial assets at fair values.

| Asset Type | 31/03/2014 | 31/03/2015 |
|-----------------------|------------|------------|
| | £000 | £000 |
| Cash deposits | 38,836 | 25,695 |
| Cash balances | 4,630 | 7,855 |
| Pooled Fixed Interest | 198,594 | |
| Securities | | 228,549 |
| Total | 242,060 | 262,099 |

Interest rate risk - sensitivity analysis

The analysis that follows assumes that all other variables, in particular exchange rates, remain constant, and shows the effect in the year on the net assets available to pay benefits of a +/- 1% change in interest rates.

| Asset Type | Value at | Change | e in Year |
|-----------------------|------------|---------|-----------|
| | 31/03/2015 | +1% | -1% |
| | £000 | £000 | £000 |
| Cash deposits | 25,695 | 25,952 | 25,438 |
| Cash balances | 7,855 | 7,934 | 7,776 |
| Pooled Fixed Interest | | | |
| Securities | 228,549 | 230,834 | 226,264 |
| Total | 262.099 | 264.720 | 259.478 |

| Asset Type | Value at | Change | e in Year |
|-----------------------|------------|---------|-----------|
| | 31/03/2014 | +1% | -1% |
| | £000 | £000 | £000 |
| Cash deposits | 38,836 | 39,224 | 38,448 |
| Cash balances | 4,630 | 4,676 | 4,584 |
| Pooled Fixed Interest | 198,594 | 200,580 | 196,608 |
| Securities | | | |
| Total | 242,060 | 244,480 | 239,640 |

Currency risk

Currency risk represents the risk that the fair value of future cashflows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Fund is exposed to currency risk on financial instruments that are denominated in any currency other than sterling.

To assist in managing this risk and to reduce the volatility associated with fluctuating currency rates, the Fund has appointed two active currency overlay managers. Record Currency Management and HSBC Trinkaus & Burkhardt each overlay half of the value of the Global Equity ex UK portfolio

managed by Invesco.

The following table summarises the Fund's currency exposure at 31 March 2015 and 31 March 2014.

| Currency Exposure - Asset Type | 31/03/2014 £000 | 31/03/2015 £000 |
|--------------------------------|--------------------|--------------------|
| Overseas Equities (quoted) | 556,212 | 611,483 |
| Pooled Investments: | | |
| Overseas Property | 23,779 | 20,098 |
| Overseas Private Equity | 82,091 | 72,484 |
| Overseas Fixed Interest | 100,617 | 112,371 |
| Total | 762,699 | 816,436 |

Currency risk - sensitivity analysis

Following analysis of historical data, the Fund considers the likely volatility associated with foreign exchange rate movements to be 10% (as measured by one standard deviation).

A 10% fluctuation in the currency is considered reasonable based on an analysis of long term historical movements in month-end exchange rates. This analysis assumes that all other variables, in particular interest rates, remain constant.

A 10% strengthening/weakening of the pound against various currencies in which the Fund holds investments would increase/decrease the net assets available to pay benefits as follows:

| Currency Exposure - Asset Type | Value at | Change in Year | |
|--------------------------------|------------|----------------|---------|
| | 31/03/2015 | +10% | -10% |
| | £000 | £000 | £000 |
| Overseas Equities (quoted) | 611,483 | 672,631 | 550,335 |
| Pooled Investments: | | | |
| Overseas Property | 20,098 | 22,108 | 18,088 |
| Overseas Private Equity | 72,484 | 79,732 | 65,236 |
| Overseas Fixed Interest | 112,371 | 123,608 | 101,134 |
| Total | 816,436 | 898,080 | 734,792 |

| Currency Exposure - Asset Type | Value at | Change in Year | |
|--------------------------------|------------|----------------|---------|
| | 31/03/2014 | +10% | -10% |
| | £000 | £000 | £000 |
| Overseas Equities (quoted) | 556,212 | 611,833 | 500,591 |
| Pooled Investments: | | | |
| Overseas Property | 23,779 | 26,157 | 21,401 |
| Overseas Private Equity | 82,091 | 90,300 | 73,882 |
| Overseas Fixed Interest | 100,617 | 100,679 | 90,555 |
| Total | 762,699 | 838,969 | 683,429 |

Credit Risk

Credit risk represents the risk that the counterparty to a transaction or a financial instrument will fail to discharge an obligation and cause the Fund to incur a financial loss.

The Fund is exposed to credit risk through securities lending, forward currency contracts and its daily treasury activities.

The securities lending programme is run by the Fund's custodian, JPMorgan, who manage and monitor the counterparty risk, collateral risk and the overall lending programme. The minimum level of collateral for securities on loan is 102%, however more collateral may be required depending upon the type of transaction. This level is assessed daily to ensure it takes account of market movements. To further mitigate risk, JPMorgan provide an indemnity to cover borrower default, overnight market risks, fails on return of loaned securities and entitlements to securities on loan. Securities lending is capped by investment regulations and statutory limits are in place to ensure that no more than 25% of eligible assets can be on loan at any one time.

Forward currency contracts are undertaken by the Fund's two currency overlay managers - Record and HSBC Trinkaus & Burkhardt. The responsibility for these deals therefore rests with the appointed managers. Full due diligence was undertaken prior to the appointment of these managers and they are regularly monitored and reviewed. Both managers are FSA regulated and meet the requirements set out in the LGPS (Management and Investment of Funds) Regulations 2009.

The Pension Fund's bank account is held at Barclays, which holds an A long term credit rating (or equivalent) across three ratings agencies and it maintains its status as a well-capitalised and strong financial organisation. The management of the cash held in this account is carried out by the Council's Treasury Manager, in accordance with an agreement signed by the Pensions Committee and the Council. The agreement stipulates that the cash is pooled with the Council's cash and managed in line with the policies and practices followed by the Council, as outlined in the CIPFA Code of Practice for Treasury Management in the Public Services and detailed in its Treasury Management Practices.

Liquidity risk

Liquidity risk represents the risk that the Fund will not be able to meet its financial obligations as they fall due. The Council takes steps to ensure that the Fund has adequate cash resources to meet its commitments.

The Fund holds a working cash balance in its own bank account to cover the payment of benefits and other lump sum payments. At an investment level, the Fund holds a large proportion of assets in listed equities - instruments that can be liquidated at short notice, normally three working days. As at 31 March 2015, these assets totalled £1,153m, with a further £38.8m held in cash. Currently, the Fund is cash flow positive each month (i.e. the contributions received exceed the pensions paid). This position is monitored regularly and reviewed at least every three years alongside the Triennial Valuation.

An additional area of risk is in the outsourcing of services to third party service organisations.

The main service areas that the Pension Fund outsources, and the controls in place to monitor them, are:

Pensions Administration

This service was performed by Mouchel, alongside a Council wide contract. In addition to the contract management that the Council undertakes, regular meetings were held between Fund Officers and the Pensions Manager at Mouchel. The Pension Fund is also a member of the CIPFA benchmarking club for Pensions Administration, to allow service comparisons to be made with other

Funds.

Custody, Accounting and Performance Measurement

JPMorgan are the Pension Fund's appointed Custodian, with responsibility for safeguarding the assets of the Fund. JPMorgan are a global industry leader, with more than \$19 trillion in assets under custody. They have been the Fund's Custodian since 2004, and were reappointed at the end of their seven year contract in March 2011. Monthly reconciliations of holdings are performed to ensure that the Custodians records match those of the Managers. Regular meetings and conference calls are held to discuss performance, and quarterly key performance indicators are produced.

Fund Management

The Fund appoints a number of segregated and pooled fund managers to manage portions of the Pension Fund. All appointments meet the requirements set out in the LGPS (Management and Investment of Funds) Regulations 2009. Managers report performance on a monthly basis to officers and performance is reported to the Pensions Committee on a quarterly basis. All segregated managers present in person to the Committee at least once a year. Regular meetings and discussions are held between officers and managers.

Independent auditor's report to the members of Lincolnshire Pension Fund on the pension fund financial statements published with the Pension fund annual report

We have examined the pension fund financial statements for the year ended 31 March 2015 on pages 31 to 61.

Respective responsibilities of the Executive Director of Finance and Public Protection and the auditor

As explained more fully in the Statement of the Executive Director of Finance and Public Protection Responsibilities in the annual published statement of accounts of Lincolnshire County Council for the year ended 31 March 2015, the Executive Director of Finance and Public Protection is responsible for the preparation of the pension fund financial statements in accordance with applicable law and the Code of Practice on Local Authority Accounting in the United Kingdom 2014/15. Our responsibility is to report to you our opinion on the consistency of the pension fund financial statements included in the Pension Fund Annual Report with the pension fund financial statements included in the annual published statement of accounts of Lincolnshire County Council, and their compliance with applicable law and the Code of Practice on Local Authority Accounting in the United Kingdom 2014/15.

In addition, we read the information given in the Pension Fund Annual Report to identify material inconsistencies with the pension fund financial statements. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

We conducted my work in accordance with guidance issued by the Audit Commission. Our report on the administering authority's full annual statement of accounts describes the basis of our opinion on those financial statements

Opinion

In our opinion, the pension fund financial statements are consistent with the pension fund financial statements included in the annual published statement of accounts of Lincolnshire County Council for the year ended 31 March 2015 and comply with applicable law and the Code of Practice on Local Authority Accounting in the United Kingdom 2014/15.

Matters on which we are required to report by exception

The Code of Audit Practice for Local Government Bodies 2010 requires us to report to you if:

- the information given in the Pension Fund Annual Report for the financial year for which the financial statements are prepared is not consistent with the financial statements; or
- any matters relating to the pension fund have been reported in the public interest under section 8 of Audit Commission Act 1998 in the course of, or at the conclusion of, the audit.

We have nothing to report in respect of these matters

Tony Crawley

ADDITIONAL INFORMATION AVAILABLE

Additional information regarding the Pension Fund and the scheme is available by going to the shared service website below:

www.wypf.org.uk

The following documents are included in this report, and can also be found by selecting Policy Statements on the home page, and then Lincolnshire Policies, on the WYPF shared website.

FUNDING STRATEGY STATEMENT

This document is prepared in collaboration with the Fund's actuary, Hymans Robertson, and sets out the Fund's approach to funding its liabilities. It is reviewed in detail every three years.

STATEMENT OF INVESTMENT PRINCIPLES

This document describes the key issues that govern the investment of the Pension Fund, and states the extent to which the Council's investment principles comply with six principles set out in a publication by the Chartered Institute of Public Finance and Accountancy (CIPFA), entitled 'Investment Decision Making and Disclosure in the Local Government Pension Scheme'.

COMMUNICATIONS POLICY

This document details the methods of communication that the Pension Fund uses to comply with relevant legislation and to ensure that relevant individuals and employers receive accurate and timely information about their pension arrangements.

GOVERNANCE COMPLIANCE STATEMENT

This document details how the Pension Fund is governed, and sets out where it complies with best practice guidance as published by the Department for Communities and Local Government.

1 Introduction

1.1 What is this document?

This is the Funding Strategy Statement (FSS) of the Lincolnshire Pension Fund ("the Fund"), which is administered by Lincolnshire County Council, ("the Administering Authority").

It has been prepared by the Administering Authority in collaboration with the Fund's actuary, Hymans Robertson LLP, and after consultation with the Fund's employers and investment adviser. It is effective from 1st March 2014.

1.2 What is the Lincolnshire Pension Fund?

The Fund is part of the national Local Government Pension Scheme (LGPS). The LGPS was set up by the UK Government to provide retirement and death benefits for local government employees, and those employed in similar or related bodies, across the whole of the UK. The Administering Authority runs the Lincolnshire Fund, in effect the LGPS for the Lincolnshire area, to make sure it:

receives the proper amount of contributions from employees and employers, and any transfer payments;

invests the contributions appropriately, with the aim that the Fund's assets grow over time with investment income and capital growth;

uses the assets to pay Fund benefits to the members (as and when they retire, for the rest of their lives), and to their dependants (as and when members die), as defined in the LGPS Regulations. Assets are also used to pay transfer values and administration costs.

The roles and responsibilities of the key parties involved in the management of the Fund are summarised in Appendix B.

1.3 Why does the Fund need a Funding Strategy Statement?

Employees' benefits are guaranteed by the LGPS Regulations, and do not change with market values or employer contributions. Investment returns will help pay for some of the benefits, but probably not all, and certainly with no guarantee. Employees' contributions are fixed in those Regulations also, at a level which covers only part of the cost of the benefits.

Therefore, employers need to pay the balance of the cost of delivering the benefits to members and their dependants.

The FSS focuses on how employer liabilities are measured, the pace at which these liabilities are funded, and how employers or pools of employers pay for their own liabilities. This statement sets out how the Administering Authority has balanced the conflicting aims of:

affordability of employer contributions,

transparency of processes,

stability of employers' contributions, and

prudence in the funding basis.

There are also regulatory requirements for an FSS, as given in Appendix A.

The FSS is a summary of the Fund's approach to funding its liabilities, and this includes reference to the Fund's other policies; it is not an exhaustive statement of policy on all issues. The FSS forms part of a framework of which includes:

- the LGPS Regulations;
- the Rates and Adjustments Certificate (confirming employer contribution rates for the next three years) which can be found in an appendix to the formal valuation report;
- the Fund's discretionary policies on admissions, cessations and bulk transfers;
- actuarial factors for valuing individual transfers, early retirement costs and the costs of buying added service; and
- the Fund's Statement of Investment Principles (see Section 4).

1.4 How does the Fund and this FSS affect me?

This depends who you are:

- a member of the Fund, i.e. a current or former employee, or a dependant: the Fund needs to be sure it is collecting and holding enough money so that your benefits are always paid in full;
- an employer in the Fund (or which is considering joining the Fund): you will want to know how your contributions are calculated from time to time, that these are fair by comparison to other employers in the Fund, and in what circumstances you might need to pay more. Note that the FSS applies to all employers participating in the Fund:
- an Elected Member whose council participates in the Fund: you will want to be sure that the council balances the need to hold prudent reserves for members' retirement and death benefits, with the other competing demands for council money;
- a Council Tax payer: your council seeks to strike the balance above, and also to minimise cross-subsidies between different generations of taxpayers.

1.5 What does the FSS aim to do?

The FSS sets out the objectives of the Fund's funding strategy, such as:

to ensure the long-term solvency of the Fund, using a prudent long term view. This will ensure that sufficient funds are available to meet all members'/dependants' benefits as they fall due for payment;

to ensure that employer contribution rates are reasonably stable where appropriate;

- to minimise the long-term cash contributions which employers need to pay to the Fund, by recognising the link between assets and liabilities and adopting an investment strategy which balances risk and return (**NB** this will also minimise the costs to be borne by Council Tax payers);
- to reflect the different characteristics of different employers in determining contribution rates. This involves the Fund having a clear and transparent funding strategy to demonstrate how each employer can best meet its own liabilities over future years; and
- to use reasonable measures to reduce the risk to other employers and ultimately to the Council Tax payer from an employer defaulting on its pension obligations.

1.6 How do I find my way around this document?

In <u>Section 2</u> there is a brief introduction to some of the main principles behind funding, i.e. deciding how much an employer should contribute to the Fund from time to time.

In <u>Section 3</u> we outline how the Fund calculates the contributions payable by different employers in different situations.

In <u>Section 4</u> we show how the funding strategy is linked with the Fund's investment strategy.

In the <u>Appendices</u> we cover various issues in more detail if you are interested:

- A. the regulatory background, including how and when the FSS is reviewed,
- B. who is responsible for what,
- C. what issues the Fund needs to monitor, and how it manages its risks,
- D. some more details about the actuarial calculations required,
- E. the assumptions which the Fund actuary currently makes about the future,
- F. a glossary explaining the technical terms occasionally used here.

If you have any other queries please contact Jo Ray, Group Manager – Pensions and Treasury in the first instance at jo.ray@lincolnshire.gov.uk or on 01522 553656.

2 Basic Funding issues

(More detailed and extensive descriptions are given in Appendix D).

2.1 How does the actuary calculate a contribution rate?

Employer contributions are normally made up of two elements:

- a) the estimated cost of future benefits being built up from year to year, referred to as the "future service rate"; plus
- b) an adjustment for the difference between the assets built up to date and the value of past service benefits, referred to as the "past service adjustment". If there is a deficit the past service adjustment will be an increase in the employer's total contribution; if there is a surplus there may be a reduction in the employer's total contribution. Any past service adjustment will aim to return the employer to full funding over an appropriate period (the "deficit recovery period").

2.2 How is a deficit (or surplus) calculated?

An employer's "funding level" is defined as the ratio of:

the market value of the employer's share of assets, to

the value placed by the actuary on the benefits built up to date for the employer's employees and ex-employees (the "liabilities"). The Fund actuary agrees with the Administering Authority the assumptions to be used in calculating this value.

If this is less than 100% then it means the employer has a shortfall, which is the employer's deficit; if it is more than 100% then the employer is said to be in surplus. The amount of deficit or shortfall is the difference between the asset value and the liabilities value.

A larger deficit will give rise to higher employer contributions. If a deficit is spread over a longer period then the annual employer cost is lower than if it is spread over a shorter period.

2.3 How are contribution rates calculated for different employers?

The Fund's actuary is required by the Regulations to report the *Common Contribution Rate*, for all employers collectively at each triennial valuation, combining items (a) and (b) above. This is based on actuarial assumptions about the likelihood, size and timing of benefit payments to be made from the Fund in the future, as outlined in <u>Appendix E</u>.

The Fund's actuary is also required to adjust the *Common Contribution Rate* for circumstances specific to each individual employer. The sorts of specific circumstances which are considered are discussed in <u>Section 3</u>. It is this adjusted contribution rate which the employer is actually required to pay, and the rates for all employers are shown in the Fund's Rates and Adjustments Certificate.

In effect, the *Common Contribution Rate* is a notional quantity, as it is unlikely that any employer will pay that exact rate. Separate future service rates are calculated for each employer together with individual past service adjustments according to employer-specific circumstances.

Details of the outcome of the Actuarial Valuation as at 31 March 2013 can be found in the formal valuation report dated 21 March 2014, including an analysis at Fund Level of the *Common Contribution Rate*. Further details of individual employer contribution rates can also be found in the formal report.

2.4 What else might affect the employer's contribution?

Employer covenant and likely term of membership are also considered when setting contributions: more details are given in <u>Section 3</u>.

For some employers it may be agreed to pool contributions, see 3.4.

Any costs of non ill-health early retirements must be paid by the employer, see 3.6.

If an employer is approaching the end of its participation in the Fund then its contributions may be amended appropriately, so that the assets meet (as closely as possible) the value of its liabilities in the Fund when its participation ends.

Employers' contributions are expressed as minima, with employers able to pay contributions at a higher rate. Account of the higher rate will be taken by the Fund Actuary at subsequent valuations.

2.5 What different types of employer participate in the Fund?

Historically the LGPS was intended for local authority employees only. However over the years, with the diversification and changes to delivery of local services, many more types and numbers of employers now participate. There are currently more employers in the Fund than ever before, a significant part of this being due to new academies.

In essence, participation in the LGPS is open to public sector employers providing some form of service to the local community. Whilst the majority of members will be local authority employees (and ex-employees), the majority of participating employers are those providing services in place of (or alongside) local authority services: academy schools, contractors, housing associations, charities, etc.

The LGPS Regulations define various types of employer as follows:

Scheduled bodies – councils, and other specified employers such as academies and further education establishments. These must provide access to the LGPS in respect of their employees who are not eligible to join another public sector scheme (such as the Teachers Scheme). These employers are so-called because they are specified in a schedule to the LGPS Regulations.

It is now possible for Local Education Authority schools to convert to academy status, and for other forms of school (such as Free Schools) to be established under the academies legislation. All such academies, as employers of non-teaching staff, become separate new employers in the Fund. As academies are defined in the LGPS Regulations as "Scheduled Bodies", the Administering Authority has no discretion over whether to admit them to the Fund, and the academy has no discretion whether to continue to allow its non-teaching staff to join the Fund. There has also been guidance issued by the DCLG regarding the terms of academies' membership in LGPS Funds.

Designating employers - employers such as town and parish councils are able to participate in the LGPS via resolution (and the Fund cannot refuse them entry where the resolution is passed). These employers can designate which of their employees are eligible to join the scheme.

Other employers are able to participate in the Fund via an admission agreement, and are referred to as 'admission bodies'. These employers are generally those with a "community of interest" with another scheme employer – **community admission bodies** ("CAB") or those providing a service on behalf of a scheme employer – **transferee admission bodies** ("TAB"). CABs will include housing associations and charities, TABs will generally be contractors. The Fund is able to set its criteria for participation by these employers and can refuse entry if the requirements as set out in the Fund's admissions policy are not met.

2.6 How does the Fund recognise that contribution levels can affect council and employer service provision, and council tax?

The Administering Authority and the Fund actuary are acutely aware that, all other things being equal, a higher contribution required to be paid to the Fund will mean less cash available for the employer to spend on the provision of services. For instance:

- Higher pension Fund contributions may result in reduced council spending, which in turn could affect the resources available for council services, and/or greater pressure on council tax levels;
- Contributions which Academies pay to the Fund will therefore not be available to pay for providing education;
- Other employers will provide various services to the local community, perhaps through housing associations, charitable work, or contracting council services. If they are required to pay more in pension contributions to the LGPS then this may affect their ability to provide the local services.

Whilst all this is true, it should also be borne in mind that:

- The Fund provides invaluable financial security to local families, whether to those who formerly worked in the service of the local community who have now retired, or to their families after their death;
- The Fund must have the assets available to meet these retirement and death benefits, which in turn
 means that the various employers must each pay their own way. Lower contributions today will mean
 higher contributions tomorrow: deferring payments does not alter the employer's ultimate obligation to
 the Fund in respect of its current and former employees;
- Each employer will generally only pay for its own employees and ex-employees (and their dependants), not for those of other employers in the Fund;
- The Fund strives to maintain reasonably stable employer contribution rates where appropriate and possible;
- The Fund wishes to avoid the situation where an employer falls so far behind in managing its funding shortfall that its deficit becomes unmanageable in practice: such a situation may lead to employer insolvency and the resulting deficit falling on the other Fund employers. In that situation, those employers' services would in turn suffer as a result;
- Council contributions to the Fund should be at a suitable level, to protect the interests of different
 generations of council tax payers. For instance, underpayment of contributions for some years will
 need to be balanced by overpayment in other years; the council will wish to minimise the extent to
 which council tax payers in one period are in effect benefitting at the expense of those paying in a
 different period.

Overall, therefore, there is clearly a balance to be struck between the Fund's need for maintaining prudent funding levels, and the employers' need to allocate their resources appropriately. The Fund achieves this through various techniques which affect contribution increases to various degrees (see 3.1). In deciding which of these techniques to apply to any given employer, the Fund will consider a risk assessment of that employer using a knowledge base which is regularly monitored and kept up-to-date. This database will include such information as the type of employer, its membership profile and funding position, any guarantors or security provision, material changes anticipated, etc. This helps the Fund establish a picture of the financial standing of the employer, i.e. its ability to meet its long term Fund commitments.

For instance, where an employer is considered relatively low risk then the Fund will permit greater smoothing (such as stabilisation or a longer deficit recovery period relative to other employers) which will temporarily produce lower contribution levels than would otherwise have applied. This is permitted in the expectation that the employer will still be able to meet its obligations for many years to come.

On the other hand, an employer whose risk assessment indicates a less strong covenant will generally be required to pay higher contributions (for instance, with a more prudent funding basis or a shorter deficit recovery period relative to other employers). This is because of the higher probability that at some point it will fail or be unable to meet its pension contributions, with its deficit in the Fund then falling to other Fund employers.

The Fund actively seeks employer input, including to its funding arrangements, through various means: see Appendix A.

3 Calculating contributions for individual Employers

3.1 General comments

A key challenge for the Administering Authority is to balance the need for stable, affordable employer contributions with the requirement to take a prudent, longer-term view of funding and ensure the solvency of the Fund. With this in mind, there are a number of methods which the Administering Authority may permit, in order to improve the stability of employer contributions. These include, where circumstances permit:-

capping of employer contribution rate changes within a pre-determined range ("stabilisation")

the use of extended deficit recovery periods

the phasing in of contribution rises or reductions

the pooling of contributions amongst employers with similar characteristics

the use of some form of security or guarantee to justify a lower contribution rate than would otherwise be the case.

These and associated issues are covered in this Section.

The Administering Authority recognises that there may occasionally be particular circumstances affecting individual employers that are not easily managed within the rules and policies set out in the Funding Strategy Statement. Therefore the Administering Authority may, at its sole discretion, direct the actuary to adopt alternative funding approaches on a case by case basis for specific employers.

3.2 The effect of paying contributions below the theoretical level

Employers which are permitted to use one or more of the above methods will often be paying, for a time, contributions less than the theoretical contribution rate. Such employers should appreciate that:

their true long term liability (i.e. the actual eventual cost of benefits payable to their employees and exemployees) is not affected by the choice of method,

lower contributions in the short term will be assumed to incur a greater loss of investment returns on the deficit.

Thus, deferring a certain amount of contribution will lead to higher contributions in the long-term, and

it will take longer to reach full funding, all other things being equal.

Overleaf (3.3) is a summary of how the main funding policies differ for different types of employer, followed by more detailed notes where necessary.

Section 3.4 onwards deals with various other funding issues which apply to all employers.

3.3 The different approaches used for different employers

| Type of employer | Scheduled Bodies | | | Community Admission Bodies and Designating Employers | | |
|--|--|--|---|--|---|---|
| Sub-type | Local Authorities, Police & Crime Commissioner | Small Scheduled Bodies | Colleges | Academies | Open to new entrants | Closed to new entrants |
| Basis used | Ong | oing, assumes long- see <u>Appe</u> | | tion | Ongoing, but may mo | ve to "gilts basis" - see <u>Note</u> (a) |
| Future service rate | | Projected Unit C | redit approach (see | Appendix D – D.2) | | Attained Age approach (see Appendix D – D.2) |
| Stabilised rate? | Yes - see Note (b) | No | No | No | No | No |
| Maximum deficit recovery period – Note (c) | 20 years | 20 years | 15 years | 20 years | Outstanding contract term, subject to a maximum of 15 years | Outstanding contract term, subject to a maximum of 15 years |
| Deficit recovery payments – Note (d) | % of payroll or Monetary Amount | % of payroll | % of payroll or Monetary Amount | % of payroll or Monetary Amount | Monetary amount | Monetary amount |
| Treatment of surplus | Covered by stabilisation arrangement | Preferred approach: contributions kept at future service rate. However, reductions Admin. Authority | | | s may be permitted by the | |
| Phasing of contribution changes | Covered by stabilisation arrangement | 3 years - Note (e) | At the discretion of the Administering Authority. May be 3 years - Note (e) | Choice of three options ranging from LCC rate to actual rate | At the discretion of the Administering Authority. May be 3 years - Note (e) | At the discretion of the Administering Authority. May be 3 years - Note (e) |
| Review of rates – Note (f) | Administering Au | Administering Authority reserves the right to review contribution rates and amounts, and the level of security provided, at regular intervals between valuations | | | | |
| New employer | n/a | n/a | n/a | Note (g) | <u> </u> | Note (h) |

| Type of employer | Transferee Admission Bodies | Designating Bodies |
|--|---|--|
| Sub-type | (all) | Internal Drainage Boards |
| Basis used | Ongoing, assumes fixed contract term in the Fund (see Appendix E) | Ongoing, assumes long-term Fund participation (see Appendix E) |
| Future service rate | Approach dependent on whether contract is open or closed to new entrants (see Appendix D – D.2) | Projected Unit Credit approach (see Appendix D – D.2) |
| Stabilised rate? | No | Yes - see Note (b) |
| Maximum deficit recovery period – Note (c) | Outstanding contract term, subject to a maximum of 15 years | 20 years |
| Deficit recovery payments – Note (d) | Monetary amount | Monetary amount |
| Treatment of surplus | Preferred approach: contributions kept at future service rate. However, reductions may be permitted by the Admin. Authority | Preferred approach: contributions kept at future service rate. However, reductions may be permitted by the Admin. Authority |
| Phasing of contribution changes | At the discretion of the awarding authority - Note (e) | At the discretion of the Administering Authority. |
| Review of rates – Note (f) | Particularly reviewed in last 3 years of contract | Administering Authority reserves the right to review contribution rates and amounts, and the level of security provided, at regular intervals between valuations |
| New employer | Notes (h) & (i) | n/a |
| Cessation of participation: cessation debt payable | Participation is assumed to expire at the end of the contract. Cessation debt (if any) calculated on ongoing basis. Awarding Authority will be liable for future deficits and contributions arising. | Can be ceased subject to passing of resolution. Cessation debt will be calculated on a basis appropriate to the circumstances of cessation – see Note (j). |

Note (a) (Basis for CABs and Designating Employers closed to new entrants)

In the circumstances where:

the employer is a Designating Employer, or an Admission Body but not a Transferee Admission Body, and the employer has no guarantor, and

the admission agreement is likely to terminate, or the employer is likely to lose its last active member, within a timeframe considered appropriate by the Administering Authority to prompt a change in funding,

the Administering Authority may vary the discount rate used to set employer contribution rate. In particular contributions may be set for an employer to achieve full funding on a more prudent basis (e.g. using a discount rate set equal to gilt yields) by the time the agreement terminates or the last active member leaves, in order to protect other employers in the Fund. This policy will increase regular contributions and reduce, but not entirely eliminate, the possibility of a final deficit payment being required from the employer when a cessation valuation is carried out.

The Administering Authority also reserves the right to adopt the above approach in respect of those Designating Employers and Admission Bodies with no guarantor, where the strength of covenant is considered to be weak but there is no immediate expectation that the admission agreement will cease or the Designating Employer alters its designation.

Note (b) (Stabilisation)

Stabilisation is a mechanism where employer contribution rate variations from year to year are kept within a pre-determined range, thus allowing those employers' rates to be relatively stable. In the interests of stability and affordability of employer contributions, the Administering Authority, on the advice of the Fund Actuary, believes that stabilising contributions can still be viewed as a prudent longer-term approach. However, employers whose contribution rates have been "stabilised" (and may therefore be paying less than their theoretical contribution rate) should be aware of the risks of this approach and should consider making additional payments to the Fund if possible.

This stabilisation mechanism allows short term investment market volatility to be managed so as not to cause volatility in employer contribution rates, on the basis that a long term view can be taken on net cash inflow, investment returns and strength of employer covenant.

The current stabilisation mechanism applies if:

the employer satisfies the eligibility criteria set by the Administering Authority (see below) and;

there are no material events which cause the employer to become ineligible, e.g. significant reductions in active membership (due to outsourcing or redundancies), or changes in the nature of the employer (perhaps due to Government restructuring).

On the basis of modelling carried out prior to the 2013 valuation exercise (see <u>Section 4</u>), the standard stabilisation arrangements that will apply for employers are as follows. Other stabilisation arrangements may, on occasion, be allowed if the actuary considers them to be prudent.

| Type of employer | Local Authorities Council | Police and Crime Commissioner | Internal Drainage Boards |
|----------------------------|--|--|--|
| Stabilisation mechanism | Fixed % of pay plus increasing monetary amount | Fixed % of pay plus increasing monetary amount | Fixed % of pay plus increasing monetary amount |
| Max cont increase | +1% of pay | +1% of pay | +1% of pay |
| Max cont decrease | -1% of pay | -1% of pay | -1% of pay |

The Administering Authority may review an employer's eligibility for stabilisation at any time in the event of significant changes in the employer's membership (due for example to redundancies or outsourcing) or if there is a significant change in the Administering Authority's assessment of an employer's security. Possible actions may include increases in contributions expressed as a percentage of pay or revised deficit contributions expressed as monetary amounts.

The stabilisation criteria and limits will be reviewed no later than at the 31 March 2016 valuation, with any changes in contribution strategy taking effect from 1 April 2017. This will take into account the employer's membership profiles, the issues surrounding employer security, and other relevant factors.

Note (c) (Deficit Recovery Periods)

The deficit recovery period starts at the commencement of the revised contribution rate (1 April 2014 for the 2013 valuation). The Administering Authority would normally expect the same period to be used at successive triennial valuations, but would reserve the right to propose alternative spreading periods, for example where there were no new entrants.

Where stabilisation applies, the resulting employer contribution rate would be amended to comply with the stabilisation mechanism.

For employers with no (or very few) active members at this valuation, the deficit should be recovered by a fixed monetary amount over a period to be agreed with the body or its successor, not to exceed 3 years.

Note (d) (Deficit Recovery Payments)

For employers where stabilisation is not being applied, the deficit recovery payments for each employer covering the three year period until the next valuation will often be set as a percentage of salaries. However, the Administering Authority reserves the right to amend these rates between valuations and/or to require these payments in monetary terms instead, for instance where:

the employer is relatively mature, i.e. has a large deficit recovery contribution rate (e.g. above 15% of payroll), in other words its payroll is a smaller proportion of its deficit than is the case for most other employers, or

there has been a significant reduction in payroll due to outsourcing or redundancy exercises, or the employer has closed the Fund to new entrants.

Note (e) (Phasing in of contribution changes)

All phasing is subject to the Administering Authority being satisfied as to the strength of the employer's covenant. Where it is a Transferee Admitted Body, the awarding authority must act as guarantor.

Employers which have no active members at this valuation will not be phased.

The employers considered eligible for 'phasing in' were:

- Small Scheduled Bodies
- Colleges
- Lincolnshire Sports Partnership
- Lincolnshire Home Improvements Agency

Note (f) (Regular Reviews)

Such reviews may be triggered by significant events including but not limited to: significant reductions in payroll, altered employer circumstances, Government restructuring affecting the employer's business, or failure to pay contributions or arrange appropriate security as required by the Administering Authority.

The result of a review may be to require increased contributions (by strengthening the actuarial assumptions adopted and/or moving to monetary levels of deficit recovery contributions), and/or an increased level of security or guarantee.

Note (g) (New Academy employers)

At the time of writing, the Fund's policies on academies' funding issues are as follows:

- a) The new academy will be regarded as a separate employer in its own right and will not be pooled with other employers in the Fund. The only exception is where the academy is part of a Multi Academy Trust (MAT) in which case the academy's figures will be calculated as below but can be combined with those of the other academies in the MAT;
- b) The new academy's past service liabilities on conversion will be calculated based on its active Fund members on the day before conversion. For the avoidance of doubt, these liabilities will include all past service of those members, but will exclude the liabilities relating to any ex-employees of the school who have deferred or pensioner status;
- c) The new academy will be allocated an initial asset share from the ceding council pool's assets in the Fund. This asset share will be calculated using the estimated funding position of the ceding council pool's at the date of academy conversion. The share will be based on the active members' funding level, having first allocated assets in the council's share to fully fund deferred and pensioner members. The asset allocation will be based on market conditions and the academy's active Fund membership on the day prior to conversion;
- d) The new academy's contribution rate will be calculated using the ongoing assumptions that applied as at the last formal valuation and the ceding council pool's funding position and membership data, all as at the day prior to conversion.

e) As an alternative to (d), the academy will have the option to elect to pay contributions initially in line with the ceding LEA instead. However, this election will not alter its asset or liability allocation as per (b) and (c) above. Ultimately, all academies remain responsible for their own allocated deficit.

The Fund's policies on academies are subject to change in the light of any amendments to DCLG guidance. Any changes will be notified to academies, and will be reflected in a subsequent version of this FSS. In particular, policies (c), (d) and (e) above will be reconsidered at each valuation.

Note (h) (New Admission Bodies)

With effect from 1 October 2012, the LGPS 2012 Miscellaneous Regulations introduced mandatory new requirements for all Admission Bodies brought into the Fund from that date. Under these Regulations, all new Admission Bodies will be required to provide some form of security, such as a guarantee from the letting employer, an indemnity or a bond. The security is required to cover some or all of the following:

the strain cost of any redundancy early retirements resulting from the premature termination of the contract; allowance for the risk of asset underperformance;

allowance for the risk of a fall in gilt yields;

allowance for the possible non-payment of employer and member contributions to the Fund;

the current deficit.

For all new Transferee Admission Bodies, the security must be to the satisfaction of the Administering Authority as well as the letting employer, and will be reassessed on an annual basis.

The Administering Authority will only consider requests from Community Admission Bodies (or other similar bodies, such as section 75 NHS partnerships) to join the Fund if they are sponsored by a Scheduled Body with tax raising powers, guaranteeing their liabilities and also providing a form of security as above.

The above approaches reduce the risk to other employers in the Fund, of potentially having to pick up any shortfall in respect of Admission Bodies ceasing with an unpaid deficit.

Note (i) (New Transferee Admission Bodies)

A new TAB usually joins the Fund as a result of the letting/outsourcing of some services from an existing employer (normally a Scheduled Body such as a council or academy) to another organisation (a "contractor"). This involves the TUPE transfer of some staff from the letting employer to the contractor. Consequently, for the duration of the contract, the contractor is a new participating employer in the Fund so that the transferring employees maintain their eligibility for LGPS membership. At the end of the contract the employees revert to the letting employer or to a replacement contractor.

Ordinarily, the TAB would be set up in the Fund as a new employer with responsibility for all the accrued benefits of the transferring employees; in this case, the contractor would usually be assigned an initial asset allocation equal to the past service liability value of the employees' Fund benefits. The quid pro quo is that the contractor is then expected to ensure that its share of the Fund is also fully funded at the end of the contract: see Note (j).

Employers which "outsource" have flexibility in the way that they can deal with the pension risk potentially taken on by the contractor. In particular there are three different routes that such employers may wish to adopt. Clearly as the risk ultimately resides with the employer letting the contract, it is for them to agree the appropriate route with the contractor:

i) Pooling

Under this option the contractor is pooled with the letting employer. In this case, the contractor pays the same rate as the letting employer, which is may be under the stabilisation approach.

ii) Letting employer retains pre-contract risks

Under this option the letting employer would retain responsibility for assets and liabilities in respect of service accrued prior to the contract commencement date. The contractor would be responsible for the future liabilities that accrue in respect of transferred staff. The contractor's contribution rate could vary from one valuation to the next. It would be liable for any deficit at the end of the contract term in respect of assets and liabilities attributable to service accrued during the contract term.

iii) Fixed contribution rate agreed

Under this option the contractor pays a fixed contribution rate and doesn't pay any cessation deficit.

The Administering Authority is willing to administer any of the above options as long as the approach is documented in the Admission Agreement as well as the transfer agreement. The Admission Agreement should ensure that some element of risk transfers to the contractor where it relates to their decisions and it is unfair to burden the letting employer with that risk. For example the contractor should typically be responsible for pension costs that arise from;

above average pay increases, including the effect in respect of service prior to contract commencement even if the letting employer takes on responsibility for the latter under (ii) above;

redundancy and early retirement decisions.

Note (j) (Cessation)

Notwithstanding the provisions of any Admission Agreement, the following are triggers for the cessation of an employer in the scheme:

Last active member ceasing participation in the Fund;

The insolvency, winding up or liquidation of the Admission Body;

Any breach by the Admission Body of any of its obligations under the Agreement that they have failed to remedy to the satisfaction of the Fund;

A failure by the Admission Body to pay any sums due to the Fund within the period required by the Fund; or

The failure by the Admission Body to renew or adjust the level of the bond or indemnity, or to confirm an appropriate alternative guarantor, as required by the Fund.

On cessation, the Administering Authority will instruct the Fund actuary to carry out a cessation valuation to determine whether there is any deficit or surplus. Where there is a deficit, payment of this amount in full would normally be sought from the employer; where there is a surplus it should be noted that current legislation does not permit a refund payment.

For non-Transferee Admission Bodies whose participation is voluntarily ended either by themselves or the Fund, or where a cessation event has been triggered, the Administering Authority must look to protect the interests of other ongoing employers. The actuary will therefore adopt an approach which, to the extent reasonably practicable, protects the other employers from the likelihood of any material loss emerging in future:

- a) Where there is a guarantor for future deficits and contributions, the cessation valuation will normally be calculated using the ongoing basis as described in Appendix E;
- b) Alternatively, it may be possible to simply transfer the former Admission Body's liabilities and assets to the guarantor, without needing to crystallise any deficit. This approach may be adopted where the employer cannot pay the contributions due, and this is within the terms of the guarantee;
- c) Where a guarantor does not exist then, in order to protect other employers in the Fund, the cessation liabilities and final deficit will normally be calculated using a "gilts cessation basis", which is more prudent than the ongoing basis. This has no allowance for potential future investment outperformance above gilt yields, and has added allowance for future improvements in life expectancy. This could give rise to significant cessation debts being required.

Under (a) and (c), any shortfall would usually be levied on the departing employer as a single lump sum payment. If this is not possible then the Fund would look to any bond, indemnity or guarantee in place for the employer.

In the event that the Fund is not able to recover the required payment in full, then the unpaid amounts fall to be shared amongst all of the other employers in the Fund. This may require an immediate revision to the Rates and Adjustments Certificate affecting other employers in the Fund, or instead be reflected in the contribution rates set at the next formal valuation following the cessation date.

As an alternative, where the ceasing Admission Body is continuing in business, the Fund at its absolute discretion reserves the right to enter into an agreement with the ceasing Admission Body. Under this agreement the Fund would accept an appropriate alternative security to be held against any deficit, and would carry out the cessation valuation on an ongoing basis: deficit recovery payments would be derived from this cessation debt. This approach would be monitored as part of each triennial valuation: the Fund reserves the right to revert to a "gilts cessation basis" and seek immediate payment of any funding shortfall identified. The Administering Authority may need to seek legal advice in such cases, as the Body would have no contributing members.

3.4 Pooled contributions

From time to time the Administering Authority may set up pools for employers with similar characteristics. This will always be in line with its broader funding strategy.

With the advice of the Actuary the Administering Authority allows smaller employers of similar types to pool their contributions as a way of sharing experience and smoothing out the effects of costly but relatively rare events such as ill-health retirements or deaths in service. Normally employers with less than 50 employees would be encouraged to participate in a pool if appropriate. Similar types of employers with more than 50 employees would be allowed to participate in a pool if they requested to do so.

Community Admission Bodies that are deemed by the Administering Authority to have closed to new entrants are not permitted to participate in a pool. Transferee Admission Bodies are also ineligible for pooling.

Smaller admitted bodies may be pooled with the letting employer, provided all parties (particularly the letting employer) agree.

Academies will be regarded as separate employers in their own right and will not be pooled with other employers in the Fund, the only exception being when the Academy is part of a Multi Academy Trust (MAT).

Employers who are permitted to enter (or remain in) a pool at the 2013 valuation will not normally be advised of their individual contribution rate unless agreed by the Administering Authority.

Schools generally are also pooled with their funding Council. However there may be exceptions for specialist or independent schools.

Those employers which have been pooled are identified in the Rates and Adjustments Certificate. As at the 2013 valuation, separate pools were operated for:-

- Lincolnshire County Council and Schools;
- Small Scheduled Bodies;
- The following Multi Academy Trusts:
 - David Ross Education Trust
 - Boston Witham Academies Trust
 - Phoenix Family of Schools
 - Priory Federation of Academies
 - Tall Oaks Academy Trust
 - West Grantham Federation
- Lincolnshire Police and G4S

3.5 Additional flexibility in return for added security

The Administering Authority may permit greater flexibility to the employer's contributions if the employer provides added security to the satisfaction of the Administering Authority.

Such flexibility includes a reduced rate of contribution, an extended deficit recovery period, or permission to join a pool with another body (e.g. the Local Authority).

Such security may include, but is not limited to, a suitable bond, a legally-binding guarantee from an appropriate third party, or security over an employer asset of sufficient value.

The degree of flexibility given may take into account factors such as:

the extent of the employer's deficit;

the amount and quality of the security offered;

the employer's financial security and business plan;

whether the admission agreement is likely to be open or closed to new entrants.

The administering authority recognises that there may occasionally be particular circumstances affecting individual employers that are not easily managed within the rules and policies set out in the Funding Strategy Statement. The administering authority may, at its sole discretion, agree alternative funding approaches on a case by case basis but will at all times take into account its responsibilities in regard to the security of the Fund.

3.6 Non ill health early retirement costs

It is assumed that members' benefits are payable from the earliest age that the employee could retire without incurring a reduction to their benefit (and without requiring their employer's consent to retire). (**NB** the relevant age may be different for different periods of service, following the benefit changes from April 2008 and April 2014). Employers are required to pay additional contributions ('strain') wherever an employee retires before attaining this age. The actuary's funding basis makes no allowance for premature retirement except on grounds of ill-health.

It is generally expected that such strain costs are paid immediately, however, in exceptional circumstances and with the agreement of the Administering Authority the payment can be spread as follows:

Major Employing bodies - up to 3 years

Community Admission Bodies and Designating Employers - up to 3 years

Academies - up to 3 years

Transferee Admission Bodies - payable immediately.

3.7 III health early retirement costs

Admitted Bodies will usually have an 'ill health allowance'; Scheduled Bodies may have this also, depending on their agreement terms with the Administering Authority. The Fund monitors each employer's ill health experience on an ongoing basis. If the cumulative cost of ill health retirement in any financial year exceeds the allowance at the previous valuation, the employer will be charged additional contributions on the same basis as apply for non ill-health cases. Details will be included in each separate Admission Agreement.

3.8 III health insurance

If an employer provides satisfactory evidence to the Administering Authority of a current insurance policy covering ill health early retirement strains, then:

- the employer's contribution to the Fund each year is reduced by the amount of that year's insurance premium, so that the total contribution is unchanged, and
- there is no need for monitoring of allowances.

The employer must keep the Administering Authority notified of any changes in the insurance policy's coverage or premium terms, or if the policy is ceased.

3.9 Employers with no remaining active members

In general an employer ceasing in the Fund, due to the departure of the last active member, will pay a cessation debt on an appropriate basis (see <u>3.3</u>, <u>Note (j)</u>) and consequently have no further obligation to the Fund. Thereafter it is expected that one of two situations will eventually arise:

- a) The employer's asset share runs out before all its ex-employees' benefits have been paid. In this situation the other Fund employers will be required to contribute to pay all remaining benefits: this will be done by the Fund actuary apportioning the remaining liabilities on a pro-rata basis at successive formal valuations;
- b) The last ex-employee or dependant dies before the employer's asset share has been fully utilised. In this situation the remaining assets would be apportioned pro-rata by the Fund's actuary to the other Fund.

c) In exceptional circumstances the Fund may permit an employer with no remaining active members to continue contributing to the Fund. This would require the provision of a suitable security or guarantee, as well as a written ongoing commitment to fund the remainder of the employer's obligations over an appropriate period. The Fund would reserve the right to invoke the cessation requirements in the future, however. The Administering Authority may need to seek legal advice in such cases, as the employer would have no contributing members.

3.10 Policies on bulk transfers

The Fund has a separate written policy which covers bulk transfer payments into, out of and within the Fund, which can be found within the discretionary policies document. Each case will be treated on its own merits, but in general:

The Fund will not pay bulk transfers greater than the lesser of (a) the asset share of the transferring employer in the Fund, and (b) the value of the past service liabilities of the transferring members;

The Fund will not grant added benefits to members bringing in entitlements from another Fund unless the asset transfer is sufficient to meet the added liabilities;

The Fund may permit shortfalls to arise on bulk transfers if the Fund employer has suitable strength of covenant and commits to meeting that shortfall in an appropriate period. This may require the employer's Fund contributions to increase between valuations.

Funding strategy and links to investment strategy

3.11 What is the Fund's investment strategy?

The Fund has built up assets over the years, and continues to receive contribution and other income. All of this must be invested in a suitable manner, which is the investment strategy.

Investment strategy is set by the administering authority, after consultation with the employers and after taking investment advice. The precise mix, manager make up and target returns are set out in the Statement of Investment Principles (SIP), which is available to members and employers.

The investment strategy is set for the long-term, but is reviewed from time to time. Normally a full review is carried out after each actuarial valuation, and is kept under review annually between actuarial valuations to ensure that it remains appropriate to the Fund's liability profile.

The same investment strategy is currently followed for all employers.

3.12 What is the link between funding strategy and investment strategy?

The Fund must be able to meet all benefit payments as and when they fall due. These payments will be met by contributions (resulting from the funding strategy) or asset returns and income (resulting from the investment strategy). To the extent that investment returns or income fall short, then higher cash contributions are required from employers, and vice versa.

Therefore, the funding and investment strategies are inextricably linked.

3.13 How does the funding strategy reflect the Fund's investment strategy?

In the opinion of the Fund actuary, the current funding policy is consistent with the current investment strategy of the Fund. The asset outperformance assumption contained in the discount rate (see <u>E3</u>) is within a range that would be considered acceptable for funding purposes; it is also considered to be consistent with the requirement to take a "prudent longer-term view" of the funding of liabilities as required by the UK Government (see <u>A1</u>).

However, in the short term – such as the three yearly assessments at formal valuations – there is the scope for considerable volatility and there is a material chance that in the short-term and even medium term, asset returns will fall short of this target. The stability measures described in <u>Section 3</u> will damp down, but not remove, the effect on employers' contributions.

The Fund does not hold a contingency reserve to protect it against the volatility of equity investments.

3.14 How does this differ for a large stable employer?

The Actuary has developed four key measures which capture the essence of the Fund's strategies, both funding and investment:

Prudence - the Fund should have a reasonable expectation of being fully funded in the long term;

Affordability - how much can employers afford;

Stewardship – the assumptions used should be sustainable in the long term, without having to resort to overly optimistic assumptions about the future to maintain an apparently healthy funding position;

Stability – employers should not see significant moves in their contribution rates from one year to the next, and this will help to provide a more stable budgeting environment.

The key problem is that the key objectives often conflict. For example, minimising the long term cost of the scheme (i.e. keeping employer rates affordable) is best achieved by investing in higher returning assets e.g. equities. However, equities are also very volatile (i.e. go up and down fairly frequently in fairly large moves), which conflicts with the objective to have stable contribution rates.

Therefore a balance needs to be maintained between risk and reward, which has been considered by the use of Asset Liability Modelling: this is a set of calculation techniques applied by the Fund's actuary, to model the range of potential future solvency levels and contribution rates.

The Actuary was able to model the impact of these four key areas, for the purpose of setting a stabilisation approach (see 3.3 Note (b)). The modelling demonstrated that retaining the present investment strategy, coupled with constraining employer contribution rate changes as described in 3.3 Note (b), struck an appropriate balance between the above objectives. In particular the stabilisation approach currently adopted meets the need for stability of contributions without jeopardising the Administering Authority's aims of prudent stewardship of the Fund.

Whilst the current stabilisation mechanism is to remain in place until 2017, it should be noted that this will need to be reviewed following the 2016 valuation.

3.15 Does the Fund monitor its overall funding position?

The Administering Authority monitors the relative funding position, i.e. changes in the relationship between asset values and the liabilities value, quarterly. It reports this to the regular Pensions Committee meetings, and also to employers through Employers Forums.

Appendix A – Regulatory framework

A1 Why does the Fund need an FSS?

The Department for Communities and Local Government (DCLG) has stated that the purpose of the FSS is:

"to establish a **clear and transparent fund-specific strategy** which will identify how employers' pension liabilities are best met going forward;

to support the regulatory framework to maintain **as nearly constant employer contribution rates as possible**; and

to take a prudent longer-term view of funding those liabilities."

These objectives are desirable individually, but may be mutually conflicting.

The requirement to maintain and publish a FSS is contained in LGPS Regulations which are updated from time to time. In publishing the FSS the Administering Authority has to have regard to any guidance published by Chartered Institute of Public Finance and Accountancy (CIPFA) (most recently in 2012) and to its Statement of Investment Principles.

This is the framework within which the Fund's actuary carries out triennial valuations to set employers' contributions and provides recommendations to the Administering Authority when other funding decisions are required, such as when employers join or leave the Fund. The FSS applies to all employers participating in the Fund.

A2 Does the Administering Authority consult anyone on the FSS?

Yes. This is required by LGPS Regulations. It is covered in more detail by the most recent CIPFA guidance, which states that the FSS must first be subject to "consultation with such persons as the authority considers appropriate", and should include "a meaningful dialogue at officer and elected member level with council tax raising authorities and with corresponding representatives of other participating employers".

In practice, for the Fund, the consultation process for this FSS was as follows:

- a) A draft version of the FSS was issued to all participating employers in January 2014 for comment;
- b) Comments were requested within 4 weeks;
- c) There was an Employers Forum on 12th February 2014 at which questions regarding the FSS could be raised and answered;
- d) Following the end of the consultation period the FSS was updated where required and approved at the Pensions Committee and then published, in March 2014.

A3 How is the FSS published?

The FSS is made available through the following routes:

Published on the shared service website at www.wypf.org.uk;

Each participating employer in the Fund notified by email of its availability on the website;

All Pensions Committee members notified by email of its availability on the website, including the employee representative;

All Fund members signposted to the FSS on the website in the annual summary leaflet;

A full copy included in the annual report and accounts of the Fund;

Copies sent to investment managers and independent advisers upon request;

Copies made available on request.

A4 How often is the FSS reviewed?

The FSS is reviewed in detail at least every three years as part of the triennial valuation. This version is expected to remain unaltered until it is consulted upon as part of the formal process for the next valuation in 2016.

It is possible that (usually slight) amendments may be needed within the three year period. These would be needed to reflect any regulatory changes, or alterations to the way the Fund operates (e.g. to accommodate a new class of employer). Any such amendments would be consulted upon as appropriate:

trivial amendments would be simply notified at the next round of employer communications,

amendments affecting only one class of employer would be consulted with those employers,

other more significant amendments would be subject to full consultation.

In any event, changes to the FSS would need agreement by the Pensions Committee and would be included in the relevant Committee Meeting minutes.

A5 How does the FSS fit into other Fund documents?

The FSS is a summary of the Fund's approach to funding liabilities. It is not an exhaustive statement of policy on all issues, for example there are a number of separate statements published by the Fund including the Statement of Investment Principles, Governance Strategy and Communications Strategy. In addition, the Fund publishes an Annual Report and Accounts with up to date information on the Fund.

These documents can be found on the shared service website at www.wypf.org.uk

Appendix B – Responsibilities of key parties

The efficient and effective operation of the Fund needs various parties to each play their part.

B1 The Administering Authority should:-

operate the Fund as per the LGPS Regulations;

effectively manage any potential conflicts of interest arising from its dual role as Administering Authority and a Fund employer;

collect employer and employee contributions, and investment income and other amounts due to the Fund; ensure that cash is available to meet benefit payments as and when they fall due;

pay from the Fund the relevant benefits and entitlements that are due;

invest surplus monies (i.e. contributions and other income which are not immediately needed to pay benefits) in accordance with the Fund's Statement of Investment Principles (SIP) and LGPS Regulations;

communicate appropriately with employers so that they fully understand their obligations to the Fund; take appropriate measures to safeguard the Fund against the consequences of employer default; manage the valuation process in consultation with the Fund's actuary;

prepare and maintain a FSS and a SIP, after consultation;

notify the Fund's actuary of material changes which could affect funding (this is covered in a separate agreement with the actuary); and

monitor all aspects of the fund's performance and funding and amend the FSS/SIP as necessary and appropriate.

B2 The Individual Employer should:-

deduct contributions from employees' pay correctly;

pay all contributions, including their own as determined by the actuary, promptly by the due date;

have a policy and exercise discretions within the regulatory framework;

make additional contributions in accordance with agreed arrangements in respect of, for example, augmentation of scheme benefits, early retirement strain; and

notify the Administering Authority promptly of all changes to its circumstances, prospects or membership, which could affect future funding.

B3 The Fund Actuary should:-

prepare valuations, including the setting of employers' contribution rates. This will involve agreeing assumptions with the Administering Authority, having regard to the FSS and LGPS Regulations, and targeting each employer's solvency appropriately;

provide advice relating to new employers in the Fund, including the level and type of bonds or other forms of security (and the monitoring of these);

prepare advice and calculations in connection with bulk transfers and individual benefit-related matters;

assist the Administering Authority in considering possible changes to employer contributions between formal valuations, where circumstances suggest this may be necessary;

advise on the termination of Admission Bodies' participation in the Fund; and

fully reflect actuarial professional guidance and requirements in the advice given to the Administering Authority.

B4 Other parties:-

- investment advisers (either internal or external) should ensure the Fund's SIP remains appropriate, and consistent with this FSS;
- investment managers, custodians and bankers should all play their part in the effective investment (and disinvestment) of Fund assets, in line with the SIP;
- auditors should comply with their auditing standards, ensure Fund compliance with all requirements, monitor and advise on fraud detection, and sign off annual reports and financial statements as required;
- governance advisers may be appointed to advise the Administering Authority on efficient processes and working methods in managing the Fund;
- legal advisers (either internal or external) should ensure the Fund's operation and management remains fully compliant with all regulations and broader local government requirements, including the Administering Authority's own procedures.

Appendix C – Key risks and controls

C1 Types of risk

The Administering Authority has an active risk management programme in place. The measures that it has in place to control key risks are summarised below under the following headings:

financial;

demographic;

regulatory; and

governance.

C2 Financial risks

| Risk | Summary of Control Mechanisms |
|--|---|
| Fund assets fail to deliver returns in line with the anticipated returns underpinning valuation of | Only anticipate long-term return on a relatively prudent basis to reduce risk of under-performing. |
| liabilities over the long-term. | Assets invested on the basis of specialist advice, in a suitably diversified manner across asset classes, geographies, managers, etc. |
| | Analyse progress at three yearly valuations for all employers. |
| | Inter-valuation roll-forward of liabilities between valuations at whole Fund level. |
| Inappropriate long-term investment strategy. | Overall investment strategy options considered as an integral part of the funding strategy. Used asset liability modelling to measure 4 key outcomes. |
| | Chosen option considered to provide the best balance. |
| Fall in risk-free returns on Government bonds, leading to rise in value placed on liabilities. | Stabilisation modelling at whole Fund level allows for the probability of this within a longer term context. |
| | Inter-valuation monitoring, as above. |
| | Some investment in bonds helps to mitigate this risk. |
| Active investment manager under-performance relative to benchmark. | Quarterly investment monitoring analyses market performance and active managers relative to their index benchmark. |
| Pay and price inflation significantly more than anticipated. | The focus of the actuarial valuation process is on real returns on assets, net of price and pay increases. |
| | Inter-valuation monitoring, as above, gives early warning. |
| | Some investment in bonds also helps to mitigate this |

| Risk | Summary of Control Mechanisms |
|--|---|
| | risk. Employers pay for their own salary awards and should be mindful of the geared effect on pension liabilities of any bias in pensionable pay rises towards longer-serving employees. |
| Effect of possible increase in employer's contribution rate on service delivery and admission/scheduled bodies | An explicit stabilisation mechanism has been agreed as part of the funding strategy. Other measures are also in place to limit sudden increases in contributions. |
| Orphaned employers give rise to added costs for the Fund | The Fund seeks a cessation debt (or security/guarantor) to minimise the risk of this happening in the future. |
| | If it occurs, the Actuary calculates the added cost spread pro-rata among all employers – (see <u>3.9</u>). |

C3 Demographic risks

| C3 Demographic risks | | |
|--|--|--|
| Risk | Summary of Control Mechanisms | |
| Pensioners living longer, thus increasing cost to Fund. | Set mortality assumptions with some allowance for future increases in life expectancy. | |
| | The Fund Actuary has direct access to the experience of over 50 LGPS funds which allows early identification of changes in life expectancy that might in turn affect the assumptions underpinning the valuation. | |
| Maturing Fund – i.e. proportion of actively contributing employees declines relative to retired employees. | Continue to monitor at each valuation, consider seeking monetary amounts rather than % of pay and consider alternative investment strategies. | |
| Deteriorating patterns of early retirements | Employers are charged the extra cost of non ill-health retirements following each individual decision. | |
| | Employer ill health retirement experience is monitored, and insurance is an option. | |
| Reductions in payroll causing insufficient deficit recovery payments | In many cases this may not be sufficient cause for concern, and will in effect be caught at the next formal valuation. However, there are protections where there is concern, as follows: | |
| | Employers in the stabilisation mechanism may be brought out of that mechanism to permit appropriate contribution increases (see Note (b) to 3.3). | |

| Risk | Summary of Control Mechanisms |
|------|---|
| | For other employers, review of contributions is permitted in general between valuations (see Note (f) to 3.3) and may require a move in deficit contributions from a percentage of payroll to fixed monetary amounts. |

C4 Regulatory risks

| Risk | Summary of Control Mechanisms |
|---|---|
| Changes to national pension requirements and/or HMRC rules e.g. changes arising from public sector pensions reform. | The Administering Authority considers all consultation papers issued by the Government and comments where appropriate. The results of the most recent reforms have been built into the 2013 valuation. Any changes to member contribution rates or benefit levels will be carefully communicated with members to minimise possible optouts or adverse actions. |

C5 Governance risks

| Risk | Summary of Control Mechanisms |
|---|--|
| Administering Authority unaware of structural changes in an employer's membership (e.g. large fall in employee members, large number of retirements) or not advised of an employer closing to new entrants. | The Administering Authority has a close relationship with employing bodies and communicates required standards e.g. for submission of data. The Actuary may revise the rates and Adjustments certificate to increase an employer's contributions (under Regulation 38) between triennial valuations. Deficit contributions may be expressed as monetary amounts. |
| Actuarial or investment advice is not sought, or is not heeded, or proves to be insufficient in some way | The Administering Authority maintains close contact with its specialist advisers. Advice is delivered via formal meetings involving Elected Members, and recorded appropriately. Actuarial advice is subject to professional requirements such as peer review. |
| Administering Authority failing to commission the Fund Actuary to carry out a termination valuation for a departing Admission Body. | The Administering Authority requires employers with Best Value contractors to inform it of forthcoming changes. Community Admission Bodies' memberships are |

| Risk | Summary of Control Mechanisms |
|---|--|
| | monitored and, if active membership decreases, steps will be taken. |
| An employer ceasing to exist with insufficient funding or adequacy of a bond. | The Administering Authority believes that it would normally be too late to address the position if it was left to the time of departure. |
| | The risk is mitigated by: |
| | Seeking a funding guarantee from another scheme employer, or external body, where-ever possible (see Notes (h) and (j) to 3.3). |
| | Alerting the prospective employer to its obligations and encouraging it to take independent actuarial advice. |
| | Vetting prospective employers before admission. |
| | Where permitted under the regulations requiring a bond to protect the Fund from various risks. |
| | Requiring new Community Admission Bodies to have a guarantor. |
| | Reviewing bond or guarantor arrangements at regular intervals (see Note (f) to 3.3). |
| | Reviewing contributions well ahead of cessation if thought appropriate (see Note (a) to 3.3). |

Appendix D – The calculation of Employer contributions

In <u>Section 2</u> there was a broad description of the way in which contribution rates are calculated. This Appendix considers these calculations in much more detail.

The calculations involve actuarial assumptions about future experience, and these are described in detail in Appendix E.

D1 What is the difference between calculations across the whole Fund and calculations for an individual employer?

Employer contributions are normally made up of two elements:

- a) the estimated cost of future benefits being accrued, referred to as the "future service rate"; plus
- b) an adjustment for the funding position of accrued benefits relative to the Fund's solvency target, "past service adjustment". If there is a surplus there may be a reduction in the employer's contribution rate. If there is a deficit there will be an increase in the employer's contribution rate, with the surplus or deficit spread over an appropriate period. The aim is to return the employer to full funding over that period. See <u>Section 3</u> for deficit recovery periods.

The Fund's actuary is required by the regulations to report the *Common Contribution Rate*¹, for all employers collectively at each triennial valuation. It combines items (a) and (b) and is expressed as a percentage of pay; it is in effect an average rate across all employers in the Fund.

The Fund's actuary is also required to adjust the Common Contribution Rate for circumstances which are deemed "peculiar" to an individual employer². It is the adjusted contribution rate which employers are actually required to pay. The sorts of "peculiar" factors which are considered are discussed below.

In effect, the *Common Contribution Rate* is a notional quantity. Separate future service rates are calculated for each employer together with individual past service adjustments according to employer-specific past service deficit spreading and increased employer contribution phasing periods.

D2 How is the Future Service Rate calculated?

The future service element of the employer contribution rate is calculated with the aim that these contributions will meet benefit payments in respect of members' **future** service in the Fund. This is based upon the cost (in excess of members' contributions) of the benefits which employee members earn from their service each year.

The future service rate is calculated separately for all the employers, although employers within a pool will pay the contribution rate applicable to the pool as a whole. The calculation is on the "ongoing" valuation basis (see Appendix E), but where it is considered appropriate to do so the Administering Authority reserves the right to set a future service rate by reference to liabilities valued on a more prudent basis (see Section 3).

The approach used to calculate each employer's future service contribution rate depends on whether or not new entrants are being admitted. Employers should note that it is only Admission Bodies and Designating Employers that may have the power not to automatically admit all eligible new staff to the Fund, depending on the terms of their Admission Agreements and employment contracts.

¹ See LGPS (Administration) Regulations 36(5).

See LGPS (Administration) Regulations 36(7).

a) Employers which admit new entrants

These rates will be derived using the "Projected Unit Method" of valuation with a one year period, i.e. only considering the cost of the next year's benefit accrual and contribution income. If future experience is in line with assumptions, and the employer's membership profile remains stable, this rate should be broadly stable over time. If the membership of employees matures (e.g. because of lower recruitment) the rate would rise over time.

b) Employers which do not admit new entrants

To give more long term stability to such employers' contributions, the "Attained Age" funding method is normally adopted. This measures benefit accrual and contribution income over the whole future anticipated working lifetimes of current active employee members.

Both approaches include expenses of administration to the extent that they are borne by the Fund, and include allowances for benefits payable on death in service and ill health retirement.

D3 How is the Solvency / Funding Level calculated?

The Fund's actuary is required to report on the "solvency" of the whole Fund in a valuation which should be carried out at least once every three years. As part of this valuation, the actuary will calculate the solvency position of each employer.

'Solvency" is defined to be the ratio of the market value of the employer's asset share to the value placed on accrued benefits on the Fund actuary's chosen assumptions. This quantity is known as a funding level.

For the value of the employer's asset share, see <u>D5</u> below.

For the value of benefits, the Fund actuary agrees the assumptions to be used with the Administering Authority – see Appendix E. These assumptions are used to calculate the present value of all benefit payments expected in the future, relating to that employer's current and former employees, based on pensionable service to the valuation date only (i.e. ignoring further benefits to be built up in the future).

The Fund operates the same target funding level for all employers of 100% of its accrued liabilities valued on the ongoing basis, unless otherwise determined (see <u>Section 3</u>).

D4 What affects a given employer's valuation results?

The results of these calculations for a given individual employer will be affected by:

past contributions relative to the cost of accruals of benefits;

different liability profiles of employers (e.g. mix of members by age, gender, service vs. salary);

the effect of any differences in the valuation basis on the value placed on the employer's liabilities;

any different deficit/surplus spreading periods or phasing of contribution changes;

the difference between actual and assumed rises in pensionable pay;

the difference between actual and assumed increases to pensions in payment and deferred pensions;

the difference between actual and assumed retirements on grounds of ill-health from active status;

the difference between actual and assumed amounts of pension ceasing on death;

the additional costs of any non ill-health retirements relative to any extra payments made;

over the period between each triennial valuation.

Actual investment returns achieved on the Fund between each valuation are applied proportionately across all employers, to the extent that employers in effect share the same investment strategy. Transfers of liabilities between employers within the Fund occur automatically within this process, with a sum broadly equivalent to the reserve required on the ongoing basis being exchanged between the two employers.

D5 How is each employer's asset share calculated?

The Administering Authority does not account for each employer's assets separately. Instead, the Fund's actuary is required to apportion the assets of the whole Fund between the employers, at each triennial valuation.

This apportionment uses the income and expenditure figures provided for certain cash flows for each employer. This process adjusts for transfers of liabilities between employers participating in the Fund, but does make a number of simplifying assumptions. The split is calculated using an actuarial technique known as "analysis of surplus".

The Fund actuary does not allow for certain relatively minor events, including but not limited to:

the actual timing of employer contributions within any financial year;

the effect of the premature payment of any deferred pensions on grounds of incapacity.

These effects are swept up within a miscellaneous item in the analysis of surplus, which is split between employers in proportion to their liabilities.

The methodology adopted means that there will inevitably be some difference between the asset shares calculated for individual employers and those that would have resulted had they participated in their own ring-fenced section of the Fund.

The asset apportionment is capable of verification but not to audit standard. The Administering Authority recognises the limitations in the process, but it considers that the Fund actuary's approach addresses the risks of employer cross-subsidisation to an acceptable degree.

Appendix E – Actuarial assumptions

E1 What are the actuarial assumptions?

These are expectations of future experience used to place a value on future benefit payments ("the liabilities"). Assumptions are made about the amount of benefit payable to members (the financial assumptions) and the likelihood or timing of payments (the demographic assumptions). For example, financial assumptions include investment returns, salary growth and pension increases; demographic assumptions include life expectancy, probabilities of ill-health early retirement, and proportions of member deaths giving rise to dependants' benefits.

Changes in assumptions will affect the measured value of future service accrual and past service liabilities, and hence the measured value of the past service deficit. However, different assumptions will not of course affect the actual benefits payable by the Fund in future.

The combination of all assumptions is described as the "basis". A more optimistic basis might involve higher assumed investment returns (discount rate), or lower assumed salary growth, pension increases or life expectancy; a more optimistic basis will give lower liability values and lower employer costs. A more prudent basis will give higher liability values and higher employer costs.

E2 What basis is used by the Fund?

The Fund's standard funding basis is described as the "ongoing basis", which applies to most employers in most circumstances. This is described in more detail below. It anticipates employers remaining in the Fund in the long term.

However, in certain circumstances, typically where the employer is not expected to remain in the Fund long term, a more prudent basis may apply: see <u>Note (a)</u> to <u>3.3</u>.

E3 What assumptions are made in the ongoing basis?

a) Investment return / discount rate

The key financial assumption is the anticipated return on the Fund's investments. This "discount rate" assumption makes allowance for an anticipated out-performance of Fund returns relative to long term yields on UK Government bonds ("gilts"). There is, however, no guarantee that Fund returns will out-perform gilts. The risk is greater when measured over short periods such as the three years between formal actuarial valuations, when the actual returns and assumed returns can deviate sharply.

Given the very long-term nature of the liabilities, a long term view of prospective asset returns is taken. The long term in this context would be 20 to 30 years or more.

For the purpose of the triennial funding valuation at 31 March 2013 and setting contribution rates effective from 1 April 2014, the Fund actuary has assumed that future investment returns earned by the Fund over the long term will be 1.6% per annum greater than gilt yields at the time of the valuation (this is the same as that used at the 2010 valuation). In the opinion of the Fund actuary, based on the current investment strategy of the Fund, this asset out-performance assumption is within a range that would be considered acceptable for the purposes of the funding valuation.

b) Salary growth

Pay for public sector employees is currently subject to restriction by the UK Government until 2016. Although this "pay freeze" does not officially apply to local government and associated employers, it has been suggested that they are likely to show similar restraint in respect of pay awards. Based on long term historical analysis of the membership in LGPS funds, the salary increase assumption at the 2013 valuation has been set to 0.5% above the retail prices index (RPI) per annum. This is a change from the previous valuation, which assumed a two year restriction at 1% per annum followed by longer term growth at RPI plus 1.5% per annum.

c) Pension increases

Since 2011 the consumer prices index (CPI), rather than RPI, has been the basis for increases to public sector pensions in deferment and in payment. This change was allowed for in the valuation calculations as at 31 March 2010. Note that the basis of such increases is set by the Government, and is not under the control of the Fund or any employers.

As at the previous valuation, we derive our assumption for RPI from market data as the difference between the yield on long-dated fixed interest and index-linked government bonds. This is then reduced to arrive at the CPI assumption, to allow for the "formula effect" of the difference between RPI and CPI. At this valuation, we propose a reduction of 0.8% per annum. This is a larger reduction than at 2010, which will serve to reduce the value placed on the Fund's liabilities (all other things being equal).

d) Life expectancy

The demographic assumptions are intended to be best estimates of future experience in the Fund based on past experience of LGPS funds which participate in Club Vita, the longevity analytics service used by the Fund, and endorsed by the actuary.

The longevity assumptions that have been adopted at this valuation are a bespoke set of "VitaCurves", produced by the Club Vita's detailed analysis, which are specifically tailored to fit the membership profile of the Fund. These curves are based on the data provided by the Fund for the purposes of this valuation.

It is acknowledged that future life expectancy and, in particular, the allowance for future improvements in life expectancy, is uncertain. There is a consensus amongst actuaries, demographers and medical experts that life expectancy is likely to improve in the future. Allowance has been made in the ongoing valuation basis for future improvements in line with "medium cohort" and a 1.25% per annum minimum underpin to future reductions in mortality rates. This is a higher allowance for future improvements than was made in 2010.

The combined effect of the above changes from the 2010 valuation approach, is to add around a year of life expectancy on average. The approach taken is considered reasonable in light of the long term nature of the Fund and the assumed level of security underpinning members' benefits.

e) General

The same financial assumptions are adopted for all employers, in deriving the past service deficit and the future service rate: as described in (3.3), these calculated figures are translated in different ways into employer contributions, depending on the employer's circumstances.

The demographic assumptions, in particular the life expectancy assumption, in effect vary by type of member and so reflect the different membership profiles of employers.

Appendix F - Glossary

Actuarial assumptions/basis

The combined set of assumptions made by the actuary, regarding the future, to calculate the value of **liabilities**. The main assumptions will relate to the **discount rate**, salary growth, pension increases and longevity. More prudent assumptions will give a higher liability value, whereas more optimistic assumptions will give a lower value.

Administering Authority

The council with statutory responsibility for running the Fund, in effect the Fund's "trustees".

Admission Bodies

Employers which voluntarily participate in the Fund, so that their employees and exemployees are **members**. There will be an Admission Agreement setting out the employer's obligations. For more details (see 2.5).

Common contribution rate

The Fund-wide **future service rate** plus **past service adjustment**. It should be noted that this will differ from the actual contributions payable by individual **employers**.

Covenant

The assessed financial strength of the employer. A strong covenant indicates a greater ability (and willingness) to pay for pension obligations in the long run. A weaker covenant means that it appears that the employer may have difficulties meeting its pension obligations in full over the longer term.

Deficit

The shortfall between the assets value and the **liabilities** value. This relates to assets and liabilities built up to date, and ignores the future build-up of pension (which in effect is assumed to be met by future contributions).

Deficit repair/recovery period

The target length of time over which the current **deficit** is intended to be paid off. A shorter period will give rise to a higher annual **past service adjustment** (deficit repair contribution), and vice versa.

Designating Employer Employers such as town and parish councils that are able to participate in the LGPS via resolution. These employers can designate which of their employees are eligible to join the Fund.

Discount rate

The annual rate at which future assumed cashflows (in and out of the Fund) are discounted to the present day. This is necessary to provide a **liabilities** value which is consistent with the present day value of the assets, to calculate the **deficit**. A lower discount rate gives a higher liabilities value, and vice versa. It is similarly used in the calculation of the **future service rate** and the **common contribution rate**.

Employer

An individual participating body in the Fund, which employs (or used to employ) **members** of the Fund. Normally the assets and **liabilities** values for each employer are individually tracked, together with its **future service rate** at each **valuation**.

Funding level

The ratio of assets value to liabilities value: for further details (see 2.2).

Future service rate

The actuarially calculated cost of each year's build-up of pension by the current active **members**, excluding members' contributions but including Fund

administrative expenses. This is calculated using a chosen set of **actuarial assumptions**.

Gilt

A UK Government bond, ie a promise by the Government to pay interest and capital as per the terms of that particular gilt, in return for an initial payment of capital by the purchaser. Gilts can be "fixed interest", where the interest payments are level throughout the gilt's term, or "index-linked" where the interest payments vary each year in line with a specified index (usually RPI). Gilts can be bought as assets by the Fund, but their main use in funding is as an objective measure of solvency.

Guarantee / guarantor

A formal promise by a third party (the guarantor) that it will meet any pension obligations not met by a specified employer. The presence of a guarantor will mean, for instance, that the Fund can consider the employer's **covenant** to be as strong as its guarantor's.

Letting employer

An employer which outsources or transfers a part of its services and workforce to another employer (usually a contractor). The contractor will pay towards the LGPS benefits accrued by the transferring members, but ultimately the obligation to pay for these benefits will revert to the letting employer. A letting employer will usually be a local authority, but can sometimes be another type of employer such as an Academy.

Liabilities

The actuarially calculated present value of all pension entitlements of all **members** of the Fund, built up to date. This is compared with the present market value of Fund assets to derive the **deficit**. It is calculated on a chosen set of **actuarial assumptions**.

LGPS

The Local Government Pension Scheme, a public sector pension arrangement put in place via Government Regulations, for workers in local government. These Regulations also dictate eligibility (particularly for Scheduled Bodies), members' contribution rates, benefit calculations and certain governance requirements. The LGPS is divided into 101 Funds which map the UK. Each LGPS Fund is autonomous to the extent not dictated by Regulations, e.g. regarding investment strategy, employer contributions and choice of advisers.

Maturity

A general term to describe a Fund (or an employer's position within a Fund) where the members are closer to retirement (or more of them already retired) and the investment time horizon is shorter. This has implications for investment strategy and, consequently, funding strategy.

Members

The individuals who have built up (and may still be building up) entitlement in the Fund. They are divided into actives (current employee members), deferreds (exemployees who have not yet retired) and pensioners (exemployees who have now retired, and dependants of deceased exemployees).

Past service adjustment

The part of the employer's annual contribution which relates to past service **deficit** repair.

Pooling

Employers may be grouped together for the purpose of calculating contribution rates, so that their combined membership and asset shares are used to calculate a single contribution rate applicable to all employers in the pool. A pool may still

require each individual employer to ultimately pay for its own share of **deficit**, or (if formally agreed) it may allow **deficits** to be passed from one employer to another. For further details of the Fund's current pooling policy (see 3.4).

Profile

The profile of an employer's membership or liability reflects various measurements of that employer's **members**, ie current and former employees. This includes: the proportions which are active, deferred or pensioner; the average ages of each category; the varying salary or pension levels; the lengths of service of active members vs their salary levels, etc. A membership (or liability) profile might be measured for its **maturity** also.

Rates and Adjustments Certificate

A formal document required by the LGPS Regulations, which must be updated at least every three years at the conclusion of the formal **valuation**. This is completed by the actuary and confirms the contributions to be paid by each employer (or pool of employers) in the Fund for the three year period until the next valuation is completed.

Scheduled Bodies

Types of employer explicitly defined in the LGPS Regulations, whose employers must be offered membership of their local LGPS Fund. These include Councils, colleges, universities, academies, police and fire authorities etc, other than employees who have entitlement to a different public sector pension scheme (e.g. teachers, police and fire officers, university lecturers).

Solvency

In a funding context, this usually refers to a 100% **funding level**, ie where the assets value equals the **liabilities** value.

Stabilisation

Any method used to smooth out changes in employer contributions from one year to the next. This is very broadly required by the LGPS Regulations, but in practice is particularly employed for large stable employers in the Fund. Different methods may involve: probability-based modelling of future market movements; longer deficit recovery periods; higher discount rates; or some combination of these.

Theoretical contribution rate

The employer's contribution rate, including both **future service rate** and **past service adjustment**, which would be calculated on the standard **actuarial basis**, before any allowance for **stabilisation** or other agreed adjustment.

Valuation

An actuarial investigation to calculate the liabilities, future service contribution rate and common contribution rate for a Fund, and usually individual employers too. This is normally carried out in full every three years (last done as at 31 March 2013), but can be approximately updated at other times. The assets value is based on market values at the valuation date, and the liabilities value and contribution rates are based on long term bond market yields at that date also.

1. INTRODUCTION

- 1.1 The Local Government Pension Scheme (Management and Investment of Funds) Regulations 2009 (the Regulations) require Lincolnshire County Council, acting as administering authority to the Lincolnshire Pension Fund, to prepare and publish a Statement of Investment Principles (SIP) to describe the key issues that govern the investment of Pension Fund money.
- **1.2** The SIP is published on the Pension Fund's shared website at www.wypf.org.uk.
- 1.3 The Pensions Committee (the Committee) act with the delegated authority of Lincolnshire County Council, and consists of eight County Councillors, one District Council representative, one non Local Authority employer representative and one employee representative. All members of the Committee have full voting rights. The Committee meet at least quarterly.
- 1.4 Investments are monitored on a regular basis by the Committee, supported by advice from Executive Director of Finance and Public Protection and professional advisers as required.
- 1.5 The Committee has agreed a long term strategic asset allocation benchmark, reflecting the outcome of the Asset Liability Modelling following the Triennial Actuarial Valuation of the Fund. This is reviewed every three years, after each Valuation.
- **1.6** The Committee are responsible for the ongoing monitoring and review of all investments, service providers and Fund administration.
- 1.7 The SIP is reviewed annually and revised if necessary. In accordance with the Local Government Pension Scheme (Management and Investment of Funds) Regulations 2009, the SIP will be updated within six months from the date of any material change in the information detailed in this document.

2 FUND OBJECTIVES

2.1 Primary Objective

The primary objective of the Fund is to ensure that that there are sufficient resources available to pay current pensions and to build up assets to provide adequate security to make future pension payments.

As required by the Regulations, an Actuary conducts a triennial valuation to assess to what extent the Fund's assets match its pension obligations and then determines appropriate levels of contributions for the various employers participating in the Scheme.

2.2 Funding Objective

The Pension Fund, in collaboration with the Fund's Actuary, has produced a Funding Strategy Statement (FSS) which is published on the Pension Fund's shared website at www.wypf.org.uk, or is available in hard copy by request (see contact details on page 7).

The purpose of the Funding Strategy Statement is:

- to establish a clear and transparent fund-specific strategy which will identify how employers' pension liabilities are best met going forward;
- to support the regulatory framework to maintain as nearly constant employer contribution rates as possible; and
- to take a prudent longer-term view of funding those liabilities.

The FSS sets out how the Administering Authority has balanced the conflicting aims of affordability of contributions, transparency of processes, stability of employers' contributions, and prudence in the funding basis. The FSS is reviewed every three years alongside the Actuarial Valuation.

3 INVESTMENT OBJECTIVES

The Fund's investment objective is to achieve a level of return from the assets that will, as a minimum, meet the investment return assumptions made by the Actuary in the triennial valuation. In order to achieve this long term objective, the following has been agreed by the Pensions Committee.

3.1 Investment Policy

The Committee will ensure that one or more investment managers are appointed to manage and invest Fund money, and that they are authorised under the Local Government Pension Scheme (Management and Investment of Funds) Regulations 2009.

The Committee, after seeking appropriate advice, will formulate a policy for investment, called the strategic benchmark, and in doing so consider the variety and suitability of investments. The Fund's strategic benchmark is shown in appendix A. The Fund has an objective to achieve a return of 1% above the return of the strategic benchmark, per annum, over the long term. This objective is being reviewed, given the changes in asset allocation over the last few years.

3.2 Investment Managers

The Managers appointed to manage the Fund's assets are detailed in appendix B. A management agreement is in place for each specialist mandate, detailing performance targets and benchmarks.

3.3 Custody and Stock-Lending

The Fund has appointed JPMorgan as Global Custodian for all listed assets. The Custodian is responsible for the safekeeping of the Fund's assets.

The Fund participates in a collateralised stock-lending programme managed by the Custodian. This is restricted to an overall limit of £220 million and an individual counterparty limit of £33 million, within the 25% maximum allowed in the Regulations.

3.4 Allowable Investments

All investments made by the Fund are in accordance with those permitted under the Regulations. These include equities, bonds, property and a range of alternative investments including private equity. The types of investments held by the current managers are detailed in appendix B.

3.5 Balance Between Types of Investment

The overall strategy of the Fund, to produce the Strategic Benchmark, is reviewed every three years alongside the Actuarial Valuation. An asset liability study was undertaken following the 2013 Valuation.

The study addresses the long term strategy for the Fund, taking into consideration the liability profile of the Fund, the current solvency level and the risk tolerance of the Committee.

All recommendations of changes to the Strategic Benchmark are agreed by the Pensions Committee, before being implemented over an agreed period of time.

3.6 Risk

The Pensions Committee's appetite for risk is factored into the Asset Liability Study mentioned above, and the overall acceptable level of risk for the Fund is used to allocate funds between different asset classes.

Each asset class, and within that each manager, operates within a tolerance range to ensure that the Fund does not deviate too far from the agreed Strategic Benchmark, whilst allowing for a degree of flexibility.

The appointment of more than one manager diversifies the manager risk within asset classes, and each manager is expected to maintain a degree of diversification within their investment portfolio. This is monitored by the Pensions Committee.

3.7 Expected Returns

The Strategic Benchmark is expected to produce a return in excess of the investment return assumed in the Actuarial Valuation, over the longer term. The assumptions used in the latest Valuation are shown in appendix C. Individual manager performance against benchmark and target, as well as the overall return to the Fund, is regularly monitored by the Pensions Committee.

3.8 Realisation of Investments

The Pension Fund is currently cash positive, in that it has excess cash paid into the Fund each month from contributions and investment income after all pensions are paid. The Fund expects to be cash positive for the short to medium term.

The majority of the Fund's investments are quoted on major stock markets and can be realised quickly, in normal market conditions, if required. More illiquid investments, such as property and private equity make up a smaller proportion of the Fund. The mix of liquid and illiquid investments is one consideration in preparing the Strategic Benchmark.

4 ADDITIONAL VOLUNTARY CONTRIBUTIONS (AVC'S)

All local government pension funds have an in-house AVC scheme where scheme members can invest money, deducted directly from salaries, through an AVC provider. The Fund has appointed Prudential to act as its' provider and a comprehensive range of investment funds is offered.

Information about AVC's is available on the Pension Fund's shared website at www.wypg.org.uk.

5 PENSION FUND CASH

There are two aspects to cash management within the Pension Fund:

5.1 Cash Held in the Pension Bank Account

The cash held in the Pension Fund Bank account is managed by the Lincolnshire County Council (LCC) Treasury Team. This cash is managed in accordance with the LCC Treasury Management Strategy. A Service Level Agreement is in place between the Pension Fund and LCC detailing how risk and return are apportioned.

5.2 Cash Held in the Custodian Bank Accounts

Each investment manager in the Fund with a segregated account will have a number of bank accounts (of various currencies) with the Fund's Custodian. Cash held in these accounts is either frictional, and arises due to timing issues

of purchases, sales or income received; or as a strategic decision by the investment manager. Maximum cash limits are agreed with managers in their Investment Management Agreements, and managers have the discretion as to how this cash is dealt with. Other cash is held by the Custodian to fund investment draw-downs (e.g. for property investments), or currency hedging outflows.

Cash balances at the Custodian are monitored daily.

6 OTHER ISSUES

6.1 Corporate Governance

The Pensions Committee agree that the adoption of good practise in Corporate Governance will improve the management of companies and thereby increase long term shareholder value.

The Fund votes on all UK, developed Europe, US, Canada and Japanese company holdings. Votes are filed via a third party agent, Manifest Voting Agency, in accordance with a template agreed by the Pensions Committee. The votes cast are reported to the Pensions Committee on a quarterly basis, and this information is available on the Lincolnshire County Council website in the relevant Committee documents.

The Fund is also a member of the Local Authority Pension Fund Forum (LAPFF), which is a voluntary organisation of 64 public sector Pension Funds based in the UK. LAPFF exists to promote the investment interests of Local Authority Pension Funds, and to maximise their influence as shareholders in promoting corporate social responsibility and high standards of corporate governance in the companies in which they invest.

The Fund has produced a Stewardship Code statement (available on the Pension Fund website) in compliance with the Financial Reporting Council's Stewardship code, and encourages its external managers and service providers to produce their own codes.

6.2 Socially Responsible Investing

Whilst the Fund does not have an explicit policy on socially responsible investing (SRI), most of the fund is managed externally by managers who incorporate a strategic commitment to SRI. Their decision-making process on investments takes into account social, ethical, environmental and governance issues because, as investors, they seek strong, sustainable companies with good all-round credentials. Many of these managers are signed up to the UN Principles of Responsible Investment (PRI), which provides a framework for investors to consider environmental, social and corporate governance issues.

6.3 Compliance with the Myners Principles

The Myners report on Institutional Investment in the UK was published in 2001, and included ten principles of good investment practice. The Local Government (management and Investment of Funds) (Amendment) Regulations 2002 required administering authorities to publish the extent to which they complied with these principles.

In 2007, a review was conducted to assess the progress made throughout the pensions industry since the introduction of the Myners principles in 2001. The outcome of this review was reported by the Treasury in 2008, and the ten principles were updated to reflect the findings.

The outcome was a set of six principles, which have been modified in the context of the LGPS, to replace the original ten principles. The Local Government Pension Scheme (Management and Investment of Funds) Regulations 2009 require the administering authority to publish the extent to which they comply with these six principles. This is shown at appendix D.

APPENDIX A - STRATEGIC BENCHMARK

| Asset Class | Manager Allocation % | Asset Class Strategic Benchmark % |
|--|----------------------------------|--|
| UK Equities | | 20.0 |
| Passive - Internally Managed | 20.0 | |
| Global Equities | | 40.0 |
| Enhanced Passive ex. UK- Invesco Active - Neptune Active - Schroders Active - Threadneedle Active - Morgan Stanley | 20.0 5.0 5.0 5.0 5.0 | |
| Property | | 11.5 |
| Bonds | | 13.5 |
| Passive – Blackrock Absolute Return - Goodhart | 6.75 6.75 | |
| Alternatives | | 15.0 |
| Absolute Return - Morgan Stanley | 15.0 | |

The Fund has an active currency overlay programme in place with two managers, Record Currency Management and HSBC Trinkaus & Burkhardt, for the Invesco Enhanced Index Global ex UK Equities mandate.

Passive means trying to match the return of a specified index.

Enhanced Passive means trying to outperform an index by a small amount.

Active means trying to outperform an index by a considerable amount, with perhaps little or no regard to the index.

Absolute return means trying to provide a positive return over and above a cash return.

APPENDIX B - INVESTMENT MANAGER ARRANGEMENTS AND OTHER SERVICE PROVIDERS

| Manager | Asset Class | Index | Mandate | Relative Targets against index (3yr rolling basis before fees)* | Fee basis |
|----------------------------------|----------------------------|--|---------------------|--|---------------------------------|
| Internal Team | UK Equities | MSCI UK IMI | Passive | +/- 0.5% p.a. | In-house |
| Invesco | Global ex UK Equities | MSCI World ex UK | Enhanced Passive | +1% p.a. | % of assets and performance fee |
| Neptune | Global Equities | MSCI AC World | Active | +2% to +4% p.a. | % of assets and performance fee |
| Schroders | Global Equities | MSCI AC World | Active | +2% to +4% p.a. | % of assets and performance fee |
| Threadneedle | Global Equities | MSCI AC World | Active | +2% p.a. | % of assets |
| Morgan Stanley | Global Equities | MSCI World | Active | n/a* | % of assets |
| Blackrock | Bonds | 50% iBoxx Sterling Non Gilt 30% FTS Govt IL > 5yr 20% JPM GBI Global ex UK | Passive | 0% p.a. | % of assets |
| Goodhart | Bonds | 3mth LIBOR | Absolute Return | +3% p.a. | % of assets and performance fee |
| Various Unit Trusts | Property | IPD | Active | Fund specific | % of assets |
| Various Funds / Fund of Funds | Specialist Property | Fund specific | Active | Fund specific | % of assets |
| Morgan Stanley | Alternative Investments | 3mth LIBOR | Absolute Return | +4% p.a. | % of assets and performance fee |

^{* -} The Morgan Stanley Global Franchise strategy seeks to generate attractive long term returns by investing in high quality franchises characterised by dominant intangible assets, high barriers to entry and strong free cash flow generation. To achieve this objective, the investment process focuses on minimising the absolute risks associated with the portfolio holdings. Whilst the portfolio construction process is benchmark agnostic, the strategy is expected to outperform broadly based benchmarks such as the MSCI World Index over a full market cycle with less than average absolute volatility.

OTHER SERVICE PROVIDERS

| Service Provider | Mandate | Fee Basis |
|---|--|--|
| Currency Overlay Record Currency Managers HSBC Trinkaus & Burkhardt | Manage the currency risk for a specific Global equity portfolio, to return 1% p.a. on a rolling three-year basis | % of assets |
| Custodian JP Morgan | Custody of all listed assets | Fee based in part on fixed rates per transaction and in part by percentage of assets |
| Investment Consultant Hymans Robertson | Investment advice to Pensions Committee | Indexed rates for specific types of work |
| Actuary Hymans Robertson | Actuarial advice | Indexed rates for specific types of work |
| Voting Adviser Manifest | Advice and vote processing for UK, developed Europe, US, Canada and Japan listed equities | Indexed fixed fee |

APPENDIX C - ACTUARIAL ASSUMPTIONS (2013 VALUATION)

| Assumption | Derivation | Rate at 31 | March 2013 |
|--------------------------------|--|------------|------------|
| | | Nominal | Real |
| Price Inflation (CPI) | Market expectation of long term future inflation as measured by the difference between yields on fixed and indexlinked Government bonds as at the valuation date | 2.5% | - |
| Pay increases | Assumed to be 2% p.a. in excess of price inflation | 3.8% | 1.3% |
| "Gilt-based" discount rate | The yield on fixed interest (nominal) and index-linked (real) Government bonds | 3.0% | 0.5% |
| Funding basis discount rate | Assumed to be 1.6% p.a. above the yield on fixed interest Government bonds | 4.6% | 2.1% |

APPENDIX D – COMPLIANCE WITH THE SIX MYNERS PRINCIPLES OF GOOD INVESTMENT PRACTISE

| | Principle | Compliance Statement |
|---|---|---|
| 1 | EFFECTIVE DECISION MAKING | |
| | Administering authorities should ensure that: • Decisions are taken by persons or organisations with the skills, knowledge, advice and resources necessary to make them effectively and monitor their implementation; and | The Pensions Committee of the County Council is delegated with the responsibility for determining the Pension Fund's investment policy, appointing and reviewing managers and advisers, and for considering any other matters relevant to the Fund's management. |
| | implementation; and Those persons or organisations have sufficient expertise to be able to evaluate and challenge the advice they receive, and manage conflicts of interest. | The Pensions Committee makes decisions after advice from one or more of the Executive Director of Finance and Public Protection, the Fund Actuary and the Independent Advisor. |
| | | Committee members are encouraged to attend the LGE Fundamentals training course, and are invited to the LGE Annual Conference, to keep up-to date with developments in the Local Government pension world. |
| | | An annual training plan is agreed by the Pensions Committee, setting out what training will be covered over the coming year and relating it back to the CIPFA Pension Finance Knowledge and Skills Frameworks. Knowledge and skills are acquired and maintained through the regular Pensions Committees, as well as through additional training sessions targeting specific areas and attendance at seminars and conferences. |
| 2 | CLEAR OBJECTIVES | |
| | An overall investment objective should be set out for the fund that takes account of the scheme's liabilities, the potential impact on local tax payers, the strength of the covenant for non-local authority employers, and the attitude to risk of both the administering authority and scheme employers, and these should be | The overall objective for the Fund is to achieve a return of 1% (currently being reviewed) above the return of the strategic benchmark, per annum, over the long term. The Pension Fund is seeking to ensure that there are sufficient resources available to pay current pensions and to build up assets |

clearly communicated to advisors and investment managers.

to provide adequate security to make future pension payments.

This is done whilst considering the affordability and sustainability of contributions, both from the employer and the employee, and is achieved by regular actuarial valuations and Asset Liability Modelling.

The Fund's Funding Strategy Statement can be found on the Pension Fund's shared website at www.wypf.org.uk.

3 RISK AND LIABILITIES

In setting and reviewing their investment strategy, administering authorities should take account of the form and structure of liabilities.

These include the implications for the local tax payers, the strength of the covenant for participating employers, the risk of their default and longevity risk.

The Fund's actuary undertakes a triennial valuation of the Fund, measuring the gap between the Fund's assets and its' liabilities. Interim valuations are also prepared for the larger employers in the Fund.

Following each triennial valuation, the Fund's consultant undertakes Asset Liability Modelling to ensure that the investment strategy is fit for purpose.

The Fund is a member of Hymans Robertson's Club Vita, which looks at the longevity risk specific to the Lincolnshire Fund.

4 PERFORMANCE ASSESSMENT

Arrangements should be in place for the formal measurement of performance of the investments, investment managers and advisors.

Administering authorities should also periodically make a formal assessment of their own effectiveness as a decision-making body and report on this to scheme members.

All investment managers are measured against specific targets, which are based on the Fund's bespoke strategic benchmark.

Fund and individual investment manager performance is reported to the Pensions Committee on a monthly and quarterly basis. Investment managers report in person to the Pensions Committee at least once every year. Officers from the Investment Team regularly discuss performance with all investment managers, and meet with them at least once every year.

The results from an independent performance measurement company are reported quarterly and annually to the Pensions Committee.

The Pensions Committee formally reviews the strategic asset allocation on a triennial basis, as a minimum.

5 RESPONSIBLE OWNER

Administering authorities should:

- Adopt, or ensure their investment managers adopt, the Institutional Shareholders' Committee Statement of Principles on the responsibilities of shareholders and agents
- Include a statement of their policy on responsible ownership in the statement of investment principles
- Report periodically to scheme members on the discharge of such responsibilities.

The Fund's position on Corporate Governance and Socially Responsible Investment (SRI) is set out in the SIP.

The Fund has appointed Manifest Voting Agency to undertake voting services. All votes are cast in accordance with a template agreed by the Pensions Committee, and voting is reported quarterly to the Committee.

The Fund has signed up to the Financial Reporting Council's Stewardship code, and a statement is on the Fund's website.

The individual fund managers' decision-making process on investments takes into account social, ethical, environmental and governance issues because, as investors, they seek strong, sustainable companies. Many of our managers are signed up to the UN Principles of Responsible Investment (PRI), which provides a framework for investors to consider environmental, social and corporate governance issues.

6 TRANSPARENCY AND REPORTING

Administering authorities should:

- Act in a transparent manner, communicating with stakeholders on issues relating to their management of investments, its governance and risks, including performance against stated objectives
- Provide regular communication to scheme members in the form they consider most appropriate.

The Fund's Governance Policy and Compliance Statement, Communication Policy Statement and Stewardship Code Statement can be found on the Pension Fund's shared website at www.wypf.org.uk.

The Lincolnshire Fund has an Employer's Forum, to ensure that all employers can be updated with the issues concerning the Fund, and can feedback ideas to the Fund.

| This meets twice a year, and an annual employer meeting is also held. |
|--|
| The Fund produces an Annual Report and Accounts, which can also be found on the Pension Fund's shared website at www.wypf.org.uk . |
| The Fund communicates regularly to all scheme members. The Communication Policy detailing scheduled communication can be found on the Pension Fund's shared website at www.wypf.org.uk . |

COMMUNICATION POLICY STATEMENT

LINCOLNSHIRE COUNTY COUNCIL

LOCAL GOVERNMENT PENSION SCHEME

Lincolnshire County Council, as administering authority for the Local Government Pension Scheme, is required by statute to publish a communications policy statement. The Fund communicates with over 180 employers and over 65,000 scheme members, in addition to a large number of other interested parties.

The Regulations governing the Local Government Pension Scheme are laid before parliament by the Department of Communities and Local Government. One of the key requirements they make on all Administering Authorities is to prepare, maintain and publish a written statement setting out the information below:-

- a) The Fund must now prepare, maintain and publish a written statement setting out its policy concerning communications with
 - members;
 - representatives of members;
 - prospective members; and
 - employing authorities.
- b) In particular, the statement must set out the Fund's policy on
 - i. the provision of information and publicity about the Scheme to members, representatives of members and employing authorities (including non-Scheme Employers);
 - ii. the format, frequency and method of distributing such information or publicity; and
 - iii. the promotion of the Scheme to prospective members and their employing authorities.

The day-to-day administration of the Local Government Pension Scheme is carried out on behalf of the County Council by West Yorkshire Pension Fund (WYPF), in a shared service arrangement. Communication material is produced by WYPF in collaboration with the Pensions Team in Lincolnshire. All arrangements for forums, workshops and meetings covered within this statement are made in partnership with WYPF.

The Fund communicates with all stakeholders, as defined in specific legislation, and listed above.

Communication is increasingly distributed via electronic means, with all documents available on a dedicated Pensions website (www.wypf.org.uk).

WYPF provide a dedicated enquiry phone number (01274 434999) and email address (wypf@bradford.gov.uk) for pension related enquiries. The appropriately qualified staff from the County Council, WYPF or external advisers will deliver presentations to groups of stakeholders and conduct individual meetings.

The Fund's objective in respect of communication is to comply with relevant legislation and ensure relevant individuals and employers receive accurate and timely information about their pension arrangements. Methods of communication are set out in the table below.

Communications events 2015 - 2016 - Scheme Members

| Communication | Format | Frequency | Method of Distribution |

Reviewed 16th July 2015 by the Pensions Committee

GOVERNANCE POLICY AND COMPLIANCE STATEMENT

LINCOLNSHIRE COUNTY COUNCIL

LOCAL GOVERNMENT PENSION SCHEME

Lincolnshire County Council, as administering authority (and Scheme Manager) for the Local Government Pension Scheme, is required by statute to publish a governance compliance statement. The Council has elected to do this by publishing a concise Governance Policy Statement and then to outline, as required by legislation, the extent to which that statement and the underlying practices demonstrate compliance with best practice guidance as published by the Department for Communities and Local Government. This latter aspect constitutes the Governance Compliance Statement.

The Governance Policy and Compliance Statements are set out in turn below.

GOVERNANCE POLICY STATEMENT

The County Council has delegated its pension fund administering authority functions to a Pensions Committee and the Executive Director of Finance and Public Protection. The Public Service Pensions Act (2013) required all administering authorities to introduce a local Pension Board to assist the Scheme Manager.

Pensions Committee

The Pensions Committee has 11 members in total, 8 of which are County Councillors and 3 co-opted members. All the members have full voting rights.

The 8 County Councillors represent the political balance of the Council.

The 3 co-opted members comprise:

- 1 representative from the other local authorities within the County,
- 1 representative for non Local Authority employers, and
- 1 Trade Union representative, reflecting the interests of scheme members.

Under the County Council's Constitution, the Pensions Committee exercises the following functions, to;

- set investment policies for the Fund, including the establishment and maintenance of a strategic benchmark for asset allocation, drawing upon appropriate professional advice,
- appoint and review the performance of all Fund Managers and associated professional service providers,

- approve the Annual Report and Statement of Accounts of the Fund,
- consider any other matters relevant to the operation and management of the fund, and
- respond to any relevant consultation impacting upon the Local Government Pension Scheme.

The Pensions Committee has four regular meetings, two manager monitoring meetings and two training meetings each year. In addition, one or more special meetings may be held to appoint new investment managers or other professional advisers.

The Pensions Committee's regular quarterly meetings are open to the public and agendas, reports and minutes are made available through the County Council's website. An annual report on the management of the fund is provided to all scheme employers with an abbreviated version distributed to scheme members.

Executive Director of Finance and Public Protection

The Executive Director of Finance and Public Protection is responsible for the dayto-day administration of the benefits and assets of the pension scheme, specifically to:

- authorise payment of statutory pensions and allowances,
- undertake or arrange for all necessary transactions associated with the management of the assets of the Pension Fund, and
- to agree appropriate means of securing external representation on the Pensions Committee, in consultation with relevant external bodies.

Lincolnshire Pension Board

The Lincolnshire Pension Board will ensure the Scheme Manager effectively and efficiently complies with the Code of Practice on the governance and administration of public service pension schemes issued by the Pensions Regulator. The Board will also ensure that it complies with the knowledge and understanding requirements in the Pensions Regulator's Code of Practice.

In addition to the local structure, the Lincolnshire Pension Board is accountable to the Pensions Regulator and the National Scheme Advisory Board.

The Pensions Regulator will also be a point of escalation for whistle blowing or similar issues (supplementary to the whistle blowing policy and anti- fraud and corruption policy operated by the administering authority, which operate to include all of the functions of the Council and its advisers).

The role of the Lincolnshire Pension Board is set out below:

- Assist Lincolnshire County Council as Scheme Manager;
- To secure compliance with the scheme regulations and other legislation relating to the governance and administration of the scheme and any statutory pension scheme that is connected with it;
- To secure compliance with requirements imposed in relation to the scheme and any connected scheme by the Pensions Regulator; and
- In such other matters as the scheme regulations may specify.

The terms of reference for the Board are available on the Funds shared website with WYPF at www.wypf.org.uk.

The Lincolnshire Pension Board consists of five members:

- two employer representatives (to represent all employers within the Scheme)
- two scheme members representatives (to represent all members of the Scheme (active, deferred and pensioner))
- an independent member (to act as Chairman)

The employer and scheme member representatives can vote. The Independent Chairman cannot vote.

The Lincolnshire Pension Board has a minimum of four meetings each year. In addition, Board members must attend regular training events.

The Lincolnshire Pension Board meetings are open to the public and agendas, reports and minutes are made available through the Funds shared website with WYPF at www.wypf.org.uk. An annual report on the work of the Board is included in the Fund's annual report, which is published on the Council's website and provided to all scheme employers with an abbreviated version distributed to scheme members.

Any complaint or allegation of breach of due process brought to the attention of the Lincolnshire Pension Board shall be dealt with in accordance with the Code of Practice as published by the Pensions Regulator.

Any questions about the governance of the Lincolnshire Local Government Pension Fund should be addressed to Jo Ray, Pensions & Treasury Manager, Finance and Asset Management. <u>Jo.ray@lincolnshire.gov.uk</u>, telephone 01522 553656.

GOVERNANCE COMPLIANCE STATEMENT

| Principle | | Full Compliance | Comments |
|--------------------|--|--------------------|---|
| A - Structure | a. The management of the administration of benefits and strategic management of fund assets clearly rests with the main committee established by the appointing council. | Yes | See terms of reference for the Pensions Committee in the Policy Statement above. |
| | b. That representatives of participating LGPS employers, admitted bodies and scheme members (including pensioner and deferred members) are members of either the main or secondary committee established to underpin the work of the main committee. | Partial | The Council has not, to date, seen the need to establish a secondary committee/panel. It will, however, keep this aspect under review and does establish working groups from the Committee to deal with specific issues. Pensioner and deferred beneficiaries are not presently represented directly on the Committee – see B a. below. |
| | c. That where a secondary committee or panel has been established, the structure ensures effective communication across both levels. | Not Relevant | As discussed above, no such forum has been established as yet. |
| | d. That where a secondary committee or panel has been established, at least one seat on the main committee is allocated for a member from the secondary committee or panel. | Not Relevant | As discussed above, no such forum has been established as yet. |
| B - Representation | a. That all key stakeholders are afforded the opportunity to be represented within the main or secondary committee | Partial | The Committee has 11 members, all with voting rights, of which 8 are County Council Councillors. Other members |

| | structure. These include:- Employing authorities (including non-scheme employers, e.g. admitted bodies); Scheme members (including deferred and pensioner scheme members), Where appropriate, Independent professional observers, and Expert advisors (on an ad hoc basis) | | include one representing other local authorities (district councils) and one representing small scheduled bodies, currently from an Internal Drainage Board. Member related issues are dealt with by having a trade union representative on the Committee. Given the statutory guarantee that exists in respect of member benefits, this is felt to be sufficient representation. The Council will review this aspect periodically. The Committee have appointed an independent investment advisor who attends all Committees. |
|---|--|-----|--|
| | b. That where lay members sit on the main or secondary committee, they are treated equally in terms of access to papers, meetings and training and are given full opportunity to contribute to the decision making process, with or without voting rights. | Yes | All members of the Committee have full voting rights and equal access to information, training, etc. |
| C – Selection and Role of Lay Members | a. That committee or panel members are made fully aware of the status, role and function they are required to perform on either a main or secondary committee. | Yes | Nationally customised training is available to all members and this is supplemented by locally provided induction sessions for new members of the Committee. In addition, the Committee agrees an annual training plan with specific topics covered on set dates. |
| | b. That at the start of any meeting, committee members are invites to declare any financial or pecuniary | Yes | The declaration of member's interests is a standard item on the agenda of the Pensions Committee. |

| | interest related to specific matters on the agenda. | | |
|-------------------------------------|---|-----|--|
| D - Voting | a. That the policy of individual administering authorities on voting rights is clear and transparent, including the justification for not extending voting rights to each body or group represented on main LGPS committees. | Yes | Full voting rights are given to all members of the Committee. |
| E – Training/Facility Time/Expenses | a. That in relation to the way in which statutory and related decisions are taken by the administering authority, there is a clear policy on training, facility time and reimbursement of expenses in respect of members involved in the decision-making process. | Yes | See C a. above. All expenses incurred by members of the Pensions Committee are either met by the body they represent or directly by the Fund itself. |
| | b. That where such a policy exists, it applies equally to all members of committees, sub-committees, advisory panels or any other form of secondary forum. | Yes | All members are treated equally in every respect. |
| | c. That the administering authority considers the adoption of annual training plans for committee members and maintains a log of all such training undertaken. | Yes | The Committee agrees an annual training plan with specific topics covered on set dates. All training undertaken by members of the Pensions Committee is recorded and additional training opportunities are regularly brought to the attention of the Committee, either in monthly update letters or in reports taken to Committee. |

| F – Meetings - Frequency | a. That an administering authority's main committee meet at least quarterly. | Yes | See Compliance Policy Statement above. |
|-----------------------------|--|--------------|--|
| | b. That an administering authority's secondary committee or panel meet at least twice a year and is synchronised with the dates when the main committee sits. | Not Relevant | As discussed above, no such forum has been established as yet. |
| | c. That an administering authority who does not include lay members in their formal governance arrangements, provide a forum outside of those arrangements by which the interests of key stakeholders can be represented. | Not Relevant | Three added members exist and have equal rights with all mainstream members in all respects. |
| G – Access | a. That, subject to any rules in the council's constitution, all members of main and secondary committees or panels have equal access to committee papers, documents and advice that falls to be considered at meetings of the main committee. | Yes | All members are treated equally in every respect. |
| H – Scope | a. That administering authorities have taken steps to bring wider scheme issues within the scope of their governance arrangements. | Partial | The terms of reference of the Pensions Committee were changed a few years ago to include benefit related matters which up until that time had been dealt with elsewhere within the governance arrangements of the Council. At present the Council does not believe |

| | | | there is a strong argument in favour of appointing an independent professional observer on administration/governance issues in addition to the independent advisor already in place in respect of investment matters. |
|---------------|---|-----|---|
| I - Publicity | a. That administering authorities have published details of their governance arrangements in such a way that stakeholders with an interest in the way in which the scheme is governed, can express an interest in wanting to be part of those arrangements. | Yes | The County Council publishes the many governance documents and communicates regularly with employers and scheme members. |
